A. I have seen indications that some of those drawings passed through the hands of Hutchinson. What he did with them, I don't know. But it is not my understanding that he actually inspected those drawings for final approval. As a matter of fact, it would be very improbable that he did inspect all the detailed drawings for final approval. All he would handle would be the general over-all plan.

By Mr. King:

Q. Do I understand you to mean that you found nothing that would indicate whether Hutchinson and his administrative force passed on these drawings or not? [19599] A. To the extent that I have mentioned that some of them passed through their hands, I have seen that.

Q. Will you please turn to transcript page 19,512? A. Yes, sir.

• • •

[19603] By Mr. King:

Q. Mr. Newlands, I refer to the question at line 24, transcript 19,517, where, in effect, you say that commodity price indices are not an accurate measure of the current price of replacement parts for old equipment. I want to know what you consider to be an accurate measurement. A. The actual price of the part itself. The market [19604] price.

Q. Suppose the duplicate of the part is not available. A. Then, I wouldn't attempt to capitalize anything in connection with a debatable item of this sort. That merely compounds a felony.

Q. You mean because there is no duplicate item available, you quit; is that right? A. No. I mean that items of this sort are of debatable worth in any case, as a capital item. That if you haven't got exact figures to indicate what portion should be capitalized, then, no portion should be capitalized.

Q. So your position is that if it should happen that there is not any duplicate of the original part available, you shouldn't capitalize anything; is that right?

• • •

A. I didn't say that. I said that these items are debatable capital items in any case, and that where you cannot have exact figures, you shouldn't attempt to capitalize any portion of them.

By Mr. King:

Q. Mr. Newlands, will you turn to page 50 of the Uniform System of Accounts of the Commission? I direct [19605] your attention to the last three lines of subparagraph 3 on page 50 reading as follows:

> "The excess cost of the replacement over the estimated cost at current prices of replacing without betterment, shall be charged to the appropriate electric plant account."

What do you understand the words "the estimated cost at current prices" to mean? A. That means the cost of replacement, using the actual cost of the old parts, plus the estimated labor cost of replacing, which would be very close to the cost of putting in, of course, the new part. That would be an exceedingly close approximation. It wouldn't correspond to price indices, however.

Q. What if a duplicate part were not available? What would this mean.

• • •

[19606] A. I have already stated my answer to that. I believe that in that case you shouldn't attempt to capitalize any portion of it.

By Mr. King:

Q. Do you think that is what the language I have just quoted you on page 50 of the Uniform System of Accounts means?

• • •

[19607] A. Yes, in my opinion, the estimated cost, under this provision, would have to be based on facts, no such a thing as price indices. And, as I mentioned before, the labor cost of actually replacing the new item would be a good estimate of the cost of replacing the old. But price indices are so far away from actual facts that they do not come under this estimated cost.

By Mr. King:

Q. Do the words "estimated cost" mean to you: facts? A. It means they have to be related to facts, very [19608] closely.

* * *

By Mr. King:

Q. You have examined the K-1 schedules attached to Exhibit 320, have you not, Mr. Newlands? A. Yes, I have looked them over.

Q. Do you know whether there is any labor cost capitalized in the K-1 schedules? A. I wouldn't know unless I examined it again. I didn't examine it with that specifically in mind.

* * *

[19609] Q. Now, I want to find out what is the difference between your idea of maintenance and repair and your idea of betterments.

* * *

A. A betterment would be such an alteration in a machine that it resulted in a substantial change in identity in the machine or the part, resulting in greater capacity, and so forth.

By Mr. King:

Q. Would you mind explaining what you mean by a change in identity? A. I mean that usually the function of the machine would have to be changed to some extent.

Q. The function? A. That is right.

Q. Can you give an example of what you mean? A. Well, adding a topping unit to a steam turbine would be a change of function.

Q. Will you turn to the Uniform System of Accounts of the Federal Power Commission, and find where there is [19610] any reference made to a change in function in connection with betterments?

* * *

[19611] TRIAL EXAMINER: In your testimony on page 19,517, Mr. Witness, did you have in mind the instruction referred to by Respondents' counsel on page 50 of the Uniform System of Accounts?

THE WITNESS: No, I had in mind the actual accounting practices and theory at that time. That is what governs these actions back there.

TRIAL EXAMINER: Where did you find the theory and practices of that time?

THE WITNESS: From my own experience, from accounting textbooks, from talks with other accountants who have done the same type of work.

TRIAL EXAMINER: As of what time are you referring to?

THE WITNESS: As of the time when the transactions on Schedule K-1 took place.

TRIAL EXAMINER: When was that?

THE WITNESS: From about 1924 to 1931, most of them, I believe.

TRIAL EXAMINER: 1924 to 1931?

THE WITNESS: Yes.

[19612] TRIAL EXAMINER: Well, does the instruction on page 50 accord with the accounting practices and principles of that time?

THE WITNESS: To some extent; not entirely. There was considerable variation in the practice, allowable practice, at that time.

TRIAL EXAMINER: What is the Respondents' theory in connection with the cross-examination that is now proceeding with reference specifically to this matter under discussion?

MR. KING: First of all, to show that the witness is clearly wrong in his conclusions, that the items in the

K Schedules represent repair and maintenance. That is his conclusion advanced for the first time in rebuttal and we are entitled to show that that is an erroneous conclusion, and we can't get to that point——

TRIAL EXAMINER: According to what standards?

MR. KING: That is what we are trying to find out. We can't get to that point until we find out this witness' conception.

TRIAL EXAMINER: Well, are you going on the assumption that the standards are contained in the Uniform System of Accounts?

MR. KING: No. Partially. I am asking him what he knows about the Uniform System of Accounts, and I was going [19613] to ask him the question that your Honor has already asked him, whether the accounting practice was different then from what it is now, and, as I understand it, he says no.

TRIAL EXAMINER: I think you had better develop a foundation for this.

MR. KING: I will be glad to.

By MR. KING:

Q. Mr. Newlands, will you turn to page 10 of the Uniform System of Accounts? In the back of the book, under this road and equipment, ICC, Section. Do you have that before you? A. Yes.

Q. What is the date of that, do you know? A. No, I don't.

Q. You have that on page 7, do you not, May 19, 1914?

A. There is an introductory letter on page 7 which is dated May 19, 1914, which apparently concerns this system of accounts.

By Mr. King:

[19614] Q. Page 5 of the Uniform System of Accounts contains the order of the Interstate Commerce Commission adopting these rules, does it not? A. Page 5?

Q. Yes. A. Yes, that is right.

Mr. Goldberg: I wish you would be more specific about saying page 5, because——

Mr. King: Page 5 of the back part of the Uniform System of Accounts, dealing with the ICC classifications.

A. Yes.

Mr. Goldberg: Let's call it Appendix Roman II.

By Mr. King:

Q. That was dated May, 1914; isn't that right? A. That is right; May 19, 1914.

Q. Now, the title of the classification appears at the beginning of the table of contents, does it not? A. What page is that?

Q. Page 1 of the ICC classification. A. Yes, page 1 shows the title of the classification.

Q. And it also says "Issue of 1914", does it not? A. That is right.

Q. Will you again turn to page 10 of the ICC classification, the third paragraph from the bottom, beginning with the word "Betterments." Do you have that before you? [19615] A. Yes.

Q. That states, does it not, Mr. Newlands, "Betterments are improvements of existing facilities through the substitution of superior parts for inferior parts retired" and so forth? That is correct, is it not?

* * *

By Mr. King:

Q. Mr. Newlands, was that a correct accounting provision at the time that you have just mentioned, 1924 to 1931?

* * *

[19616] A. It was an accounting principle authorized by the Interstate Commerce Commission and was correct in that regard. There were, of course, other ideas as to what should be capitalized as betterments—very many different opinions. This is only one.

By Mr. King:

Q. Now, will you turn—you say this is only one? A. That is right.

Q. Name some others that are different from this.

Mr. Goldberg: I object to that, Mr. Examiner.

Trial Examiner: If the witness knows, he may answer.

A. It was a general practice during that period to charge the betterments of the nature listed on K-1 to expense. They occurred because of repair and maintenance. Actually, the machine required repairing.

By Mr. King:

Q. I asked you to refer to some authority, not general practice. Can you refer to any authority? Of any kind? Accounting, legal?

Mr. Goldberg: Right this minute?

Mr. King: Yes.

A. Which gives a different definition of betterments?

By Mr. King:

Q. Yes, than that contained on page 10 of the ICC [19617] classification? A. Yes, I believe Kester probably contains a different definition.

Q. Kester? A. Yes.

Q. Any others? A. I imagine that a great many textbooks written back then would contain a somewhat different definition than this of betterments.

Q. What is the name of the textbook written by Kester that you referred to? A. "Advanced Accounting."

Q. Do you have a copy of the Uniform Classification of Accounts for Electric Companies, prescribed by the Public Service Commission of Pennsylvania, before you? A. Yes, I have a copy.

Q. Effective January 1, 1919? A. Yes.

Q. Do you have that? A. Yes.

Q. Will you turn to page 43, please? A. I have it.

Q. About the sixth paragraph from the top it reads as follows, does it not, Mr. Newlands: "Betterments are physical changes in structures or equipment, the object [19618] of which is to make the structure or equipment affected more useful or of greater capacity than they were at the time of their original installation or acquisition;" is that correct? A. That is correct, and that requires interpretation by the persons who are making the entry.

Q. Do you know whether this rule that we have just discussed, in the Pennsylvania System of Accounts, effective January 1, 1919, was in effect at the time the items in connection with the K Schedules were entered on the books of Penn Water? From 1924 to 1931, I believe is the period. A. Yes, and I believe the entries on the books were made in accordance with this definition. It is a question of managerial judgment.

Q. And that is the basis upon which you have concluded that these items in the K Schedules cannot be corrected; is that correct? A. I decided that the disposition made on the books had been done properly in the exercise of managerial judgment under the system of accounts in effect, and that cannot now be changed.

[19619] Q. Which system of accounts, in effect, are you referring to? A. The Pennsylvania system of accounts, for one.

Q. If they were not done in accordance with the Pennsylvania system of accounts referred to, is it your opinion that the entries could be corrected? A. No, I would say they still could not be corrected because it was a general

practice at the time to handle items of this nature the way the Company did.

Q. In other words, as I understand you, you take the position that even though the uniform system of accounts in effect at the time directs a Company to proceed one way, that if the Company does not proceed in that fashion they still cannot remedy the error? A. That is correct, if your assumption were correct.

Q. Then it is your position that once the entries are made they never can be corrected, under any condition; is that right? A. If they are made in accordance with accepted accounting practice they cannot be corrected later. That is correct.

Q. And there can be accepted accounting practices contrary to the provisions of the uniform system of accounts, under which a Company operates; is that correct? A. There can be, and a great many times the Public [19620] Service Commissions allow those entries, even though they are in contrast with what the uniform system of accounts says.

Q. Mr. Newlands, a little while back you described betterments as resulting in a functional change of a particular item. Does the word "functional" appear either in the ICC classification, attached to the FPC system of accounts, or in the uniform system of accounts effective January 1, 1919, of the Pennsylvania Commission?

* * *

[19621] THE WITNESS: Limited to those two paragraphs that are already in the record I think the word "functional" does not appear in those two definitions.

By MR. KING:

Q. Mr. Newlands, when did you first study accounting?

* * *

THE WITNESS: About 1920, I guess.

By MR. KING:

Q. Did you begin the practice of accountancy in 1920? A. No, I was studying it in school at that time.

Q. For what period of time between 1924 and 1931 were you actively engaged in the practice of accountancy? A. From about 1922 on, I believe.

[19622] Q. And in what capacity was your practice, from 1922 to 1931?

* * *

THE WITNESS: Prior to 1928 it was in a bookkeeping capacity for a plant, including the construction of the plant. After that it was it was in public accounting, until I came with the Commission.

By MR. KING:

Q. Mr. Newlands, do you have Exhibit 320 before you? A. Yes, I do.

Q. I direct your attention particularly, Mr. Newlands, to the K-1 Schedule. I believe they start at page 35 of Exhibit 320. A. Yes.

Q. Do you have that before you? A. Yes.

[19623] Q. Will you refer to Item 2 of the K-1 Schedule? Do you have that before you? A. Yes.

Q. Is it not a fact that the new copper cooling coils mentioned there are more durable than the brass coils which were replaced? A. I don't know. And at the time this entry was made I don't believe the Company was sure that it would be more durable. They were making an experiment.

Q. If you don't know, how do you know what the Company knew? A. The Company probably wouldn't know unless they had used copper coils. The Company started out using galvanized iron coils. They changed to brass and then to copper. They were developing their experience in regard to these transformer coils.

Q. Would you assume the Company changed to copper without knowing that that was beneficial? A. I assume they hoped it would be beneficial.

Q. Then your answer is that you don't know, as I understand it--whether it knew that copper coils were more

durable than the brass coils; is that correct? A. That is right.

Q. Now, will you refer to Item 3? Isn't it true that the copper cooling coils there mentioned, in Item 3, are more [19624] durable than brass coils, which were replaced, if you know? A. I don't know.

Q. Now, will you refer to Item 4? Do you know whether the copper cooling coils referred to in Item 4 are more durable than the brass coils which they replaced? A. No, I don't know that.

Q. Will you please refer to Item 5? Do you know whether the copper cooling coils mentioned there were more durable than the brass coils which they replaced? A. No. And I might say that even though they were proven more durable my treatment of these items would be the same. They are a proper maintenance and repair item.

Q. Now, Mr. Newlands, still referring to Item 5, isn't it a fact that replacement of the 10,000 kva coil with 15,000 kva coils represents a 50% increase in the capacity of this transformer? Do you know? A. If the repair were made correctly I should imagine, from the description given here, that it probably would result in a 50% increase in capacity.

Q. What do you mean by "repair," in your last answer? A. I mean that the coils were being repaired, at least partly, because they required repairing. They required replacement. When the replacement was done a 15,000 kva winding was put in the place of the former 10,000 kva winding.

Q. Will you refer to Item 6, still in the K-1 Schedule? [19625] Do you have that before you? A. Yes.

Q. Isn't it a fact that the new cab there referred to provides better visibility than the old one—if you know? A. No, I don't know. And it would make no difference to my treatment.

Q. Is it also a fact that the new controller is more useful than the old one—if you know? A. I don't know that

and it would make no difference in my treatment These are all minor items.

Q. Will you please refer to Item 7? Isn't it a fact that ¾-inch pipe made this high-tension bus more durable than the one-half inch copper tubing which was being replaced? A. No, I don't know, and it would make no difference in my treatment.

Q. Will you please refer to Item 8? A. Yes.

Q. Do you have that before you? A. Yes.

* * *

[19626] Q. Would your answer be the same with respect to Item 8 as it was with respect to Item 7?

MR. GOLDBERG: In what regard, so we will know exactly what it is you are referring to?

MR. KING: We apparently can't shorten it, then. I will ask the same question.

MR. GOLDBERG: I am willing to cooperate to shorten it. I am trying to be certain that when you get an answer we will know exactly what the answer means.

MR. KING: My question is: If I asked the witness the same question with regard to Item 8 as I did with regard to Item 7, whether his answer would be the same.

MR. GOLDBERG: The point is that in regard to Item 7 you asked if the high-tension bus had become more durable. That might apply to Item 8, but it wouldn't apply to Item 9 and Item 10. And as I understood the Examiner's wishes——

MR. KING: I am just talking about Item 8.

MR. GOLDBERG: —some general question of principle is involved.

TRIAL EXAMINER: The witness may answer.

THE WITNESS: Your question is whether the new rail would be more durable than the old?

By Mr. King:

Q. No, I am talking about Item 8 now. It is similar to Item 7? [19627] A. No, I don't know that, as a matter of fact, and it would not make any difference in my treatment.

Q. Now, with regard to Item 9, do you know whether it is a fact, Mr. Newlands, that 85-pound rail was more durable than the 60-pound rail? A. I should assume that that would be the fact.

Q. And also has a greater carrying capacity, does it not? A. I would say that you could run heavier trains over an 85-pound rail.

Q. Now refer to Item 10. Do you know whether or not it is a fact that the replacement of 800 Amp. parts with 1200 Amp. parts resulted in increasing the current-carrying and interrupting capacities of this oil circuit breaker referred to? A. The new parts themselves would carry greater amperage. I don't know whether the oil circuit breaker would. It would depend on the other parts of the breaker.

Q. Now, will you refer to Item 11? Do you know whether or not it is a fact that the new lower pedestal bearings for the operating shaft is more durable than the old one which was replaced? A. No, I don't know that as a matter of fact.

Q. Isn't it a fact that the rubber guide bearings with split ascaloy sleeve is much more durable than the old [19628] lignum vitae bearing and solid sleeve which it replaced? A. I don't know that to be the fact. I think I have seen some information in the Company's files to indicate they had better luck with the replaced bearings. It would make no difference in my determination, however.

Q. With regard to Item 12, do you know whether it is a fact that the aluminum compression joints eliminated the excess heating which had been experienced with the old twisted splices? A. No, I don't know that as a fact, and it would make no difference in my determination.

* * *

By Mr. King:

Q. Will you turn to Item 13, Mr. Newlands? Would your answer be the same as to Item 13 as it was with reference to Item 11? A. Yes.

[19629] Q. Would your answer be the same as to Item 14 as it was with respect to Item 11?

Mr. Goldberg: That is in connection with increased durability.

Mr. King: That is right.

The Witness: Yes.

By Mr. King:

Q. Will you please refer to Item 15? Would your answer be the same with respect to Item 15 as it was with respect to Item 10? A. So far as the second part of that Item 15 is concerned, yes.

Q. Please refer to Item 16. Do you know whether or not the new design of governor-restoring mechanizing system was more efficient than the old design equipment which was replaced? A. No, I don't know that as a fact, and it would have no effect on my determination.

Q. Will you please refer to Item 17? Do you know whether or not it is a fact that the change in connection with Item 17 resulted in increased capacity, as is stated in the description of this item? A. No, I don't know that that was a fact, and it would not change my determination.

Q. Now, would you turn to Item 18? Would your answer [19630] with respect to Item 18 be the same as it was with respect to Item 13? A. Yes.

Q. And the same for Item 19? In other words, your answer would be the same as to Item 19 as it was as to Item 13? A. Yes.

Q. Mr. Newlands, do you, as a result of your investigation, dispute any of the facts set forth in the items of the K-1 Schedules?

* * *

[19631] TRIAL EXAMINER: Have you checked the original job orders?

THE WITNESS: Not with these descriptions; no, sir.

MR. KING: Then you don't know if they are correct or not.

THE WITNESS: I was in Washington when this was presented to us, and I haven't been back to Baltimore since.

By MR. KING:

Q. Well, didn't you check the job orders during all the time you spent in Baltimore in preparation for this case? A. I didn't have this to compare with the job orders.

Q. That isn't what I asked you. You had the job orders, didn't you? A. We had the job orders.

Q. Didn't you check them? A. But I didn't check them in comparison with this. That is what you are asking me here.

Q. Did you check them at all? A. Yes.

Q. Did you make any notes as a result of that check? A. I made some notes; yes.

Q. Where are they? A. Most of them are here in Washington.

Q. Do you have them with you? A. I think some of them are.

* * *

[19632] By MR. KING:

Q. How did you characterize the items as maintenance and repair, Mr. Newlands, without some knowledge of the facts contained in the job orders? A. I have knowledge of some of the facts contained in the job orders.

Q. You do? A. I know that all of these items represented repair and maintenance and were so charged on the books.

Q. Now I ask you, in the light of the knowledge that you have, to point out to me where, in the K-1 Schedules,

there is a misdescription in connection with the facts, as to each one of the items.

• • •

[19633] THE WITNESS: I don't have such a detailed knowledge of all that is in these job orders—sometimes there are 20 or 30 pages—to enable me to determine whether the description shown here is exactly as is shown in the job order, or whether there isn't some further information in the job order which would make an adjustment of this description necessary.

By MR. KING:

Q. Now, will you turn to the K-2 Schedules, Mr. Newlands? A. Yes, sir.

Q. Will you give us your distinction between maintenance and repairs and additions? A. Additions is the outright addition of a new piece of property.

Q. New piece of property? A. That is right. Maintenance and repair is the process of keeping the present property in good operating condition, including replacements, alterations, and things of that nature.

Q. Is a topping unit an addition, Mr. Newlands, in your [19634] opinion? You referred to a topping unit a while ago. A. It would be a proper capital item.

Q. Is it an addition? A. Yes, it could be characterized as such.

Q. Now, will you refer to Item 1 in the K-2 Schedule? Do you know whether the guide vanes for this unit had been equipped with bushings of any kind before the work referred to here was done? A. I am not certain, but I know that the work that was here done was necessary because wear of the parts had made bushings necessary. And that is a customary repair job. It is done every day.

Q. Do you know whether or not the fulcrum pins were equipped with any kind of sleeve before the work referred to in this item was done? A. I don't know whether this particular item had sleeves prior to this time, but it is a

repair job because it is taking up wear on the item and bushing is necessary in order to do the job.

Q. Will you refer to Item 4? A. Yes.

Q. Do you know whether or not it is a fact, Mr. Newlands, that the flashboard sockets had previously been provided on 2'6" centers, over the entire crest of the dam, with the exception of the distance of 300 feet, over which they were [19635] on 5' centers until the remaining 60 sockets were installed on this job? A. No, I don't think that is correct. My information is that back in 1911 and 1912 the sockets were on two and a half feet centers the entire crest of the dam. Changes have taken place in those sockets in the intervening time. Portions of the crest of the dam have been repaired, for instance, which might mean elimination or replacement of those sockets.

Q. Do you know that to be a fact? A. I know that to be a fact—that a portion of the crest was repaired, including repairing of sockets.

Q. Will you turn to Item 7 and tell me what equipment described there could be considered as being a replacement of previously existing equipment, or as representing the cost of repairs to the existing equipment? A. This represents minor equipment attached to an existing unit and which the management, in its discretion, decided to charge to repairs and maintenance. That was customarily done during this period.

Q. But it is new equipment that was not theretofore installed; isn't that right? A. I don't know that as a fact. That is the claim that is made here. It may be so. I don't know.

Q. Then you don't know that it is incorrect, either, do you? The statement made here? A. No, I don't know that this statement is incorrect.

* * *

[19636] By Mr. King:

Q. Mr. Newlands, will you please turn to Item 9 on the K-2 Schedule? A. Yes, I have that item.

Q. Would your answer in connection with this item be the same as your answer in connection with Item 1? A. Yes, except that in some of these cases I think I could determine they had not been bushed before; I am not sure which one. That was part of the question you asked me.

Q. Would your answer to Item 12 be the same as your answer with relation to Item No. 9? A. Yes.

* * *

By Mr. King:

Q. Will you turn to Item 14? Do you know how many cables were used for the output of each of these exciters prior to the time the work described under this item was done? A. Yes, I believe it was two cables.

Q. Does that mean two per leg, four per exciter? A. I believe so.

Q. How many cables were used for each of these exciters after the work referred to in this item was done? A. The job order indicated that in repairing these cables an additional lead was put in when replacing the two older [19637] leads per leg.

Q. This fact resulted in an increase in capacity of the cables, did it not, speaking of this work? A. It did not increase the capacity of the individual cables, no. Current carrying capacity of three cables would be more than two cables if that is what you mean.

Q. That is what I mean.

Now, will you refer to Item 16? A. I have that item before me.

Q. Would your answer to that be the same as it was on Items 1 and 9? A. Yes.

Q. Will you refer to 17? Would your answer be the same as to Items 1 and 9? A. Yes, with this exception: That this present job order also covers installing washers to take up the play underneath the guide vanes but it is a similar operation to rebushing; in other words, it is something inserted to take up the play. In this case it happened to be stainless steel.

Q. Did I understand you to say rebushing? A. Well, I am not certain whether this particular one covered rebushing or whether this was a first installation of bushings and washer.

Q. Why did they bore the vanes if it was rebushed? A. Well, that might have been necessary if you put in [19638] a larger sized bushing. My impression is that this was the first bushing. I just am not certain.

Q. Will you refer to Item 21? A. Yes, I have that item.

Q. Do I understand you to say that additions made to leased property were charged as operating expense? A. Redecorating rooms on leased property is very often and very properly charged to expense immediately. As a matter of fact, this company has done it in later periods as they did here.

* * *

By Mr. King:

Q. Does this represent redecorating? A. Yes, to some extent.

Q. What do you mean to some extent? A. Redecorating covers, putting in walnut paneling, Cello-tex ceiling, linoleum, drapes, and so forth. That is commonly called redecorating a room.

Q. They were not there before, were they, the items you just spoke of? A. The walls were there; the ceiling was there and the floors were there.

Q. Panels, linoleum and Cello-tex ceiling were not there before, were they? [19639] A. No, but there was a wall there.

* * *

[19645] By Mr. King:

Q. Will you refer to transcript 19,506, your answer at the bottom of the page beginning with line 19? A. Yes, sir.

Q. Does your answer mean that flashboards were replaced as of March 1916? A. No, they started a month or two later, I believe, to work on replacement of the flashboards.

Q. A month or two later? A. I believe so. I do not have the exact time.

Q. Will you turn to page 62 of the schedules of Exhibit 51? You state there that the flashboards were not replaced [19646] until July 1917. A. That is right. They were not erected until July of 1917 but they started in June or July of 1916 to prepare the flashboards. They were going to experiment with a new swing gate and it required fabricating an entire new set of flashboards for that purpose.

Q. Will you refer to transcript 19,510? Do you have that before you? A. Yes.

Q. Did you make any investigation to determine the length of time over which the negotiations extended prior to the purchase of the property after 1916, that is the Woelpper and other properties?

* * *

THE WITNESS: It was my understanding the property was purchased in March of 1916. There would have been no negotiations necessary after that.

* * *

By MR. KING:

Q. Did you make any investigation as to any properties [19647] other than the Woelpper property as to the length of time over which negotiations extended prior to purchase?

* * *

THE WITNESS: I made no investigation in the case of each separate piece of property to find out exactly what period of time the negotiations covered. I did find in going through the accounts indications of the length of time. I made no attempt to note them, however.

* * *

By Mr. King:

Q. Did Mr. Bortner furnish you at your request a memorandum dated May 22, 1925? A. Is that one that is in the record? Q. No, it is not in the record. It is a list of docket entries involving a particular case. A. I believe it is over in a book on the table. May I look at that?

Q. Yes, indeed. A. Yes, I have a memorandum furnished by Mr. Bortner dated May 22, 1945, headed——

[19648] Q. That consists of how many pages? A. Four.

Q. Mr. Bortner also furnished you a subsequent memorandum, Mr. Newlands, to the one we have just been discussing, did he not, dated May 24, 1945? A. That is correct.

Q. How many pages are there in that memorandum? A. Five pages.

Q. What does that memorandum indicate, the one dated May 24? A. It is a description of various cases filed against Penn Water.

Q. And it indicates the length of time those cases pended, does it not? A. In some instances, yes. I have not checked the whole thing.

* * *

[19649] Trial Examiner: The documents referred to may be marked respectively Exhibit 451 and 452 for Identification.

* * *

[19650] By Mr. King:

Q. Did Mr. Bortner give you a memorandum showing docket entries in the case of Wilson Woelpper v. Penn Water and Power Company and Lancaster and York Furnace Street Railway v. Penn Water as well as Colemanville Water & Power Company v. Penn Water, Vandersloot against Penn Water, and Tripple v. Penn Water and Shoss v. Penn Water.

I will show you the copies we have. Maybe you can ascertain it from that.

• • •

[19651] By Mr. King:

Q. You have them? A. Yes.

• • •

(The document referred to above was marked Exhibit 453 for Identification.)

• • •

[19656] By Mr. King:

Q. Assume that the cement which we discussed yesterday was insured against fire loss, would the insurance premium be a proper charge to construction, in your opinion?

• • •

[19657] The Witness: During the original construction period that would be a proper charge to construction where it was obvious that the cement was going to be used for construction purposes, and nothing else.

By Mr. King:

Q. If the company takes the risk of the entire loss itself, you would not allow the loss as a construction cost, is that correct?

Mr. Goldberg: By that you mean, by "taking the risk itself" you mean they do not take out insurance on it?

Mr. King: Correct.

The Witness: That is right. I think that that is one of the things that a company should guard itself against. Of course, the circumstances in this case are a great deal different. The cement that we are talking about here, as is indicated clearly in the records had deteriorated and it is also indicated that the company did not consider that the fire had destroyed that cement.

By Mr. King:

Q. You think that a claim for allowance to the insurance company for cement damaged by fire is an indication that the company did not consider the cement was destroyed by fire? A. That is not what I said. I said the correspondence indicated that the company agreed with the insurance [19658] company that the fire had not destroyed the cement.

Q. Do you know, Mr. Newlands, as a result of the fire loss that actually the company recovered a portion of the loss from the Insurance Company? A. I know they recovered a portion of the total claim made against the insurance company.

Q. Now, Mr. Newlands, if the company were in commercial operation and had a loss due to bad cement, would such a loss be a proper charge to operating expenses?

* * *

The Witness: While I stated yesterday "operating expenses", it would not be in the classification of operating expenses as operating expenses are defined in the uniform system of accounts. It is not a strict operating expense but it would be charged to expenses.

By Mr. King:

Q. Mr. Newlands, did you ever examine the original stock certificates of the McCall Ferry Power Company?

* * *

[19659] The Witness: Yes, we examined what stock certificates were available.

By Mr. King:

Q. The stock certificates that you examined were endorsed in blank? A. I do not recall.

Q. Do you know the name of the holder of the original six shares referred to by you on page 19,495 of the transcript? A. Did you say do I know the name of the owner?

Q. The original holder and owner of the six shares. A. The names on the certificates are the names of the five nominees of Hutchinson. The shares were owned by Hutchinson according to the records.

Q. How about the other four shares? A. That is true of all ten shares, they were in the names of the five nominees.

Q. Do you know that the shares were endorsed in blank? A. I do not recall that but I would assume that to be the case since the shares were delivered to Hutchinson, although they were in the names of those five individuals. [19660] Q. Do you know one of the certificates which was endorsed in blank bore a date? A. They all bore dates.

Q. I am talking about a date for transfer, now. A. Well, there——

Q. On the back of the certificate—the date is on the back of the certificate, do you recall that?

Mr. Goldberg: You mean was there a date on the back of the certificate?

Mr. King: That is what I am asking him.

The Witness: No, I do not recall that detail.

By Mr. King:

Q. Now did you examine and consider in reaching your conclusions as to original cost, Exhibits 451, 452 and 453 for Identification?

• • •

The Witness: Yes, this is part of the material.

Mr. King: That you examined and considered?

The Witness: That is right.

By Mr. King:

Q. In your consideration of Exhibit 452 did you note that on the second page thereof Mr. John E. Malone's name [19661] appears as one of the counsel for the company in the John Edward Vandersloot v. Penn Water and Power

Company case? A. Yes, in the case of Vandersloot v. Penn Water and Power Company, a complaint filed because of flooding-damage claim—John E. Malone is mentioned as one of the counsel, with Stewart & Gerber for Penn Water and Power Company.

• • •

By Mr. King:

Q. I show you Exhibit for Identification 453 and ask you if you did not, in considering this exhibit see the name of Mr. Malone, one of the counsel in the Wilson Woelpper v. Penn Water and Power Company case, is that right? [19662] A. That is correct, but in that case I happen to know that Hensel handled that case alone entirely.

Malone came in only after Hensel died.

Q. You say Malone came in after Hensel died? A. Hensel died near the end of that case.

• • •

The Witness: That states the appearance of W. U. Hensel in writing filed.

By Mr. King:

Q. At the bottom of that same page under date of March 4, 1915, you note do you not the appearance of John E. Malone and John A. Newman, Esquire, in writing filed for defendants. A. Yes, sir.

Q. On the third page of the exhibit Mr. Malone's name appears as counsel for the Penn Water and Power Company in the case of Lancaster and York Furnace Street Railway Company v. Penn Water and Power Company, is that correct? A. That is correct.

Q. His appearance was entered according to this exhibit July 27, 1918, right? A. Yes, sir. That case was never tried.

Q. The suit was dismissed October 7, 1921, is that right? A. Yes, sir.

Q. On the next page of this same exhibit for [19663] identification Mr. Malone's name appears as attorney for

the Pennsylvania Water and Power Company in the case of Colemanville Water and Power Company v. Penn Water and Power Co., is that right? A. Yes, sir.

Q. And his appearance was entered on July 27, 1918, right? A. Yes, sir, and that case never came to trial.

Q. And that case was settled on October 7, 1921, is that right? A. Yes, sir.

Q. The next page of this same exhibit, namely 453, indicates that John E. Malone was attorney for Penn Water in the case of John Edward Vandersloot v. Penn Water and Power Company? A. Right.

Q. And Mr. Malone's appearance was entered September 16, 1918? A. That is correct, and that case never came to trial.

Q. And the docket entries show that case was settled October 8, 1921? A. Right.

Q. In the next case the exhibit indicates that Mr. Malone was attorney for the company in the case of Alice M. Tripple v. The Penn Water and Power Company, is that right, sir? A. Yes, sir.

[19664] Q. And Mr. Malone's appearance was entered September 13, 1918? A. Yes, and the case never came to trial.

Q. And the case was settled October 7, 1921? A. That is correct.

Q. When you say the cases never came to trial are you trying to indicate the lawyer performed no service? A. I am indicating that the lawyer did not perform as much service as he otherwise would.

Q. You mean if it went to trial? A. That is right.

Q. In the next case, this same exhibit indicates Mr. Malone's appearance was entered for the company in the case of Annie W. Shoff v. Penn Water and Power Company, is that correct? A. Yes, sir.

Q. Mr. Malone's appearance was entered April 8, 1929, is that correct? A. That is correct, and that case never came to trial.

Q. That case was settled October 4, 1933? A. That is correct.

• • •

[19665] By Mr. King:

Q. You testified concerning Mr. Bushong's services in connection with the organization of Holtwood Power Company, did you not? A. That is correct.

Q. That appears on transcript page 19,515? A. Right.

Q. You stated, did you not, that you found no evidence that Bushong organized Holtwood Power Company, is that correct? A. Yes, sir.

Q. And by the statement that you found no evidence that Bushong organized the Holtwood Power Company you meant, did you not, that in your opinion there was no evidence indicating that? You were not attempting to pass on the evidence as a matter of law, were you? A. No, the record indicated to me that the lawyers had [19666] organized the company.

Q. Did it indicate to you that Mr. Bushong had done nothing in connection with the organization of the Holtwood Power Company? A. Nothing of any moment. He did some clerical work in that connection which any officer or employee might do. For instance, the Lancaster Office paid for the recording of the charter and some of the other miscellaneous documents in that connection. Also Mr. Bushong was used as a go-between sometimes in transmitting requests to Malone in Lancaster but there is no evidence that he did any real work in connection with that organization.

Q. What do you mean by real work? A. That he had nothing to do with the organization itself. This incidental clerical work does not constitute organizing a company.

Q. Clerical work, in your opinion, does not constitute real work?

• • •

The Witness: Not of this nature.

By Mr. King:

Q. I show you a copy of a letter dated June 25, 1924 to Bushong from Mr. John A. Walls and ask you to look at that and tell me if you have seen that letter in connection with your investigation in connection with this case. I am going [19667] to ask leave to have it photostated but I have one extra copy for the Examiner. A. No, I have not seen this letter but it agrees with the records I have seen that Mr. Bushong's work was limited to mechanical work of a clerical nature.

Q. In other words, the letter accurately depicts the facts, is that correct? A. Yes, I believe it does.

* * *

Trial Examiner: The document handed the reporter may be so marked.

(Exhibit No. 454 is marked for Identification.)

* * *

By Mr. King:

Q. Mr. Newlands, I show you a copy of a letter dated June 28, 1924 to Mr. J. A. Walls from Marvin E. Bushong. I ask you to examine that letter and tell us whether or not you took that into consideration in connection with your investigation in this case and whether or not you have ever seen it before?

* * *

[19668] A. No, I have never seen it before so I did not take this particular letter into consideration, but I have seen most of the information that is here in the records, that is, regarding advertising in the papers and things of that sort.

Q. The letter correctly, in your opinion, reflects the fact? A. Yes, it reflects the fact that Mr. Bushong did some clerical work.

Q. That is not the question I asked you. I asked you if the letter correctly reflects the facts as you understand [19669] them.

* * *

TRIAL EXAMINER: He is asking as to whether those facts set forth in the letter are in accord with the facts you found in the files, without the supplementation of your opinion as to what the facts mean.

* * * *

THE WITNESS: Yes, I would say that that was so.

MR. KING: May we have the letter just referred to to Mr. J. A. Walls from Mr. Marvin Bushong dated June 28, 1924, marked for Identification as Exhibit 455?

TRIAL EXAMINER: It may be so marked.

(Exhibit No. 455 is marked for Identification.)

* * *

[19670] By MR. KING:

Q. Exhibit 455 on page 3, the last paragraph, states as follows, does it not, Mr. Newlands?

"There will, in all probability, be no necessity for a conference with Judge Stewart because Mr. Zimmerman will handle the work before the Public Service Commission and in the other offices in Harrisburg in Mr. Malone's absence."

That is correct, is it not, Mr. Newlands? A. That is what the letter states.

[19671] Q. You have heretofore stated on page 19516 of the transcript that you could find no evidence indicating what Mr. Zimmerman's charge for legal services represented, is that correct? A. That is correct. This is the first indication I have seen on that, of what Mr. Zimmerman did during that period. I presume he did other things than this.

* * *

[19695] Q. Mr. Newlands, will you refer to Exhibit for Identification 445? A. I have that.

Q. The second paragraph of that exhibit indicates that Mr. Bortner furnished you a memorandum dated May 23, 1945, [19696] does it not? A. Yes, sir.

Q. I show you a copy of that memorandum and ask you to examine it and tell me if that is an accurate copy of the memorandum furnished by Mr. Bortner to you? A. I will have to get another book over here.

Q. Did you find it? A. Yes, sir.

Q. Is the copy I showed you an accurate copy? A. From a hasty glance, it seems to be a correct copy.

Q. Did you take the memorandum that we are discussing into consideration in connection with your determinations in this case? A. Yes.

* * *

TRIAL EXAMINER: The document referred to may be marked for Identification.

(Exhibit No. 456 is marked for Identification.)

* * *

[19762] RE-DIRECT EXAMINATION.

By MR. HALL:

Q. Mr. Newlands, yesterday Mr. King questioned you regarding an insurance claim for fire losses in 1911. What was the total amount of Penn Water's claim as respected that schedule which he showed you? A. The total amount of the claim was $24,469.50.

Q. What amount did Penn Water receive in settlement of its total claim? A. $18,817.

Q. Was the total claim of $24,469.50 made up of numerous items? A. Yes, sir.

Q. What was the amount claimed by Penn Water for 21,000 bags of Union Cement? A. $5,460.

Q. Will you refer to page 19658 of the transcript, and specifically to your answer contained in lines 5 and 6? A. Yes, I have that.

Q. Do you mean by that answer to say that Penn-Water recovered its claim for loss of 21,600 bags of cement? A. No, I did not.

• • • •

[19763] By MR. HALL:

Q. Was the James E. Hopkins who you referred to at page 19587 of the transcript as being a director of Susquehanna Contracting Company, also a director or officer of McCall Ferry Power Company? A. No, he was not.

Q. Referring to the volume of Executive Committee Meetings which Mr. King had you examine for the limited period from October to December 6, 1905, will you state what that volume shows as to the place of the McCall Ferry executive meetings from the period December 9, 1905, to March 17, 1909? A. The meetings during that period were held at 60 Wall Street.

Q. Whose offices were located at 60 Wall Street, New York, during the period December 9, 1905, to March 17, 1909? A. The offices of McCall Ferry Power Company were located at 60 Wall Street during that period.

Q. In connection with those items in the K-1 and K-2 Schedules of Exhibit 320 where you were asked about the durability of the new items over the old, did you assume the new items were more durable in reaching your conclusions? A. Yes, I did.

Q. In other words, you accepted the company's claim in that regard? [19764] A. That is correct.

Q. Referring to the items listed in the K-1 and K-2 Schedules of Exhibit 320, is the work covered by those schedules properly characterized as repair? A. Yes, the work was made necessary because parts had worn out or failed in operation and it was necessary to repair them.

In repairing them the Company sometimes used better material which was available at that time.

Q. Referring to the items on Schedule K-1 and K-2 and assuming the work was performed today and the accounting therefor was pursuant to the present FPC system

of accounts, and further that those items were not capitalized, would you recommend that those items be reaccounted for and capitalized on the company's books? A. No, I would not. The management is allowed considerable discretion in items of that nature, and where the decision is made and it is a reasonable one, we do not seek to change it.

* * *

By Mr. Hall:

Q. Having considered Exhibits 454 and 455, would you [19765] consider any part of Mr. Bushong's salary or of the Lancaster office expense as chargeable to Holtwood steam plant construction account? A. No, I would not consider any part of it as a proper organization expense.

Q. Having examined Exhibit No. 455, does it afford you a basis for determining if any of Mr. Zimmerman's fees should be allowed as part of the Holtwood Power Company organization expense? A. No, the information given there does not afford me any basis for allocating Mr. Zimmerman's fee.

* * *

[19767] By Mr. Hall:

Q. Referring to transcript 19,589 and specifically to line 3 on that page where the reporter indicates that you were interrupted before you completed your answer to the Examiner's question, will you complete the answer which you intended to give? A. The words, "Were present," should be added at the end of that line, that is, it should read, "And by request Messrs. Fisk, Lane and Hutchinson were present."

* * *

[19773] DONALD L. WETZEL.

• • •

DIRECT EXAMINATION.

By MR. KING:

Q. Mr. Wetzel, you have heretofore been sworn and testified in this proceeding? A. Yes, sir.

[19774] Q. You are now employed by the Pennsylvania Water and Power Company? A. Yes, sir.

Q. In what capacity? A. Budget engineer.

Q. How long have you been employed by that company? A. Since 1936.

Q. Will you give us a brief summary of your experience to date? A. I was employed as an electrical tester by G. E. for a period of two years, testing locomotives and electric locomotive equipment, and by Duquesne Light Company for a period of one year testing instrument transformers.

I was employed as a material expediter in the construction of overhead transmission lines for a period of two years.

MR. GOLDBERG: By Duquesne Light Company?

THE WITNESS: Yes. I was employed as supervisor of the installation of heat insulation in connection with the construction of steam power plants and commercial steam generating facilities for Duquesne Light Company, the Allegheny Steam Heating Co., and Northern States Power Co. for a period of 2½ years, and I was employed as a cost analyst on underground transmission construction for a period of one year.

In 1934 I was employed by Safe Harbor Water Power Corporation as a material cost checker in connection with [19775] the installation of 25 cycle equipment at Safe Harbor and Conestoga Substation.

In 1936 I began my employment with Pennsylvania Water and Power Company as a material and time distribution checker, becoming thereafter a field-cost engineer.

Baltimore office cost engineer in charge of original cost studies and budget engineer in charge of the budget and cost section of the engineering department, which position I still hold.

By Mr. King:

Q. Will you give us a brief description of the scope of your duties as budget engineer? A. Yes, sir. It is the duty of my department to receive and put into proper form the construction budget items for the year, and for their presentation to the Board of Directors for approval, for the issuance of job orders authorizing the field to do construction work, to follow the costs incurred in job orders, to make an analysis of them, to procure inventories of structures and equipment installed on those jobs, and to associate them with the costs under such jobs, and then in general to follow the plant accounting of the company—and we have other work, of course, such as insurance, and so forth.

Q. Now, Mr. Wetzel, did you make an analysis of the job orders in the company's files in connection with the items listed on the K Schedules attached to Exhibit 320? A. Yes, sir.

[1977] Q. And the K Schedules represent the result of that analysis by you, right? A. It represents an analysis of the residue of what we refer to as the company claims which were not accepted by the FPC Staff Examiners.

Q. Some of the company's claims were accepted, is that correct? A. Yes.

Q. And those claims are of the same nature as the items in the K Schedule, is that right? A. I am not sure at the present time that they are all of the same nature, but they all are claims of the company.

Q. Are some of the items in the K Schedule of similar nature to items which the Commission Staff allowed? A. Yes.

[19777] CROSS-EXAMINATION.

By MR. GOLDBERG:

* * *

[19784] Q. Will you please specify which of the items accepted by the Staff of the Commission are, in your opinion, similar [19785] to those in the K Schedules of Exhibit 320? A. Oh, I believe the additions.

* * *

[19786] Q. Does Schedule K-1 of Exhibit 320 represent how the company treated the items or does it reflect your opinion of how the company should have treated the items? A. It represents not only my own opinion of how the company should have treated the items, but also the opinion of Mr. Gunn, Mr. Eichhorn, and so on, counsel.

Q. That means that the K Schedule reflects the opinions of the individuals you have named as to how the company should have treated the items, but does not reflect how the company did treat the items, right? A. That is correct.

Q. And that applies to Schedules K-2, K-3 as well, right? A. Yes, sir.

Q. Would you agree with me that the determination of whether the item represents an addition, betterment or replacement involves the exercise of judgment?

* * *

THE WITNESS: Yes, I would say many of them are very self-evident but they may require some exercise of judgment.

[19787] By MR. GOLDBERG:

Q. You will also agree with me, I think, that it is fair to state that there are no hard and fast rules or standards or clear lines of demarcation, as between additions, betterments and replacements? A. No, I cannot agree to that statement.

Q. Do you think there are clear lines of demarcation which one can follow in determining whether the item is

an addition, replacement, betterment or repair, is that right? A. Well, if I may, I would like to put it this way: That in the majority of instances the line of demarcation is very evident. In some instances it may be considered as an on-the-fence item. That is the only way I can characterize it.

Q. Would you say that there are on-the-fence items in the K Schedules? A. I believe not.

Q. You think in each of the instances reflected in the K Schedules the category is self-evident, is that right, and did not involve the exercise of judgment? A. I believe that is true with at least the very great majority of them.

Q. But you think there are a number of them where it is not true, is that right? A. No, I would say there are a few of them.

[19788] Q. Well, since you say there are only a few of them, where it is not true will you please specify those few? A. I would say Item 26 covering the construction plant buildings on page 6 of Schedule K-2 is argumentative.

Q. Is that the only one you can specify? A. That is the only one I can find offhand. I would have to make a rather thorough examination to identify them.

Q. Based upon your present examination and your knowledge of your determinations at this time, we can say as to the others that the classification as between addition, betterment, replacement or repair is self-evident and does not involve judgment? A. No. Let me put it this way: That as regards the specification as to whether or not the item belongs in K-1, K-2 or K-3 it is of no great importance, it was considered to be of no great importance in this series of schedules. What was to be considered of importance was the fact that the item was one of the three.

Q. That is, whether it should be capitalized or not, is that right? A. That is right.

Q. Now, then, let us go back to my question and having your explanation in mind will you take my question.

[19789] THE WITNESS: Well, the fact that the item is a capital improvement is self-evident.

By MR. GOLDBERG:

Q. Let me put it this way: Whether it is a capital charge, or not, which you say was the important thing, is a matter of judgment, right? A. Yes.

Q. There are no hard-and-fast rules or standards which you can apply in determining that, right? A. As I said before there are in some cases on-the-fence items but in the majority of cases it is self-evident that the items are of a capital nature.

Q. Well, now, is it your statement that there are hard and fast rules to determine whether it is a capital charge, or not? A. Yes, there are.

Q. There are? A. Yes.

Q. It doesn't require the exercise of judgment? A. Only in those cases where the question becomes [19790] debatable as to whether those hard and fast rules are hard and fast enough to cover the point.

* * *

Q. There are different rules for each of the items that you were dealing with in the case of the K Schedules? A. I will not say that there are some items here classified as betterments which may, in fact, not be—in Schedule K-1 —may, in fact, not be just as applicable under K-2 or K-3, depending on the treatment given.

Q. As you said the important thing is not whether it is K-1, K-2 or K-3, so I am directing myself to the important thing, whether it is a capital charge or a charge to operations. Did you apply the same rule to all of the items in the K-1 Schedules? A. I believe so, but we applied a general rule first.

Q. What was that general rule? A. The general rule was to the effect that if the property [19791] of the company, the physical property of the company did not accurately or was not accurately reflected in capital costs of the company, that certain adjustments should be made in-

cluding the writing-off of property which did not exist and the capitalizing of items of a capital nature which did exist but which were not on the books of account.

Q. That general rule I suppose you applied to the K-2 and K-3 Schedules as well, is that right? A. Yes, except in the matter of the K-2 Schedule, it was a fact that the company may have had the same property as it had on its books of account, but it had been added to since the item was first acquired.

Q. Is there any exception with respect to K-3 Schedules? A. The K-3 Schedules are sort of the same effect.

Q. As K-2? A. K-2 is marked "Betterments"; K-3 is marked "Replacements Involving Betterments".

Q. This general rule begins "If the physical property of the company was not accurately reflected in capital cost of the company;" how was it decided whether or not the physical property of the company was accurately reflected in the capital cost of the company as applied to the K Schedules? A. Well, as part of the original cost studies the company took a physical inventory of its property. It also made an analysis of the plant costs, then it reconciled the plant [19792] costs with the physical inventory of the property.

If the plant costs reflected the purchase of property which the physical inventory did not reflect, it was due to the fact, first, that the property may have been abandoned in which case it was written off the books; in the second place it may have indicated that the property was used in construction, that is, it was of an incidental nature in constructing the company's property, in which case it became an indirect cost.

Then there were items of equipment inventoried which could not be found in the analysis of the plant costs of the company. That indicated that the original charge, the original cost of that item had not been charged to plant costs, but elsewhere. If that were true a claim was made similar to these.

Q. Now, what standards did you apply in connection with the K-1 Schedules to ascertain whether there should be a re-accounting for the charge which had not originally been made to plant account? A. The standard was this: That if the physical inventory indicated that there was a purchase of one type of equipment, that there should be a purchase of one type of equipment but the actual purchase indicated otherwise, we had to justify the difference between the two and we very often found it was due to the betterment existing in the [19793] physical item that the original cost for the item and the description of physical inventory would differ.

Q. I have difficulty in following that. Could you take one of the items and illustrate what the last answer means? A. Well, take Item 6 of Schedule K-1, "Generator Room Controller and Cab". The physical inventory of the controller and cab on that generator room crane did not tally with the original purchase of the equipment. Therefore it was evident that some change had been made between the time of the original purchase and the time of the inventory. The claim for the two items identified here now makes it possible to reconcile physical inventory with the cost as adjusted.

Q. Now, then, in reaching your conclusions that the items in the K Schedules should be charged to plant account and that the company originally erred in not so treating the items, did you, yourself, apply the Standards of Accounting in the 1919 Pennsylvania System of Accounts?

* * *

THE WITNESS: I cannot answer your question directly, Mr. Goldberg. I will have to explain, if I may.

The decision to make claims to have the company's physical inventory of property and cost properly reconciled was made by Mr. Gunn, Mr. Eichhorn and counsel. It was my function to make those claims so that the inventory and cost would [19794] reconcile themselves.

In making that determination I was, of course, familiar with the fact that the property, in order to make the claim, should have inherent in it the increase in durability, increase in efficiency, and so forth, as prescribed by the Pennsylvania system of accounts, but I was in no way passing upon the original accounting.

Q. We are not to understand then that you are saying that the accounting followed by the company originally was erroneous under the 1919 Pennsylvania system of accounts, is that right? A. No, except as to this: When these claims were made after the decision to make such claims had been made and the claims had been made, they were reviewed by Mr. Gunn and Mr. Eichhorn as to the propriety of them and in so doing they may, or may not have passed on the former accounting, I do not know.

Q. Yes, but I am interested in your process and if I understand your answer you agree with me that you personally, in dealing with the items of the K Schedules and setting them up, did not reach any conclusions as to the propriety of the accounting followed by Penn Water under the system of accounts in force at the time, is that right? A. May I ask you if you mean by that question as to whether or not it was made upon managerial discretion, and so on, or whether it was incorrect as far as proper records are [19795] concerned? Which of those?

Q. Accounting. A. Accounting?

Q. Proper accounting for the items under the applicable system of accounts. A. The fact that it was incorrect accounting had already been established before I made these claims.

Q. So that you did not consider or concern yourself with the propriety of the accounting followed, right? A. No, that fact had already been established.

Q. Established by whom? A. Mr. Eichhorn, Mr. Gunn and counsel.

Q. But you reached no independent decision on that? You accepted their conclusion that the accounting had been

improper? A. Yes, but that did not give me authority to make any claim I wanted to make. I had to confine my claims to reconciling physical inventory with cost.

* * *

[19796] Q. Is not this the fact, that the job orders referred to in the K Schedules contain rather elaborate descriptions of the work done? A. In some cases, yes. I do not recall just the degree of description given in each of the job orders involved here.

Q. In some cases the job orders consist of many pages, sometimes as many as 20 pages, right? A. I believe so. That is the information contained in [19797] the job order folder; the job order itself is a single sheet of paper.

Q. Were there any instances where the job orders did not provide you with sufficient detail to reach your conclusions referring to items which you have included in the K Schedules? A. I believe that is true. We had to go to people in the company who knew the situation in order to find out the true facts in the matter.

Q. People in the company who had worked for Penn Water at the time the jobs had been done? A. Exactly so, and knew what work had been done, yes.

Q. They relied on their memories, did they not? A. No, there was very often other correspondence which related to the work, drawings, notes of men in the field, and things of that nature.

Q. Very often it was merely memory they relied on to supplement their information, right? A. I do not believe I can think of a case which is that vague, no.

Q. Did you personally secure the supplemental information? A. Most of it came to me in such form that I could readily determine whether it was proper or valid information.

Q. Do you know whether you had available to you in reaching your conclusions, regarding the items in the K [19798] Schedules all the information which Penn Water

had at the time the original determination was made as to how the items should be handled? A. I cannot answer that without having some specific item in mind. Can you point one out?

Q. Well, not having done the job myself you are putting the burden on me that is really on you. I just want to know if you can tell me right now, having in mind the items in the K Schedules, whether you had all the information available to you that the company had available to it at the time the original determinations were made? A. I do not know. I would say that I had the very great majority of the information available to me that the company had at the time it made its plans and charges.

Q. Do you have any reason to doubt that the company, at the time the entries were made, had as much information to go on as you did? A. I believe they had as much information as I did but they neither applied it consistently nor correctly.

Q. Do you have any doubt that they knew that the items in the K Schedules were more durable than the old items that were being replaced or repaired? A. You are now referring to betterments particularly, I assume?

Q. K-1 Schedules. [19799] A. At that time it was of no great consequence to the company whether it charged the capital accounts for betterments, or not. It was not a matter of rate base at that time or original cost, or reconciliation of original cost of items with inventory.

Q. That does not answer my question.

• • •

THE WITNESS: They may have known that they were more durable and decided to ignore it in view of the circumstances.

By MR. GOLDBERG:

Q. What did you mean when you said it was not a matter of rate base? A. At the time the entries were made

it did not matter to the company whether or not the items were capitalized.

Q. Why? A. It did not affect its earnings.

Q. Why didn't it? A. It was on an energy form of contract at that time.

Q. You were not then speaking of principles of regulation being involved, is that right? A. No, what I meant to indicate was it is of much more importance now to have the plant accounts reflect the property than it was at that time.

Q. And you think because of that reason the company [19800] at that time, the time the entries were made, was not so much concerned with correct accounting? A. Yes, sir.

* * *

[19801] RE-DIRECT EXAMINATION.

By MR. KING:

Q. Mr. Wetzel, the job orders which you analyzed in connection with the K Schedules, together with the file in which they were contained, were all made available to the Commission Staff, were they not? A. Yes, sir.

* * *

[19833] MR. GOLDBERG: "Johnson's Legal Opinion Re Organization of the Company;" Part 65, "Johnson's Legal Opinions Re Eminent Domain;" Part 8, "Lee's Affidavit." Part 24, "Hopkins' Affidavit."

I think Hopkins or Lee is still alive and was not produced for cross-examination.

TRIAL EXAMINER: Which one is alive?

MR. GOLDBERG: I think the record already shows which one Mr. Gunn thought was still alive.

MR. KING: It is Lee.

TRIAL EXAMINER: What is his condition? Where is he living and what is his physical condition?

MR. KING: He resides outside of Boston. He is a man in the late 80's, I believe, an elderly man. We have communicated with him and his doctor forbids him to leave his home.

TRIAL EXAMINER: I think I remember that.

MR. KING: You remember that.

TRIAL EXAMINER: Yes.

* * *

[19865] GEORGE H. DAVIS.

* * *

CROSS-EXAMINATION.

* * *

[19964] TRIAL EXAMINER: Just one other question I want to ask before we recess.

If I recall your testimony on either cross or direct with regard to the assignment of the Holtwood-Highlandtown line and Highlandtown substation, your basis for assigning them directly to Baltimore was a consideration of the amount of energy used in connection with the time-of-year use? Is that correct?

THE WITNESS: No, that energy and the time-of-year use, or the time of the year it was used was with reference to the 220 kv lines, not the Highlandtown line.

TRIAL EXAMINER: What was your basis for the [19965] Highlandtown line?

THE WITNESS: That Baltimore used substantially all of the energy that was carried over that line, or used all of the energy that was carried over that line, and I did not consider its use as a return, just a direct delivery to Baltimore.

* * *

[19972] RE-DIRECT EXAMINATION.

By MR. GOLDBERG:

Q. Mr. Davis, at transcript 19008, line 22, in answer to a question by Mr. Myse you testified that you are "not [19973] using in this allocation, the costs reported by Holtwood Company" and at transcript 19009, line 2, in response to another question by Mr. Myse you further testified that the $5,157,627 was not the total cost as reported by Holtwood.

Will you please explain what you mean by that testimony? A. Yes, I think it will be easier to understand if I use specific illustrations.

For example, the costs I have used contain an item of return based on a 5 per cent rate of return on the depreciated rate base whereas Holtwood Company reports costs of service computed on an undepreciated rate base at a rate of return in excess of 5 per cent.

Also the costs I have used in my allocation contain a figure for income taxes based on the income of a 5 per cent rate of return rather than on the income which is presently received by Holtwood Company.

These are the principal illustrations which result in a variance between the costs I have used and those reported by Holtwood Company.

Of course there are many instances where the costs I have used are the same as those reported by the company.

Q. At transcript 18975, Mr. Myse was questioning you regarding your statement that the methods followed by Mr. Spaulding of combining all Safe Harbor and all of Holtwood's cost of service results in the allocation of a greater ratio [19974] of Holtwood's cost to Baltimore than if he had developed the ratio for Holtwood alone, and in that connection you testified at that page that you were referring to the costs involved in supplying power and energy and special facilities.

Were you correct in testifying that you were referring to special facilities? A. No, my answer should have been confined to power and energy.

Q. And when you testified as you did at line 17 of transcript 18989, were you there speaking of power and energy only? A. Yes, I was.

* * *

Q. Have you checked the figure of $74,379 which you deducted for "fuel" and which is referred to at line 24 of transcript 19018 for the purpose of ascertaining whether it is an average figure? A. Yes.

Q. Is it an average figure? A. Yes, it is the average of the fuel in storage at the end of each month during the year.

Q. And at transcript pages 19039 to 19043 you were [19975] asked concerning the assignment of two-thirds of the 220 kv lines to Baltimore and one-third to pool and particularly concerning the energy use of the lines in 1946 as compared with 1944, which you said was one of the considerations you took into account.

Were there other considerations which influenced your determination? A. Yes, I considered the fact that in periods of low flow these lines provide the only dependable source of energy required to supply Penn Water's firm requirement in Pennsylvania during those hours when the water is being stored at the hydro plants, particularly if such low flow should occur in the peak load months.

This consideration, though not susceptible to mathematical determination, does indicate to me a greater use of the 220 kv lines for service to Pennsylvania customers than appears from a direct comparison of the energy actually transmitted over the lines in any one year.

TRIAL EXAMINER: What page was that?

THE WITNESS: 19043.

MR. GOLDBERG: 19039 to 19043.

TRIAL EXAMINER: Where did you stop on 19043? At the bottom of the page?

THE WITNESS: There is one question on 19044 that carries over there on the same subject.

[19976] TRIAL EXAMINER: All right.

By MR. GOLDBERG:

Q. During what month was backfeed used for the 220 kv lines a maximum in 1946? A. During the months of low flow and of maximum load on the interconnected system.

Q. During what months is there maximum use of the 220 kv lines for send-out from Safe Harbor to Baltimore? A. During the months of high river flow.

Q. Did these facts enter into your allocation of the 220 kv lines? A. Yes.

Q. At transcript pages 19,045 and 19,046, you testified that the Ellicott City-Takoma line is used for interchange purposes between Baltimore and PEPCO and for the purpose of supplying firm energy from Baltimore Company to PEPCO.

Are those the only uses of that line? A. No, they are not.

Q. What other use is made of that line? A. That line is used also for backfeed to Holtwood Company.

Q. Does that mean a portion of the backfeed from Baltimore to Safe Harbor comes over the Ellicott City-Takoma line? A. Yes, that is where part of it does come from.

[19977] Q. On page 19,067, line 9 you stated you treated the amount of firm energy billed to Metropolitan Edison Company as though it were actually the metered amount at Violet Hill. Did you mean when you so testified that firm energy was metered separately from interchange energy to M. E. Company at that point? A. No, the meter measures the total quantity received at that point without distinction and the interchange to M. E. Company, after adjustment for the portion delivered to Pennsylvania Power and Light Company through Metropolitan Edison Company, is that portion of the total in excess of the firm energy

as computed according to the terms of the contract, which is Exhibit No. 72.

Q. Is that what you had in mind in making your answer at transcript 19,066, line 20: Namely, that the meters do not distinguish the quantities registered as between firm and net interchange? A. Yes, that is right.

Q. Referring you to transcript 19,070, the question beginning at line 2, what did you understand Mr. Myse was referring to when he said "total resources"? A. Total energy resources, which was what we had been discussing at that time.

Q. And did you make your answer which appears on lines 5 to 7 of that transcript page 19,070 on that basis? [19978] A. Yes.

Q. At transcript 19,135 you were questioned by Mr. Myse regarding your use of 2 per cent in connection with operation of single phase equipment at Safe Harbor for railroad service.

Have you since your cross-examination checked the available data in connection with your use of 2 per cent? A. Yes, I have.

Q. What have you found? A. I have found that operating and maintenance expense applicable to water wheels, turbines, generators and accessory electrical equipment as reported by Safe Harbor for 1946, including an allocation of general and administrative expense, is approximately 2.2 per cent of investment in those facilities.

Q. At 19,215, line 21, you state in effect that there were two outlets for 25-cycle generation at Holtwood, namely to Lancaster and to Baltimore Company at Highlandtown. Is it not true that a part of the 25-cycle output at Holtwood can be transferred to Holtwood's 50-cycle system through the two frequency changers at Holtwood?

* * *

THE WITNESS: Yes, that is true.

* * *

[19980] Q. Referring you to transcript 19,233, lines 7 to 11, and your answer at line 12 of that page and considering Mr. [19981] Myse's definition of received at transcript 19,238, line 25, is the amount of 538,171,000 kwh the amount of energy actually received by Penn Water from Safe Harbor in 1946?

MR. MYSE: Now, I object to that question as not being proper rebuttal, because again I point out that the definition given on page 19,238 has no connection whatsoever with the testimony at page 19,233 which this question purports to examine anew.

TRIAL EXAMINER: The objection is overruled.

* * *

THE WITNESS: No, that is not the actual amount of energy delivered by Safe Harbor to Holtwood's facilities.

By MR. GOLDBERG:

Q. Why not? A. Because the total amount of Safe Harbor's output is delivered to Holtwood's facilities. In 1946 this amount was 876,968,000 kilowatt-hours.

Q. At transcript 19,201, line 24, to transcript 19,203, [19982] line 11, you were asked concerning the allocation of total hydro power cost to capacity and energy components, and you agreed that if 100 per cent of the installed capacity were dependable capacity, then by your method you would allocate 100 per cent of the hydro costs to the capacity components.

Did the type of contract known as H and I in this proceeding influence you in making the allocation to capacity and energy components as you did? A. Yes, it did. Consideration was first given to the net revenue to determine what, if any, part of it was a function of energy sales which would constitute a proper basis for allocating a portion of the costs including return, depreciation and income taxes to the energy component.

Examination of the contracts under which Holtwood operates revealed that the net revenues are independent of the amount of energy sold. In view of this condition, it appears that the hydro costs should be allocated to the capacity component in proportion to the dependable capacity of the hydro plants, which is the method which I have used.

Q. Do the same considerations which determined your method of allocating hydro costs also apply to the allocation of the fixed costs of steam generation to the capacity components? A. Yes, they do.

[19983] Q. Are these considerations responsible for the unit capacity costs developed in your studies? A. Yes, because these unit capacity costs are the direct result of a contract condition.

Q. Beginning at transcript page 19,110 to page 19,124, you were asked about your allocation of intangible and general plant, which in your study you assigned to the pool. Why did you assign this general and intangible plant to the pool? A. This was considered a jointly used property, and was therefore allocated from the pool on the basis of use.

Q. What other method could you have used in allocating general and intangible plant? A. Well, this property could have been allocated directly to transmission and production plant.

Q. Would this same method apply to general and administrative expenses? A. Yes, that could have been treated the same way.

Q. At transcript 19,098 you were asked concerning the total hydro operating cost as shown in the last column of Table III, Exhibit 421, which represents the total cost of hydro operating after deducting the $133,750 which Holtwood receives for allowing backwater from the Conowingo plant to reduce the head at its plant.

Could you have treated this payment in any other way?

[19984] A. Yes. The hydro costs could have been assigned to the pool without the deduction, and the deduction could

have been made in Table V after administrative and general expense had been allocated to the individual customers and the pool.

• • •

[19988] Q. Mr. Davis, at transcript 19,098, you were asked whether the amount $269,145 appearing in line 1 of Table III of Exhibit 421 shows the total costs of service as you or the Commission accountants found them; is that right? A. That is right.

Q. And is your answer to the question based upon the treatment you accorded the $133,750? A. Yes.

Q. And did you at transcript 19,099 testify that there seemed to be no satisfactory way of handling the $133,750 except to say that Penn Water had a cost net of only $269,000? A. That is right.

Q. Now, then, have you considered whether the $133,750 could have been treated in any way other than the manner in which you treated it in Exhibit 421? A. Yes, I had in mind another way. I had in mind another way at that time.

• • •

[19989] Q. When you say you had in mind another way at that time, what does "at that time" refer to? A. At the time when I set up the allocation as is shown in Exhibit 421.

Q. Now, did you consider that the hydro costs could have been assigned to the pool without the deduction, and the deduction could have been made in Table V after administrative and general expense had been allocated to the individual customers and to the pool?

• • •

THE WITNESS: Yes, I did consider that as an alternative method, and considered what effect it might have on the answer.

By Mr. Goldberg:

Q. What would have been the effect on the results of your study if you had treated this backwater payment in that way?

• • •

[19990] The Witness: It would have increased the total cost allocated from the pool by a small amount of administrative and general expense which would have been allocated to the $133,750, and it would have decreased the costs assigned to individual customers.

It would also have increased the proportion of administration and general expense allocated to hydro costs in the pool. The effect on the final result would have been small. I have not attempted to determine the effect of this change separately from that of transferring intangible and general plant from the pool to direct allocation in Table I, and of similarly transferring administrative and general expense in Table III.

By Mr. Goldberg:

Q. Well, what would have been the effect on the results of your study had you adopted the method of direct allocation of intangible and general plant, administrative and general expense and had used the total hydro costs in Table III and the first part of Table V?

• • •

The Witness: All three of these alternative methods cumulatively would have increased the total cost allocated to Baltimore by about $76,000 and decreased the costs allocated to [19991] Pennsylvania customers in the same total amount.

• • •

Q. At transcript 19,186, lines 5 to 10, you were asked this: "If the actual Pennsylvania Railroad load in Pennsylvania at the time of the area 6 system peak had actually been 36,557 kilowatts, would not the load shown in Exhibit 425 have been higher by 12,557 kilowatts on that peak

hour," and at transcript page 19,187, lines 14 to 19, you were asked if it [19992] would not be correct to say that if you had used that higher peak load at the time of area 6 system peak in determining your dependable capacity, you would have come out with a higher figure for dependable capacity.

You replied that that was correct if it had been determined that way. Was it determined that way? A. No, sir.

Q. How was it determined in so far as the railroad load entered into your determination? A. My determination was based on a consideration of the total area 6 peak load which included the combined railroad load in Maryland and Pennsylvania. Using 36,557 kilowatts for the load in Pennsylvania alone would not alter the total railroad load and therefore would not affect the result of my determination of dependable capacity.

Q. At transcript page 19,294, in reply to a question beginning at line 16 and ending at line 21, you stated at lines 22 to 24 at that same page that more backfeed or diversion would be required assuming all other conditions remaining the same, if interchange energy supplied to the Pennsylvania customers were increased.

Would not backfeed and diversion of Baltimore Comuany's two-thirds from Safe Harbor be increased assuming all other conditions remaining the same, if Penn Water's sale of firm energy to its Pennsylvania customers increased?

* * *

[19997] THE WITNESS: Yes, the same thing would be true if firm power sales increased as if interchange sales increased all other conditions remaining the same.

By MR. GOLDBERG:

Q. Would not backfeed and diversion of Baltimore's two-thirds from Safe Harbor also increase, assuming all other conditions remaining the same, if the river flow at

Safe Harbor and Holtwood was lower than experienced in 1946? A. Surely.

• • • •

[19999] Q. Mr. Davis, referring you to transcript 19,325, Mr. Myse put this question to you at line 13: "Now, which of the two figures $103,690 or $94,037 is the correct [20000] amount of the cost to be allocated to the Pennsylvania Railroad in Pennsylvania for special facilities"—implying that there was some inconsistency between the two amounts.

Is there an inconsistency between the two amounts in your use of them? A. No, one is costs allocated; the other is charges made to the railroad company.

Q. Will you explain why there is a difference between the $94,038 and the $103,600? A. The $94,038 is the total special facility cost allocated to the railroad in Pennsylvania and the $103,690 is the proportionate amount of the facility charges corresponding to the $94,038 of allocated cost and is used as the basis of adjusting the revenue collected by Holtwood from the Pennsylvania Railroad to conform to the allocation of cost.

• • •

[20005] STANLEY W. ROLAND.

• • •

FURTHER RE-DIRECT EXAMINATION.

By MR. GOLDBERG:

Q. I show you your testimony at 19449 and call your attention to your answer at line 17 where you say, "My answer [20006] at that point is wrong."

That answer that you make followed what is referred to by the reporter as "question and answer read." I wonder if you can tell us what you were rererring to when you said "My answer at that point is wrong" in the previous testimony you were referring to. A. I had reference to the answer at 19447, line 10; also the answer at 19447, line

17, and also on the same page at line 21. In each case the deliveries at Westport, Riverside, Takoma Park and at Conowingo and at Perryville are in part energy purchased by Baltimore Company from Safe Harbor at Safe Harbor and delivered by Holtwood to the Baltimore Company.

• • •

[20010] TRIAL EXAMINER: Very well. On page 19461, lines 21 to 23, Respondents' counsel attempted to put a question to the [20011] witness which was ruled out by the Examiner at 19466, lines 3 and 4.

In consulting the transcript I find that most of the testimony in evidence that I thought would support a finding that this particular question was repetitious, went to the matter of what the contracts provided, and I have not yet been able to find in the transcript that there has been any testimony directly on the point of whether Baltimore Company rendered a bill to the railroad covering only the so-called sale to the Railroad in Maryland, as a matter of practice. You may put that question to the witness if you wish.

MR. MYSE: Well, may we have an answer to the question, then, as put on page 19461, lines 21 to 23, as follows: "Does Baltimore Company render a bill to the Railroad covering only the so-called sales to the Railroad in Maryland?"

THE WITNESS: No, the bill covers sales by Baltimore Company in Maryland and Holtwood Co. in Pennsylvania. There is one bill.

By MR. MYSE:

Q. Is there anything in the bill where it says anything about sales by Holtwood and Baltimore in both Pennsylvania and Maryland?

• • • •

[20012] THE WITNESS: I do not believe it does.

By Mr. Myse:

Q. As a matter of fact, this bill covered sales by "Electric Companies," is not that right?

* * *

The Witness: If it is stated as it is in the contract, that is what it would state, but I have not seen the bill or I do not recall having seen it recently enough to recall whether or not it includes what was just stated.

* * *

[20014] JOHN M. NEWLANDS.

* * *

Further Re-Direct Examination.

By Mr. Goldberg:

Q. You are the same Mr. Newlands who has previously appeared and been sworn? A. Yes, sir.

Q. Do you have Exhibit 421 before you? A. Yes, sir.

Q. Can you take Exhibit 421 and referring to each of the tables indicate the figures you supplied to Mr. Davis?

* * *

[20016] The Witness: Yes, I can do so.

By Mr. Goldberg:

Q. Will you do so, please? A. On Table I of Exhibit 421 I supplied all the figures in column 7, with the exception of the 100 per cent at the end.

Mr. Myse: Just so we understand what you mean by column 7, it is the column headed, "Total Service," right?

The Witness: Yes, sir.

Mr. Myse: With what exception?

The Witness: The percentage figure at the end. On Table II, I supplied all the figures in the Total Service

column, Column 7 and the basic figures by lines from which Item 2, "Depreciation Reserve," was calculated.

I supplied depreciation reserve figures by lines. Mr. Davis took those figures and accumulated them by companies and made an allocation of the reserve applicable to general property to those companies.

• • •

[20017] THE WITNESS: On Table III I supplied the basic figures for operating expenses taken from the company's books from which the figures in the Total Service column, Column 7 were derived.

[20018] TRIAL EXAMINER: In other words, you supplied everything in the "Total Service" column?

THE WITNESS: Yes, the underlying figures. Mr. Davis has made combinations to arrive at these figures here. On Table IV I supplied the basic figures from which Item 4 "Depreciation Expense" was calculated by Mr. Davis. In other words, there again I supplied the depreciation by lines and he accumulated them and allocated the general depreciation by companies.

• • •

[20019] THE WITNESS: The figures in Column 7 of "Total Service" of Table IV check directly or can be derived from exhibits that [20020] are already in the record, Mr. Dunn's Exhibits 392 and 393.

On Table V I supplied the basic figures for line 7 "Depreciation Reserve" and there again Mr. Davis made an allocation of the general depreciation and added it to my basic figures to arrive at the figures on this schedule. I also supplied the figures shown at line 18 "Depreciation Expense" and Mr. Davis made the same allocation.

• • •

By MR. GOLDBERG:

Q. Referring to Exhibit 422, can you point out, by going through the tables, the figures you supplied to Mr. Davis? A. Well, they are similar figures to those that

I explained or just illustrated in Exhibit 421. Do you want me to go through this exhibit?

Q. No, I think that answer is sufficient.

* * *

[20052] R. L. THOMAS.

* * *

DIRECT EXAMINATION (in Rebuttal).

By MR. REIBLICH:

* * *

[20064] Q. How have the parties construed the two-thirds and one-third apportionment since the Safe Harbor plant went into commercial operation in 1932? A. Until after the beginning of these hearings, the three parties (i. e., the Baltimore, Holtwood and Safe Harbor Companies) have all considered and have repeatedly and consistently stated that the Baltimore Company purchases two-thirds, and Holtwood Company one-third, of the Safe Harbor output, and conversely that Safe Harbor Company makes these *sales*.

Q. Was this true after, as well as before, Safe Harbor Company became a party to the Pennsylvania Railroad, Lancaster, Coatesville and York contracts? [20065] A. Yes, it was. The signing of these contracts by Safe Harbor Company made no difference in the situation. Both before and after Safe Harbor Company became a party to them Holtwood Company has sold the electrical energy to the customers at Lancaster, Coatesville and York, and has collected and retained the charges. The amounts of these charges became deductions in computing Holtwood Company's bill to Baltimore Company as provided in Article III of the 1931 agreement between Holtwood and Baltimore Companies. Likewise Holtwood Company has made the sales to the Pennsylvania Railroad in Pennsylvania.

* * *

[20070] Q. Was this idea of avoiding double taxation by the direct sale of energy by Safe Harbor Company to the Pennsylvania customers ever carried out? A. No, it was not. The fact is that it was decided not to attempt to avoid double taxation, as I shall explain later. From the beginning of commercial operation until [20071] the end of 1942, Safe Harbor Co. paid to the State of Pennsylvania the gross receipts tax on every dollar of revenue received from the sale of one-third of its output to Holtwood Co. and Holtwood Co. paid the gross receipts tax on the entire amounts paid by the Pennsylvania customers and by the Pennsylvania Railroad for power and energy delivered in Pennsylvania, with the single exception of the year 1932 in which Holtwood Company claimed certain exemptions. Effective January 1, 1943, an amendment to the Pennsylvania Gross Receipts Tax Law exempted from taxation

> "gross receipts derived from sale for resale of electric energy to persons, partnerships, associations, corporations or political subdivisions subject to the tax imposed by this act upon gross receipts derived from such resale . . ." (Pennsylvania Act of May 21, 1943, P. L. 334.)

Nevertheless, Safe Harbor Company was still required to pay the gross receipts tax on revenue from that portion of Holtwood Company's one-third share of Safe Harbor's output which was calculated to be resold by Holtwood Co. to Pennsylvania customers other than the Pennsylvania Railroad, since Holtwood Co. did not pay the tax on such sales, and Holtwood Co. has paid the tax on the Pennsylvania portion of revenues received from the Pennsylvania Railroad.

* * *

[20072] Q. Can you explain what happened with reference to the inter-company consideration of whether Safe Harbor should sell directly, or jointly with Holtwood, to the Pennsylvania customers. A. Yes, I can. The method of ac-

counting for energy and the decision that Safe Harbor Company would continue to sell its entire output to the Baltimore and Holtwood Companies were the result of joint study of the question over a period of years and of mutual agreement by Baltimore Company and Holtwood Company. When the Pennsylvania Railroad began the work of electrifying its lines in Pennsylvania the question of whether Safe Harbor Company should sell directly or jointly with Holtwood Company the supply to the Railroad in Pennsylvania was taken up specifically by Holtwood and Baltimore Companies as set forth in a memorandum dated March 3, 1937, by the Operating Committee provided for in the contracts between the Holtwood and Baltimore Companies and between the Safe Harbor, Holtwood and Baltimore Companies. It had not been necessary to decide the question prior to that time as [20073] all of the energy for the Pennsylvania Railroad electrification was delivered either in Maryland or the District of Columbia for the electrification of the main railroad line from Perryville, Maryland, to Washington, D. C., and was recognized as a sale by Baltimore Co. alone.

Q. Is this the memorandum to which you refer? A. It is.

MR. REIBLICH: I ask to have this marked Exhibit 470.

(Exhibit No. 470 is marked for Identification.)

By MR. REIBLICH:

Q. What conclusion was reached by the Operating Committee? A. This memorandum reveals that the idea of joint sale by Holtwood and Safe Harbor Companies to the Railroad in Pennsylvania was rejected by the Committee as too complicated. After considering the respective merits of sale directly by Safe Harbor Company or directly by Holtwood Company, the Operating Committee recommended that Holtwood Company should sell directly to the Pennsylvania Railroad all of the latter's requirements de-

livered under this contract in the State of Pennsylvania. In considering these plans, the Operating Committee referred to the proposed direct sale by Holtwood Company as being treated in "exactly the same manner as sales to Lancaster, York and Coatesville." The recommendations of the Operating Committee were approved by Mr. Walls, [20074] President of the Holtwood Co., and Mr. Wagner, President of the Baltimore Co. by an exchange of letters dated September 9, 1937, which letters have been introduced into evidence by the Holtwood Company in this case and have been identified as Exhibit No. 11.

Although the Operating Committee's memorandum was written primarily in connection with the Pennsylvania Railroad electrification, it also discusses the treatment of sales to other customers in Pennsylvania, pointing out that substantial savings in gross receipts taxes in Pennsylvania could be effected if the Safe Harbor Company made direct sales to the Pennsylvania Railroad and the other Pennsylvania customers. However, the Operating Committee said on page 5 of their memorandum: "Nevertheless the tax saving (equal in amount to the gross receipts tax on one-third of the revenue received from the Pennsylvania customers) has never been considered sufficient to justify contractual changes and complications resulting from direct sale by Safe Harbor Company."

* * *

[20076] Q. Prior to these hearings, have the sales of electric energy by Holtwood Company to its Pennsylvania customers ever been considered as joint sales by Holtwood Company and Safe Harbor Company? A. No, the sales have never been considered as joint sales, but recognition has been given to the fact that the energy for these sales comes from an integrated system consisting of the resources of the Baltimore, Holtwood and Safe Harbor Companies. Such recognition is found in the fuel rate adjustment clauses of the Pennsylvania Railroad and Coatesville [20077] contracts.

The fuel rate adjustment formula for the Pennsylvania Railroad is specified in the original 1931 Agreement with that Company, but the formula for the Coatesville contract was not developed until 1944. Both formulae are based on the premise that the energy supply includes the generation of the Holtwood and Safe Harbor Hydro Plants and of the Baltimore and Holtwood Steam Plants and adjust for the increased cost of coal in Baltimore in the proportion that the Baltimore and Holtwood steam generation bears to the total generation of the Holtwood, Baltimore and Safe Harbor Companies. (In the Coatesville contract allowance is also made for certain interchange operations.)

Q. If Safe Harbor Company had not been made a party to the contracts with Holtwood Company's Pennsylvania customers, would the accounting and operations of the Safe Harbor, Holtwood and Baltimore Companies have been any different than they have been? A. They would not. If Safe Harbor had not been named as a party to any of the Pennsylvania contracts, including the Pennsylvania Railroad, no change would have been necessary in any operations, statistical or accounting records, or sales reported to public agencies; and the revenue received, expenses, taxes paid and net income of all three parties would remain unchanged.

[20078] For example, in the initial drafts of the 1946 contract with the Metropolitan Edison Company as submitted to Baltimore Company by Holtwood Company, it was proposed that Safe Harbor Company should continue to be a party as in the preceding 1935 agreement. When Baltimore Company questioned whether taxes had been saved through Safe Harbor Company's being a party to the existing contract and pointed out that no power and energy was actually sold by Safe Harbor Company to Metropolitan Edison Company, Holtwood Company agreed to the omission of Safe Harbor Company as a party to the renewal contract. This omission has caused no changes

in operation, accounting or billing. The accounting and reports of the three power companies have been consistently on the basis that Safe Harbor disposes of its entire output to Baltimore and Holtwood Companies.

Q. Will you please explain this? A. In 1932, when the Safe Harbor plant began commercial operation, it became necessary for the Baltimore, Holtwood and Safe Harbor Companies to agree on a method of accounting for energy sales and purchases even though this determination did not affect the inter-company billings. In 1932 the Operating Committee worked out and adopted a form, identified in this case as Exhibit No. 143, for the monthly determination of energy sales. This form, entitled "Energy Purchased by Baltimore and Holtwood Companies from Safe Harbor Company and [20079] Energy Purchased by Baltimore Company from Holtwood Company" has been used by all three companies from July 1932 to October, 1946. Every month from July 1932 to October, 1946, the form has been made out by Holtwood Company and sent to Baltimore Company. All three companies have used these statistical reports, or the data therein, in reporting energy purchases and sales to the Federal Power Commission, the Public Service Commission of Maryland and the Public Utility Commission of Pennsylvania.

[20080] Q. Mr. Thomas, I show you a tabulation showing the annual kwh figures for 1944, 1945 and 1946. Is this the same form you just referred to? A. Yes, it is. The form itself, and the figures typed thereon for 1944 and 1945, were made up by Holtwood Company and sent to Baltimore Company. The figures for 1946 were entered on the form in ink by Baltimore Company. Holtwood Company has not yet issued this report for 1946.

MR. REIBLICH: May I have the document handed to the reporter marked for identification as Exhibit 471?

TRIAL EXAMINER: The document handed to the reporter may be marked Exhibit 471 for Identification.

(Exhibit 471 was marked for Identification.)

By Mr. Reiblich:

Q. Do you wish to comment on this form? A. Yes. One of the items on this form (No. 20) which was needed and has been used for reports to the regulatory authorities is captioned "Energy Purchased by Baltimore Company from Safe Harbor Company." It is computed as two-thirds of the Safe Harbor net metered kwh sendout less a computed allowance for line losses. The companion item (No. 21) is captioned "Energy Purchased by Holtwood Company from Safe Harbor Company." It is computed as one-third of the net metered kwh sendout at Safe Harbor.

When Safe Harbor Company became a party to Holtwood [20081] Company's contracts with the Pennsylvania customers no change was made in Items 20 and 21 of the form, or elsewhere.

* * *

[20094] Q. Mr. Thomas, at transcript page 908 Mr. Roland identified as Exhibit No. 37 a transmission map of Holtwood [20095] Company, No. 130463, which was filed with Holtwood Company's Form 12 report to the Federal Power Commission for 1944. What does the symbol designation on this map at Perryville and Conowingo, Maryland, show? A. At Perryville and Conowingo there appears a symbol "W-1" which is identified in the legend as "Point of Delivery for Account of Consolidated Gas Electric Light and Power Company of Baltimore."

Q. Mr. Spaulding has introduced a revision of Map No. 130463 dated January 15, 1945, identified in this case as Exhibit 353. What designation is shown at Perryville and Conowingo on this map? A. The symbol "V," shown on the revised map at Perryville and Conowingo, is identified in the legend as "Interconnection with The Pennsylvania Railroad Company."

Q. In testimony regarding the revised map Mr. Spaulding testified as follows (transcript page 16588, lines 21 through 24):

"Q. (By Mr. Sparks) Was such designation as shown on Exhibit 37 a misstatement of the facts?

"A. Not in all instances, but it was an oversimplified representation."

Do you agree with the changes made on the map and with Mr. Spaulding's reasons for changing the designations on the map? [20096] A. No, I do not. Perryville and Conowingo are points of delivery of electric energy by Holtwood Company to Baltimore Company, that is, Holtwood Company physically delivers energy to the Railroad for the account of Baltimore Company.

* * *

[20102] Q. In Exhibit 319, page 4, Mr. Zinder has made the following statements:

"Furthermore, the joint nature of many of the operations serves to very closely knit Penn Water into the whole interconnected system. Lifting Penn Water out of this position and treating it as a self-contained whole, while contrary to its manner of operation, is possible in connection with the determination of Penn Water's cost of service to Baltimore Company.

"* * * A review of the facilities of Penn Water reveals that while the operations involved over the facilities may be very complex, particularly contractually, the actual purpose and use of the facilities is comparatively simple with reference to the services to Baltimore."

Do you agree with these statements? A. No, I do not. Holtwood Company cannot be treated as a "self-contained whole" in connection with any allocation of cost of service to any of its customers, and "the actual purpose and use of the facilities" is not "comparatively simple" with reference to the services to Baltimore. I particularly take exception to Mr. Zinder's attempt to "lift out" from the rest of the system Holtwood Company's 25-cycle facilities.

Q. Will you explain briefly your reasons for this answer?

[20103] A. * * * Holtwood Company is dependent upon the transmission lines from Holtwood and Safe Harbor to Baltimore not only to dispose of its energy during high river flow, but to receive energy during periods of low flow. All of these transmission lines are two-way streets. Furthermore, energy flows from Holtwood to Baltimore on the 25-cycle transmission lines at the same time that 60-cycle energy is flowing back from Baltimore Company to Holtwood Company or its Pennsylvania customers by way of the transmission lines connecting Baltimore with Safe Harbor. The system is operated like a single system to obtain maximum overall economy. Energy originating at the plants of the several companies is commingled and is allowed to flow around the various loops and over the variout transmission lines in accordance with the requirements of system characteristics and operating economy. One of the objectives of the 1931 inter-company contracts (Items E and H in this proceeding), was to avoid the necessity of identifying the kilowatt hours flowing around the various loops and over the various transmission lines and of segregating them for billing purposes.

* * *

[20105] Q. In Exhibit 319, pages 13 and 14, Mr. Zinder allocates 92% of the investment in Holtwood 25-cycle generating plant and substation to Baltimore Company. Do you agree that such allocation is reasonable? A. No, I do not. An analysis of the use that is made of the 25-cycle power generated at Holtwood shows that in any allocation the generating plant, frequency changers and 25-cycle substation should be charged to the pool, as they are used in connection with pool operations for the benefit of all customers.

Q. Have you had charts prepared to illustrate in particular the use that is made of the 25-cycle Holtwood output? A. Yes.

[20106] Q. Are these the charts to which you refer? A. Yes.

MR. REIBLICH: I offer these documents, Mr. Examiner, and ask that they be marked for Identification.

TRIAL EXAMINER: The documents are marked Exhibit 472 for Identification.

(The documents referred to above were marked Exhibit 472 for Identification.)

By MR. REIBLICH:

Q. These charts cover the week of September 16 through September 22, 1946. Will you please explain why you chose that week? A. There are several reasons: (1) That week has already been referred to in the cross-examination of Mr. Spaulding at transcript p. 3628; (2) this week illustrates operation during fairly low river flow, although the flow was still more than three times the minimum; (3) this week's operation demonstrates the fact that Holtwood 25-cycle energy is indirectly supplied to 60-cycle Pennsylvania customers at other than high flow, contrary to what was implied by Mr. Myse's questions and Mr. Davis' answers at transcript p. 11,932; (4) this week's operation illustrates well the various ways in which Holtwood 25-cycle capacity is used for the Pennsylvania load.

Q. Will you please describe this exhibit? A. First I should like to say that the ordinates are [20107] in units of thousands of kilowatts and each small division represents 5,000 kw. Each small division on the horizontal scale represents an hour and 24 hours are shown for each day of the week. Certain hours are shaded red, green and blue for easy reference. The actual daily flow for each of the seven days is shown under the day and date. Sheet No. 1 and Sheet No. 2 of the exhibit graphically illustrate how Holtwood's 25-cycle capacity is used. Sheet No. 3 shows energy flow on individual lines and other data that are useful in explaining the disposition of the energy.

Q. Starting with curve 1 on Sheet No. 1 and working up, will you please explain each curve? A. Curve 1 on Sheet No. 1 shows the Holtwood hourly 25-cycle generation. This generation is fairly typical of the hydro generation during the high load period of the day. On Friday the heavy generation extending into the evening hours is due to the upswing in flow. It may be seen that the average daily flow increased to 7,600 c. f. s. on Saturday and then dropped off to 6,300 c. f. s. on the following day. The shaded red hour, 11 A. M. on Wednesday, was the weekly peak load hour on the Safe Harbor-Baltimore-Holtwood pool. For that hour the 25-cycle generation at Holtwood was 65,000 kw.

Q. Mr. Thomas, will you explain curve 2? A. Curve 2, which looks almost like a straight line, illustrates the first way in which Holtwood's 25-cycle capacity is used for Holtwood Company's Pennsylvania customers. [20108] This curve shows that part of the Holtwood 25-cycle capacity which is used directly for the Pennsylvania load. For the 11 o'clock hour indicated, 5,000 kw. were delivered to Lancaster.

Q. What does curve 3 represent? A. Curve 3 represents the operation of the frequency changers at Holtwood. For the hour indicated in red, 14,000 kw. were being converted from 25-cycle energy into 60-cycle energy for the Pennsylvania customers. This is the second way that Holtwood 25-cycle capacity can be used for the Pennsylvania customers. It might be well to notice at this point that the output of the Holtwood frequency changers in general follows that of the Baltimore frequency changers, shown on curve 5, but is much less, as the capacity of the Holtwood frequency changers is about 14,000 kw. whereas the frequency changers on curve 5 have a capacity of about 90,000 kw.

Q. What is the significance of curves 4, 5 and 6? A. Curve 4 shows 25-cycle energy sent down to Baltimore from

Holtwood and received at Highlandtown. A third way of using Holtwood 25-cycle capacity for the Pennsylvania customers is to transmit 25-cycle energy to Baltimore, convert it there to 60-cycle by use of Baltimore frequency changers and then return it to Holtwood Company over the 220 kv. circuits. For the week shown most of the 25-cycle energy so received (or its equivalent, since there is a commingling of 25-cycle steam generation at Baltimore with the energy received at Highlandtown [20109] from Holtwood) was converted into 60-cycle energy.

Curve 5 shows the conversion of 25-cycle energy to 60-cycle and vice versa, by means of the frequency changers in Baltimore. Again for the week shown, most of the energy so converted (or its equivalent, since there is a commingling of 60-cycle steam generation at Baltimore with 60-cycle converter output) was sent back to Holtwood Company by way of Safe Harbor. This return of energy at 60 cycles to Holtwood Company is shown by curve 6 labeled "Net 60-cycle from Maryland to Pennsylvania" (as indicated by the footnote this curve, in addition to being the net of the two 60-cycle 220 kv. lines, also includes the transfer of single-phase 25-cycle energy at Perryville and Conowingo. This single-phase system has been included with the 60-cycle system to eliminate any objection that might be raised concerning the small amount of 60-cycle power that may be sent to Safe Harbor and then sent down the Safe Harbor-Perryville transmission line and used on the Maryland Section of the Pennsylvania Railroad).

Q. What was the magnitude of such power flow as you have described for this third way of using Holtwood 25-cycle capacity for the Pennsylvania customers at the 11 o'clock hour on Wednesday, September 18, 1946? A. This hour is indicated by the shaded red line through curves 4, 5 and 6 on sheet No. 1. 43,000 kw. of Holtwood 25-cycle power was delivered to Baltimore, which delivery [20110] accounted for part of the 55,000 kw. that entered the Baltimore frequency changers and was converted into 60-cycle

power. Of the 55,000 kw. of power so converted, curve 5 shows that 51,000 kw. of 60-cycle power was delivered by Baltimore back to Holtwood Company over the 60-cycle circuits for Pennsylvania customers.

Q. What is the fourth way that the Pennsylvania customers use Holtwood's 25-cycle capacity? A. The fourth method of using Holtwood's 25-cycle capacity for the Pennsylvania customers is by transmitting Holtwood power to Baltimore and, without the necessity of conversion, exchanging it for 60-cycle steam generation. This method of using Holtwood 25-cycle capacity for the Pennsylvania customers is illustrated by the 8 A. M. hour on Tuesday, September 17, 1946. This is the first hour of 25-cycle generation on that day as shown in curve 1. This hour is identified by the green shading. Here, while there was 17,000 kw. delivered at Highlandtown, none was converted to 60-cycle power, but instead 113,000 kw. of Baltimore 60-cycle steam generation was delivered to Holtwood Company for its Pennsylvania customers as shown in curve 6.

Q. What is the fifth way that Holtwood's 25-cycle capacity is used for the Pennsylvania customers? A. The fifth method of using Holtwood's 25-cycle capacity for Holtwood Company's Pennsylvania customers is by Holtwood [2011] Company receiving part and at times all of Baltimore's two-thirds of Safe Harbor's 60-cycle output in exchange for 25-cycle power delivered at Highlandtown. Referring to curve 7 on Sheet No. 2, this is illustrated clearly at 8:00 P. M. on Saturday, September 21, 1946 (the hour shaded blue) where 34,000 kw. of 25-cycle power was delivered to Highlandtown (curve 1, Sheet No. 1) at which time there was no net flow of 60-cycle power between Maryland and Pennsylvania (curve 6, Sheet No. 1), but all of Baltimore Company's two-thirds of Safe Harbor was delivered to Holtwood Company for use for Pennsylvania customers.

Q. Is there any other way that Holtwood 25-cycle power is used? A. Yes. A sixth type of operation is where Holtwood Company delivers 25-cycle power to Bal-

timore, but does not receive an equal or greater amount of 60-cycle power back in return, either as backfeed from Baltimore or as diversion of Baltimore Company's two-thirds of Safe Harbor output. This is illustrated by curve 8 on Sheet No. 2, labeled "Baltimore Company's Net Purchases from Holtwood Company." As may be seen, there were only a few off-peak hours on Friday evening and on Sunday, when Baltimore Company received net power from Holtwood Company. On the peak hour of the week Baltimore Company received a net amount of power equal to minus 60,000 kw.

[20112] Q. What does curve 8 further indicate? A. This curve indicates that the amount of Baltimore Company's net purchase from Holtwood Company for the week in question was a large negative figure—i. e., Baltimore Company actually supplied a much larger amount of energy to Holtwood Company than Baltimore Company received from Holtwood Company. The hourly values in curve 8 are computed in the same manner as the monthly and annual figures computed by Holtwood Company and shown in Item 22 of the inter-company energy accounting statement, Exhibit 143 and Exhibit 471. For the month of September, 1946, as a whole the net purchase by Baltimore Company from Holtwood Company was also a large negative figure.

• • •

[20141] By Mr. Sturtevant:

Q. Mr. Thomas, Holtwood Company in its Form 12 report to the Federal Power Commission for 1945, Schedule 16, line 1-B shows the dependable hydro capacity of the Holtwood and Safe Harbor plants combined for 1945 as 295,000 kw.

[20142] Do you agree with this figure? A. No, sir; I believe it is entirely too high.

Q. What were the dependable hydro capacities of the Holtwood and Safe Harbor plants combined for the years 1944, 1945 and 1946? A. The actual dependable capaci-

ties as reported by Baltimore Co. in the so-called pool Form 12 report were, for 1944, 122,000 kw.; for 1945, 161,000 kw.; for 1946, 167,000 kw.

• • •

[20149] Q. Mr. Thomas, when the hearing was recessed yesterday afternoon, you had just testified with respect to dependable hydro capacity of the Holtwood and Safe Harbor plants. What do you mean by dependable hydro capacity? A. By dependable hydro capacity, I mean the dependable capacity as defined in paragraph 1-B of the instructions of Schedule 16 of the FPC Form 12 report.

• • •

[20150] Q. Mr. Thomas, is dependable hydro capacity the same thing as hydro capacity value? [20151] A. No, it is not, as Baltimore Company interprets that definition.

Q. What do you mean by the term "hydro capacity value"? A. By hydro capacity value I mean the amount of steam generating capacity which is replaced or rendered unnecessary in the system by the hydro supply.

Q. Will you explain the principal differences between dependable hydro capacity and hydro capacity value? A. Dependable hydro capacity, as I have defined it, is susceptible of reasonably exact determination and is largely independent of judgment.

On the other hand, the hydro capacity value involves consideration of various factors which are additive to what I might call the bare bones of dependable capacity under the most adverse flow conditions.

• • •

[20169] Q. Mr. Thomas, are there any specific technical objections to Mr. Watchorn's study which he has submitted in this proceeding? A. There are some. One is the uncertainty as to the definition of forced outages of steam plants. Another is that Mr. Watchorn used his own estimates for load shape which were based on a past year, I believe, 1941 instead of actual recent load shapes.

• • •

MR. SPARKS: Now I would like to make one other statement, Mr. Examiner.

This witness is in the habit of launching into a long discursive answer every time he is asked a question, and it prevents Respondents from making a proper objection and it has happened all morning.

I think Your Honor should direct the witness to make his answers responsive, and not to launch into long, expansive discussions and debates about the subject.

[20170] TRIAL EXAMINER: I think this: I think that Respondents' counsel's objection to the character of the answers is well taken.

MR. GOLDBERG: Of course I might observe, Mr. Examiner, that Respondent's counsel had no objection to their witnesses making the same type of answers on cross-examination.

TRIAL EXAMINER: I cannot go back into the case.

• • •

[20175] By MR. STURTEVANT:

Q. At transcript page 16,682, lines 19 to 21 Mr. Spalding said that Baltimore Company has no obligation in connection with any of the firm power obligations of Holtwood Company to its Pennsylvania customers.

[20176] At transcript page 16,669, line 23, Mr. Spalding said, "Baltimore Company is one of several suppliers of supplemental energy, but I do not agree that as a supplier it is in any different position, in fact, than any of the other several interchange customers of Penn Water and there is no actual burden to Baltimore Company in so doing". Do you agree with these statements?

• • •

[20178] THE WITNESS: No, I do not. Baltimore Company has definite obligations to Holtwood Company to enable it to supply its firm-power customers and the Pennsylvania

customers do not have such obligations. As suppliers Baltimore Company and the Pennsylvania customers are entirely different.

By Mr. Sturtevant:

Q. Mr. Thomas, does your answer relate to the capacity as well as backfeed? A. Yes. Baltimore has obligations to supply both capacity and backfeed.

Q. What are the Baltimore Company's obligations to supply capacity in connection with the firm power obligations for the Holtwood Company to its Pennsylvania customers? A. Baltimore Company is obligated to supply such capacity as is required to enable Holtwood Company to meet its firm-power [20179] obligations. As a result of the contracts and the overall economic set-up Baltimore Company has the same obligations in that respect that a single utility would have if a single utility owned and operated all the facilities of the Baltimore-Holtwood and Safe Harbor Companies.

Q. When you refer to the contracts, do you mean the contracts designated as Items E to I in this case? A. Yes.

Q. Now, Mr. Thomas, as to this capacity obligation, can you be more specific as to the basis of your statement as to Baltimore Company's contractual obligation? A. The obligation of Baltimore Company to supply capacity is the result of the over-all contractual set-up that was made in 1931 when Baltimore Company assumed the obligations that go with the purchasing of the entire output not required to meet other customers' needs under contracts that have to be approved by the Baltimore Company. Baltimore Company under that supplemental agreement which is Items H and I in this case, purchases the entire output of Holtwood Co. not required for customers under contracts approved by Baltimore Co.

* * *

[20180] The Witness: Article V of the contract provides that Holtwood Company cannot make an investment of

over $50,000 without obtaining the approval of Baltimore Company; that it cannot dispose of or alienate property without Baltimore Company's approval and Baltimore Company's approval is required under Article IV of Holtwood Company's agreements for the purchase or interchange of electric and hydroelectric power, or before making any substantial modification in existing contracts. The over-all effect of all of this is that Baltimore Co. necessarily has to stand behind the system.

When I say that Baltimore Company is obligated to provide capacity I did not mean to say that all of that capacity has to be in Baltimore. If Holtwood Company, with Baltimore Company's approval, installs capacity Baltimore Company pays all the fixed and operating expenses and therefore incurs all of the costs and expenses the same as if the capacity was put in Baltimore.

* * *

[20185] Q. Please state whether or not any of the generating capacity installed by Baltimore Company since 1931 was for the purpose of enabling Holtwood Company to meet its firm power obligations in Pennsylvania? A. Yes, it was.

* * *

[20191] Q. Article 6 of the 1927 contract between Baltimore Co. and Holtwood which is Item H in this record, reads as follows:

> "Upon request of Power, Electric will supply to Power steam generated energy in excess of Electric's own requirements up to the limit of its available generating capacity, provided, however, that Electric is not obligated to start up a station which would not otherwise be operated. For all such energy Power will be billed for the daily net amount of such backfeed at actual cost plus 10 per cent. The costs to be used [20192] are those reported in Electric's monthly production statement covering the month during which steam energy was furnished to Power."

Now are your statements as to Baltimore Company's contractual obligations in any way based on the provision of Article 6 which I have just read? A. No. That article is a dead letter. No billing has been carried out under the ten per cent provision since 1932, I believe. The provision that Electric--which I call Baltimore Co.—is not obligated to start up a station which would not otherwise be operated, is a completely dead letter, and until I heard it quoted in this hearing the other day I had forgotten it was in there.

When I got back to Baltimore I tried it out on Mr. Greer and Mr. Brunner and one or two others and none of them remembered that was in there. The fact is that we have started up the Pratt Street standby station without any reference to that article to supply firm load to the firm power load of the Baltimore-Pennsylvania customers' system at the time when it was not needed for interchange. The station has been started up at other times when it was primarily for interchange.

Q. Now, did that article become a dead letter prior to or subsequent to the execution of the 1931 supplemental agreement?

* * *

[20193] THE WITNESS: Subsequent to the 1931 contract.

By MR. STURTEVANT:

Q. Why did it become a dead letter subsequent to the execution of the 1931 supplemental contract? A. Because those contracts gave Baltimore Company the obligation which I have previously explained to back up the Holtwood system.

* * *

[20325] By MR. REIBLICH:

Q. Mr. Thomas, at page 20058 of the transcript, you were asked a question, and I quote:

"Is Safe Harbor Company a party to certain contracts other than the contract with Baltimore Com-

pany and Holtwood Company identified as Items E, F and G?"

And you answered, "Yes, it is."
To what contracts were you referring?

• • •

[20331] THE WITNESS: I was referring to the contracts with Pennsylvania Power and Light Company, Exhibit 76, I think; Philadelphia Electric Company, Exhibit 73, and Pennsylvania Railroad Company, Exhibit 10.

By MR. REIBLICH:

Q. Does the Safe Harbor Company sell any electric energy under these contracts?

MR. SPARKS: Now, I object to that, Mr. Examiner. That is the type of cumulative testimony that we argued about all day yesterday, Mr. Examiner.

TRIAL EXAMINER: Just a minute.

MR. REIBLICH: Mr. Examiner, it is a perfectly proper question. It was caused as a result of testimony that was stricken out on the pages to which we have already referred, and I do not see that it calls for an extended answer. It will not have an extended answer, but it certainly is a matter with reference to which we are entitled to have this witness testify in the record.

TRIAL EXAMINER: May I have the question?

(Question read.)

MR. REIBLICH: We are certainly a party in interest directly affected on that point.

MR. SPARKS: I think I can point out, Mr. Examiner, [20332] very simply, what it is. In the question beginning at line 16 on page 20058 there were certain quotations—you will see them at the bottom of the page. Then the question was: "Do you agree with

those statements?" which are in quotes. The witness said, "Yes, I do." And Your Honor struck that out.

TRIAL EXAMINER: The reason that answer was stricken was because that is not the proper way to introduce testimony. If the witness knows, he is entitled to say, and if he does know there is no necessity for referring to any other source for information.

MR. SPARKS: But it is purely cumulative, Mr. Examiner. That was one of the points in the motion to strike those portions all the way through.

TRIAL EXAMINER: Well, in view of the importance of the issue involved, the Examiner will permit the question to be put. Answer the question.

• • •

THE WITNESS: No, it does not. These contracts involve no rates or charges for the sale or transportation of energy by Safe Harbor Company.

By MR. REIBLICH:

Q. Referring to page 20067 of the transcript, Holtwood Company has introduced in this proceeding as Exhibit No. 163 [20333] an order of the Public Service Commission of Pennsylvania dated January 10, 1933, authorizing the Safe Harbor Water Power Corporation to sell electric energy or power to certain utility companies in Pennsylvania.

Why was this authority obtained?

MR. SPARKS: Now, just a minute, Mr. Examiner. I object to that. If you will look at the bottom of page 20067, beginning with line 20, that very answer which would be called for by this question, I assume, was stricken out.

TRIAL EXAMINER: Well, the Examiner made a statement in connection with its reintroduction in evidence. The objection is overruled.

THE WITNESS: This authority was obtained so that Safe Harbor Company might enter into Holtwood Company's contracts with the Pennsylvania customers in order to avoid double taxation under the Pennsylvania gross receipts tax law, and to simplify accounting and operating arrangements.

MR. SPARKS: Now, Mr. Examiner, I move to strike it. It is obvious that they are getting back in exactly what you struck out, because the witness read word for word from the transcript beginning at line 20 and ending at line 24 of page 20067.

TRIAL EXAMINER: The motion to strike is denied. The reason for the other ruling was that the question at line 16 at 20065 was no predicate for whatever might have been left [20334] in the answer if the sustaining of the motion to strike had been qualified to save a part of the answer which the witness has now restated.

By MR. REIBLICH:

Q. Has Safe Harbor Company ever exercised this authority?

MR. SPARKS: Just a minute. May I ask what the purpose of that question is?

MR. REIBLICH: To reinstate the rest of the answer, Mr. Examiner, which is related to the preceding question that I have just asked.

MR. SPARKS: May I ask counsel where it appears in the transcript?

MR. REIBLICH: At the bottom of page 20067.

MR. SPARKS: I do not see anything there in the answer relating to the question as to whether Safe Harbor—oh, I see it is at the bottom of the page beginning at line 24. I object to it for the same reason, Mr. Examiner, that the question calls for an exact answer apparently that is at the bottom of page 20067 beginning at line 24.

TRIAL EXAMINER: For the reasons previously stated by the Examiner the objection is overruled.

* * *

THE WITNESS: No, it has not.

* * *

[20711] GEORGE W. SPAULDING.

* * *

DIRECT EXAMINATION.

By MR. SPARKS:

* * *

[20772] Q. You are the same G. W. Spaulding who has previously been sworn and who has testified in this proceeding, are you? A. I am.

Q. At page 19876, line 6, Mr. Davis states that "emergency energy would be in the nature of firm power and if 21 million of that 72 were in the nature of firm power, by being emergency energy, it would change the allocation on the principle that I have used there, as a benefit to Metropolitan Edison and to the economy interchange." Mr. Spaulding, is it correct to consider emergency energy as firm energy?

* * *

[20774] THE WITNESS: No.

By MR. SPARKS:

Q. Is the term "emergency energy" used in interchange transactions only when the purchasing company has no alternate source of obtaining interchange energy?

* * *

THE WITNESS: No, interchange energy is frequently accounted for as "emergency energy" under our interchange contracts in connection with various kinds of interchange transactions, and is not limited to those transac-

tions where the receiving company had no other alternate source of supply.

• • •

[20775] Q. Mr. Spaulding, in 1946 did Metropolitan Edison have other alternate sources of energy available to it during those hours when Penn Water reported emergency energy was supplied to Metropolitan Edison?

• • •

THE WITNESS: Yes, they only obtained it from Penn Water because it was available from Penn Water at a lower cost than from any of their other several available sources.

By MR. SPARKS:

Q. Was the 21,951,000 kwh which was accounted for as emergency energy in 1946 transmitted by Penn Water to Metropolitan Edison Company over the Holtwood-Violet Hill transmission lines?

• • •

[20776] THE WITNESS: No, a substantial part of such energy was transmitted over the Safe Harbor-Harrisburg tie to the Pennsylvania Power & Light Company.

• • •

[20777] Q. In connection with Mr. Thomas' testimony relating to the history and development leading up to the contractual apportionment of Safe Harbor output, as he called it, he testified at page 20061, line 11, that the load and revenue studies indicated that, if Baltimore Company purchased part of Safe Harbor output and Holtwood Company the remainder, about the most Holtwood Company could risk taking was about one-sixth. Is it a fact that the load estimates made in 1930 of the future requirements of the Pennsylvania customers were materially different from the loads which have actually been experienced?

• • •

THE WITNESS: No, the actual loads we have been experiencing are not materially different from those estimated in 1930.

By Mr. Sparks:

Q. Mr. Spaulding, at page 20076, Mr. Thomas testified that the fuel rate adjustment clause of the Coatesville contract was based on the premise that the energy supply included generation of the Baltimore steam plants which was a recognition that the energy for these sales came in part from the resources of Baltimore Company. Is this testimony of Mr. Thomas correct? A. No. The Coatesville fuel rate adjustment clause was not a recognition that the energy came in part from the resources of Baltimore Company. The fuel rate adjustment formula [20778] used in the Coatesville Power Supply Contract was merely lifted out of the Railroad Contract and modified in certain respects. The adjusted formula was used because it was found, after study, that it would provide an adjustment which would conform with variations in the operating expenses of Penn Water and Safe Harbor.

[20779] Q. Mr. Spaulding, at page 20078, Mr. Thomas testified that when the initial drafts of the 1946 contract with Metropolitan Edison Co. were submitted to Baltimore Company, in which it was proposed that Safe Harbor Company would continue to be a party, Baltimore Company questioned whether taxes had been saved through Safe Harbor Company being a party to the existing contract, and pointed out that no power and energy were actually sold by Safe Harbor Company to Metropolitan Edison Company, whereupon "Holtwood Company agreed to the omission of Safe Harbor Company as a party to the renewal contract." Is this a correct statement? A. It is not a correct statement.

Q. Will you please state what the facts were? A. An early draft of a proposed contract with Metropolitan Edison Company was submitted to Baltimore Company for their comment on July 17, 1945. In this draft Safe Harbor was a joint party in all respects with Holtwood Company in connection with the supply to Metropolitan Edison Company. Under date of August 3, 1945, Balti-

more Company, through Mr. Greer, addressed a memorandum to me as a member of the Operating Committee commenting upon this proposed draft of contract with Metropolitan Edison Company. There were five comments in this memorandum respecting this early draft, but there were no comments relating to Safe Harbor's joint participation or suggestions that it should not be a party to the proposed contract. On October 19, [20780] 1945, I submitted to Mr. Greer, a revision of the early draft of this Metropolitan Edison Contract, this draft being dated October 18, 1945. This draft did not contain Safe Harbor as a joint or participating party. During the interval between August 3 and October 19, 1945, there were no discussions with Baltimore Company about this proposed contract, other than relating to progress.

On October 27, I had a long discussion with Messrs. R. T. Greer and R. L. Thomas regarding this Metropolitan Edison Contract at which time many features and details were discussed. It was at this conference that Baltimore Company particularly urged certain further changes in this agreement.

These matters related to Baltimore's objection to the tax clause provision, to the fuel rate adjustment provision, and to the wording of the regulatory approval clause. Baltimore Company at no time suggested, or contended that Safe Harbor should or should not be a party to the Metropolitan Edison Contract. That decision was made solely between Penn Water and Metropolitan Edison Company.

Q. At page 20119, line 16, Mr. Thomas testified that your Exhibit 361 implied a relationship which did not exist between Baltimore Company's 25 cycle peak load and Penn Water's monthly 25 cycle peak deliveries at Highlandtown, because the data shown on your Exhibit 361 for each month were not coincident. Does the fact that Baltimore Company's [20781] 25 cycle load requirements and the 25 cycle peak deliveries for each month do not occur on the same hour in any way affect your testimony relating to Exhibit

361? A. No, it does not. In connection with my testimony I recognize that there is not always a coincidence of the monthly peak deliveries of 25 cycle service to Baltimore Company at Highlandtown with Baltimore Company's maximum 25 cycle system requirements. While the magnitude of the daily 25 cycle peak varies, had I shown on Exhibit 361 the actual deliveries at Highlandtown on the hour of the 25 cycle monthly peak requirements in Baltimore, this new curve would lie generally parallel to the peak delivery curve and slightly below it.

Q. Mr. Spaulding, is there a relationship between the 25 cycle delivery at Highlandtown and Baltimore Company's 25 cycle load? A. Yes, there is and it is not the fortuitous result of the flow of the Susquehanna River or the fact that a large part of the output has to go to Baltimore, that the deliveries at Highlandtown are scheduled in the present manner; rather it is because Penn Water's system was planned that way and is operated that way in order that Baltimore Company's own requirements may be delivered to it at the frequency and at the geographic location in Baltimore City where it is most useful to Baltimore Company.

* * *

[20782] Q. Does Holtwood Company at all times have to transmit a large part of its Holtwood hydro output to Baltimore Company? A. No, during the larger part of the year, Holtwood Company has an option as to the proportion of its 25 and 60 cycle hydro generation at Holtwood and as to its deliveries at Highlandtown and to its other customers. Penn Water's day to day choice of generation is in large part in consideration of Baltimore Company's 25 cycle requirements and in part for overall system economy. Baltimore's own 25 cycle generating capacity is the highest cost and most inefficient capacity operating on the system and Baltimore naturally desires to restrict its operation to the maximum extent possible.

* * *

[20784] Q. Mr. Spaulding, does Baltimore restrict its operation to the maximum extent possible?

• • •

THE WITNESS: As a member of the Operating Committee and one who considers those matters with the operating people [20785] I know that Baltimore plans their operation in such a way as to restrict the operation of their 25 cycle capacity to a minimum.

MR. GOLDBERG: May I have the question and answer?

(Record read.)

THE WITNESS: By that, Mr. Examiner, I mean that they endeavor to keep their 25 cycle capacity shut down and to generate a minimum amount of energy with such capacity.

By MR. SPARKS:

Q. At page 20120, Mr. Thomas testified that Baltimore has 145,000 kw of 25 cycle generating capacity and about 70,000 kw frequency changer capacity, which capacity is far in excess of Baltimore Company's 25 cycle system peak. Could Baltimore Company supply its own 25 cycle system requirements without the assistance of 25 cycle service from Holtwood delivered at Highlandtown? A. No, it could not. Baltimore Company's 25 cycle distribution system was not provided to carry its 25 cycle load requirements without the assistance of capacity, energy and other electric services supplied by Penn Water at Highlandtown. Without Penn Water's services, Baltimore would be unable to maintain voltage or provide the expected degree of service reliability to its 25 cycle industrial customers.

• • •

[20787] Q. Mr. Spaulding, at page 20143, Mr. Thomas referred to the "Pool Report for the Combined PW-SH-Baltimore-Bethlehem Steel and Washington System" for 1946 filed with the Federal Power Commission by Balti-

more Company. Do you agree that the data shown and the statements accompanying Schedule 16 of this pool report are correct? A. No, I do not.

Q. Has Penn Water advised Baltimore Co. that it does not agree with this pool report? A. Yes, by letter dated June 20, 1947, and filed with [20788] the Federal Power Commission, as a part of the Penn Water-Safe Harbor System, Form 12 report for 1946.

Q. Did Penn Water or Safe Harbor participate in the preparation of this pool report? A. No, neither Penn Water nor Safe Harbor participated in nor were they consulted in connection with the preparation of this pool report by Baltimore Company.

Q. At page 20158, line 15, Mr. Thomas testified in respect to the valuation of drawdown as a capacity value of the hydro plants, that the operating men shun the idea of depending on drawdown because they do not want to get caught with a low pond. Will you state whether, notwithstanding Mr. Thomas' statement, the operating executives of Baltimore Co. did recognize and rely on such additional value of hydro capacity? A. Yes, Baltimore Co.'s management has recognized and relied upon the value of drawdown through the years, up to and including 1941, both in connection with contractual negotiations and renewals and in the evaluation of hydro service for all purposes.

Q. Has Baltimore Company ever indicated to the Federal Power Commission that it relied upon hydro capacity in excess of that available under most adverse river flow conditions experienced in each calendar month? A. Yes, under date of February 27, 1941, Baltimore Company wrote the Commission and therein stated that the [20789] available hydro capacity for the greater part of the time was equal to or greater than the amount of hydro capacity which I have used in Exhibits 35 and 378; and further stated that in the peak load season of November and December, the potential hydro capacity in nine out of ten years has been equal to or greater than the amount of dependable hydro capacity which I have used in Exhibits 35 and 378.

MR. SPARKS: At this time may the two letters which Mr. Spaulding just referred to be identified with the appropriate exhibit number?

TRIAL EXAMINER: The witness has referred to only one, has he not?

MR. SPARKS: Yes, sir. We have attached to the letter to which he has referred also the letter from the Federal Power Commission to Consolidated Gas Electric Light and Power Company requesting the data which was given in the letter to which Mr. Spaulding referred.

Now, we attached it merely for convenience, but we do not insist on the letter of the Federal Power Commission going in. We thought it would be proper.

TRIAL EXAMINER: The two letters are stapled together?

MR. SPARKS: Yes, sir.

TRIAL EXAMINER: The document handed the reporter may be marked Exhibit 500 for Identification.

(Exhibit No. 500 is marked for Identification.)

* * *

[20790] Q. I hand you the document which has been marked Exhibit 500 and ask you if the first letter which is part of that exhibit, and which is dated January 9, 1941, is a copy of a letter addressed to the Consolidated Gas Electric Light and Power Company by Leland Olds, Chairman, F. P. C.? A. Yes.

Q. I ask you whether the second letter to which are attached two tabulations, and which is dated February 27, 1941, and signed by F. E. Ricketts, Vice President, addressed to the Federal Power Commission, is the letter to which you [20791] have just referred? A. It is.

Q. Has Baltimore Co. ever reported to the Federal Power Commission a net dependable capacity available from the Safe Harbor and Holtwood Developments in ex-

cess of the figure testified to by Mr. Thomas and developed in his Exhibit 477? A. Yes, under date of February 10, 1942, Mr. R. T. Greer wrote to Mr. A. J. Kohler, who was the Senior Engineer in the Federal Power Commission's Baltimore Office at that time, advising them that after the adoption of certain changes in reporting capability of generating plants without deduction for station uses or transmission losses, the "net dependable capacity available from system hydro plants" would be 265,000 kw. This letter confirmed discussions with the Federal Power Commission held prior to the introduction of "Eastern War Time" and before the system load shapes were affected by the extended around-the-clock efforts in producing war materials.

MR. SPARKS: May we have marked as Exhibit 501 a three-page letter dated February 10, 1942, or rather a copy of a three-page letter addressed to Mr. A. J. Kohler, Associate Engineer, Federal Power Commission, and signed R. T. Greer, Director, Inter-System Power Utilization Bureau.

TRIAL EXAMINER: The document referred to is marked Exhibit 501 for Identification.

(Exhibit No. 501 is marked for Identification.)

* * *

[20793] Q. Mr. Spaulding, in your last answer before the mid-afternoon recess you referred to a letter from Mr. R. T. Greer to Mr. A. J. Kohler dated February 10, 1942.

I show you a document consisting of three pages, which has been marked Exhibit 501, and ask you if Exhibit 501 is the document to which you there referred? A. It is.

Q. At page 20168, line 2, Mr. Thomas referred to Mr. Watchorn's method of determining dependable hydro capacity by applying the theory of probability, and stated "It was not revealed to Baltimore Company until it was filed in this case although there were repeated discussions of hydro capacity [20794] value over the last two or three years." Is this a correct statement? A. It is not. Balti-

more Co., on several occasions during the spring and summer of 1946, discussed the capacity value of hydro with us. Mr. Thomas, on one occasion stated in effect that we must have used a "Probability Method" to get our dependable capacity figure of 295,000 kw, and I remarked to him that such an approach certainly was not new to him because he had at one time advocated such a method. His reply was to the effect that his people would never accept our figure however it was determined.

* * *

[20796] Q. Did Penn Water at any time offer to show Baltimore Co. Mr. Watchorn's determination of dependable hydro capacity using the theory of probability? A. Yes, at my direction Mr. Watchorn and an associate went to Mr. Greer's office to discuss this matter with Baltimore Company's representatives in connection with the 1945 [20797] pool report on FPC Form 12 early in 1946. My instructions to my associates were to give them a copy and explain in detail the derivation of the 295,000 kw. My associates reported to me after the conference that Baltimore Company's representatives raised no question as to our derivation of 295,000 kilowatts of dependable capacity.

Q. Mr. Spaulding, referring to the testimony beginning at line 24 of page 20,178 and continuing on page 20,179, Mr. Thomas states that Baltimore Co. is obligated to supply such capacity as is required to enable Holtwood Co. to meet its firm power obligations. He also states that as the result of the contracts and the over-all economic set-up, Baltimore Company has the same obligations in that respect as a single utility would have if a single utility owned and operated all the facilities of Baltimore, Holtwood and Safe Harbor Companies. Is Mr. Thomas' statement a fact? A. No.

Q. At page 20,185, Mr. Thomas testified that the "Generating capacity installed by Baltimore Company since 1931 was for the purpose of enabling Holtwood Company to meet its firm power obligations in Pennsylvania." Is that a cor-

rect statement? A. No, it is not, nor is it in accord with Baltimore's repeated statements through the years that they were the residual receiver under the hydro contracts, a position [20798] which they maintained up to these proceedings.

* * *

[20799] Q. Why do you say Mr. Thomas' statement is not correct? A. As the requirements of the Pennsylvania customers have increased since 1931, the capacity, energy and other electric service requirements of these customers have been met by Penn Water or by Penn Water and Safe Harbor with the result that less capacity and energy services are available for the use of [20800] Baltimore Company. Through the years, Penn Water and Baltimore Company have always recognized that this growth in Pennsylvania customer loads required Baltimore Company to provide additional capacity in Baltimore, in part due to growth in Baltimore's own system load and in part to replace the capacity services no longer available to Baltimore because of the increased requirements of the Hydro Companies' Pennsylvania customers.

Q. At page 20,192, Mr. Thomas testified that Article 6 of the 1927 Agreement is a "dead letter" and became a "dead letter" subsequent to the execution of the 1931 Supplemental Agreement. Prior to the time Mr. Thomas made that statement, had Baltimore Company ever to your knowledge taken the position in connection with Article 6 of the 1927 contract that it was no longer in effect? A. No.

Q. Subsequent to 1931, have Baltimore Company and Penn Water given consideration to the need for billing for backfeed under Article 6 of the 1927 Agreement? A. Yes, they have.

Q. In what connection? A. In September, 1941 the Operating Committee recognized that there had been a net amount of monthly backfeed received by Penn Water from Baltimore Company for the month of August, 1941.

[20801] After consideration, the Operating Committee, consisting of Mr. F. E. Ricketts and myself, went to Mr. E. M. Sturtevant, counsel for Baltimore Company, and discussed this matter of billing under Article 6.

Mr. Sturtevant advised the Operating Committee that Baltimore Co. need not bill Holtwood Company for net backfeed in August, 1941, because the effect of such billing on either Baltimore Co. or Penn Water would be unimportant and that no other parties would be affected. Based on Mr. Sturtevant's opinion, the Operating Committee agreed there would be no formal billing for the net monthly backfeed in August 1941. In those discussions between Mr. Sturtevant and the Operating Committee, neither Mr. Sturtevant nor either member of the Operating Committee indicated that Article 6 of the 1927 contract was no longer in effect.

Q. Are there any provisions in any of the contracts between Baltimore Company and Penn Water which provide for any operating responsibility of Baltimore Company to provide electric energy to Penn Water, other than whatever operating responsibility may be provided in Article 6 of the 1927 Agreement?

• • •

[20803] THE WITNESS: No, there are none.

TRIAL EXAMINER: Now, you are testifying there upon the basis of your knowledge of the operations conducted by the Respondents under those contracts?

THE WITNESS: Yes, sir, I am.

• • •

[20804] Q. Mr. Spaulding, is Mr. Thomas on record as stating that this Article 6 is still in force and effect? A. Yes, he is. In a letter dated November 2, 1933, addressed to Mr. George T. Hambright, re "Back-feed Steam", he stated as follows:

"Backfeed steam is purchased by Holtwood Company from Baltimore Company under the following Ar-

ticle 6 of the power agreement of December 31, 1927 between the Baltimore and Holtwood Companies (in this agreement 'Electric' means Consolidated Gas Electric Light and Power Company of Baltimore and 'Power' means Pennsylvania Water & Power Company):

"'*Steam Energy Purchased*—Upon request of Power, Electric will supply to Power steam generated energy in excess of Electric's own requirements up to the limit of its available generating capacity, provided, however, that Electric is not obligated to start up a station which would not otherwise be operated. For all such energy Power will be billed for the daily net amount of such backfeed at actual costs plus ten per cent (10%). The costs to be used are those reported on Electric's monthly production statement covering [20805] the month during which steam energy was furnished to Power.'

"This article still is in full force and effect because the Supplemental Agreement of June 1, 1931 did not modify this provision and specifically reaffirmed all provisions of the 1927 agreement not inconsistent with the 1931 Supplement."

Q. Mr. Spaulding, beginning at line 20 of page 20,193 and continuing on to page 20,194, Mr. Thomas gave as one of his reasons why he considered the results of your Exhibits 35 and 378 incorrect and without merit, that your exhibits were based on the combination of Holtwood and Safe Harbor and, therefore, do not have value in determining an allocation as between Holtwood and Safe Harbor. Have Baltimore and Penn Water ever considered or attempted to determine an allocation between Holtwood and Safe Harbor? A. No, Baltimore Co. and Penn Water have always considered Penn Water and Safe Harbor as a single operating unit for all purposes of determin-

ing or evaluating the service from these hydro companies to Baltimore Company.

* * *

[20814] CROSS-EXAMINATION.

By MR. GOLDBERG:

* * *

[20836] Q. Now, then, you state at transcript 20,782 that Penn Water's day to day choice of generation is in large part in consideration of Baltimore Company's 25 cycle requirements and in part for over-all system economy.

Can you be specific and tell us what "large part" means? Is it 70 per cent, or what figure? A. No, I don't believe I can put an evaluation on that, Mr. Goldberg, as a percentage.

Q. Can you put any type of an evaluation on it other than the phrase you used? A. Well, it happens that in supplying Baltimore's 25-cycle requirements by Holtwood hydro generation, it is assisting in the over-all system economy, so that I cannot differentiate between that part of the time when the choice is made for 25-cycle requirements and that part of the time that it is made solely for over-all system economy.

Q. Does your testimony mean that Baltimore Company [20837] could not at any time supply its own 25-cycle system requirements without 25-cycle service from Penn Water at Highlandtown? A. No, indeed.

Q. Under what circumstances, then, would you say that Baltimore Company could not supply its own 25-cycle system requirements without 25-cycle service from Penn Water at Highlandtown? A. When those requirements are of a magnitude such as is experienced during the daytime hours when industrial plants are operating. I did not mean to imply that they could not get along without services during the week-ends or during the midnight hours, although even

during those hours there is frequent demand on us for voltage regulation and power factor cooperation.

• • •

Q. Do you limit your testimony regarding the needed assistance of Penn Water's 25-cycle service at Highlandtown to maintenance of voltage or expected degree of service reliability to the industrial customers?

• • •

[20838] THE WITNESS: No, I did not intend to so limit it.

By MR. GOLDBERG:

Q. But speaking in those terms you intended to include energy services as well, is that right? A. Energy and capacity services.

Q. Can you please explain for us, particularly for me, what you mean by "expected degree of service reliability"? A. If there were no 25-cycle services delivered at Highlandtown, Baltimore's 25-cycle distribution system would not have sufficient capacity to meet the requirements of its customers during the higher load periods of the 25-cycle system with anywhere near the degree of reserve cable capacity, transformer capacity and otherwise, to assure continuity of service to those customers, without services from Holtwood.

A few years ago they did not even have cable capacity enough to meet their peak requirements, let alone have cable reserves. I haven't checked that matter in the last few years but there hasn't been much change in load and there has been no additional cable or transformer capacity installed so that I would expect the situation to be about the same with respect to that 25-cycle system.

Q. Then if I understand your testimony you mean that Consolidated might very well fail to meet the demands of its industrial customers if it was unable to secure from Penn Water the 25-cycle services at Highlandtown, is that it? [20839] A. That is right, during certain portions of the load cycle.

Q. What were those portions of the load cycle again? A. During the on-peak periods, roughly from 8 or 9 o'clock in the morning until 5 or 6 o'clock at night.

• • •

[20841] Q. Here is my difficulty, Mr. Spaulding. I thought it peculiar that you should have stopped with the year 1941. Now then, that leaves a gap, 1942 to 1943—let's take that gap because that is before this hearing started. In that period of time, 1942 to 1943, did Baltimore Company's management recognize and rely upon the value of drawdown? A. I am not in a position to know what the management [20842] recognized and relied upon after the spring of 1942, other than statements made to me by certain officers of Baltimore Company in which they professed that their change in reporting the value of drawdown did not change their reliance upon the actual conditions, and that the change was only being made during the war years when there was a marked change in load shape and when there was the uncertainty of how much additional load might be imposed on the system in the war effort by OWU and others.

I had been under the impression during that time that there was no change on their part, but certainly in their statements to the regulatory bodies—and by regulatory bodies I include the Federal Power Commission and OWU who was, in a way, a regulatory body during the war years—they placed less emphasis or, I should like to say, they deemphasized the value of drawndown, and for a very good reason during the war years, but they did not go back, as they had professed they would after the war was over, and give it the same recognition that they had given prior to the spring of 1942.

Now, what they had in their mind at that time I, of course, am not in a position to state.

Q. Is this the fact, that you cannot state whether or not Baltimore Company's management recognized and relied upon the value of drawndown during the period 1942

to 1943, inclusive? A. They told me one thing and they reported something [20843] else to the Government agencies. Therefore I don't know the degree to which they relied upon it.

Q. You cannot answer my question as to their reliance, then, in those years upon the value of drawdown, is that right? A. That is right.

Q. And that applies, does it not, to 1944, 1945 and 1946? A. I would say that situation did not change in 1944 and in 1945 and 1946 we were approaching the present proceedings and they did not change back to their former reliance upon it, so far as their published and formal statements were concerned to the regulatory agencies.

* * *

[20853] Q. Referring to Tabulation No. 1 which is attached to Consolidated's response, which is a part of Exhibit 500, it is there stated, is it not, that the values are based, in Columns 3 and 4, on "the present load shape," namely, 1941, isn't that so? A. It is.

Q. And is it your statement that your 295,000 Kw. is directly comparable to the values reported by Consolidated in that Tabulation No. 1 I have referred to, namely, Columns 3 and 4, having in mind the load shape basis for the values reported in Exhibit 500? A. No, they are not directly comparable.

Q. You state in your testimony regarding Exhibit 500 that Baltimore Company has indicated to the Federal Power [20854] Commission that it relied upon hydro capacity in excess of that available under most adverse river flow conditions experienced in each calendar year month. Now then, referring to Consolidated's response, which is a part of Exhibit 500, where does Consolidated state that it relies on those capacities? A. I think it is implied by the entire letter.

Q. You get it by implication, is that it? A. Yes.

Q. Having in mind that Consolidated in its answer to the Commission, which is a part of Exhibit 500, stated on

page 2 of its response that "These monthly hydro capacity figures are not on the same basis as that which is used to determine requirements for capacity installation and which is reported on FPC Form 64 in connection with the annual peak," would you say that your 295,000 Kw. is likewise not on the same basis as that which is used to determine requirements for capacity installation?

* * *

THE WITNESS: No, I would not.

By MR. GOLDBERG:

Q. Then if I understand that testimony your 295,000 Kw., you are saying, is on the basis of use to determine [20855] requirements for capacity installation? A. No, I did not say that, but I would not agree that likewise it is the same as the quotation on page 2, and that is the reason I answered as I did.

* * *

[20866] Q. Mr. Spaulding, will you refer to transcript 20797? At that point your attention is called to certain testimony of Mr. Thomas at line 24 of page 20178, which continues through page 20179, and you are asked whether Mr. Thomas' statement is a fact. You replied that it is not.

Will you please tell us why not?

* * *

A. Because although the facilities, including generating and [20867] transmission facilities of Baltimore, Holtwood and Safe Harbor are coordinated, each of those companies have certain contractual arrangements with others which are quite independent of such coordination, and because each of those companies are separate corporate identities, and in the case of Baltimore and Penn Water has its equity control in the hands of the public and not in the hands of the other company.

* * *

[20872] TRIAL EXAMINER: Have you made any determination in your own mind as to whether Baltimore's com-

mitments on other contracts are of such an extent that it would not enable Baltimore to meet any claimed obligations to supply capacity required to enable Holtwood to meet its firm power obligations if the claim were made under contracts E to I?

THE WITNESS: No, I am not testifying as to whether there are other obligations which wouldn't permit it; but rather they don't have any obligations under E, F and G, H and I to do so.

• • •

[20874] Q. It is by virtue of the coordination of Penn Water's operations that Penn Water was able to enter into its contracts to undertake those operating responsibilities that you referred to. Isn't that so? A. No, I do not agree.

Q. I see. In other words, you say Penn Water could have entered into those agreements and undertaken those operating responsibilities without having that coordination of operations provided for by Items E to I? A. Very definitely.

• • •

[20876] Q. Why do you say that that position has been maintained only through Mr. Thomas' testimony in Baltimore's presentation of their case in chief and not throughout this proceeding?

• • •

THE WITNESS: They have continually referred to their position as the residual receiver, and Mr. Thomas referred to that position in his direct testimony back in June a year ago, or May a year ago.

TRIAL EXAMINER: You are not implying that so far as you know they have changed that position since then?

THE WITNESS: Yes, I think that Mr. Thomas' testimony on rebuttal is very clear evidence of a somewhat different position when he refers to Baltimore operating these com-

panies as though they were all one. That is quite a different situation in my mind from considering themselves as the residual receiver.

* * *

[20881] Q. Counsel, through the witness Spaulding, brought into this record Exhibit 367. Do you have that before you? A. No, I do not.

Q. I will place it before you. Did that billing take place under Article 6? A. It did.

Q. Is it in strict conformity with Article 6? A. It is in conformance with Article 6, except as modified in small detail by agreement of the operating committee.

* * *

[20894] By Mr. Reiblich:

Q. Mr. Spaulding, at transcript 20782, lines 14 to 16, you testified that Penn Water's day to day choice of generation is in large part in consideration of the overall system economy. On cross-examination by Mr. Goldberg this morning I understood you to say that about one-third of the time in a year the river flow was such that Holtwood Company has no choice because the entire generating capacity is working at maximum output because of the river flow? [20895] A. That is about right.

Q. Isn't it also a fact that for approximately one-third of the days there is no choice during the heavy load hours of the day because all Holtwood hydro units are likewise operating?

* * *

The Witness: There would be another period of time. I don't know that I would say it was another one-third.

By Mr. Reiblich:

Q. Looking at the flow duration curve that you are using wouldn't it be approximately one-third? A. I think it would be a little less than an additional one-third of the time.

Q. Isn't it a fact that even during the rest of the time, the remaining one-third, approximately, the system must be operated in the interests of over-all maximum economy? A. The system is operated where possible in the [20896] interests of over-all system economy. That is the very reason that at times there is a larger amount of 25 cycle hydro generation at Holtwood than would otherwise be experienced. In other words, Holtwood's 60 cycle hydro is much more efficient than its 25 cycle hydro generating units, but at Baltimore it is the reverse. Baltimore's 60 cycle steam generation is very much more efficient than Baltimore's 25 cycle generation and therefore more 25 cycle hydro generation is used and sent to Baltimore in order to produce better over-all system economy.

* * *

[20983] By MR. GOLDBERG:

Q. Mr. Spaulding, at transcript 20908 you spoke of consideration being given to modernizing the Highlandtown substation in a very large degree. At the time you were referring to in that answer do you know whether any further consideration has been given to modernizing that substation since the [20984] Bailey-Oppenheimer and Greer-Von Eiff studies that you referred to in your answer?

* * *

THE WITNESS: I should like to answer it this way, that there have been no studies on the modernization of Highlandtown substation, to my knowledge, other than those that were given at that time but those studies extended, as I recall, into the year 1940.

* * *

[21013] EDWARD S. LOANE.

* * *

DIRECT EXAMINATION.

By MR. MYSE:

* * *

[21014] Q. Mr. Loane, do the corrections shown by Exhibit 509 include any of those previously shown in Exhibit 351 prepared as rebuttal of Exhibits 64, 249 and 292? A. They do not.

* * *

[21016] Q. Will you describe generally the changes or corrections in the assumptions used by Mr. Davis in his Exhibit 421 which were made in Exhibit 509? [21017] A. The capacity accounting shown in Table V-A has been made consistent with the energy accounting shown in Table V-B; and the costs based upon the costs of Safe Harbor as determined by Mr. Davis in his Exhibit 421 were applied to the services described by him as "diverted from Baltimore's two-thirds of Safe Harbor."

Q. Were any changes made in Tables I, II, III, III-A, IV, V, V-B and V-C? A. No.

Q. Do you take the responsibility for the accuracy of any of the data, the descriptions, or the methods employed by Mr. Davis in his Exhibit 421 as applied to Exhibit 509? A. No.

Q. Will you describe briefly what is shown in Exhibit 509? A. On Schedule X there are shown certain additional data derived from Tables V and V-B of Exhibit 421; also, on Schedule X is the adjusted revenue from Baltimore which takes the place of Table VI-A of Exhibit 421. Schedule Y shows a corrected Table V-A and Schedule Z shows a corrected Table VI.

Q. Will you describe what is shown by Schedule X? A. On Schedule X there is first determined the cost of capacity and energy supplied by what Mr. Davis described as "diversion from Baltimore's two-thirds of Safe Harbor." Such costs shown are based upon the costs in Table

V of Exhibit 421. The [21018] computation is self-explanatory. The calculation results in unit costs applicable to the services described as "diverted from Baltimore's two-thirds of Safe Harbor" of $14.27/kw and 0.867 mills/kwh. Schedule X also shows the determination of the division of what is described by Mr. Davis in his Table V-B as "supply by Baltimore" between backfeed and "diversion from Baltimore's 2/3 of Safe Harbor." This determination is based upon Table V-B of Exhibit 421. No alteration has been made in the basic data shown on such table. This calculation leads to the following result: Of the "total available supply for firm and interchange sales in Pennsylvania" 17.02 percent is supply by backfeed and 17.34 percent supply by "diversion from Baltimore's 2/3 of Safe Harbor."

At the bottom of Schedule X, there is also shown the adjustment of the revenue actually received from Baltimore Company. To provide a basis for comparison on Table VI and without agreement that it is a proper basis, the revenue from Baltimore is considered to be the revenue actually received from Baltimore plus the net interchange revenue received from the Pennsylvania customers. No adjustment, such as was shown in Table VI-A of Exhibit 421, has been made of Penn Water's division of the total revenue received from P. R. R.

Q. In your revision of Table V-B did you make any adjustment for the difference between actual conditions in the year 1946 and a year of average river flow conditions? [21019] A. No.

Q. What effect does a difference between actual conditions and conditions under a year of average river flow have on the assumptions and the data in Table V-B of Exhibit 421? A. With respect to any excess or deficiency in Holtwood generation approximately 70 percent of this amount would be reflected in changed deliveries at Highlandtown, shown on line 6 of Table V-B. It is not proper to assume that all of such excess or deficiency would

be reflected in an adjustment in the single item of backfeed. There would be an adjustment of about 5 percent of Holtwood's excess or deficiency in the amount of transmission losses on line 4 of Table V-B. There would be an adjustment of about 7 percent or 8 percent of the combined excess or deficiency at both Holtwood and Safe Harbor in the firm sales to M. E. Co. included in line 13 of Table V-B. With respect to any excess or deficiency at Safe Harbor there would be a change in line 2 of Table V-B equal to one-third of such excess or deficiency, and in lines 8, 10 and 14 of Table V-B of amounts that could only be determined by an hour to hour computation for the entire year.

Q. Why did you not attempt to adjust the figures on Table V-B for the difference between actual flow in the year 1946 and average river flow conditions? A. The proper amount of correction could only be determined by a long and detailed study of the hour by hour [21020] conditions, which we have not had an opportunity to make.

Q. Will you describe what is shown in Schedule Y of Exhibit 509? A. On Schedule Y certain data have been used which are the same as those shown on Table V-A of Exhibit 421. Principally these are the first nine lines of that table, which are being used for the purpose of this exhibit without change in the dependable capacity or allocation of losses and capacity among the several plants. Based on the amounts of "net dependable capacity available for load," shown in line 9, there is determined, in lines 10 to 13, the amount of "Holtwood resources of net dependable capacity," in a manner which parallels the computation in Table V-B of the "Holtwood resources" of energy. It is in the next line (line 14) of Schedule Y that the method that I have used departs from anything shown in Exhibit 421.

Q. How did you determine the amount of capacity delivered to Baltimore at Highlandtown as shown in line 14 of Schedule Y? A. That was determined by reference

to a diagram showing the relation of Holtwood generation, deliveries at Highlandtown, and system losses to the total PW and Safe Harbor hydro generation.

MR. MYSE: Mr. Examiner, I now hand the reporter a chart entitled "Relations of (1) Holtwood Hydro Generation, [21020-A] (2) 25 cycle Delivery to Highlandtown, and (3) P. W. & S. H. Transmission Losses and Station Uses to Total P. W. & S. H. Hydro Generation for the hours of System Peak Load (Area 6 & Pa. Cust) on All Days of 1945 and 1946 except Sat., Sun. and Hol. and Those Days on which Hydro Units (at Holt. or S. H.) were Out of Service for Maintenance," and ask that it be marked Exhibit 510 for Identification.

(The chart referred to was marked Exhibit No. 510 for Identification.)

By MR. MYSE:

Q. Will you describe Exhibit 510? A. There are plotted on this diagram certain data for the years 1945 and 1946, limited to the hours of daily peaks on the Area 6 plus Pennsylvania customers system, on all days except Saturdays, Sundays and holidays, days on which hydro units at either Holtwood or Safe Harbor are out of service for maintenance, and days on which the hydro generation on the peak hour was less than 200,000 kw. For all these daily peak hours there were recorded: (1) the Holtwood hydro generation, (2) the 25 cycle deliveries at Highlandtown, (3) the PW and Safe Harbor station uses and transmission losses.

These three items were plotted vertically against a horizontal scale showing the total hydro generation at Holtwood and Safe Harbor. Then on this plot straight lines were drawn through the data to represent the average relations [21021] shown by 1945 and 1946 experiences.

Q. How did you use the data shown on Exhibit 510 in determining the capacity delivered to Baltimore at High-

landtown, as shown on line 14 of Schedule Y? A. This diagram shows that for a total hydro generation of 250,000 kw which generation is equal to the total dependable hydro capacity as shown by Mr. Davis in Exhibit 421, that the average 25 cycle delivery at Highlandtown will be 53,000 kw. On any particular daily peak the delivery at Highlandtown may be more or less than 53,000 kw, just as the total hydro generation at that time may be more or less than 250,000 kw, but to the same extent that the entire system can count on 250,000 kw as dependable hydro capacity, Baltimore Company can count on the delivery at Highlandtown at the time of their peak of 53,000 kw.

Q. Will you state the significance of the data plotted in the upper part of Exhibit 510? A. The data on the upper part of this diagram, showing the relation between Holtwood hydro generation and the total hydro generation, were plotted as a check on the relation between the delivery at Highlandtown and the total hydro generation. The difference between Holtwood hydro generation and the delivery at Highlandtown appears to be about 37,000 kw, which difference is accounted for by (1) 60 cycle hydro generation—22 or 23 mw; (2) 25 cycle sendout to Lancaster—[21022] 5 or 6 mw; (3) station uses and loss on the 25 cycle circuits to Highlandtown—perhaps 7 or 8 mw. Finally, there may be a residual of 1 or 2 mw, accounted for by the relatively small use, on the average, of the Holtwood frequency changers.

Q. Will you state the significance of the data plotted in the lower part of Exhibit 510? A. The data at the bottom of this diagram, showing the relation between the Penn Water and Safe Harbor station uses and transmission losses and total hydro generation, show that on the average the losses are about 17,000 kw for a hydro generation of 250,000 kw. The scattering of points from which this average curve is drawn is to be expected. The losses are determined by the difference between a great many meter readings. Not all of these meters can be read exactly on

the hour and any small inaccuracies in these many meter readings causes a relatively large variation in the resulting difference, representing the system losses. It is possible to have recorded losses of as much as 25,000 kw or more, but such amounts are the results of meter reading inaccuracies and are not the actual losses being experienced on the system at that time.

Q. What part of the "Holtwood resources of net dependable capacity," shown in line 13 of Schedule Y, can be counted upon on the average to be delivered at Highlandtown? A. The 53,000 kw shown in line 14 as delivery to [21023] Highlandtown is about 35 percent of the "Holtwood resources" shown in line 13.

Q. What part of the "Holtwood resources of net dependable capacity" are available for use in Pennsylvania as shown by Schedule Y? A. After deducting the capacity delivered at Highlandtown, the balance available for use in Pennsylvania in meeting the demands of the Pennsylvania customers is 97,312 kw, or about 65 percent of the "Holtwood resources of net dependable capacity."

Q. Have you made any changes in the demands of the Pennsylvania customers as shown in Table V-A of Exhibit 421? A. Yes, there have been two changes made in these demands shown in Schedule Y as compared with Table V-A of Exhibit 421. The load for the Railroad used in Schedule Y is 47 per cent of the total actual Railroad load at the time of the system peak, instead of a portion of the total billing demand for the Railroad load in December. Also, in Schedule Y no reserve has been added to the demand of M. E. Co.

Q. Why did you use the actual demand of the Railroad instead of the billing demand for December as a basis for the figures in your Schedule Y? A. Because the actual demand of the P. R. R. is a component of the system peak load used in the purported determination of dependable hydro capacity. The deduction of the actual [21024] de-

mand of the P. R. R. from the available capacity is necessary to determine what capacity is left for other customers.

Q. Could a billing demand be substituted for an actual demand of the P. R. R. in the determination of the capacity available for other customers? A. Such substitution is not proper in my opinion. It could not be made without making necessary an adjustment in the purported dependable hydro capacity.

Q. What adjustment would be necessary? A. Because there is no separate billing demand for the railroad load in Pennsylvania, the figure shown by Mr. Davis in line 14 of Table V-A is 48 percent of the total December billing demand, amounting to 76,333 kw. This December billing demand is 11,333 kw greater than the actual railroad load at the time of the system peak. If the billing demand were substituted for the actual railroad load at the time of the system peak, that system peak would be about 11,000 kw greater with no change in the average system load. The dependable capacity shown by Mr. Davis in line 3 of Table V-A would then have been increased by 11,000 kw provided he followed the same procedure of computation explained in connection with Exhibit 425.

Q. Why did you not apply any reserve to the load of M. E. Co.? A. Operations under the M. E. contract are distinctly [21025] different from those under the PL and PE contracts. PW has no obligation to provide reserve capacity (other than spinning reserve) for the M. E. system and M. E. Co. considers no reserve (other than spinning reserve) to be available as a result of their operations with the Penn Water-Safe Harbor system.

Q. Will you describe what Schedule Z of Exhibit 509 shows? A. Schedule Z shows revision of Table VI of Exhibit 421. The form of the schedule and table are somewhat similar but the following differences should be noted: In Schedule Z there has been inserted a line (4a) to show the subtotal of Pennsylvania customers and P. R. R. in Pennsylvania. There has also been inserted lines 5a, 5b

and 5c, to show separately the following: line 5a—service to Baltimore and cost relating thereto; line 5b—supply by Baltimore and credits assumed in connection therewith; line 5c—net services and cost to Baltimore. The data shown in the ten columns are generally of the same character in Schedule Z and Table VI except in column 6.

The notes on Schedule Z show all the computations of data that cannot be obtained from other schedules of Exhibit 509 or on tables of Exhibit 421.

Q. Where did you obtain the costs of energy and capacity shown as "diverted from Baltimore's 2/3 of Safe Harbor" in notes (a) and (b) of Schedule Z? [21026] A. Those costs were determined on Schedule X.

Q. Why did you not make any change in the 4.7 mill rate applied to backfeed in Schedule Z? A. With the time available it has not been possible to complete the detailed computations necessary for the determination of the actual cost to Baltimore of backfeed from Baltimore and Washington.

Q. If you had carried out all the appropriate corrections made or suggested in Exhibit 351 in relation to Exhibit 421, would there have been any effect on the amounts shown in Exhibit 509 as the excess of revenues over allocated costs to Baltimore? A. Those amounts shown in line 5c, columns 9 and 10 of Schedule Z would have been further substantially reduced.

Q. What would be the effect if you had made corrections similar to those made in Exhibit 509 in relation to Exhibit 422? A. The amount and percentage shown, respectively, in line 5, columns 8 and 9 of Exhibit 422 would have been substantially reduced.

Q. Exhibit 482 shows that an adjustment was made to Exhibit 421 for an excess of generation in the year 1946 as compared with average river flow conditions, based upon the years 1917 to 1941, inclusive. Does Baltimore Company now compute the generation at Holtwood and Safe Harbor under [21027] average river flow conditions based upon the

years 1917 to 1941, inclusive? A. No, it does not. Neither Penn Water nor Baltimore Company now uses an average based upon such 25-year period. Both companies use, for all purposes connected with their expectations of average hydro generation, an average based on the 30 years from 1917 to 1946, inclusive. This longer record gives a more reliable indication of expected future conditions.

Q. Is there available any computation by Baltimore Company of the average generation based upon this 30-year period? A. Yes.

MR. MYSE: Mr. Examiner, I now hand the reporter a memorandum from R. L. Ashley to F. A Leslie dated January 6, 1947, the subject of which is "Revised Basis for Average Flow Hydro Generation," and ask that it be marked Exhibit 511 for Identification.

TRIAL EXAMINER: The Memorandum handed to the reporter may be marked Exhibit 511 for Identification.

(The document referred to was marked Exhibit No. 511 for Identification.)

By MR. MYSE:

Q. What does Exhibit 511 show? A. It shows that Baltimore Company now uses a 30-year average flow record and expects that the average gross hydro generation should be approximately 1,525,000,000 kwh per year.

[21028] Q. As compared with the actual gross hydro generation in 1946 was there a deficiency or an excess based upon Baltimore Company's expectation of generation under average river flow conditions? A. There was a deficiency of about 20,000,000 kwh in contrast with the excess of approximately 30,000,000 used in Exhibit 482.

* * *

[21029] MR. MYSE: Mr. Examiner, may the record show that I now distribute additional copies, in addition to those which were distributed the other day, of Exhibits 510 and 511?

TRIAL EXAMINER: Any further questions of the witness on direct?

MR. MYSE: Not at this time, Mr. Examiner.

TRIAL EXAMINER: Any cross-examination of the witness by Staff counsel?

MR. GOLDBERG: Does this complete the witness' direct testimony, Mr. Examiner?

MR. MYSE: No, sir, this is all we have ready at this time of this witness. We feel we have not had an adequate or sufficient opportunity to complete our research and prepare sur-rebuttal by the witness Loane.

TRIAL EXAMINER: The Examiner rules that the witness should pass for cross-examination.

MR. MYSE: We take exception to that ruling for the reasons stated yesterday or day before yesterday in connection with the same ruling in respect to the testimony of the witness Spaulding.

TRIAL EXAMINER: The Examiner rules that the Respondents have had an adequate time to prepare for their sur-rebuttal. You may cross-examine.

• • •

[21039] CROSS-EXAMINATION.

By MR. GOLDBERG:

• • •

[21040] Q. Now, will you tell us why, in your opinion, you believe that there should be deducted from the Holtwood resources the capacity delivered at Highlandtown in Table V-A of Exhibit 421? A. To make it consistent with V-B.

Q. Is it merely to make it consistent, or is there a reason in your mind why there should be this consistency? That is really what I am getting at. A. Certainly I think there should be a consistency between the two. Energy goes to Highlandtown, and so does the capacity, and are both used by Baltimore.

[21043] Q. Do you consider the capacity delivered at Highlandtown as dependable capacity? A. The 53,000 kw which I deducted in my exhibit, being delivered at Highlandtown, is dependable in the same extent and same degree that the 250,000 kw capacity is dependable that Mr. Davis used in Exhibit 421.

Q. Then you are saying that you have considered 53,000 kw as dependable capacity in asserting that there should be consistency between the energy accounting in Table V-B and the capacity accounting in Table V-A of Exhibit 421. Is that right? A. Yes, with this explanation: That 53,000 may not be all that I think is dependable and is delivered at Highlandtown.

Q. Now, then, let us assume for the sake of this question that the 53,000 kw is not dependable capacity. Under that assumption, would you still say that there is inconsistency between Tables V-B and V-A of Exhibit 421? A. I just cannot make that assumption, because I know it is contrary to the facts.

Q. Well, the fact that you answer on the basis of that assumption doesn't mean that you are agreeing with the assumption, Mr. Loane. But I would like to have an answer from you taking my assumptions for the sake of the question. A. I haven't considered it, and I don't know what my [21044] answer would be.

Q. Well, can you consider it now and tell me what your answer is?

* * *

THE WITNESS: There are so many other things that would have to change, Mr. Goldberg. In Exhibit 421, according to Mr. Davis there is only 27,000 of undependable Holtwood hydro capacity. I cannot conceive of 53,000 undependable capacity being delivered at Highlandtown.

By MR. GOLDBERG:

Q. You say, then, that you cannot give it that consideration you feel you would have to give it at this time in

answering my question? A. You would have to change a lot of other conditions.

Q. Do I correctly understand, then, that you say that you cannot give me an answer because you would not have on the witness stand sufficient time to consider all the [21045] ramifications that you say are involved. Is that right? A. O. K., that is right; I couldn't consider everything.

Q. Now, in saying that you have made the energy accounting and the capacity accounting in Exhibit 421 consistent, have you in any way departed from the theories and the principles employed by Mr. Davis?

* * *

THE WITNESS: I don't know, Mr. Goldberg.

* * *

[21059] Q. Isn't it a fact that when Baltimore's two-thirds of Safe Harbor's energy is diverted to the Pennsylvania customers, Baltimore Company is required to replace that diverted energy to meet its own requirements by generating steam electric energy?

MR. MYSE: Now, Mr. Examiner, I object to that. There is an assumption in there that there is some diversion from Baltimore's two-thirds, which is an assumption this witness has not made, and there is no foundation in the direct testimony of this witness for that question, and I therefore object to it as not within the scope of the direct, and immaterial and irrelevant.

MR. GOLDBERG: That I cannot fathom, Mr. Examiner, because all you have to do is glance at Exhibit 509, and it is inherent in the exhibit. He treats with the diversion.

MR. MYSE: I think if you glance at the exhibit you will see that in every place "diversion from Baltimore" is quoted, and it means as Mr. Davis used it.

Now, this witness hasn't taken any responsibility for it.

• • •

[21060] THE EXAMINER: As the Examiner sees it the question goes to the matter of the witness applying certain costs to the so-called diverted energy. The question is therefore deemed to be proper.

THE WITNESS: Let me say it this way: When more Safe Harbor energy is used in Pennsylvania and less is sent to Baltimore, Baltimore has to generate more by steam.

By MR. GOLDBERG:

Q. Isn't it also a fact that such additional generation by steam costs Baltimore considerably more than the energy which is generated at Safe Harbor and diverted to Pennsylvania [21061] customers? A. Very likely.

Q. It is more than very likely, isn't it? It is a fact, isn't that so?

• • •

THE WITNESS: The cost of steam generation in Baltimore is more than the 0.867 mills I used in Safe Harbor.

By MR. GOLDBERG:

Q. Is it fair to say it is considerably more? A. Yes.

Q. Now, then, in Exhibit 509 the credit to Baltimore Company is in an amount less than the costs incurred by Baltimore Company in generating the energy by steam, isn't that so? A. That is right.

• • •

[21062] By MR. GOLDBERG:

Q. Well, in view of the fact that the credit is in an amount less than the cost to Baltimore generating the additional steam energy, doesn't it mean that the Pennsylvania customers receive the benefit of low cost hydro energy at the expense of Baltimore Company?

[21063] MR. MYER: I object to that question as being argumentative.

TRIAL EXAMINER: It is very close to the line but the Examiner will permit the question.

THE WITNESS: The Pennsylvania customers are charged with the cost of the energy from Safe Harbor. Baltimore Company's credit is the cost which it would have paid for the Safe Harbor energy if it received it, not the value of that energy to Baltimore.

By MR. GOLDBERG:

Q. Isn't the answer to my question yes? A. I don't know what you mean by the expense of Baltimore.

Q. That means you don't understand my question and therefore cannot answer it? A. No, I answered it, I think.

Q. I am trying to understand what you mean when you say that you don't know what I mean by the use of the word "expense." Does that mean you don't understand my question and therefore cannot answer it? A. What two conditions are you comparing? If there is a disadvantage to Baltimore you have to compare two things.

Q. I am giving you the comparison. The credit to Baltimore Company as against the cost Baltimore Company has to incur in generating the additional steam.

[21064] MR. MYSE: Mr. Examiner, I think the colloquy that has just taken place shows exactly what I said a moment ago that the entire line of questioning is argumentative.

TRIAL EXAMINER: I think so.

• • •

Q. Mr. Loane, comparing the credit to Baltimore and the cost Baltimore incurs in generating the additional steam, the treatment in Exhibit 509 results in a disadvantage to Baltimore, right?

MR. MYSE: Same objection.

THE WITNESS: That is what I said initially, that if Exhibit 509 is compared with 421 there is more cost to

[21065] Baltimore, if that is what you mean by the expense to Baltimore.

• • •

Q. Doesn't the treatment in Exhibit 509 mean that the costs of energy to the Pennsylvania customers do not properly reflect the cost of steam generation on the interconnected system?

• • •

[21066] THE WITNESS: I don't want to say what they do not reflect. They do reflect the costs incurred in serving the Pennsylvania customers under the assumptions made herein.

By MR. GOLDBERG:

Q. Under the assumptions made in Exhibit 509——

A. And 421.

Q. —the costs of energy to the Pennsylvania customers do not properly reflect the cost of steam generation on the interconnected system, isn't that so? A. I won't say what they do not reflect, I will tell you what they do reflect.

Q. Do you mean you would rather not answer that question?

TRIAL EXAMINER: No, the witness is having difficulty, I think, with your insertion of the word "properly."

By MR. GOLDBERG:

Q. Well, shall we say do not reflect the costs of steam generation on the interconnected system, leaving aside for the moment whether it is proper, or not? A. That is right, they do not reflect the costs of steam generated energy on the interconnected system.

• • •

[21080] Q. Will you agree that a company selling power and energy on a firm basis requires reserve generating capacity? A. Generally, yes, but there may be exceptions.

Q. Will you agree that all the firm customers should be

required to bear the cost of such reserve generating capacity?

• • •

[21081] THE WITNESS: If the customer is provided with reserve he should pay the cost of it.

By MR. GOLDBERG:

Q. Isn't Metropolitan Edison that kind of firm customer? A. No.

[21082] Q. You say it is not? A. It is not.

Q. Isn't it a fact that it is that type of a firm customer in so far as it affects Penn Water's obligations to supply Metropolitan Edison Company's requirements above the steam line? A. No, I don't think it is.

Q. The requirements above the steam line you do not think are a firm obligation? A. There have been several definitions of firm supply and maybe according to the FPC definition the supply to M. E. Company would not be firm, but what is firm is defined in the M. E. contract.

Q. Isn't this the fact, that with respect to M. E.'s requirements above the steam line they are no different from P. P. & L.'s requirements under its contract with Holtwood? A. They are different.

Q. In what way are they different?

MR. MYSE: I object to that, Mr. Examiner. That is the point at which we launch off into a long investigation as to what Exhibit 72 shows. We have gone over that several times.

TRIAL EXAMINER: I think the form of the question is bad.

THE WITNESS: Maybe I can explain the difference relatively easy. P. P. & L. and P. E. Company in their reports [21083] of various kinds show as the capacity available from P. W. an actual demand plus a reserve. P. W. has to provide the reserve related to the Coatesville and Lancaster load; M. E. Company shows as available from P. W.

only the demand, they supply the reserve, that is the difference.

• • •

Q. I am just interested in finding out if you can identify for us, for me at least, these reports. A. The reports that I referred to are capacity reports which we receive from the Pennsylvania-New Jersey Interconnection in connection with our coordinated operation with them. Now I understand that M. E. will follow the same thing in their FPC Form 12 report, but it is not available yet.

Q. You say you understand M. E. will do that in their FPC Form 12 report which has not been filed yet? A. I asked for it last week and it was not available upstairs.

Q. Was that the first report that will reflect operations under Exhibit 72? A. That is right.

Q. How did you ascertain that M. E. is going to do that? A. I asked Mr. Von Eiff, who is a member of the [21084] Operating Committee under that contract, to find out for me, and I believe he and Mr. Watchorn contact someone in the M. E. Company.

MR. MYSE: I don't think it is quite clear as to what you meant when you said that M. E. was going to do something in its Form 12. Can you be a little clear on that?

THE WITNESS: M. E. Company will show in their Form 12 the capacity available from P. W. as an actual demand without any addition of reserve, whereas in former years when we supplied York-Edison they showed the demand plus the reserve as being available from P. W.

• • •

By MR. GOLDBERG:

Q. And you take that to mean that Penn Water provides no reserve for M. E., is that right? A. That is right.

Q. Have you yourself attempted to verify your conclusion that Penn Water does not supply any reserve to M. E.

under Exhibit 72 by making any reference to the terms of the contract? A. Oh, I know they supply a spinning reserve.

Q. Well, other than that, have you referred to the contract to verify your understanding? A. No, it is just the understanding of what the operations will be.

[21085] Q. What detailed computations would be necessary to determine actual cost to Baltimore of the backfeed from Baltimore and Washington? A. Well, you would have to set up the hour-to-hour schedule of what the backfeed is, some of it being for interchange and some of it being used in connection with the firm supply in Pennsylvania. Then the costs that relate to the interchange have already been determined as the basis of the interchange billing. It is the highest cost part of the backfeed that is related to the interchange, and it would be necessary hour-by-hour to determine the costs that relate to the backfeed or the part of the backfeed used in connection with firm supplies.

Q. When you say that the higher costs have already been determined as related to interchange, to what period of time do you have reference? When was this determination made? A. Whether it was the hour following, the day following or the week following, I don't know, but the interchange figure is determined currently.

Q. Oh, it is always ready as the operations of the company move along? A. Well, you have got to make out a bill for the interchange.

Q. I see. Now, what would you have to do to determine the costs of the firm? A. The costs of what?

[21086] Q. Of the firm portion. A. You mean the backfeed that is used to supplement Holtwood's and Safe Harbor's supply?

Q. Yes. A. Well, ordinarily we go to the Gas Company and ask them to cooperate in such a study, but I don't think we could under these circumstances.

Q. You haven't done that? A. We are proceeding without their cooperation.

Q. Now, is that determined as rapidly as the interchange costs are determined? A. Oh, no, there is no current determination of that.

Q. But you say such a determination is presently in process? A. We started it in connection with this rebuttal testimony.

Q. When did you start?

• • •

[21087] THE WITNESS: Sometime last week. I couldn't be sure of the date.

By MR. GOLDBERG:

Q. What records have to be examined to ascertain the costs in connection with the firm portion? A. Well, a good many of the hourly load records will be necessary, the generation and deliveries at various places, and we have got to get the data which relates to the costs of generation at various places.

Q. I take it it has to be an hour-by-hour study. Is that right? [21088] A. For the most part, yes. Perhaps there will be times where you can group hours together and work out the costs for a group of hours.

Q. I understand your testimony to be that you have to determine what portion is for interchange and what portion is for firm. Right? A. Well, since the backfeed that is used for interchange has already been paid for, I wouldn't think that any costs relating to that use of backfeed would be charged to the backfeed used in connection with the firm supplies.

Q. Well, how do you determine what portion is for interchange and what portion is for firm? A. Well, the highest cost part has already been billed as interchange.

Q. That is the determination that the highest cost is for interchange?

TRIAL EXAMINER: I think the cross-examination is beginning to become highly general and not particularly relevant.

By MR. GOLDBERG:

Q. How close to completing the study are you? A. I don't know. It is being done in Baltimore, and I am only in telephone communication with it.

• • •

[21216] TRIAL EXAMINER: Is there any further testimony to be offered by Respondents' counsel in sur-rebuttal?

MR. MYSE: Mr. Examiner, this is all the sur-rebuttal testimony we have been able to prepare for presentation in the wholly inadequate and unreasonable time we have been allowed for such preparation.

We want to make it clear, however, that this is not all of the evidence we would produce if we were to be accorded a reasonable opportunity to rebut the evidence presented against us in this proceeding by the Staff and the Intervenors.

We object strenuously to the summary nature of the action of the Commission, as represented by the Examiner, which thus deprives us of an adequate opportunity for hearing on such evidence presented by other parties to this proceeding.

The volume, detail and technical nature of the evidence recently presented by the other parties, combined with the almost continuous hearing sessions since September, 1946; the requirement of immediate cross-examination of hostile witnesses; the requirement of immediate re-direct examination of our own witnesses; the requirement——

TRIAL EXAMINER: Now, just a minute. All of this is a statement of the same character that the Examiner has listened to on every single occasion when the Examiner has directed Respondents' counsel, as he has directed every other counsel appearing in this case, to proceed with the [21217] examination of the witness that is then in order. I see no reason for counsel again going through all of this recitation.

MR. MYSE: Well, I would like to summarize, if I may, the reasons why we think we are being deprived of a fair hearing under the Constitution and the laws of the United States, and in addition I have an offer of proof at the end of the summary.

TRIAL EXAMINER: You may hand your summary to the reporter.

MR. MYSE: I do not have it in condition where I could hand it to the reporter. I have notes, but I have corrections to those notes which I would like to consider as I go along in making my statement.

TRIAL EXAMINER: In view of the fact that Respondents' counsel has had an opportunity every time that he has been called upon to state his objection, if he had any, to going forward at that time when called, and to state the grounds supporting that objection, and that the Examiner permitted a complete statement of counsel's position and the grounds in support of that position in connection with the ruling on Respondents' counsel's application for a recess in February to prepare for rebuttal testimony, and for a recess in June in order to prepare for the sur-rebuttal testimony, I see no reason for the Examiner to be compelled to listen to a restatement of all of those objections and the grounds supporting [21218] them, or any resume thereof.

Now, if Respondents' counsel is not prepared to go forward at this time with further sur-rebuttal testimony, and there is any condition of emergency attending his inability to proceed at this time, he may state that.

MR. MYSE: Mr. Examiner, we except to your ruling denying us the right to state our objections to the procedure adopted by the Commission, as represented by the Examiner, and state that we have not had an opportunity to fully state those objections.

I do at this time, however, desire to make an offer of proof, and although we have not completed our research and consideration in determining all of the rebuttal evi-

dence we would present if given an adequate and reasonable opportunity, we are able to state and hereby offer to prove——

TRIAL EXAMINER: Wait just a minute. What is the nature of this offer of proof?

MR. MYSE: I am just going to get to it.

TRIAL EXAMINER: I don't mean that. I think it is improper for counsel to make an offer of proof with respect to testimony which he states he has not had time to prepare. Now, if he has any testimony to present, an offer of proof is unnecessary. He may call his next witness.

MR. MYSE: I would like to state for the record, Mr. Examiner, that we do have in the process of preparation certain [21219] detailed testimony, and I would like to state just exactly what that is in order that the Examiner may know the nature of the testimony in further rebuttal that we intend to produce, and it is as follows: By the witnesses Spaulding and Loane——

TRIAL EXAMINER: Wait just a minute. If it is unprepared testimony, it is not properly the subject of an offer of proof. If it is prepared testimony, counsel may call his next witness.

MR. MYSE: Mr. Examiner, we want to have the record show just exactly and in detail the type of evidence which we are prepared to bring in if given an adequate opportunity, and it relates to testimony and evidence in direct rebuttal and refutation of many of the documents and evidence presented by Commission's Staff and by the other Intervenors in this case, and it is in the course of preparation. I think we should have an opportunity to state for the record just exactly the detail that we intend to come in with if given an opportunity.

TRIAL EXAMINER: I see no reason for counsel's being permitted to make any such statement at this time. If

counsel has been unable to prepare sur-rebuttal evidence under any condition involving an emergency, the Examiner will hear such a statement. But any other statement would appear to the Examiner to be out of order.

MR. MYSE: I don't understand what the word "emergency" [21220] means, but if I do understand it, this is an emergency, and it is as follows: That if we were able to prepare the testimony that I mentioned, we would be able to refute without a doubt Exhibit 421——

MR. GOLDBERG: Now, Mr. Examiner, may I interpose here? I understand that the Examiner has ruled that he will not listen to an offer of proof or will not hear an offer of proof with respect to testimony which is not prepared; that if it is prepared, he is willing to have the witness called.

What the Examiner will listen to is to a detailed specification of the material they say they are in the process of preparing.

MR. MYSE: That is exactly what I want to tell the Examiner at this time.

TRIAL EXAMINER: I do not think anything would be added to the record by receiving a detailed statement of what Respondents' counsel is in process of preparing if he is not now ready to present whatever testimony or evidence is in the process of preparation.

Once again, if there is any matter that has intervened since the Examiner first directed Respondents' counsel to put on his sur-rebuttal testimony and evidence that has prevented the regular course of preparation of that testimony and evidence, he may state what that was.

MR. MYSE: That is also what I intended to state by [21221] reciting in detail what the evidence would be, and pointing out why we have been unable to prepare it.

TRIAL EXAMINER: I think it can be assumed that whatever evidence is in course of preparation would relate to

the issues in this proceeding; but the time has come when this hearing must be brought to a conclusion. The time for the reasonable conclusion of this hearing has long since passed. Respondents' counsel, Intervenors' counsel and Staff counsel have each been given more than a reasonable amount of time in which to prepare any evidence that is now to be presented in this hearing.

MR. GOLDBERG: Mr. Examiner, may I be heard for a moment?

MR. MYSE: Before you do that, may I except to the Examiner's rulings?

MR. GOLDBERG: I for one am not willing to assume that what Mr. Myse was going to refer to is material or relevant or competent as far as the issues in this proceeding are concerned; and I submit, Mr. Examiner, that there would be no occasion under any circumstances at all to afford the Respondents any additional time—they have had more than ample time to prepare anything—even to prepare testimony that is incompetent, irrelevant and immaterial.

MR. MYSE: Mr. Examiner, I point out that because you have deprived us of an opportunity to state what that detailed [21222] evidence is, I don't see how anybody can tell whether it is material, relevant or competent, and I state to the Examiner that in our opinion it is material, relevant and competent.

TRIAL EXAMINER: The basis for the Examiner's ruling is that counsel has had an adequate time to bring forward now whatever sur-rebuttal evidence he may have, and in using the word "evidence" the Examiner is now calling for all material, competent, relevant testimony, and if counsel now states, whatever his statement should be, with regard to that relevance and materiality and competency, if he is not now prepared to go forward or state some emergency that would require the Examiner in all due rea-

sonableness to give him additional time, then counsel's proposed statement can have no effect whatever on the Examiner's ruling.

MR. MYSE: Do I understand, Mr. Examiner, that you will not permit me to state in detail what the evidence would be if we were permitted to prepare it in order to show the Examiner what the emergency is which requires additional time?

TRIAL EXAMINER: You may state what the emergency is, but I don't care to hear what it is if you are now in the course of preparing it. It makes no difference. Now is your time to come forward.

MR. MYSE: Well, the emergency is as follows: We require the additional time to prepare the testimony that I would have liked to refer to because of its nature, and its [21223] nature is as follows:

One, we would rebut and hereby offer to prove——

TRIAL EXAMINER: Wait just a minute. I think it is improper for counsel to make any statement as to what he is going to rebut.

MR. GOLDBERG: Apparently they arrive at their conclusion first and then prepare to meet that conclusion, Mr. Examiner.

TRIAL EXAMINER: Wait just a minute. Counsel apparently is again attempting to describe what his evidence would be, and the Examiner admonishes counsel to abide by the Examiner's direction and ruling.

MR. MYSE: Does that mean, Mr. Examiner, that you will not permit me to recite the evidence we would produce in order to show the Examiner the nature of the emergency that the Examiner referred to?

TRIAL EXAMINER: Will you read that statement, please?

(The statement was read.)

TRIAL EXAMINER: You can state the nature of the emergency without citing the evidence.

MR. MYSE: I state to the Examiner that I cannot state the nature of the emergency because the emergency depends upon the detailed evidence, and I am unable to go into any other detail than to recite the nature of the evidence in order to show that emergency.

[21224] TRIAL EXAMINER: I am certain that a recitation of the nature of the evidence is not necessary in order to conform with what the Examiner considers emergency to mean in the Examiner's ruling.

Now, if there has been any illness, or any incapacity of any witness or of counsel, or if records have been misplaced and counsel has been unable to locate them, or any other matter of that general nature and character, or any similar character, then counsel may state it. But if this is going to be a recitation of the fact that Exhibit 421 was first served on a certain date, was identified on a certain date, was received in evidence on a certain date, and testimony relating thereto was received between certain dates, there is no need to try to establish an emergency by making any such recitation.

MR. MYSE: I didn't intend to make any such recitation, Mr. Examiner.

TRIAL EXAMINER: If you would disclose what you are attempting to do, I would listen to you.

MR. MYSE: I can only do that by reciting in detail the evidence we propose to offer in this proceeding.

TRIAL EXAMINER: When you start your statement by saying, "We propose to rebut Exhibit 421," I don't think you are even making an attempt to comply with the Examiner's direction.

MR. MYSE: Do I understand the Examiner will not permit [21225] me to recite in detail the nature of the evidence we are now in the process of preparing and would produce

if given further opportunity in order that we may show the Examiner just why we need that further opportunity? Is that the Examiner's ruling?

TRIAL EXAMINER: I think it would be improper to listen to any description of the nature of the evidence under any attempt to evade the Examiner's ruling on an offer of proof.

MR. MYSE: Well, I state there is no intent on my part to evade any of the Examiner's rulings. I merely want to state to the Examiner the nature of the evidence we would produce if given an opportunity.

MR. GOLDBERG: Mr. Examiner, I submit that the Examiner has indicated what "emergency" means in his mind, and that Respondents' counsel should address himself to that directly.

TRIAL EXAMINER: Well, you may proceed to make a statement in conformity with the ruling of the Examiner.

MR. MYSE: We offer to prove, one——

TRIAL EXAMINER: Just a minute. You are not even attempting to comply with the Examiner's directions. The Examiner feels it would be improper to hear any offer of proof.

MR. MYSE: I except to Your Honor's ruling, and point out that we are thereby being deprived of a fair hearing under the Constitution and the laws of the United States.

MR. SPARKS: Mr. Examiner, I believe there are a few [21226] matters unfinished. At page 20730 and 20734——

TRIAL EXAMINER: Before we get into that matter, I understand that Respondents have no further sur-rebuttal testimony and evidence prepared and ready to offer at this time?

MR. SPARKS: It is in the course of preparation, as Mr. Myse stated to you, Mr. Examiner.

TRIAL EXAMINER: But you have none to offer at this time as you are now being called upon by the Examiner to proceed with your next witness or your next offer of evidence?

MR. SPARKS: We have none to present at this time, Mr. Examiner, for the reasons which Mr. Myse stated.

TRIAL EXAMINER: Would you be prepared to do so at 2 o'clock this afternoon?

MR. SPARKS: No, we would not, Mr. Examiner.

TRIAL EXAMINER: Would you be prepared to do so at 10 o'clock tomorrow morning?

MR. SPARKS: No, sir. Mr. Myse was attempting to state to Your Honor what we needed to do in the way of research and preparation in order to ask for a reasonable time, Mr. Examiner, and it would not be two or three days.

TRIAL EXAMINER: You might indicate how much time you do have in mind.

MR. MYSE: Well, I think, Mr. Examiner, that that requires knowledge of what we propose to offer, but I can say this: We would need at least three weeks from today to [21227] finish the research which has already been in progress, and some of which was testified to by Mr. Loane, I believe, yesterday.

TRIAL EXAMINER: All right. The Examiner merely observes you are now requesting as much time to prepare your remaining sur-rebuttal as you requested originally to prepare all of your sur-rebuttal.

MR. MYSE: That is correct, Mr. Examiner. We originally, as I recall it, requested three weeks. After, however, getting into the details of some of those matters, including those referred to by Mr. Loane yesterday, we found that the job was a much greater job, as Mr. Loane said, than we expected, and it required an analysis of hour-by-hour data for a considerable period covering the year 1946.

TRIAL EXAMINER: The Loane investigation is the principal basis for your request for three weeks' time?

MR. MYSE: No, sir, that is only one of several.

TRIAL EXAMINER: I might observe, since you mention the witness Loane, that the Examiner made a note the other day when that matter was developed on cross-examination——

MR. GOLDBERG: If the Examiner is referring to the matter that is in my mind the witness Loane stated the investigation began last week.

TRIAL EXAMINER: That is correct. That related to a determination of the cost of backfeed to Penn Water from [21228] Baltimore and Washington.

MR. MYSE: That is right, that is one of the studies which we are now engaged in and if permitted we would show that that cost of backfeed would be substantially less than 4.7 mills.

TRIAL EXAMINER: Yes, and you were served with the Staff witness' exhibit on May 23, as to Exhibit 421, and May 29 as to Exhibit 422, and more than two weeks have elapsed since Respondents were required to proceed with their sur-rebuttal testimony.

MR. GOLDBERG: Mr. Examiner, beyond that, the question of the mill rate to be used in connection with backfeed goes all the way back to Exhibit 64. In other words, the question of the propriety of any mill rate to be applied to backfeed—as to that, they have been on notice—that has been involved as long ago as when the hearing first began.

MR. MYSE: The record will show whatever that is to be the fact. I don't want to argue it, but I do want to point out that there was never any use of the 4.7 mill rate in the manner Mr. Davis used it until he used it as he did in his Exhibit 421.

I want to point out to the Examiner that we have other studies in the course of preparation in refutation of Exhibit 421 which, because of the limited staff we had available and the requirement of going ahead with cross-examination, required [21229] us to schedule these studies at intervals and that explains why the study relative to the refutation of the 4.7 mill rate was not begun until last week. We had these other studies in connection with Exhibit 421 in process of preparation for some time.

TRIAL EXAMINER: If this hearing goes on much further I think we will have to revise all of our exhibits to bring them up to date.

MR. GOLDBERG: When they say "limited staff," Mr. Examiner, that must be said with a smile. I know we have supplied at least as many as 20 copies of many of our exhibits for use by the Respondents' staff.

TRIAL EXAMINER: If the Examiner does not impose some restrictions on the hearing the Examiner is convinced, on the basis of the progress of this hearing to date, the hearing would go on for another year. You may proceed.

• • •

[21265] TRIAL EXAMINER: Is there anything further before the Examiner rules that the hearing shall now be deemed concluded as to the receipt of evidence in this proceeding?

MR. MYSE: Is that directed to us generally?

TRIAL EXAMINER: Any counsel may respond.

MR. MYSE: We have stated our position on that matter this morning and I won't burden the record by restating it. I refer to the offer to show the Examiner what we had in the way of further evidence. We take exception to any ruling closing the hearing at this time.

TRIAL EXAMINER: The Examiner will set a date for the filing of main briefs which will be 90 days after July 15,

which is the date set for the final determination of corrections. Main briefs, therefore, will be filed on or before Wednesday, October 15, 1947, and reply briefs will be filed on or before Monday, November 17, 1947.

The hearing is now concluded as to the receipt of evidence and the hearing is recessed to reconvene in this room on Tuesday morning, July 15, at 10 o'clock for the purpose of the final determination of corrections to the transcript.

(Thereupon, at 4:47 o'clock P. M., the receipt of evidence was concluded, and the hearing recessed until Tuesday, July 15, 1947, at 10 o'clock A. M.)

* * *

[21279] TRIAL EXAMINER: I understand this matter requires no ruling of the Examiner at this time. The Examiner's responsibility at this time consists of closing the record. Accordingly, under Section 1.155 of the Federal Power Commission's Rules of Practice and Regulations, effective June 1, 1938, as amended, the Examiner now declares the record in this proceeding closed, and there being nothing further to come before this hearing the Examiner proposes to adjourn sine die.

MR. SPARKS: I would like to state our exception, Mr. Examiner, to your closing the hearing at this time, on the basis stated by Mr. Myse on July 10, 1947, with regard to our offer of further proof.

TRIAL EXAMINER: The hearing is concluded and adjourned sine die.

This composite form is the result of deletions, changes and additions to the original Power Contract of September 2, 19[illegible] in line with the specific intention of the Supplemental Agreement of August 15, 1934 and the Supplemental Agreement of June 22, 1938. It has been compiled as a working paper for ready reference from the formal agreements.

Certain footnotes have been added to clarify the text, which might otherwise be ambiguous in this composite form.

PREAMBLE TO ORIGINAL CONTRACT

This Contract, made this second day of September, 1931, by and between THE PENNSYLVANIA RAILROAD COMPANY, a Pennsylvania Corporation, hereinafter called "Railroad Company," and the CONSOLIDATED GAS ELECTRIC LIGHT AND POWER COMPANY OF BALTIMORE, a Maryland Corporation, the PENNSYLVANIA WATER & POWER COMPANY, a Pennsylvania Corporation, and the SAFE HARBOR WATER POWER CORPORATION, a Pennsylvania Corporation, hereinafter jointly referred to as "Electric Companies."

WHEREAS Railroad Company is electrifying certain railroad lines for which it desires to purchase electric power and energy, to be available if and when said lines will be ready for electric operation, and

WHEREAS Electric Companies are engaged in the generation, purchase and sale of electric power and energy and own and operate hydro-electric and steam-electric generating

stations and an interconnected transmission system, and desire, jointly and severally, to sell, and Railroad Company desires to purchase, a portion of the electric power and energy requirements for the lines that are now being electrified and that are to be electrified in the future.

NOW, THEREFORE, THIS AGREEMENT WITNESSETH: That for and in consideration of the mutual covenants and agreements hereinafter contained and of the sum of Five Dollars ($5.00) paid by each of the parties hereto to the other, receipt whereof is hereby acknowledged and of other valuable considerations, Railroad Company and Electric Companies, jointly and severally, do covenant and agree as follows:

PREAMBLE TO SUPPLEMENTAL AGREEMENT

DATED AUGUST 15, 1934

This Supplemental Agreement made this Fifteenth day of August, 1934, between THE PENNSYLVANIA RAILROAD COMPANY, a Pennsylvania Corporation, hereinafter referred to as "Railroad Company," the CONSOLIDATED GAS ELECTRIC LIGHT AND POWER COMPANY OF BALTIMORE, a Maryland Corporation, hereinafter referred to as "Baltimore Company," the PENNSYLVANIA WATER & POWER COMPANY, a Pennsylvania Corporation, the SAFE HARBOR WATER POWER CORPORATION, a Pennsylvania Corporation, the last mentioned three Companies hereinafter referred to as "Electric Companies," and the POTOMAC ELECTRIC POWER COMPANY, a Corporation of the District of Columbia, hereinafter referred to as "Washington Company," and the last mentioned four companies hereinafter referred to as "Supplying Companies."

WHEREAS under a contract dated September 2, 1931, between Railroad Company and Electric Companies, hereinafter referred to as "Railroad Contract," it has been agreed between the said parties to make available to each other from time to time, property and facilities for power transmission, communication, or other similar purposes for such joint use as may appear practicable and desirable, and

WHEREAS under an agreement entered into subsequent to the Railroad Contract, between Washington Company and Baltimore Company, dated June 16, 1932, and supplemental agreement of even date herewith, which two agreements are jointly referred to herein as "Takoma Agreement," it has been agreed between the said parties, to endeavor to coordinate their system planning and in particular their investments in generating and transmission facilities with the object of effecting maximum overall economy and service reliability, and

WHEREAS Railroad Company desires to change the location of a portion of the frequency changer equipment provided for in the Railroad Contract, from Loudon Park, Maryland, to Benning, D. C., in order to secure better protection to traffic south of Baltimore, improved voltage regulation and other advantages, which benefits were not available to Railroad Company until continuous parallel operation of the power systems of Electric Companies and of Washington Company had been established under the Takoma Agreement of June 16, 1932, and

WHEREAS Electric Companies are willing to agree to the change in location of a portion of the frequency changer equipment from Loudon Park, Maryland, to Benning, D. C., and

WHEREAS Washington Company is willing to provide the necessary equipment to furnish power to Railroad Company at Benning, D. C., and to operate and maintain same

for Railroad Company's use under the general direction of Electric Companies, and thereby become a party to the Railroad Contract, and

WHEREAS all parties hereto desire that some of the existing transmission lines, communication facilities and other equipment owned by them and certain additional interconnection facilities contemplated under this Agreement, shall be made available for the joint use of the parties hereto in order to secure greater economy in operation and improved service to the Railroad Company and to the public,

NOW, THEREFORE, THIS SUPPLEMENTAL AGREEMENT WITNESSETH: That for and in consideration of the sum of Five Dollars ($5.00) paid by each of the parties hereto to the other, receipt whereof is hereby acknowledged, and of other valuable considerations, Railroad Company, Electric Companies and Washington Company hereby agree to the following changes, additions and modifications of the Railroad Contract, all other terms and conditions of that contract not specifically modified hereinafter and not inconsistent with the terms and conditions of this supplemental agreement to remain in full force and effect:

PREAMBLE TO SUPPLEMENTAL AGREEMENT

DATED JUNE 22, 1938

This Supplemental Agreement made this Twenty-second day of June, 1938, by and between THE PENNSYLVANIA RAILROAD COMPANY, a Pennsylvania Corporation, hereinafter referred to as "Railroad Company," the CONSOLIDATED GAS ELECTRIC LIGHT AND POWER COMPANY OF BALTIMORE, a Maryland Corporation, the PENNSYLVANIA WATER & POWER COMPANY, a Pennsylvania Corporation, and the SAFE HARBOR WATER POWER CORPORATION, a Pennsylvania Corporation, the last mentioned three Companies hereinafter jointly referred to as "Electric Companies."

WHEREAS Railroad Company and Electric Companies heretofore entered into a contract dated September 2, 1931, for the supply of electric power and energy in connection with Railroad Company's main line electrifications and for the furnishing by Electric Companies of specified facilities required in connection with such supply, and

WHEREAS the said contract was supplemented by an agreement dated August 15, 1934, to which Potomac Electric Power Company, a corporation of the District of Columbia, was also a party; the said contract as so supplemented being hereinafter referred to as the "Railroad Contract," and

7

WHEREAS Railroad Company and Electric Companies, the parties hereto, now desire to amend and modify certain of the terms and conditions of said Railroad Contract,

NOW, THEREFORE, THIS SUPPLEMENTAL AGREEMENT WITNESSETH: That for and in consideration of the sum of Five Dollars ($5.00) paid by each of the parties hereto to the other, receipt whereof is hereby acknowledged, and of other valuable considerations, Railroad Company and Electric Companies hereby agree to the following changes, additions and modifications of the Railroad Contract, all other terms and conditions of that contract not specifically modified hereinafter and not inconsistent with the terms and conditions of this supplemental agreement to remain in full force and effect:

8

ARTICLE I

Duration of Agreement

This agreement shall become effective on the date of execution and shall remain in force until midnight of September 30th, 1960.

ARTICLE II

Amount of Power and Energy

Section 1. The amount of power and energy, hereinafter referred to as "contractual supply," which Railroad Company shall call for and which Electric Companies shall supply when called for by Railroad Company is defined as the entire electrification requirements for passenger, freight and switching service, as and when electrified, including such auxiliary services for signals, light and power in connection therewith as Railroad Company may elect to take, on the main line of the Philadelphia, Baltimore & Washington Railroad from Perryville, Md. to Washington, D. C., on the passenger and freight lines of the present Philadelphia Division between Thorndale, Pa. and Harrisburg and Enola, Pa., on the Columbia and Port Deposit Railroad from Columbia, Pa. to Perryville, Maryland, and yards adjacent thereto and supporting these services.

Section 2. Railroad Company may from time to time call upon Electric Companies for the supply of power and energy for additional services on the lines referred to in Section 1 of

this Article and/or for passenger, freight and switching services on additional lines in connection with extensions of electrification by Railroad Company, excepting, however, that in respect to such lines in the vicinity of, and within a radius of approximately 25 miles from Safe Harbor, Railroad Company shall call for and Electric Companies shall supply the entire power requirements of said lines, including such auxiliary services for signals, light and power in connection therewith as Railroad Company may elect to take. Electric Companies shall supply such additional power and energy when called upon under this Section, under the terms and conditions of this contract, and such additional power and energy, which may be furnished in part by additional single phase hydro generation referred to in Sub-Section 2(d) of Article VIII, shall then constitute a part of the "contractual supply" hereunder, provided, however, that for such additional supply, Railroad Company shall endeavor to give to Electric Companies written request for the supply at least eighteen (18) months in advance of the date when such energy will be required. If due to unforeseen circumstances, Railroad Company requests such additional supply on less than eighteen (18) months' notice, Electric Companies will use their best endeavor to provide such additional system capacity and/or special facilities as may be required, but in such event Electric Companies shall not be charged with any breach of contract for failure so to do within a period less than eighteen (18) months from receipt of the written request.

SECTION 3. It is understood and agreed that the above mentioned boundary or terminal points are approximate des-

ignations, the actual locations being the Railroad Company's substations in the vicinity of such points. The entire power and energy requirements for the above electrified line or lines, up to the capacity of Railroad Company's transmission lines to transmit the power and energy safely and with satisfactory voltage regulation, shall be supplied normally by Electric Companies at all times, commencing with the date when electric train service on the above mentioned railroad lines or any part thereof is inaugurated.

ARTICLE III

Facilities to Be Provided and Points of Supply

Electric Companies shall install, operate and maintain all generating, transmission and switching equipment, except the 110 kv. 60 cycle circuit described in Section 3 of Article III-A below, necessary to deliver at the points of supply hereinafter designated the amount of power and energy specified in Article II, including such special equipment and facilities provided for use of and at the request of Railroad Company, as may be called for from time to time under the provisions of Articles VIII and IX. The first and second frequency changer originally intended* for installation by Electric Companies at Loudon Park, Maryland, will be installed, operated and maintained by Washington Company at Benning, D. C.

---

* *Under the terms of Original Contract of September 2, 1931, the frequency changers here referred to were to be located at Loudon Park, Maryland. This "original intention" has been changed by the terms of the Supplemental Agreement of August 15, 1934.*

Points of supply shall be at or near the terminals of the 25 cycle single phase generators of the frequency changers, located at Benning, D. C. and Loudon Park, Md.; at the terminals of Electric Companies' 132.0 kv. circuits at Perryville, Md.; at the low tension terminals of the Railroad Company's step-up transformers at Safe Harbor, Pa.; and at such high tension terminals of Railroad Company's step-down transformers as may be agreed upon between the parties. Railroad Company shall provide single phase transmission capacity between Perryville and Loudon Park sufficient to normally transmit not less than 25,000 kw. to the Railroad Company's lines south of the Baltimore tunnels and in addition shall provide for the general transmission use of Supplying Companies, a three wire 110 kv. circuit described in Section 3 of Article III-A below, two wires of which circuit may be used by Railroad Company in emergencies as a reserve 132.0 kv. single phase circuit.

ARTICLE III-A

Supply at Benning

Section 1. *Amount of Power and Energy Available:* Railroad Company is entitled to receive through the frequency changer equipment at Benning such power and energy as may be needed for its service requirements at Benning and as may be transmitted over the 230 kv. Baltimore supply connection through Takoma in excess of the firm peak service as defined in the Takoma Agreement and/or as may be transmitted over the 110 kv. connection on Railroad Company's right-of-way to Benning. Railroad Company shall be

further entitled to such additional power and energy as can be made available by Washington Company from its own steam generating stations at request of Baltimore Company in excess of Washington Company's system load to the extent that Baltimore Company is entitled to call for such power and energy under Articles IV and V of the Takoma Agreement. It is expressly understood and agreed that Washington Company for the purpose of this agreement shall not be required to install additional generating capacity at its own steam stations and that Electric Companies shall provide generating capacity sufficient to supply the full amount of "contractual supply" defined in Article II.

SECTION 2. *Voltage Regulation, General Operation, etc.:* Washington Company shall adjust the load and voltage on the 25 cycle side of the frequency changer equipment under the general direction of Electric Companies' load dispatcher, but may adjust the voltage on the 60 cycle side to suit best the requirements on its own generating and distributing system within such range as may not adversely affect the stability of interconnection and other characteristics of the combined power supply system or the 25 cycle output to Railroad Company. In addition to its primary purpose of power supply to Railroad Company and secondary purpose of 60 cycle voltage regulation, the frequency changer equipment at Benning, may be used for transmitting in conjunction with Railroad Company's 132.0 kv. circuits, power and energy to or from Washington Company's system to the extent of spare capacity available over such circuits in excess of Railroad Company's own service requirements, and in such manner

as will not materially affect Railroad Company's voltage regulation or transmission losses on the 132.0 circuits, provided however, that Railroad Company's Load Dispatcher may order curtailment or suspension of such interchange of power between Supplying Companies, in the event that Railroad Company's service is adversely affected by such operation. For the purpose of determining the contractual supply to Railroad Company, energy delivered on the 25 cycle side of the frequency changer equipment at Benning shall be combined with the energy delivered to Railroad Company by Electric Companies at the other points of supply, referred to in Article III.

SECTION 3. *Reserve Supply to Benning Frequency Changer:* In order to insure to the greatest possible extent availability of 60 cycle supply at Benning in excess of the spare capacity available on Washington Company's own system, Railroad Company hereby agrees to install and maintain in first class order at its own expense that portion of the Baltimore-Benning 110 kv., 60 cycle circuit located on Railroad Company's structures from a point at or near the Patapsco River, where Electric Companies' existing tower line crosses the Railroad, to the 60 cycle transformer station at Benning, D. C.; Supplying Companies providing the circuit extension and transformers connecting this 110 kv. circuit to the Westport and Benning station buses, as provided for in the Takoma Agreement.

The facilities referred to in this section shall be made available not later than the date for which Railroad Company

may request the second frequency changer set at Benning, D. C., as provided for in Article VIII; except however, that in respect to that portion of the Baltimore-Benning 110 kv., 60 cycle circuit located on Railroad Company's structures between Patapsco Crossing and Odenton, at which latter point Baltimore Company may connect this circuit to its own transmission system, Railroad Company if requested by Electric Companies shall provide such portion of this line in advance of the installation of the second Benning frequency changer unit, but not earlier than January 1st, 1936, and excepting further that Railroad Company if requested by Electric Companies shall provide the entire circuit between Patapsco Crossing and Benning at any time after January 1st, 1939. The request for these facilities before the installation of the second Benning frequency changer set shall be made in writing by Electric Companies not less than nine months in advance of the date when such facilities shall be required.

Except for the above mentioned connection to Baltimore Company's transmission system at Odenton, no connection of other facilities of Supplying Companies shall be made to the portion of the 110 kv. circuit located on the structures of, and owned by Railroad Company without the consent of Railroad Company.

SECTION 4. *Additional Services:* If during the terms of this agreement additional services or equipment covered by Railroad Contract other than those specified herein* or modifica-

* *Refers to terms and conditions of Supplemental Agreement of August 15, 1934.*

tions in such services or equipment are desired by Railroad Company from Washington Company, such additional services or modifications shall be arranged for from time to time by joint agreement between the parties hereto including Electric Companies. Additional services and modifications of equipment and services, as between Railroad Company and Electric Companies, referred to in the Railroad Contract which do not affect the terms and conditions of this supplemental agreement* as far as Washington Company is concerned, may be agreed upon from time to time between Railroad Company and Electric Companies without requiring Washington Company's consent.

ARTICLE IV.

Characteristics of Supply

All electrical energy supplied under this agreement shall be delivered in the form of single phase alternating current at a frequency of nominally 25 cycles per second, at a generating voltage of nominally 13,200 volts. The frequency shall not vary more than three per cent (3%) above or below normal.

The fields of the generators shall be designed and equipped with suitable voltage regulators so that the voltage may be automatically varied from 11,400 to 14,300 volts. Generators of the frequency changer sets at Benning and Loudon Park shall be capable of operating as synchronous condensers and as such shall have a capacity of not less than 60% of the kva. ratings specified for operation as generators.

---

* *Refers to terms and conditions of Supplemental Agreement of August 15, 1934.*

ARTICLE V

Power Factor

The power and energy supplied and taken under this agreement shall be at a power factor as near to unity as practicable, consistent with the inherent characteristics of the electric system and apparatus employed and without special or additional appliances for power factor correction.

Each party shall adjust, maintain and operate its apparatus and circuits in such manner as will, to the greatest extent possible, maintain high power factor and avoid the interchange of wattless current, except when necessary to permit the greatest possible use of single phase generation produced by direct connected prime movers.

ARTICLE VI

Emergency Supply

During or following railroad wrecks, extraordinary load demands caused by storms, floods, blizzards, abnormally heavy railroad traffic, derangement of converting or transmitting facilities, failure of the Railroad Company's other source or sources of power supply, or any other emergency condition causing excessive draught on Electric Companies, said draught shall be considered an abnormal demand. The term "abnormally heavy railroad traffic" shall be considered to mean excessive or congested traffic beyond that usually carried by Railroad Company due to accidents, congestion, or failure of other connecting transportation line or lines or other sections of Railroad Company's system to furnish its

or their normal service, or any other emergency conditions causing excessive or congested traffic. Electric Companies, if they have sufficient generating, conversion and transmission capacity available at the time, shall supply such abnormal demand at the billing energy rates but without increasing the billing demand and charges for same under Article VII hereof, provided reasonable notice is given by Railroad Company to Electric Companies as far in advance as conditions will permit.

In case of breakdown of machinery and equipment of Electric Companies or other similar emergencies, Railroad Company agrees upon request to reduce its demand on Electric Companies during such emergency to the extent that it is able to do so without incurring expense thereby, by making use of the emergency facilities of its other sources of power supply.

It is understood and agreed that in thus rendering assistance to each other without charge for increased demand caused by such emergencies neither Railroad Company nor Electric Companies shall be required to render capacity service greater than the capacity of its available equipment or greater than it may be able to secure under other contractual arrangements nor shall either of them be required to subject its equipment or other services to undue hazard or disturbances as to the extent of which each party shall be the sole judge in respect to conditions on its own system. The party receiving assistance agrees to promptly reduce the emergency demand to the then normal demand upon notification from the

other party that such reduction is necessary in order to protect its equipment, preserve its other electrical services or meet the contractual obligations of its other sources of power supply.

ARTICLE VII

Rates for Power and Energy

Section 1. *Demand:* As soon as practicable after each calendar month Railroad Company's billing demand in kilowatts of electrical energy taken from or provided by Supplying Companies hereunder for such month in respect to the "contractual supply" specified in Article II, shall be ascertained in the manner hereinafter stated in this section.

From each of three days in the month, Sundays excepted, there shall be selected one even or clock hour which shall be the hour of greatest combined draught (in kilowatt hours) of the day from which it is taken; and said three days shall be such that the total draught of the three hours selected therefrom in the manner thus indicated shall be greater than the total draught of three hours similarly selected from any other three days in the month, Sundays excepted. One-third of the aggregate number of kilowatt hours drawn and consumed by Railroad during the three hours selected as aforesaid from each month shall be taken and considered as the number of kilowatts constituting the Railroad Company's billing demand for such month.

The term "greatest combined draught" (in kilowatt hours) as hereinbefore used is to be construed as representing a single quantity of energy, and the billing demand shall be

determined from the combined quantity of energ, taken hereunder at the various points of supply just as though the various quantities were measured as one quantity at one point.

For each month during the term of this contract or any extension thereof, the amount of electrical energy which Electric Companies shall stand ready to supply and which the Railroad Company shall be obligated to pay for, shall be not less than two-thirds of the greatest previous billing demand of the "contractual supply" exclusive of the power requirements of Railroad between Parkesburg and Thorndale, Pa.

For the billing demand Railroad Company shall pay at the rate of One Dollar and Fifteen and One-half Cents ($1.155) per kw. per month.

SECTION 2. *Energy:* The amount of billing energy shall be equal to the total energy metered as per Article XIII at the various points of supply and Railroad Company shall pay for the same at the rate of

Four (4.0) Mills per kwh. for First 5,500,000 kwh. per month.
Three and thirty-four hundredths (3.34) Mills per kwh. for excess above 5,500,000 kwh. per month.

SECTION 3. *Fuel Rate Adjustment:* The amount charged for steam generated energy supplied under this contract shall be subject each month to adjustment by increase or decrease according to the average cost of coal (in the bunkers) as reported monthly by the Consolidated Gas Electric Light and Power Company of Baltimore to the Public Service Commission of Maryland. This adjustment is based upon

changes in cost of fuel used for generating electricity by steam from a base price of $4.00 per net ton and shall be determined each month by the following formula:

$$\text{Adjustment in \$} = \frac{\text{Net Steam Gen. in kwh.}}{\text{Tot. Net Gen. in kwh.}} \times \text{R. R. Bill. Energy in kwh.} \times \text{Avge. Lbs. Coal per kwh.} \times \frac{\text{Variation in \$ per Net Ton}}{2000}$$

Net Steam Gen. in kwh.	=	Total kilowatt hours sent out at generator voltage from all steam generating plants of Electric Companies during the month.
Tot. Net Gen. in kwh.	=	Total kilowatt hours sent out at generator voltage from all the hydro and steam generating plants of Electric Companies during the month.
R. R. Bill. Energy in kwh.	=	Total energy in kilowatt hours billed Railroad Company during the month.
Avge. Lbs. Coal per kwh.	=	Average lbs. of coal used per kwh. (station sendout) in all the steam generating plants of the Consolidated Gas Electric Light and Power Company of Baltimore.
Variation in $ per Net Ton	=	Difference between base price of $4.00 per net ton in the bunkers and the actual cost of coal per net ton during the month as reported by the Consolidated Gas Electric Light and Power Company of Baltimore to the Public Service Commission of Maryland.

If at any time during the life of this contract fuels other than the type of fuel now burned are used by Electric Companies in their steam generating plants, the above fuel rate adjustment shall be modified to take care of changed conditions on an equitable basis.

SECTION 4. *Decrease of Billing Rates:* The energy rates specified in Sections 2 and 3 of this Article are to be regarded as maximum rates and it is the intent of this agreement, as provided for in this Section, that Railroad Company shall receive the benefit of lower cost of generation in the event that the average cost to Electric Companies of producing energy is lower than the rates specified in Sections 2 and 3 of this Article. Electric Companies will compute at the end of each calendar year the actual generating and operating costs of the items specified in Tables VII to X, inclusive, attached hereto and made a part of this contract, these items being those specified in the Classification of Accounts of the Public Service Commission of Pennsylvania as operating accounts for steam, hydro, substation and transmission expenses, the hydro costs herein referred to being those of the Safe Harbor and Holtwood plants. In place of the Classification of Accounts of the Public Service Commission of Pennsylvania, the corresponding accounts set up by the Federal Power Commission and/or the Public Service Commission of Maryland may be substituted in regard to those plants and equipment for which Electric Companies are setting up the accounts in accordance with the rules of the above mentioned regulatory bodies.

To this total annual operating cost there shall be added an amount representing an adjustment for excess annual charges on capital costs of the above mentioned hydroelectric plants, equal to the total output of Electric Companies' hydro plants in kwh., multiplied by 3.0 mills. The total figures thus

computed and divided by the total output in kwh. of all generating plants* shall represent the bus bar cost per kwh.

There shall be included in the above computation the amount and cost of purchased energy (other than intercompany supply of Electric Companies), and of supply secured from jointly owned or leased plants or through interchange with other sources of supply, including in such cost Electric Companies' apportionment of expense of operation and maintenance of tie lines and other facilities which are required in connection with such purchased energy or supply from sources other than specifically provided for in Tables VII to X, the intent of the inclusion of such energy and costs being to give Railroad Company the benefit of lower bus bar cost if such lower costs are actually secured by Electric Companies by reason of such purchased energy or supply from other sources.

To the above bus bar cost shall be added a percentage, representing the conversion losses on all energy supplied through frequency changer units at the various points of supply, equal to 12.5% multiplied by the ratio of the total annual output in kwh. of the 25 cycle end of such frequency changer units to the total energy in kwh. billed Railroad Company, to obtain the actual cost per kwh. of energy delivered to Railroad Company. When such actual cost in mills per kwh. so computed is found to be less than the average rate specified in Sections 2 and 3, then this lower value shall be the energy rate to be paid by Railroad Company for all energy supplied in that year.

---

* Signed copy contains words "*and equipment*" at this point.

ARTICLE VIII

Annual Charges for Specified Equipment and Facilities

Section 1. At the written request of and upon reasonable notice by Railroad Company, Electric Companies shall install, operate and maintain single phase water wheel generators, converting equipment, cables, special 25 cycle bus for single phase supply to Railroad Company and switching equipment, step-up transformers and transmission lines under terms and conditions as herein specified. Railroad Company shall call on Electric Companies to provide additional single phase generating or converting capacity when the maximum integrated clock hour load of the "contractual supply" specified in Article II, exclusive of the power requirements of the Railroad between Parkesburg and Thorndale, Pa., and exclusive of any hour during which an abnormal demand occurs that would not be used in the determination of Electric Companies' billing demand under the provisions of Article VI, is equal to or greater than Electric Companies' total installed single phase capacity less the capacity of the largest of such units. Railroad Company however shall not be required to call for an increase in said single phase generating or converting capacity by reason of deficiency in flow at the hydroelectric generating plants of Electric Companies. Railroad Company shall endeavor to request the single phase water wheel generators and transmission lines not less than eighteen (18) months, and other equipment and facilities not less than fifteen (15) months in advance of the date when such equipment shall be required. If due to unforeseen circumstances, Railroad Company requests such facilities on

less than the above notice, Electric Companies will use their best endeavor to comply with Railroad Company's request, but in such event Electric Companies shall not be charged with any breach of contract for failure so to do within a period less than eighteen (18) months or fifteen (15) months as the case may be.

Railroad Company shall pay annual charges on such apparatus and equipment, including operation and maintenance thereof, as hereinafter specified and described in detail in Tables I to VI attached hereto and made a part of this contract.*

All such equipment shall be complete and adequate for the purpose intended regardless of whether all necessary details and parts are specifically mentioned in the tables. The equipment furnished also shall be adequate and suitable for the character of load and service of Railroad Company throughout the term of this contract, and should any part of such equipment at any time be found to be inadequate or unsuitable, as evidenced by frequent breakdowns or by interruptions to Railroad Company's service, caused by inadequacy or unsuitability of such equipment, Electric Companies shall replace the same without increasing the annual charges herein specified.

Electric Companies shall bill said annual charges pro rata each month commencing with the date specified in the

---

** Tables I to VI being a part of the terms and conditions of the Original Contract of September 2, 1931, have been superseded by Tables I-A to VI-A under the terms of the Supplemental Agreement of August 15, 1934.*

written notice, provided that Electric Companies actually have such equipment ready for service, or commencing with such earlier date that equipment is ready and Railroad Company makes actual use of same.

The initial 25,000 kw. frequency changer and appurtenances to be located at Loudon Park as per Table I shall be located at Benning, D. C., and shall comprise the apparatus and equipment described in Table I-A; also one additional frequency changer set as per Table VI to be located at Loudon Park shall be located at Benning, D. C., and consist of the equipment described in Table VI-A. Tables I to VI are superseded by Tables I-A to VI-A attached hereto and made part of this supplemental agreement.*

Washington Company hereby agrees to lease to Railroad Company for the term of this agreement certain property owned by Washington Company adjacent to or near its Benning Power Station, of approximately one (1) acre to be used as a site for Railroad Company's transformer substation, also right-of-way across Washington Company's property from said substation site to the right-of-way of Railroad Company's Anacostia Branch for a transmission line consisting of poles or towers, three single-phase 132 kv. circuits and one 110 kv. three phase circuit, adaptable to 132 kv. single phase operation, with ground wires, etc., and Railroad Company shall have the right to occupy said substation site and transmission line right-of-way and right of access thereto

* *Tables I to VI being a part of the terms and conditions of the Original Contract of September 2, 1931, have been superseded by Tables I-A to VI-A under the terms of the Supplemental Agreement of August 15, 1934.*

at the nominal rental of One Dollar ($1.00) per year, provided, however, that location and layout shall be subject to the approval of Washington Company and shall comply with all laws and regulations pertaining thereto.

SECTION 2. The annual charges on the equipment which Supplying Companies provide shall be as follows:

Initial Equipment for Perryville-Washington Line:

(a) Equipment at Safe Harbor and at or near Benning, as per Table I-A, totaling 78,000 kw. capacity at an annual charge of.....$220,620.

(b) A single phase, 25 cycle step-up transformer substation of 80,000 kva. capacity with preparation of site for 160,000 kva. additional transformer capacity; together with a four circuit single phase 132 kv. steel tower line between Safe Harbor, Pa., and Perryville, Md., as per Table II-A, at an additional annual charge of.....$207,000.

Additional Equipment as Required:

(c) The first additional 25,000 kw. frequency changer set at Safe Harbor, as per Table III-A, at an additional annual charge of...$ 71,700. and each further additional 25,000 kw. frequency changer set at Safe Harbor, as per Table III-A at an additional annual charge of.....$100,800.

(d) An additional 28,000 kw. water wheel generator, as per Table IV-A, at an additional annual charge of.....$ 71,700.

(e) Each additional pair of 13 kv. switch positions at Safe Harbor (Conestoga Substation) with oil circuit breakers, etc., for connecting the low tension side of additional step-up transformers to the substation bus, as per Table V-A, at an additional annual charge of.....$ 4,500.

(f) Each additional 25,000 kw. frequency changer set, i.e., one additional at Benning and two at or near Loudon Park, as per Table VI-A, at an additional annual charge of.....$109,200.

SECTION 3. At the time of request by Railroad Company for the installation of equipment herein provided for, other apparatus and equipment may, if and when acceptable to Railroad Company be substituted, or variations in the quantities and arrangement of same may be made. Annual charges in all such cases are to be determined in the same manner as provided for in Article IX hereof.

SECTION 4. An adjustment shall be made in respect to the annual charges for the special equipment enumerated in this Article in the event that Railroad Company's written request for such equipment is not received by Electric Companies within sixty (60) days after the date of this contract. Such adjustment shall be made in accordance with the variation

in the price of electrolytic copper as quoted on the New York metal market and in the price of commercial grade steel billets as quoted on the Pittsburgh metal market. The base price of these commodities shall be taken as 8.952 cents per pound for electrolytic copper and $1.34 per hundred weight for steel billets, and adjustment shall be made for the average of the daily closing price quotations for the first full calendar month following written notice on the part of Railroad Company requesting additional special equipment. The percentages which copper and steel billets bear to the total cost are 15% and 55% respectively.

SECTION 5. In respect to the initial electrified operation of the Philadelphia, Baltimore and Washington Railroad, between Perryville, Md. and Washington, D. C., the following dates in lieu of the notice of eighteen months and fifteen months respectively, specified in Section 1 of this Article, are hereby agreed upon for Supplying Companies to have equipment ready for service and for Railroad Company to commence pro rata payments of annual charges:

January 1, 1935	$28,095.00	per month covering one hydro unit, one frequency changer set, 25 cycle, 13 kv. bus, connecting cables, step-up transformer substation, all at Safe Harbor and including the transmission line to Perryville.
June 1, 1935	$ 7,540.00	per month covering one 25,000 kw. frequency changer set at Benning.

SECTION 6. Supplying Companies further agree to supply without charge D. C. control current at or near the location of Supplying Companies' frequency changer stations for the

control of Railroad Company's switching equipment and to operate Railroad Company's outdoor substations at Benning, D. C., and Loudon Park, Maryland, (after such time as Railroad Company may request a frequency changer station at this location) and Safe Harbor, Pa., in accordance with the directions of the authorized representatives of Railroad Company, provided, however, that Railroad Company arranges with the supplying company for the installation and maintenance of such control circuits between said frequency changer station control room and Railroad Company's outdoor substations and provided further that Electric Companies do not assume any liability for damage to property and equipment or for injury to persons caused directly or indirectly in connection with the furnishing of these facilities and/or services under this Section, and that Railroad Company hereby agrees to indemnify Washington Company for damage to property and equipment or for injury to persons and employees caused directly or indirectly in connection with the furnishing by Washington Company of these facilitie and/or services under this Section.

SECTION 7. The annual charges to be paid by Railroad Company to Electric Companies under this Article shall be reduced by $6,000 which is the agreed upon amount of rental and Supplying Companies' share of the maintenance cost of the 110 kv. circuit described in Section 3 of Article III-A, said reduction shall commence, prorated, from the date the entire length of this circuit is made available between Patapsco Crossing and Benning, under the provisions of Section 3 of Article III-A and Section 2 of Article XII.

SECTION 8. At such time as Railroad Company shall call on Electric Companies to provide the first unit of additional single phase capacity at Safe Harbor under the provisions of Section 1 of this Article, Electric Companies shall have the option of providing either a 25,000 kw. frequency changer or a 28,000 kw. water wheel generator as specified in Items (c) and (d) respectively of Section 2 of this Article and described in detail in Tables III-A and IV-A.

SECTION 9. Railroad Company further agrees to supply without charge 100 cycle power at not more than four of its signal bridges along the east side of the Susquehanna River between Safe Harbor and Shocks Mills Bridge for the operation of Electric Companies' telemeter transmitters for remote water level indications, provided the amount of power supplied at each such point shall not exceed 250 watts and that the use thereof shall not adversely affect the signal facilities of Railroad Company.

ARTICLE IX

OTHER FACILITIES AND JOINT USE

SECTION 1. If from time to time it appears practicable and desirable to both parties to make use of each other's property and/or facilities for additional single phase hydro generation beyond the provisions of Article VIII, for power transmission, communication, or other similar purposes, or to make use of each other's engineering, construction and/or maintenance organization or special maintenance and construction equipment, it is agreed between the parties hereto that one party

will provide such facilities, do work or perform services for the other as agreed upon in detail at the time, at actual cost plus such percent to cover overhead charges as is customarily charged by the party doing the work.

SECTION 2. For such electrical equipment, transmission structures and circuits as are especially provided for Railroad Company's use by Electric Companies, the annual charges thereon shall be at the rate of 12.75% of the cost thereof in Maryland and 12.0% in Pennsylvania plus the cost of operation and maintenance; for hydraulic equipment including substructure and superstructure at the rate of 10.5% including the cost of operation and maintenance; and for real estate, right-of-way, cost of excavation and grading work of substation sites at the rate of 8.5%. The above rates are predicated on the use over an average period of 20 years and shall be adjusted by mutual agreement to take care of less than 20 years occupancy.

SECTION 3. Railroad Company will provide, operate and maintain as a consideration of this agreement,* communication, telemetering and control circuits in conjunction with its own telephone cable and plant facilities, including connections thereto, required directly or indirectly in the joint interest and/or for the joint use of the parties hereto, as specified and described in Table XI-A attached hereto and made a part of this contract. Electric Companies and Railroad Company shall each have the right to ask for modifications or rearrangements of the facilities so described in a manner as may better

* *Refers to Supplemental Agreement of August 15, 1934.*

meet their future requirements, provided that such modifications or rearrangements requested by Electric Companies shall not involve either additional wire circuits or additional expense without compensation to Railroad Company, and provided also that such modifications or rearrangements requested by Railroad Company can be effected under the then prevailing state of the art in a manner that will not curtail or impair Electric Companies' essential communication, telemetering and control services in the event that it becomes necessary for Railroad Company to withdraw for its own use some of the circuits described in Table XI-A.

ARTICLE X

Coordinated Operation of Power Supply.

Section 1. During the hours of peak loads on other sections of the railroad, and provided that such peak loads do not regularly occur during the hours of peak loads of the "contractual supply" specified in Article II, Railroad Company may call for and Electric Companies shall then furnish without demand charge additional loads in excess of the "contractual supply" up to the capacity of one unit rated at not more than 28,000 kw. but Electric Companies shall not be obligated to furnish energy in excess of 56,000 kwh. on days of high flow and 20,000 kwh. on days of low flow. For the purpose of this Article a day of high flow is defined as a 24 hour period from midnight to midnight during which water is discharged over or through the spillway openings at the Safe Harbor plant for more than two consecutive hours, all other days being days of low flow.

This additional supply furnished by Electric Companies in excess of the "contractual supply" is subject to Railroad Company complying with the following conditions:

(a) That Railroad Company secures the consent of third parties affected by the provisions of this Article (which parties are normally supplying those other sections of the railroad) or without such consent upon advice of Railroad Company that it has the right under its contract with such third parties to put into effect the method of operation herein described.

(b) That the capacity of the 25 cycle hydro and motor-generator units installed in accordance with Article VIII is sufficient.

(c) That there is no major breakdown to Electric Companies' generating equipment.

(d) That Railroad Company has installed the equipment necessary for putting into effect the method of operation herein described without causing undue disturbance to other services of Electric Companies.

SECTION 2. Said capacity and energy is to be furnished by Electric Companies either from a segregated unit at their hydroelectric generating plant or from the 25 cycle unsegregated units supplying normally the "contractual" load, or by a combination of these two methods of operation, as Railroad Company may elect; if furnished from unsegregated units, the load may be transferred from the other sections of the Railroad Company by means of suitable switching operations

carried out by Railroad Company on its own system, or may be furnished through parallel operation where such method of operation is provided for by separate agreement; if furnished from a segregated unit, Electric Companies may limit the duration of such supply to a continuous period of not over two hours per day and may furnish approximately full load of such segregated unit on days of high flow and not less than 7,500 kw. on days of low flow. All operations are to be carried out by Electric Companies as near as practicable in accordance with the load dispatching directions of Railroad Company, subject, however, to the limitations as to duration and amount of supply stipulated in this Article. Demand and energy furnished to Railroad Company in connection with said additional load shall either be metered separately by equipment installed by Railroad Company at its own expense or shall be computed by a method jointly agreed upon between Electric Companies and Railroad Company prior to the furnishing of such additional loads. For all energy delivered under the provisions of this Article in excess of the "contractual supply," Railroad Company shall pay a surcharge of one and sixty-six hundredths (1.66) mills per kwh.

ARTICLE XI.

Payments

Section 1. On or before the Fifth day of each month a bill for all charges under Articles VII to X inclusive, suitably prorated on a monthly basis, shall be rendered to Railroad Company by Consolidated Gas Electric Light and Power

Company of Baltimore for Supplying Companies jointly and Railroad Company shall pay same on or before the Twentieth day of each month without deduction for any amount in dispute. On those charges or credits for which final data are not available at the time when bill is rendered, a temporary method of billing shall be agreed upon subject to final correction the following month or months or at the end of each calendar year.

In rendering bills and receiving payment thereof, the Consolidated Gas Electric Light and Power Company of Baltimore is acting for itself and for the other companies, jointly referred to as Supplying Companies, and payment by Railroad Company to the Consolidated Gas Electric Light and Power Company of Baltimore in accordance with terms hereof shall be a full and complete discharge of its liability for payments to Supplying Companies hereunder.

SECTION 2. If at any time during the term of this contract Electric Companies shall supply electricity to any consumer at a lower rate than that hereinbefore given to Railroad Company hereunder and such lower rate shall not be justified by different conditions of service making the cost of production for and distribution to such other consumer relatively less than to Railroad Company, then and in that event and so long as such lower rate shall be given to such other consumer while this contract is in force, Railroad Company shall be entitled to a reduction in its said rate equal to so much of the amount of the difference between such lower rate and the Railroad Company's said rate as shall not be justified.

ARTICLE XII

Interruptions to Service, Cancellation of Contract, Non-Payment of Bills, Other Uses of Power

Section 1. It is expressly agreed that Supplying Companies shall not be held responsible or liable for any loss or damage on account of the non-delivery of all or any portion of the electrical energy herein contracted for, nor for any deduction or delay in such delivery caused by strike not due to the collusion of Supplying Companies, or fire, civil or military authority, insurrection or riot, the action of the elements or by any other cause beyond its control; and, on the other hand, it is agreed that if Supplying Companies shall at any time fail for any such cause to make delivery of any energy called for by Railroad Company to meet its requirements, such failure shall entitle Railroad Company to proportionate and equitable deduction from payment for demand and annual charges during the month in which such non-delivery occurred. Any such deduction or abatement shall be made as soon as practicable after the end of the month in which the failure of delivery occurred.

Section 2. It is recognized that Railroad Company must receive regular and uninterrupted service from Supplying Companies in order to make this contract of value to it, and if for any cause, not contributed to by Railroad Company or by equipment outside of Supplying Companies' control, interruptions to service to be furnished under this contract shall be so frequent or of such character or duration as to interfere materially with Railroad Company's operation of its

lines, then Railroad Company shall in writing notify Electric Companies thereof, specifying the reason for complaint; and Electric Companies shall forthwith proceed to remedy the trouble. If the trouble is not so remedied within thirty (30) days or such reasonable period as shall be mutually agreed upon, Railroad Company may by notice in writing to Electric Companies cancel this contract. Such cancellation shall take effect as soon thereafter as Railroad Company may be able to obtain elsewhere the necessary supply of energy, and in the interim Supplying Companies shall, under all terms and conditions of this contract, continue to supply for a reasonable time the energy necessary for Railroad Company's requirements, and Railroad Company shall state definitely in said cancellation the date when the supply of energy under this contract shall cease.

It is recognized that under the provisions of this agreement,* Electric Companies assume the responsibility of uninterrupted service to Railroad Company, including that portion of the service supplied by Washington Company. Washington Company hereby expressly agrees to use due diligence and cooperate with Electric Companies for the purpose of maintaining satisfactory and uninterrupted service to Railroad Company. In the event that disturbances to service causing complaint by Railroad Company are due to conditions arising on Washington Company's system, the correction of such conditions shall be undertaken by Washington Company at Electric Companies' request. If the correction of such conditions, prior to the installation of the 60 cycle tie line facilities

* *Refers to Supplemental Agreement of August 15, 1934.*

between Westport and Benning, is beyond Electric Companies' control, but can be effected by providing these facilities, either Electric Companies or Railroad Company shall have the right to call upon the other parties to provide their respective portion of the 60 cycle tie-in facilities referred to in Section 3 of Article III-A irrespective of the installation dates provided for in that section, and the right of Railroad Company to cancel this contract on account of interruptions on that portion of the service supplied by Washington Company shall be suspended for the period required to provide these facilities. Such right of cancellation, however, shall be reinstated within a reasonable time after these facilities are in operation, in the event that Electric Companies, after being notified in writing by Railroad Company of service complaints as provided in the foregoing paragraph, have failed to remedy the trouble.

SECTION 3. Should Railroad Company fail to make payment due under Article XI within thirty (30) days after receipt of a bill therefor, Electric Companies shall have the right to discontinue for that cause the supply of electrical energy hereby agreed to be furnished by them, after having given Railroad Company ten (10) days' notice in writing of its intention so to do and the cause therefor. In case the supply of electrical energy shall be discontinued on account of the non-payment of any bill rendered by Electric Companies, Railroad Company shall, nevertheless, be obliged to pay and shall pay to Electric Companies, during the period of such discontinuance, the demand and annual charges in force at the time of such discontinuance. During such period of discontinuance and before the life of the contract shall have

been terminated, Railroad Company may procure resumption of the electrical service hereunder upon and by the payment to Electric Companies of all moneys at the time due to them hereunder, with interest on such moneys at the rate of six per cent (6%) per annum from the time they become due until the time of payment, but in any such period of discontinuance Electric Companies may, at their option, give written notice to Railroad of their intention to terminate this contract, and in case such notice be given, this contract shall terminate at the expiration of thirty (30) days after the giving of such notice, unless before such expiration Railroad Company shall have made the payments entitling it to the resumption of service as above provided.

SECTION 4. Upon the expiration of the full contract period as stipulated in Article I, or in the event that Railroad Company shall terminate this contract under Section 2 of this Article, Railroad Company shall have the right to purchase from Electric Companies the step-up transformer station at Safe Harbor and the transmission line connecting said step-up station to Railroad Company's 132.0 kv. switching station at Perryville.

In the event that Electric Companies shall terminate this contract under Section 3 of this Article, Railroad Company shall be obligated to purchase from Supplying Companies all the property and equipment that may have been provided by Supplying Companies up to that time for Railroad Company's use, as per Article VIII and IX hereof; except for hydro generators and single phase bus at Safe Harbor for

which Railroad Company shall pay to Electric Companies a sum of money to be agreed upon as representing a fair division, as between the parties, of the original or replacement cost of such equipment.

Upon the expiration of the full contract period as stipulated in Article I, Electric Companies shall promptly remove, if requested by Railroad Company, any portion of the transmission line from Safe Harbor to Perryville which may be located on Railroad Company's right-of-way or property, referred to in Table II of this agreement, and, likewise, if requested by Supplying Companies, Railroad Company shall promptly remove any portion of its equipment which may be located on Supplying Companies' property.

The purchase price to be paid by Railroad Company to Supplying Companies for property and equipment as may be involved either at the expiration of this contract or at the earlier termination thereof, shall be determined by appraisal and agreement, giving due consideration to the original and/or replacement cost, obsolescence, depreciation, and all other factors affecting the then value of the said property and equipment, all of which purchases are conditioned upon the approval of any regulatory authorities within their respective powers and jurisdiction.

SECTION 5. Supplying Companies agree that Railroad Company shall have the right, during the term of this contract, to sell or transmit portions of the electrical energy supplied to it by Supplying Companies under this contract, to any other railroad within the zone specified in Article II, which

railroad it now controls or hereafter may control or which is affiliated with it, and which railroad now constitutes or may hereafter constitute a portion or portions of the system of Railroad Company; also, that Railroad Company shall have the right under this contract to supply electrical energy for traction and other railroad operation and maintenance purposes consumed by itself and/or other railroads or companies in yards, terminals and on lines used jointly with connecting railroads, within or adjacent to the electrified zone and to resell such energy to said other users, but Railroad Company shall not have the right to sell or transmit any portion of such electrical energy to any parties other than the above, either for electric traction requirements or for any other purpose.

ARTICLE XIII

METERING

SECTION 1. All electrical energy furnished under this contract for Railroad Company shall be measured, both as to maximum demand and as to kilowatt hours, by meters to be installed and maintained by Electric Companies at their own expense, at the points of supply specified in Article III or at such other more convenient locations as may be agreed upon between the parties, including a suitable adjustment to be applied to the measurement to correct for differences caused by such change in location.

SECTION 2. Railroad Company shall install and maintain metering equipment in the 132.0 kv. transmission lines at Perryville and/or at such other points as may be found

necessary, for the purpose of carrying out the provisions of Article X.

SECTION 3. The instruments to be installed by Electric Companies and Railroad Company shall be of a standard type and manufacture, and shall accurately measure the energy in electrical units and in periods of time as required by the terms of this agreement. Railroad Company shall have the right to install at its own expense, check meters in series with Electric Companies' meters, using separate current and potential transformers whenever convenient. Both parties shall have the right to be represented at the readings of, and in the checking, adjusting, or changing of billing and checking meters.

All meters shall be kept under seal. Railroad Company agrees to provide, without charge, at its substations, suitable and necessary space and supports acceptable to Electric Companies for the erection, maintenance and testing of Electric Companies' meters and the necessary auxiliary apparatus for the said meters.

SECTION 4. All meters shall be tested and calibrated by comparison with accurate standards at regular intervals as may be mutually agreed upon. If as a result of any test, a meter shall be found incorrect, or inaccurate, it shall be restored to an accurate condition or a new meter shall be substituted. In case either Electric Companies or Railroad Company shall at any time believe that any meter registers incorrectly, the party holding such belief shall have the right to require that an extra test outside the regular schedule be made of such meter. The party desiring such test shall make

request therefor in writing upon the other party, and thereupon such meter shall be tested and calibrated, and if it shall be found inaccurate it shall be restored to an accurate condition or a new meter shall be substituted. If as a result of any test, any meter shall be found to register in excess of two per cent (2%) either above or below normal, then the readings of the check meter if available and if found correct within two per cent (2%) shall be substituted. If no check meter is available then the readings of the normal billing meter previously taken shall be corrected according to the percentage of inaccuracy so found, but no such correction, either in respect to maximum demand or kilowatt hours drawn and consumed, shall extend back beyond thirty (30) days previous to the day on which such inaccuracy shall be discovered by such test, and if during such previous thirty (30) days one or more prior tests shall have been made under provisions hereof, then no such correction shall extend back beyond the date of the last of such prior tests.

ARTICLE XIV

Arbitration

It is the intent of this agreement that disputes which may arise regarding its provisions shall be amicably settled between the parties hereto but in case any dispute cannot be thus settled within a reasonable time it shall be referred to a Board of Arbitration consisting of three competent disinterested persons experienced in the particular matter which is the subject of dispute, upon service of written notice by either party to the other.

The first member of said Board shall be chosen by the party complaining, the second member by the other party, and the third member by the first and second members. Should the second or third member remain unselected at the expiration of thirty (30) days after notice of arbitration is given, then upon the request of the complaining party, and upon notice thereof having been given to the other party, the second or third member, or both, of the Arbitration Board shall be selected by the then Chief Judge of the Court of Appeals of Maryland, or, in the event of the said Judge's disinclination or failure to act within sixty days after original notice of arbitration, said selection shall be made by the then Chairman of the Public Service Commission of Maryland.

The Board of Arbitration shall proceed at its earliest convenience to hear and determine the questions at issue after having given each party hereto not less than five days' notice of the time and place of the first meeting.

Each party shall be permitted to be represented by counsel before the Board of Arbitration, and to present in full, by competent witnesses, all facts, figures and statements which might aid the Board of Arbitration to give a final and fair judgment as to the questions in dispute.

The determination of the Board of Arbitration, or a majority thereof, shall be made within sixty days after the submission to said Board, unless prevented by circumstances unforeseen, and the decision of the Board of Arbitration or a majority thereof, shall be final and conclusive upon the parties hereto and said parties shall abide by such decision.

All expenses in connection with such arbitration, including a reasonable compensation for the arbitrators, shall be divided equally between the parties, with the exception of expenses of counsel, witnesses and employees of the parties, which expenses shall be borne by the parties incurring them.

All notices herein provided for may be given by serving the same in writing, or by sending the same by registered mail addressed to the party interested, at its principal place of business.

ARTICLE XV

Approval of Regulatory Authorities

The provisions of this contract and supplemental agreement are subject to the approval of regulatory authorities within their respective powers and jurisdiction under the Constitution and Laws of Pennsylvania, Maryland, the District of Columbia, and the United States, and all parties hereto shall cooperate in obtaining such approval.

ARTICLE XVI

Assignment

This contract shall enure to and be binding upon the successors and assigns of the respective parties hereto, but no such assignment shall be made by either party hereto without the written consent of the other.

TABLE I-A

Initial Converting Equipment at Benning

Adjacent to or within the Benning Generating Station in the northeast section of the District of Columbia, Washington Company will provide, operate and maintain a frequency changer station, consisting of one 60/25 cycle frequency changer of 25,000 kw., 80% p.f., single phase rating on 25 cycle side, with cable connection between the 60 cycle side of this machine and the main 60 cycle Benning Station Bus, and including the cable leads, oil circuit breaker, and disconnecting switch on the 25 cycle side of the frequency changer, said switches being located in and made a part of Railroad Company's 13 kv. bus.

Railroad Company's transformer substation, 25 cycle single phase, 13 kv. bus, and such direct 132 kv. and 110 kv. circuit connections as may be required from said substation to the Railroad Company's own right-of-way, will be located on property owned by Washington Company, and Railroad Company may occupy same at the nominal rental of One Dollar ($1.00) per year. The annual charge on said equipment shall be..... $90,480.

Initial Generating and Converting Equipment at Safe Harbor

Electric Companies will provide, operate and maintain in and adjacent to the Safe Harbor Hydro-electric Plant at Safe Harbor, Pa., one 25 cycle water wheel generator, 28,000 kw., 80% p.f., single phase rating; one 60/25 cycle frequency

changer, 25,000 kw., 80% p.f., single phase rating on 25 cycle side, with cable connection between the 60 cycle side of this machine and the main station 60 cycle bus; single phase cables together with oil circuit breakers, disconnecting switches, control and other appurtenant equipment for connecting both 25 cycle machines to a 13 kv. outdoor, 25 cycle single phase bus located in a substation near the mouth of Conestoga Creek, at an annual charge of..... $130,140.

Total annual charges to be paid by Railroad Company as stipulated in Article VIII, Section 2, Item (a)... $220,620.

TABLE II-A

Initial Substation at Safe Harbor

Electric Companies will provide, operate and maintain at Safe Harbor a 13 kv. outdoor, 25 cycle single phase double bus located in a substation near the mouth of Conestoga Creek; four single phase step-up transformers each rated 20,000 kva., 13.2/132 kv., 25 cycle, together with 13 kv. oil circuit breakers, disconnecting switches and other appurtenant equipment for connecting these transformers on the low tension side to the 13 kv. outdoor bus and the necessary high tension air break switches, control and protective equipment for connecting these transformers on the high tension side to four 132 kv. transmission lines; including also the necessary auxiliary substation equipment.

The substation site shall be graded and improved for an ultimate transformer capacity of 240,000 kva. including transfer and handling tracks, on which site Electric Company shall permit Railroad Company to install additional transformers and substation equipment. When so occupied Railroad Company shall pay a nominal rental of One Dollar ($1.00) per year. Additional transformer capacity, foundations, structures and equipment, to be provided, operated and maintained by Railroad Company. This initial substation shall be provided at an annual charge of..... $84,900.

Initial Transmission Facilities

Electric Companies will also provide, operate and maintain a four circuit single phase 132 kv. steel tower transmission

line connecting said transformer substation to a 132 kv. switching station of Railroad Company at Perryville, Md., adapted to lateral connections with Railroad Company's step-down substations adjacent to the C. & P. D. R. R. tracks at or near Conowingo, Md., and Holtwood, Pa., respectively, at which latter point Electric Companies shall permit Railroad Company to occupy land owned by Electric Companies for a transformer station at a nominal rental charge of One Dollar ($1.00) per year, Railroad Company furnishing without charge such locations for towers and supporting structures on its own right-of-way and on adjacent real estate owned by Railroad Company, where Electric Companies may find said locations necessary without interfering with Railroad Company's other necessary uses of said right-of-way or property, all at an annual charge of..... $122,100.

Total annual charges to be paid by Railroad Company as stipulated in Article VIII, Section 2, Item (b)..... $207,000.

TABLE III-A

Additional Conversion Equipment at Safe Harbor

Electric Companies will also provide, operate and maintain at Safe Harbor a total of three additional 60/25 cycle, frequency changers, 25,000 kw., 80% p.f., single phase rating on 25 cycle side with cable connection between the 60 cycle side of these machines and the main station 60 cycle bus, together with single phase cables, oil circuit breakers, disconnecting switches, control and other appurtenant equipment for connecting these frequency changers to the 13 kv. outdoor 25 cycle single phase bus located in the transformer substation, including such extensions to the 25 cycle double bus as may be required, at additional annual charges as follows:

For the first of such three frequency changers as stipulated in Article VIII, Section 2, Item (c) of.....$71,700.

For the second and third of such frequency changers as stipulated in Article VIII, Section 2, Item (c) of....$100,800.

TABLE IV-A

Additional Water Wheel Generator at Safe Harbor

Electric Companies will also provide, operate and maintain at Safe Harbor one additional 25 cycle water wheel generator, 28,000 kw., 80% p.f., single phase rating to provide direct 25 cycle, single phase generation, together with single phase cables, oil circuit breakers, disconnecting switches, control and other appurtenant equipment for connecting this machine to the 13 kv. outdoor 25 cycle single phase bus located in the transformer substation, including such extensions to the 25 cycle double bus as may be required, at an additional annual charge as stipulated in Article VIII, Section 2, Item (d) of.....$71,700.

The above annual charge is based only on the difference in cost between a 25 cycle and a 60 cycle generator and appurtenant equipment, adjusted to equalize the annual charges for this additional water wheel generator and the first additional 25,000 kw. frequency changer described in Table III-A, as referred to in Section 8 of Article VIII.

TABLE V-A

Additional 13 Kv. Transformer Switching Equipment at Safe Harbor

Electric Companies will provide, operate and maintain at Safe Harbor, additional switch positions in pairs, on the 13 kv. outdoor 25 cycle double bus, including such bus extensions as may be required together with oil circuit breakers, disconnecting switches and control for same, for connection to the low tension side of additional step-up transformers to be installed by Railroad Company in this substation up to an ultimate installed transformer capacity at this substation, including the initial installation, of 240,000 kva., at an additional annual charge for each pair of such switch positions as stipulated in Article VIII, Section 2, Item (e) of.....$4,500.

TABLE VI-A

Additional Conversion Equipment at Benning and Loudon Park

Supplying Companies will also provide, operate and maintain at or near Benning one additional frequency changer and at or near Loudon Park a total of two frequency changers, all to be 60/25 cycle, single phase and of 25,000 kw., 80% p.f., single phase rating each on 25 cycle side, fed by cables connecting the frequency changer stations to the Benning Generating Station bus and to the Westport Switching Station bus, respectively, and including necessary cable with one oil circuit breaker and disconnecting switch on the 25 cycle side of each frequency changer unit, said switches being located in, and made a part of, Railroad Company's 13 kv. bus, at an additional annual charge for each frequency changer as stipulated in Article VIII, Section 2, Item (f) of.....$109,200.

TABLE XI-A

A. Communication Facilities

Railroad Company will provide, operate and maintain the following communication circuits or channels, loaded as may be necessary, in conjunction with its own telephone cable and plant facilities, together with such wire, telephone and turret connections, protective and other telephone plant equipment as may be required to provide communication between the various operating and dispatching offices involved.

(1) One circuit connecting to each of the following points: Safe Harbor operator, Electric Companies' Baltimore load dispatcher, Washington Company's load dispatcher and Railroad Company's Baltimore power director.

(2) One additional circuit connecting to each of the following points: Railroad Company's Philadelphia load dispatcher, Safe Harbor operator, Electric Companies' Baltimore load dispatcher, Washington Company's load dispatcher and Railroad Company's Baltimore power director.

(3) One circuit connecting to each of the following points: Railroad Company's Philadelphia load dispatcher, Philadelphia Electric Company's load dispatcher, Electric Companies' Baltimore load dispatcher and Railroad Company's Baltimore power director.

(4) One circuit connecting the Safe Harbor and Holtwood hydro plant operators.

(5) One circuit connecting the Safe Harbor operator and Railroad Company's Perryville Tower, with intermediate patrol box connections for use of Electric Companies' transmission line patrolmen and with additional connections to the Conowingo and Holtwood plant operators.

(6) One circuit connecting the Safe Harbor operator and Railroad Company's Harrisburg power director.

(7) One circuit connecting the Safe Harbor operator with patrol box telephones on the Railroad right-of-way between Safe Harbor and Shocks Mills Bridge, for use of Electric Companies' river observers.

B. Telemetering Facilities

Railroad Company will provide, operate and maintain the following telemetering circuits or channels in conjunction with its own telephone cable and plant facilities, together with such wire and protective facilities as may be required to provide suitable telemetering facilities between the various operating and dispatching offices involved.

(1) [*Deleted.*]

(2) [*Deleted.*]

(3) One circuit between the Benning control room, Electric Companies' Baltimore Load Dispatching office and the Safe Harbor control room.

(4) Three additional circuits between the Benning control room and Electric Companies' Baltimore Load Dispatching office.

(5) Three additional circuits between the Safe Harbor control room and Electric Companies' Baltimore Load Dispatching office.

(6) One circuit between the Safe Harbor control room and the Holtwood Plant control room.

(7) Five additional circuits between the Holtwood Plant control room and Electric Companies' Baltimore Load Dispatching office.

(8) One circuit between the Safe Harbor control room and terminal boxes on the C. & P. D. R. R. right-of-way at or near Section Rapids, Creswell and Columbia.

C. Supervisory and Control Facilities

Railroad Company will provide, operate and maintain the following control circuits in conjunction with its own telephone cable and plant facilities, together with such wire and protective facilities as may be required to provide suitable pilot wire relaying circuits between the various points involved.

(1) One pilot wire relay circuit between the Benning control room and Railroad Company's Perryville Substation.

(2) [*Deleted.*]

(3) Two pilot wire relay circuits between the Safe Harbor and Holtwood Plant control rooms.

September 9, 1937

MEMORANDUM TO MR. H.A.WAGNER
MR. J.A.WALLS

RE: ALLOCATION OF P.R.R. LOAD BETWEEN MARYLAND AND PENNSYLVANIA:

On March 3, 1937, we submitted to you a memorandum entitled "Arrangements Among the Aldred Companies with Respect to Pennsylvania Railroad Electrification Extension" in which we recommended that power and energy delivered to the Pennsylvania Railroad in Pennsylvania be considered as sold to the Railroad by Holtwood Company, and that power and energy delivered to the Railroad in Maryland and the District of Columbia be considered as sold by Baltimore Company. We also recommended that the total revenue from the Railroad Company (including charges for special facilities) be divided between Baltimore Company and Holtwood Company in proportion to the Kwh. delivered to the Railroad in Maryland (including the District of Columbia) and Pennsylvania, respectively.

After the electrification extension in Pennsylvania is in service, under normal operation as now proposed two 132 Kv. circuits from Safe Harbor to Perryville will be connected to the Railroad Company's 132 Kv. circuits running south from Perryville and will also be connected to the Fishing Creek Substation of the Railroad in Pennsylvania and to the Railroad Company's step-down transformers supplying the trolleys at Safe Harbor, without any other high tension connection to circuits supplying the railroad load in Pennsylvania. The energy supplied to Maryland can then be obtained by reading the send-out meters at Safe Harbor on the two Perryville circuits just mentioned and substracting from these readings the amount of energy tapped off at Fishing Creek and Safe Harbor for supply to the trolleys in Pennsylvania. This can be done at the end of the month without much trouble by reading the meters at Fishing Creek and Conestoga Substations. However, to obtain the data for hourly and daily allocations between states would require the installation of printometers and the sending

of men daily to the unattended and isolated Fishing Creek Substation and to the step-down transformer portion of Conestoga Substation. In other words, the records required for such allocation would be inaccessible except at considerable cost and inconvenience to the Railroad's operating organization, who would themselves have no need for, nor interest in, such records. Furthermore, if the 132 Kv. Railroad circuits south of Perryville should be connected to the 132 Kv. circuits north of Perryville, or with the circuits to Harrisburg or Parkesburg, the allocation of the energy between the states would have to be estimated, unless a large expenditure is made for high tension metering. Any inaccuracy in this estimate would not affect the bill to the Railroad Company and would affect only the gross revenues and not the net revenues (except slight changes in taxes) of the Baltimore and Holtwood Companies.

This metering question was brought to our attention early in the summer and was discussed with the engineers of both companies. It was the unanimous opinion that the expense and complication of arranging for hourly, daily and weekly allocations were not justified; that for the purpose of statistical records of hourly, daily and weekly loads the entire supply to P.R.R. should be treated as a separate unit, not included in the load of any of the three Aldred Companies, and that the allocation of railroad load as between Maryland and Pennsylvania be made only every month for the purpose of dividing the P.R.R. payment between Baltimore Company and Holtwood Company.

If any change is to be made in this metering plan, or in the plan for division of railroad revenue recommended on March 3rd as referred to in the first paragraph above, it is important that those concerned be advised at an early date, because any provisions for additional metering equipment and meter reading procedure, if necessary, must be made at once.

CONSOLIDATED GAS ELECTRIC LIGHT AND POWER COMPANY
OF BALTIMORE

Baltimore, Md.

Office of the President

September 9, 1937.

Mr. J. A. Walls, President,
Pennsylvania Water & Power Company,
Lexington Building, Baltimore, Md.

Dear Mr. Walls:

Referring to yours of September 9, I had read the Operating Committee's report of September 9 on the "Allocation of the P.R.R. Load Between Maryland and Pennsylvania." The conclusions arrived at therein and the recommendations of the Operating Committee in their memorandum of March 3, 1937, are acceptable to our Company. I will send my approval to the Operating Committee with yours. This will involve some changes in our Income Account and Load Reports, but I think we can handle this matter without difficulty.

My trip to Europe was a most pleasant one in every respect, but I am very glad to get home.

Very truly yours,

(Signed) Herbert A. Wagner

President.

September 9, 1937

Mr. Herbert A. Wagner, President,
Cons. Gas Electric Light and Power Company
Baltimore, Md.

Dear Mr. Wagner:

I have the Operating Committee's Report of September 9th on the "Allocation of the P.R.R. Load Between Maryland and Pennsylvania." The conclusions arrived at therein and also the recommendations of the Operating Committee in their memorandum of March 3, 1937 are acceptable to P.W. & P. Company.

I don't know whether you have yet had time to study the recommendations but if you have gone into the matter and approve of it, I will then send in my approval to the Operating Committee. If you should like to discuss this I will be at your convenience.

Hope your trip to Europe was a pleasant one even though you had to cover a good deal of ground in a short time.

Yours very truly,

(Signed) J. A. Walls

J. A. Walls
President

	2. Decr. in Rev. from Cust. other than Balto. 1931 compared with 1930		70,080.06	
	3. Base Net Revenue			$ 2,762,179.69
(b)	PAYMENTS ON NET ADDITIONS AT 10.25% & 9.5%			897,500.00
(c)	EXPENSES			
	1. *Operating Exp. Excl. Power Purchased		$ 1,111,900.00	
	2. Maintenance		432,700.00	
	3. General Expense		760,000.00	
	4. General Taxes		299,207.00	
	5. Federal Normal Tax and Surtax		987,470.70	
	6. Depreciation	$ 355,146.73		
	Less Adj. for Auto Depr.	2,000.00	353,146.73	
	7. Total			3,944,424.43
	*Power Purchased shown in Item (d)			
(d)	HOLTWOOD CO.'S PAYMENTS FOR POWER PURCHASED			
	1. Metropolitan Edison Co.		$ 10,800.00	
	2. Philadelphia Electric Co.		42,300.00	
	3. Penna. Power & Light Co.		22,600.00	
	4. S.H.W.P.Corp.		1,188,602.98	
	5. Total			1,264,302.98
SUM OF (a), (b), (c) and (d)				$ 8,868,407.10
(e)	HOLTWOOD CO.'S REV. FROM PARTIES OTHER THAN BALTO.			
	1. P.P.& L.Co. (Firm Power)		$ 1,932,400.00	
	2. Philadelphia Elec. Co. (Firm Power)		976,100.00	
	3. Metropolitan Edison Co. (Firm Power)(Incl.Y.E.)		641,500.00	
	4. Pioneer Elec. Light Co. (Firm Power)		12,000.00	
	5. Metropolitan Edison Co. (Interchange)		234,500.00	
	6. Philadelphia Elec. Co. (Interchange)		206,000.00	
	7. P.P.& L.Co. (Interchange)		172,400.00	
	8. Pennsylvania Railroad Company		1,615,800.00	
	9. Conowingo Backwater Payment		133,750.00	
	10. Rent from Electric Property		100.00	
	11. Total			$ 5,924,550.00
(f)	INT. ON INCREASE IN RES. FOR DEPRECIATION			239,700.00
(h)	REDUCTION AS PER SUPPLEMENTAL AGREEMENT OF SEPT. 29, 1939			600,000.00
(x)	ESTIMATED MISCELLANEOUS CREDITS			16,300.00
	TOTAL DEDUCTIONS - SUM OF (e), (f), (h) AND (x)			$ 6,780,550.00
	ESTIMATED NET BILL FOR YEAR 1946			$ 2,087,857.10
	TOTAL AMOUNT PAID JANUARY TO MARCH, INCL.			$ 555,013.98
	ESTIMATED BILL APRIL - DECEMBER, INCL.			$ 1,532,843.12
	ESTIMATED BILL PER MONTH APRIL - DECEMBER, INCL.			$ 170,315.90

7/30/40

TABLE OF CONTENTS

	Page
I - GENERAL DESCRIPTION OF THE SUSQUEHANNA RIVER AND ITS EARLY UTILIZATION	
General Description of Susquehanna River	1
Description of Lower Portion of Susquehanna	1
Early Canals	2
Water Power Developments	2
Early Hydroelectric Development	3
Three Major Interests on the River	3
Power Market	4
II - EARLY ACTIVITIES OF THE HARLOW-McGAW GROUP	
Acquisition of Property by Harlow-McGaw	5
Water Power Companies Formed by Harlow-McGaw	5
III - EARLY ACTIVITIES OF THE HUTCHINSON GROUP	
Hutchinson's First Contact with Development of the Susquehanna	6
Electrical Reduction of Iron Ore Considered	6
Hutchinson Becomes Interested in York Furnace Development	6
Selection of McCall Ferry Site	7
Opposition between Harlow-McGaw and Hutchinson	7
Formation of Predecessors of Pennsylvania Water & Power Company	8
IV - DIVISION OF INTERESTS ON THE RIVER	
Attempt to Revoke Canal Charter	9
Agreement between Harlow-McGaw and Hutchinson	9
Attempt to Finance Harlow-McGaw Development	10
Inactivity during 1904	11
V - DIMOCK-BERTRON-BARNEY UNDERWRITING FOR McCALL FERRY DEVELOPMENT	
Parsons' Report on McCall Ferry Development	12
Early Preparation for Underwriting	12
Hutchinson Plan for Financing, February 1905	13
Formation of Syndicate	14
Dimock-Bertron-Barney Prospectus	14
Dimock-Bertron-Barney Underwriting Agreement	16
Susquehanna Securities Company	17
Lee, Higginson & Company Solicit Subscriptions for Dimock-Bertron-Barney Underwriting	18
Failure of Dimock-Bertron-Barney Underwriting	19
VI - HARVEY FISK & SONS' UNDERWRITING FOR McCALL FERRY DEVELOPMENT	
Harvey Fisk & Sons Obtain Control from Hutchinson	21
Harvey Fisk & Sons' Underwriting Agreement	22
Changes Resulting from Fisk Control	23
Dimock Bertron Barney Subscribers Participate in Harvey Fisk & Sons' Underwriting	24
Stock Distributed to Bankers	24

	Page
VII - HARVEY FISK & SONS ACQUIRE CONTROL OF LOWER SUSQUEHANNA	
Pullen Negotiations with Harlow-McGaw	26
Pullen Negotiations with Welch Group	27
New Option on Harlow-McGaw Properties	28
Harlow-McGaw Propose Consolidation with McCall Company	29
Harvey Fisk & Sons Purchase Harlow-McGaw Interests	30
Terms of Harlow-McGaw Sale	31
Pullen Rights Purchased	32
VIII - COMPLETION OF ORGANIZATION	
Incorporation of McCall Ferry Power Company	34
Eminent Domain - Act of April 13, 1905	35
Classes of Bond Subscriptions	36
Harvey Fisk & Sons' Loan Arrangement with Knickerbocker Trust Company	36
Incorporation of Susquehanna Contracting Company	37
Harvey Fisk & Sons Assign Loan Arrangement to Contracting Company	38
Loan Agreement between Contracting Company and Knickerbocker Trust Company	39
Agreement with Susquehanna Contracting Company for Financing McCall Ferry Power Company	39
Increase of McCall Company Indebtedness and Capital Stock	41
Acquisition of Hutchinson Interests by Susquehanna Contracting Company	42
Acquisition of Harlow-McGaw Interests by McCall Company	43
Mortgage with Knickerbocker Trust Company as Trustee	43
Permanent Directors and Officers Elected	44
Voting Trust	45
IX - VALUE OF McCALL COMPANY SECURITIES	
Securities Issued for Property or Services	46
Value of McCall Bonds	46
Value of McCall Preferred Stock	47
Value of McCall Common Stock	48
Distribution of McCall Preferred Stock	49
Distribution of McCall Common Stock	50
Summary of Distribution of McCall Stock	51
Value of Services Rendered for Stock	51
Original Cost of Property and Services Acquired with McCall Securities	53
X - CONSTRUCTION PRIOR TO FAILURE OF McCALL COMPANY	
Dam Crest Elevation of 185 Recommended	55
Bids for Construction	56
Negotiations for Relocation of C. & P. D. Railroad	57
Cooper to Manage Hydraulic Construction	57
Sanderson & Porter to Superintend Electrical Construction	59
Acquisition of Additional Property and Rights	59
Agreements for Relocation of C. & P. D. Railroad	59
McCall Ferry Supply Company Formed	60
Construction Begins	60

	Page
X - CONSTRUCTION PRIOR TO FAILURE OF McCALL COMPANY (Continued)	
Factors against Dam at 185	61
Estimates for Six Different Plants	61
Dam Crest Fixed at 165	63
Final Agreements with Railroad for Relocation of C. & P. D.	63
Final Agreements with Kerbaugh for Relocation of C. & P. D.	64
Contract for Cully's Cut	66
Kerbaugh Abandons Cully's Cut	67
Miscellaneous Contracts	67

GENERAL PLAN OF THE SUSQUEHANNA RIVER - WRIGHTSVILLE TO HAVRE DE GRACE		
INDEX		

I - GENERAL DESCRIPTION OF THE SUSQUEHANNA RIVER AND ITS EARLY UTILIZATION

General Description of Susquehanna River

The Susquehanna River drains the largest area of any river on the Atlantic Coast, south of the St. Lawrence. The main branch rises in the State of New York, the west branch in the easterly slope of the Alleghenies along the northern line of the State of Pennsylvania. The river flows in a south and southeasterly direction, emptying into the Chesapeake Bay within the State of Maryland. The total drainage area is approximately 27,500 square miles of which 26,786 lie above the site of the Holtwood dam.

The river flows through a territory of much diversity. In the State of New York it is rolling and sometimes rather broken. Its bed is composed of sand and gravel, with an occasional rock ledge. Passing into Pennsylvania, its course is very tortuous as it winds among the ranges of hills. In the Wilkes-Barre region it passes through the anthracite coal district and carries from there to the lower reaches of the river, fine particles known as "river coal."

Description of Lower Portion of Susquehanna

The descent of the river is gradual except in the lower fifty miles which, in its natural state, was a succession of rapids, the average fall being approximately five feet per mile. Here it passed through a valley with precipitous hillsides rising from 200 to 400 ft. above the channel, composed in general of mica schist, and in places of a very excellent granite. In this lower section, the valley varies in width from a few hundred yards to more than two miles. The channel in many places is filled with small rocky islands, some of which were covered with

alluvial soil and were under cultivation.

Early Canals

The river flow is subject to extreme fluctuations, the maximum recorded flow at Holtwood (1936) being approximately 860,000 cubic feet per second and the minimum seven day average being 2,100 cubic feet per second. This wide variation in flow, combined with the rocky and irregular character of the river bed, necessitated the construction of artificial waterways or canals along the banks in order to provide navigation facilities. Between 1784 and 1802, a canal nine miles long was built on the lower east bank of the river in Maryland by a company called The Proprietors of the Susquehanna Canal. In 1836, construction of a canal was started between Wrightsville, Pa., and tidewater along the west bank. It was completed in 1840, the Pennsylvania portion being known as the Susquehanna Canal, the Maryland portion, as the Tidewater Canal, and was popularly referred to as the Susquehanna and Tidewater Canal. Use of the canals decreased, and after 1890 they were little used and were in bad disrepair.

Water Power Developments

Concurrently with the development of the canals a number of small water power mills were built on tributaries of the lower Susquehanna. Two paper mills were built along the Susquehanna itself, one at York Haven, Pa., and one at Shuresville, Md., both having low wing-dams in the river. The conversion of these mills and the construction of others for the production of electricity by water power and its long distance transmission to commercial centers was considered by several individuals about 1894. Construction had been started on the hydroelectric project at Niagara Falls and considerable publicity seems to have been given the possibilities of high voltage alternating current transmission over distances previously

considered impracticable and uneconomical when using direct current.

Early Hydroelectric Development

By 1900 several small hydroelectric plants were in operation on these lower tributaries and a number of engineers and financiers had made studies toward the development of the main river between tidewater and Columbia, Pa. Several hydroelectric companies had been formed and both these and individual promoters had been acquiring land and water power rights along this section. One company had actually started construction at Wrightsville but, following an ice jam and flood, the project had been abandoned. The competition for the acquisition of land which soon developed between the various interests, resulted in high prices being demanded for property which had had very little value prior to the awakening to the power possibilities.

Three Major Interests on the River

The greatest competition for water power rights, markets and financing was among three major interests and continued for several years. Just above the mouth of the river at Shuresville, the old paper mill had been acquired by a group headed by B. Harvey Welch which had obtained a charter for their company to engage in hydroelectric production. Another group, hereinafter referred to as Harlow-McGaw, held property adjacent to the Welch development and certain rights as far upriver as Wrightsville. These upper rights were in territory held largely by the Hutchinson interests. Regarding land and water rights, Welch and Harlow-McGaw were opposing interests but not Welch and Hutchinson. All three were competitors for financing and power markets.

It was generally recognized that the first group to successfully finance and develop a project would secure the most desirable markets and would probably force the others to postpone construction for many years.

The overlapping of separately controlled properties presented a stumbling-block for financing, for each interest seemed unwilling to release any property essential to another's development unless their entire holdings were purchased at a profit, or unless the parties selling were given a substantial interest in the buying company.

As a result of the efforts of the various groups to secure financing and power contracts, several of the country's most eminent engineers made investigations of the developments proposed by the different interests.

Power Market

For a number of years following the turn of the century, the growing railway and electric companies of Baltimore presented the best market for hydroelectric power from the Susquehanna. While it was known that other markets were available, it was recognized that the first group to secure the Baltimore market stood the best chance of success; conversely, the group first to secure the necessary land and financing would probably obtain contracts for delivery of power in Baltimore.

II - EARLY ACTIVITIES OF THE HARLOW-McGAW GROUP

Acquisition of Property by Harlow-McGaw

James H. Harlow and George K. McGaw were among the first to take an active part in investigating the hydroelectric possibilities of the lower Susquehanna and in acquiring lands and water power rights for such developments. They, and their associates, (hereinafter referred to as Harlow-McGaw) organized several companies for this purpose, made surveys along the river, studied river flow, selected sites, estimated costs and purchased numerous parcels of land. Their most important single acquisition was the purchase from the Reading Railroad Company of the stock of The Proprietors of the Susquehanna Canal, the property of the Tidewater Canal, and the rights and franchises of the Susquehanna Canal Company. As the two latter canals extended along the west bank of the river from Havre de Grace to Wrightsville, ownership of them vested the owner with substantial control of the river so far as competing developments were concerned. On the other hand, ownership of the canals alone was not sufficient to permit Harlow-McGaw to construct a plant at any point without acquiring miscellaneous parcels held by competing interests.

Water Power Companies Formed by Harlow-McGaw

After acquisition of the canals, Harlow-McGaw continued their efforts to develop the river. In 1902 they had the old Susquehanna Canal Company reorganized as the Susquehanna Canal and Power Company, thus perpetuating their canal rights in Pennsylvania. The same year they also formed nine water power companies in Pennsylvania townships adjacent to the river and merged them into three companies. These were in addition to three other township water power companies they had previously incorporated in that state.

III - EARLY ACTIVITIES OF THE HUTCHINSON GROUP

Hutchinson's First Contact with Development of the Susquehanna

John Bogart was one of the engineers who, in 1899, had investigated Harlow-McGaw's proposed development. Assisting him was C[illegible] T. Hutchinson, an electrical engineer. Following his work with Bogart, Hutchinson was retained to investigate the possibilities of the electrical reduction of iron ore for three Lancaster men - William F. Beyer, George B. Willson and Frederick Shoff.

Electrical Reduction of Iron Ore Considered

Beyer and Willson owned two small hydroelectric plants on Conestoga Creek which were supplying power to Lancaster. They, together with Shoff and two others, had formed a co-partnership in 1899, naming it the York Furnace Power Company. The purpose of the partnership was to acquire property and rights on the Susquehanna near York Furnace incident to the development of hydroelectric power for iron ore reduction. Shoff appears to be the member who controlled the ore deposits. In 1900 this group also formed The York Furnace Electric Company, a corporation presumably to construct and operate the proposed electric plant in connection with the ore reduction. About this time, Hutchinson made his investigation which disclosed the impracticability of the electrical reduction of this iron ore.

Hutchinson Becomes Interested in York Furnace Development

As a result of his investigation for Beyer and Willson, Hutchinson became personally interested in developing power at York Furnace and, on

a partnership basis, arranged with George S. Morison, a consulting engineer to investigate the possibilities of generating and selling power. Hutchinson obtained an option on the property held by the York Furnace partnership. The results of the studies made did not appear sufficiently favorable to warrant a development at the York Furnace site and investigations were continued downriver.

Selection of McCall Ferry Site

A more favorable location was found near McCall Ferry and preliminary studies showed that an economical development of substantially greater capacity could be made there. Property held by the York Furnace partnership was still useful for a project at McCall Ferry and the option was kept alive. Hutchinson at once began the acquisition of property between McCall Ferry and York Furnace. In addition, he acquired various scattered parcels below McCall Ferry in order to interfere with any development by Harlow-McGaw. He also bought out Morison's interest in their partnership arrangements.

(See Exhibit No. 1)

Opposition between Harlow-McGaw and Hutchinson

It was about this time that Harlow-McGaw attempted to form the Susquehanna Canal and Power Company and thus perpetuate their canal rights in Pennsylvania. Hutchinson made an unsuccessful attempt to prevent this reorganization. Shortly after the incorporation of Harlow-McGaw's nine water power companies, Hutchinson formed two similar companies in townships adjacent to the site of the proposed dam at McCall Ferry. Harlow-McGaw unsuccessfully opposed the granting of charters to these Hutchinson companies.

Formation of Predecessors of
Pennsylvania Water & Power Company

On July 17, 1902, applications were made on behalf of the Hutchinson interests for charters for The Hillside Water and Power Company and Susquehanna Water and Power Company.

The Hillside Water and Power Company was formed for the purpose of

> "the storage and transportation of water and water power for commercial and manufacturing purposes in Lower Chanceford Twp., York Co., Pa., and the supply of the same to the public and to such persons, partnerships, and corporations residing therein as may desire the same; and in order that the water and water power may be supplied to the public to the best advantage in furtherance of its corporate purposes, the development by the use of the same of electric current, and power to the public, individuals, firms and corporations, at any place or places at such prices as may be agreed upon."

Susquehanna Water and Power Company had identical purposes except the location was "in the Twp. of Martic, Co. of Lancaster, Pa."

A protest against granting these charters was filed by the Harlow-McGaw interests. A hearing was held on August 28th, but on September 2nd letters patent were issued for both companies, granting perpetual life.

The capital stock of each company was $500., consisting of five shares. Both companies had the same incorporators, stockholders and directors as follows:

Jacob Hill Byrne	1 share
W. F. Jack	1 share
George B. Willson	1 share
Walter M. Franklin	1 share
W. F. Beyer	1 share

Beyer was elected President of both companies and Willson, Secretary.

The Pennsylvania Water & Power Company subsequently became a successor of these companies after they had been merged to form McCall Ferry Power Company.

IV - DIVISION OF INTERESTS ON THE RIVER

Attempt to Revoke Canal Charter

Although Harlow-McGaw had acquired the rights of the canal companies which owned the canal along the west bank of the river, Hutchinson, either through direct ownership or by option on the York Furnace properties, was the actual or potential owner of practically all of the property along the canal which would be affected by the proposed dam at McCall Ferry. He therefore attempted, early in 1903, to have the canal charter rescinded. At one time it seemed certain enough that he would accomplish this result that Harlow-McGaw were willing to enter into an agreement with Hutchinson for a division of interests along the river, provided the latter would abandon his attempts to have the canal charter revoked.

Agreement between Harlow-McGaw and Hutchinson

The agreement was signed April 14, 1903 by M. H. Houseman and J. H. Harlow, representing the Harlow-McGaw interests, and R. R. Quay, representing the Hutchinson interests. This agreement provided:

1. Upon request within six months, Harlow McGaw were to transfer to Hutchinson:
   - A. All shares of capital stock of the Susquehanna Falls Power Company.
   - B. All title and interest in all lands, water rights and easements held for the benefit of the above company. (This company resulted from the merger of two of Harlow-McGaw's nine water power companies, the two having been formed in the same townships as Hutchinson's two companies.)
   - C. A permit from the Susquehanna Canal and Power Company, in so far as that company's rights were concerned, for the erection and maintenance of a dam about one mile below McCall Ferry.

2. In addition, Harlow-McGaw agreed to have the Susquehanna and Tidewater Railroad Company locate its proposed road-bed so as not to interfere with the construction and operation of a plant at McCall Ferry (instead of on the tow-path of the canal as originally proposed).

3. Hutchinson agreed to provide right of way for that railroad through any property he might own along the west bank which was not essential to his development.

4. Hutchinson agreed to install and operate, gratis, locks for the passage of canal vessels and permit their passage through the pool flooding the old canal.

5. Hutchinson agreed to reimburse Harlow-McGaw for all moneys expended by them for the organization of the Susquehanna Falls Power Company and in making plans, surveys, etc., for that company and for acquisition of all lands and water rights for it, together with interest, which amounts were not to exceed in the aggregate $20,000.

6. Hutchinson agreed to convey to Harlow-McGaw all land and interests held by himself or his associates in Peach Bottom, Drumore and Fulton Townships, upon reimbursement of the cost thereof with interest, but not to exceed $8,000.

7. Harlow-McGaw agreed not to interfere with Hutchinson's development between Shenk's Ferry and a point a mile below the proposed dam.

8. Hutchinson agreed to withdraw his interference at all other places on the river.

(See Exhibit No. 2)

Attempt to Finance Harlow-McGaw Development

The April 14th Agreement broke the previously existing deadlock which had prevented either Harlow-McGaw or Hutchinson from going ahead with their proposed developments. An attempt was then made to finance a company that would acquire Harlow-McGaw's interests on the Susquehanna for immediate development of a hydroelectric plant and also the Welch properties for a future plant. Due apparently to general financial conditions, the necessary funds were not raised.

Inactivity during 1904

While the Hutchinson group made some effort to perfect their organization, there seems to have been no serious attempt at this time to secure financing for the development at McCall Ferry. By mutual consent, the provisions of the April 14, 1903 agreement were not carried out within the six months' period but the time limit was extended to May 15, 1905. (See Exhibit No. 2) Neither group seems to have made any further attempt to secure financing until the end of 1904.

V - DIMOCK-BERTRON-BARNEY UNDERWRITING FOR McCALL FERRY DEVELOPMENT

Parsons' Report on McCall Ferry Development

Following the purchase by Hutchinson of Morison's interest in their partnership arrangements for investigating and developing the Susquehanna, Hutchinson retained Morison as consulting engineer until the latter's death in July 1903. Subsequently, Hutchinson engaged William Barclay Parsons as consulting engineer. Parsons submitted a report, dated January 13, 1905, on the proposed development at McCall Ferry. His recommendation for the McCall dam was elevation 155 and his estimate of cost for the dam, power house, hydraulic and electrical equipment, substations and three transmission lines to Philadelphia was $4,041,000. Everything seems to have been included in this figure except land, water rights, promoters' fees and certain overhead costs. The plant could deliver 37,500 kw. in Philadelphia during an average year on all but thirty days and during a dry year on all but one hundred days. An additional investment of not more than $1,000,000. in steam auxiliary would have been required to have enabled the plant to deliver 37,500 kw. at all times in Philadelphia. (See Exhibit No. 3)

Early Preparation for Underwriting

The submission of Parsons' engineering report to Hutchinson instituted a new stage of activity for the McCall enterprise, as early in February 1905 Hutchinson began seeking legal advice on the organization of corporations in Pennsylvania and the preparation of an underwriting agreement. The counsel who rendered the opinions in these matters was John G. Johnson of Philadelphia. This was followed immediately by getting William F. Beyer, a Lancaster attorney, who had been one of the

York Furnace partners, and who had also been agent for Hutchinson in some of his property negotiations up to this time, to look into the requirements for organizing a company with the requisite charter powers for the purpose desired. During this time, a preliminary form of underwriting agreement had been prepared, for on February 15th it was sent to Hutchinson for approval.

Beyer immediately undertook the formation of a company with the requisite charter powers. The state law, in effect at that time, permitted a company incorporated for the supply of light, heat and power by electricity to supply the same only in the borough, town, city or district in which it might be located. It was this circumstance that was the basis of Johnson's suggestion to form electric power companies in each township lying between the location of the plant on the river and the proposed point of delivery, these companies to be later consolidated into one company. Extensive correspondence and many conferences transpired before the legal complications were smoothed out satisfactorily. Proposed changes in laws were among the many suggestions brought forward by the organizers in an effort to solve the knotty problems confronting them.

Hutchinson Plan for Financing, February 1905

Lorenzo Semple of Coudert Brothers was Hutchinson's personal attorney and had advised him throughout his activities on the Susquehanna. On February 8, 1905, Semple wrote to Johnson asking his opinion on their proposed plan. A summary of the situation was given which, in effect, stated that

> Cary T. Hutchinson was the owner of lands on each side of the Susquehanna River in York and Lancaster Counties at McCall's Ferry. He either owned in fee or had releases from damages from the owners in fee of all property above and below McCall's Ferry along the River on each side, which would be affected by the erection of a dam across the River at that point to an elevation

of 160 above tidewater. Harlow-McGaw owned the bed of the old Susquehanna Canal and had also organized water power companies on each side of the River and projected a line of railroad upon one side of the River. All of these properties would have been affected by the proposed development of Cary T. Hutchinson; therefore, an agreement was made with Harlow-McGaw by which all opposition upon their part, by reason of the ownership of the above, was to be removed.

A tentative plan of organization was presented to Johnson and approved by him but differed in many respects from the plan finally adopted. (See Exhibit No. 4)

Formation of Syndicate

Soon after Hutchinson had started his acquisition of land and water power rights, he had received financial assistance from and through his father-in-law, Henry F. Dimock. In the latter part of February 1905, Hutchinson and Dimock submitted their proposition to S. Reading Bertron, of Bertron, Storrs and Griscom, whereby Hutchinson was to receive not less than one-half of the common stock of the proposed company and $750,000. in cash. This was for his efforts, and monies invested, and as a means of enabling him to pay off his obligations and for expenses, legal fees, etc., incurred to that date. (See Exhibit No. 1) Pursuant to this understanding, Bertron formed a syndicate to underwrite the finances required. The syndicate managers were Dimock, Bertron and Charles T. Barney, President of Knickerbocker Trust Company of New York.

Dimock-Bertron-Barney Prospectus

A combined Prospectus and Underwriting Agreement was prepared, dated March 1, 1905. The Prospectus presented a general description of the proposed work, gave its approximate location and referred to engineering studies which had been made up to that time. The proposed first development was for 50,000 horsepower, but it was further stated that 75,000 and even 100,000 horsepower was ultimately possible. The proposed markets for power were given and the estimated cost of construction was stated as shown in the following schedule:

Estimate of W. B. Parsons for dam, power house, all hydraulic and electric equipment, including 3 transmission lines to Philadelphia, with substation	$ 4,041,000.
Cash for property and rights of way, in addition to stock to be issued by the company	1,000,000.
Interest during construction	450,000.
Total Cost, without steam plant	$ 5,491,000.
Auxiliary steam plant, maximum capacity of 30,000 hp.	1,200,000.
	$ 6,691,000.
Working Capital	509,000.
Total Estimated Cost of Construction	$ 7,200,000.

The basis for earnings was next set forth as shown herewith:

Receipts

25,000 horsepower at $25.	$ 625,000.
25,000 horsepower at $30.	750,000.
Total	$ 1,375,000.
Total operating expense (Estimated at a greater cost for a plant of 50,000 hp. than the cost at Niagara for a plant of 100,000 hp.)	320,000.
Net earnings from operation	1,055,000.
Special reserve fund to provide against extraordinary contingencies, failure to sell full output during first five years of operation, etc., and to provide sinking fund for bonds after first five years	175,000.
Balance	$ 880,000.

Fixed Charges

5% on $8,000,000. bonds	$ 400,000.
Net Income	$ 480,000.
Dividend, 5% on $4,000,000. preferred stock	200,000.
Surplus applicable to common stock	$ 280,000.
Equal to 7.0 per cent on $4,000,000. common stock	

The capacity of the plant was stated as being capable of being increased to 75,000 hp. for a comparatively small additional cost. This increase in capacity would cause but a slight increase in operating expenses and fixed charges while, at the same time, it would greatly increase earnings. It was estimated that this would increase the surplus available for common stock to $580,000.

The financial plan called for an issue of $10,000,000. of bonds of which $8,000,000. were to be underwritten at 90 per cent and the balance held in the treasury for future needs. The proceeds of the underwriting were to be used to construct the first 50,000 hp. development. The company was to have an authorized capitalization of $10,000,000. stock, one-half of which was to be five per cent cumulative preferred, and the other half, common. $4,000,000. of each class of stock was to be issued, making a total capitalization as follows:

Five per cent Sinking Fund Bonds	$ 8,000,000.
Cumulative five per cent Preferred Stock	4,000,000.
Common Stock	4,000,000.
Total	$16,000,000.

(See Exhibit No. 5)

Dimock-Bertron-Barney Underwriting Agreement

Although the Underwriting Agreement was dated March 1, 1905, there is some correspondence available which indicates that it was not completed in final form until after March 9, 1905.

The underwriting agreement provided that Henry F. Dimock, S. R. Bertron and Charles T. Barney were to be the "Managers," with Knickerbocker Trust Company as the proposed "Trust Company," and Susquehanna Securities Company (to be incorporated later) as the proposed "Securities Company."

It was intended to secure underwritings for $8,000,000. of First Mortgage Bonds at ninety per cent of par of a corporation to be organized and to be called McCall's Ferry Power Company, and to arrange whereby the Trust Company would advance on the bonds so underwritten seventy-five per cent of par.

1. Subscribers were to receive a bonus of 50% in preferred stock.
2. Payments were to be 10% of par at date of allotment, 5% of par on March 1, 1906, and balance on maturity of loan provided in agreement.
3. Trust Company was to loan to Securities Company, as required, amounts not to exceed in total the unpaid balances on the subscriptions at the rate of 6% per annum with a commission of 1% on the two year loan. Each subscriber was to guarantee to the Trust Company his balance of unpaid subscription.
4. Managers reserved the right to sell the bonds subscribed for at not less than 90% of par with a bonus of preferred stock of not more than 15% of par and such sales would reduce subscribers' amounts pro rata.
5. Managers were to have control of funds paid in by subscribers for the construction of the Power Company plant.
6. Managers might, in their discretion, provide for a Voting Trust to cover the stock of the company which would also include the stock issued under the Underwriting Agreement.
7. Subscriptions to $6,000,000. of bonds were needed before agreement would become effective.

(See Exhibit No. 5)

This underwriting was never completed and the Underwriting Agreement for the McCall project, as finally adopted, had different Managers as well as differing in some of its other provisions.

Susquehanna Securities Company

As mentioned in the Underwriting Agreement, the Susquehanna Securities Company was to be the organization through which the Managers would carry out their plans to develop the McCall project. A form of charter was drafted of which the following are the major points of

interest in summary:

1. Purpose - To aid in the formation, promotion and organization of other corporations and in marketing, guaranteeing or disposing of securities. To purchase and deal in securities of other corporations. To carry on the business of contracting and construction in all of its branches. To build, construct, etc., plant and development for the utilization and distribution of water power and generation and transmission of electricity and electric power, but not to operate the same. To deal in real and personal property.

2. Capital Stock - 15 shares of $100. par value each.

3. Directors - Cary T. Hutchinson, Benjamin Barker and Howard Thayer Kingsbury.

4. Subscribers to Stock -

Cary T. Hutchinson	13 shares
Benjamin Barker	1 share
Howard T. Kingsbury	1 share
Total	15 shares

5. Directors shall have power without assent of stockholders to make By-Laws.

6. With the consent in writing of the holders of a majority in interest of the stock issued and outstanding, the Board of Directors shall have power and authority to sell, assign, transfer or otherwise dispose of all the property, rights, and franchises of the corporation.

(See Exhibit No. 6)

Lee, Higginson & Company Solicit Subscriptions for Dimock-Bertron-Barney Underwriting

Under date of March 10, 1905, Gardiner M. Lane of Lee, Higginson & Company addressed a letter to Robert Fleming of London, England, which contained the following points:

1. C. A. Coffin, President of General Electric Company, had brought the proposed development to the attention of Lee, Higginson & Company some time prior to the date of the letter.

2. Lee, Higginson & Company had given considerable time and attention to studying the proposed development and thought well of it, although a study of a water power project at a lower point on the river ten years previous had been considered by them as not worth taking up at that time.

3. Lee, Higginson & Company believed that there was no question whatever of there being a sufficient demand for the McCall power within a satisfactory distance at a profitable price.

4. The figures of the estimates were considered most conservative by Coffin and others. Coffin had given a good deal of attention to the figures.

5. Five per cent cumulative preferred stock in the amount of $4,000,000. was to go with the $8,000,000. of bonds to be underwritten and was to be profit to the Underwriters. The Syndicate Managers believed that they would be able to sell the bonds at the proper time without giving any of the preferred stock.

6. In addition to the issue of preferred stock, there would be an issue of common stock, all of which would be used in acquiring the rights from the promoters, who had been out a large sum of money for several years.

(See Exhibit No. 7)

Failure of Dimock-Bertron-Barney Underwriting

While Semple and Beyer were busy with the legal matters, important changes were taking place in the financial interests backing the enterprise. Bertron soon concluded that the proposition was more than his firm could complete. He thereupon suggested that the matter be placed before Harvey Fisk & Sons of New York City and that that firm be asked to head a new syndicate. (See Exhibits Nos. 1 and 8) This change probably occurred between March 10th and 25th, 1905.

Apparently about one half of the necessary subscriptions had been obtained under the Dimock-Bertron Barney underwriting plan. Of these subscriptions, approximately $2,500,000. were secured by Lee, Higginson & Company, the remainder being evidently obtained by Coffin and Bertron, Storrs & Griscom. If the financing could not be completed, the Hutchinson interests were confronted with the prospects of an indefinite delay in securing release of funds expended on the enterprise during the previous four years, as well as the possibility of the interests on

the lower river securing sufficient financing to construct their plant and gaining the desirable markets for power. They chose the course of securing immediate financing even though it entailed relinquishing control of the enterprise.

(See Exhibits Nos. 1 and 8)

VI - HARVEY FISK & SONS' UNDERWRITING FOR McCALL FERRY DEVELOPMENT

Harvey Fisk & Sons Obtain Control from Hutchinson

Harvey Fisk & Sons agreed to undertake the formation of the new syndicate and save the underwriting, but insisted as consideration for their efforts that a majority of the common stock of the proposed development corporation be issued to them or their nominees. Of the 50,000 shares of common stock to be issued under the Harvey Fisk & Sons' plan which is detailed hereinafter, the bankers were to receive 30,000 shares. Practically all of the remaining shares plus $750,000. in cash were to be given to Hutchinson to be utilized for the same purpose as under the Bertron plan. Hutchinson considered this to be a rather exorbitant demand, but because of the impending failure of Bertron's attempt to finance the project and, particularly, in view of the large amounts which he had already invested in the enterprise and the demands made upon him by those to whom he was indebted, it was finally agreed to accept the proposition as submitted by Fisk.

The Fisk firm took over and headed the financing and dominated the entire picture from the date they first decided to participate, and thereafter dictated the policies and all important decisions. They undertook to act in two capacities in the matter. As bankers, they underwrote the issue and arranged for the sale of approximately $8,000,000. of bonds. In addition to this, they undertook to manage the project while it was being built.

In Pliny Fisk's opinion, the value of the banking services of the Fisk firm was at least $250,000. This estimate was based upon Harvey

Fisk & Sons acting as syndicate managers and actually selling approximately one-half of the $8,000,000. bond issue. It was Fisk's opinion that the management services performed by his firm were of a value of not less than $150,000. The primary responsibility for supervising the construction of the project, the selection of personnel and the selection of experts, engineers and contractors was imposed upon Harvey Fisk & Sons. (See Exhibits Nos. 1 and 9)

Harvey Fisk & Sons Underwriting Agreement

The essential points of Harvey Fisk & Sons Underwriting Agreement dated March 25, 1905, were as follows:

1. The agreement was between the Subscribers severally and Harvey Fisk & Sons, Bankers, and the proceeds were to be used for the purpose of developing a power plant of 50,000 hp. capacity on the Susquehanna River near McCall s Ferry, Pennsylvania. The name of the company in this agreement was Susquehanna Power Company. (This name was finally changed to McCall Ferry Power Company on March 29th because of the possibility of confusion of the former name with a company of the same name organized in Maryland.)

2. Capitalization was as follows:

Common Stock	$ 5,000,000.
5% Cumulative Preferred Stock	5,000,000.
Thirty Year 5% First Mortgage Gold Bonds (with a sinking fund provision of $160,000. per annum)	10,000,000
Total	$ 20,000,000.

3. All of the bonds and stock, except $2,000,000. of bonds and $1,000,000. of preferred stock were to be issued for acquiring property and rights, for providing for the construction of the dam and other works, for the needed transmission and distribution system, for all profits in connection with the bringing together and turning in of the said properties, for financial assistance except as otherwise stated in the agreement, and for organization, corporate, legal and other proper expenses in connection with the acquisition of lands and interests and said construction.

4. Bankers agreed to take subscription contracts and secure loans thereon.

5. Price was $900. for $1,000. of bonds with $450. in par of preferred stock. Installments were not to exceed 20%; the first was due five days after allotment, and the others upon call of Bankers on twenty days' notice. Subscribers were to be credited with interest at 5% upon all installments.

6. Subscribers had option of deferring for three years all installments after the first, upon guaranteeing interest and commission on the loan to be secured by the Bankers, to the extent of the amount deferred.

7. All interest and commissions were to be paid as part of the cost of producing plant and equipment.

8. Bankers were to secure loans upon pledge of deferred Subscribers' purchase agreements, together with stocks and bonds to be purchased thereby up to the aggregate amount of the deferred payments. Cost of loans was not to exceed 6% interest on amounts actually loaned plus commission of one-half of 1% per annum on the amounts agreed to be loaned.

9. Bankers had option to repurchase from Subscribers all or any part of said bonds at 90% of par on 30 days' notice.

(See Exhibit No. 10)

Under the provisions of this proposed plan, the cash which could be raised was $7,200,000. The total cost of constructing the proposed works, as estimated by Wm. Barclay Parsons, was $5,041,000., which included a steam auxiliary plant but apparently omitted the cost of land, water power rights, interest during construction, other overhead items and promoters' fees. The estimate prepared by Parsons was supplemented in the preliminary Underwriting Agreement dated March 1, 1905, with other items to total $7,200,000., the amount to be raised by this issue and was generally considered to be quite conservative.

Changes Resulting from Fisk Control

The law firm of Simpson, Thacher and Bartlett, which was retained by Harvey Fisk & Sons for the McCall deal, replaced Coudert Brothers and took control of all legal matters relating to organization and property. However, John G. Johnson continued to advise on matters

of major importance. Harvey Fisk & Sons became Syndicate Managers in joint account with Bertron, Storrs & Griscom and the latter took part in some of the important negotiations. William M. Barnum represented the Fisk firm in the management of the McCall Ferry project. Charles A. Coffin became prominent in the affairs of the company which was soon formed for the development. Lee, Higginson & Company took a large portion of the new underwriting and through Gardiner M. Lane became actively interested in the company. Although Hutchinson and Dimock had lost control of the enterprise, they continued to be connected with the development.

Dimock-Bertron-Barney Subscribers Participate in Harvey Fisk & Sons' Underwriting

Lee, Higginson & Company had obtained approximately two and a half million dollars of subscriptions under the Dimock-Bertron-Barney Syndicate Agreement. Approximately an additional million and a half had been obtained by that syndicate elsewhere. Harvey Fisk & Sons were desirous of retaining the subscriptions already obtained under the March 1st agreement. Accordingly, they agreed to provide these with the 50% bonus of preferred stock instead of the 45% stated in the Fisk Underwriting Agreement and thus continued in force these earlier subscriptions. (See Exhibits Nos. 8 and 11)

Stock Distributed to Bankers

The issue of common stock under the March 25th plan was increased to 50,000 shares, of which the Bankers were to receive 30,000 and the Hutchinson interests 20,000. The Bankers' shares were divided as follows:

Harvey Fisk & Sons	17,537½ shares
Bertron, Storrs & Griscom	7,462½ shares
Lee, Higginson & Company	5,000 shares
Total	30,000 shares

The only preferred stock issued for services was 1,875 shares to Harvey Fisk & Sons. This preferred stock and the 17,537½ shares of common issued to the Fisk firm were compensation for both banking and management services, whereas the stock going to Bertron, Storrs & Griscom and Lee, Higginson & Company was for banking services only.

VII - HARVEY FISK & SONS ACQUIRE CONTROL OF LOWER SUSQUEHANNA

Pullen Negotiations with Harlow-McGaw

It seems that some time prior to February 22, 1905, Charles D. Pullen became interested in promoting the hydroelectric development of the Susquehanna River, for on that date Harlow-McGaw communicated to Pullen the terms under which they would agree to Pullen's plan of promotion. These terms provided among other things for Pullen's obtaining options on Hutchinson's project at McCall Ferry and the Welch or Susquehanna Power Company development at Shuresville. These negotiations by Pullen culminated in an agreement with Harlow-McGaw, executed on February 28, 1905, the chief provisions of which were as follows:

1. Provided Pullen was successful in his efforts to consolidate all properties and rights under one united ownership by July 1, 1905, Harlow-McGaw would sell all their properties along the Susquehanna River for $500,000. cash and $1,000,000. par value in stock of the controlled corporation. Property and rights which were to be transferred by Harlow-McGaw included the following:
   - (a) All outstanding stock of Susquehanna Canal and Power Company.
   - (b) All property and rights of old Tidewater Canal Company.
   - (c) All outstanding stock of Proprietors of Susquehanna Canal.
   - (d) 400 shares of stock of Conowingo Land Company.
   - (e) All lands, islands, rights, etc., controlled by Harlow-McGaw.
   - (f) Cooperation of Conowingo Bridge Company was to be secured by Harlow-McGaw.
   - (g) Harlow-McGaw were to prepare plans showing any other lands needed.
2. Pullen was to continue his efforts to effect united ownership.
3. Provision for extension past July 1, 1905, if material progress had been made.

(See Exhibit No. 12)

Pullen Negotiations with Welch Group

On March 21, 1905, Pullen executed an agreement with the stockholders of the Susquehanna Power Company, or Welch interests, in which he secured an option on their rights along the River. A summary of the major provisions of this option is set forth:

1. Pullen represented to Welch, et al, that he had arranged to acquire the following properties:

   (a) Property known as the McCall's Ferry Development, owned and controlled by Cary T. Hutchinson and others.

   (b) All the property owned and controlled by Geo. K. McGaw, James H. Harlow, George R. Harlow, M. H. Houseman, Conowingo Land Company, Susquehanna Canal Company, Tidewater Canal Company, and Old Maryland Canal Company, both in Maryland and Pennsylvania.

   (c) All the property owned and controlled by Susquehanna Power Company or Welch, et al.

2. Welch, et al, to sell all their stock in Susquehanna Power Company, totaling 3,612 shares, to Pullen at its par value, payable July 1, 1905, amounting to $361,200.

3. Provision was made for renewals of the option, if substantial progress had been made by July 1, 1905.

4. Stock of Welch, et al, was to be placed with Joel H. De Victor to be held in trust by him, and all payments of money for said stock were to be likewise made to De Victor in trust and were to be applied by him, first, in liquidation of certain outstanding obligations of Susquehanna Power Company, with the balance going to Welch, et al.

5. Welch, et al, to lend Pullen all maps and briefs of title.

6. Sale of stock by Welch, et al, conditioned upon Pullen's first purchasing the properties and rights of Harlow-McGaw.

7. If settlement was not made, the Trustee was to return the stock to Welch, et al.

8. Each depositor of stock with the Trustee was to be charged a pro rata portion of the obligations of Susquehanna Power Company.

(See Exhibit No. 12)

New Option on Harlow-McGaw Properties

The first option, obtained from Harlow-McGaw, was contingent on Pullen's ability to obtain control of the Hutchinson-Dimock and Susquehanna Power Company properties. The second one, obtained from Welch, et al, was contingent only on his ability to acquire the Harlow-McGaw holdings. In the third option, which he secured from Harlow-McGaw, the condition of obtaining control of the Hutchinson-Dimock properties was omitted. A memorandum, dated April 4th, relating to this new option contains the following language:

> "The understanding which we have of the movements of the Hutchinson development indicates that if no time is lost that we are in a good position to carry out our own development on the Peach Bottom, and in the raising of any funds for this purpose the Welch proposition will be easily taken care of."

(See Exhibit No. 13)

This agreement of April 5th between Pullen and Harlow-McGaw provided as follows:

1. The transfer of all the lands and rights mentioned in the first agreement (February 28, 1905) to the Susquehanna Canal and Power Company by Harlow, McGaw and Houseman.

2. Harlow, McGaw and Houseman were to receive 10,000 shares ($500,000. par value) of Canal and Power stock for these properties, etc.

3. Pullen was to exercise the second option (March 21, 1905) to obtain Susquehanna Power Company stock and then transfer it to the Susquehanna Canal and Power Company.

4. Pullen was to receive 10,000 shares ($500,000. par value) of Canal and Power stock in full payment therefor.

5. Susquehanna Canal and Power Company capital stock was to be increased to 30,000 shares ($1,500,000.).

6. This stock was to be issued and placed in trust until lands and rights were transferred to the Canal and Power Company.

(See Exhibit No. 12)

This new agreement in effect cancelled the first agreement, for it excluded the Hutchinson holdings. It provided for the transfer of the Harlow-McGaw holdings to a corporation (Susquehanna Canal and Power) designated by Pullen and thus paved the way to exercise his second option to obtain the Susquehanna Power Company stock for the Canal and Power Company. This placed Pullen in potential control of all river holdings except that of the McCall area.

Harlow-McGaw Propose Consolidation with McCall Company

Although Pullen had by this time given up the idea of including the McCall development in his plans, Houseman of the Harlow-McGaw group made a further attempt to bring the entire River area under one management by suggesting a plan to Harvey Fisk & Sons on April 18, 1905, for consolidating all interests. He gave a general description of the plans of the Susquehanna Canal and Power Company (the company to be used in the Pullen and Harlow-McGaw agreement of April 5th) covering its proposed canal from tidewater to Wrightsville-Columbia with a large storage pool, docks and wharves at Columbia where connections with the Pennsylvania Railroad and Reading Railroad were to be made. He then referred to the general development of the 200 feet of fall in the river for hydroelectric purposes and mentioned the Harlow plan for five developments on this section of the river. He mentioned the power markets that his associates were negotiating with and other potential markets. He finished his letter, suggesting the consolidation of interests in the following language:

> "I am writing this letter somewhat in detail to your house, for the reason that your present interests on the river are apparently in conflict with our plans, which were being worked out on the river long before Dr. Hutchinson had acquired any property rights there. We feel sure that the merits of the enterprise are worthy of very careful consideration and investigation

by your house, with a view to harmonizing and adjusting the conflicting plans for the development of the entire water power of the River.

"The writer, therefore, respectfully asks that someone connected with your house read over carefully these papers, and as he expects to be in New York the latter part of this week will take the liberty of calling upon you, and if by that time you have determined that this matter is not of sufficient interest to warrant a conference he would be pleased to have you return the papers to him. Otherwise, if you desire to join with him and his clients in an effort to adjust this unnecessary complication, he desires to offer his services to that end."

(See Exhibit No. 14)

Harvey Fisk & Sons Purchase
Harlow-McGaw Interests

The letter written by Houseman to Harvey Fisk & Sons indicated that the Harlow-McGaw interests were deeply concerned about the progress of the McCall development. It was generally considered that only one development would be economically possible along the river at the time and there was no question whatever but that the first development on the river would gain a great advantage. It will be recalled that the agreement of April 14, 1903, had been extended to May 15, 1905. It appears that after the original signing, the Harlow-McGaw interests were not anxious to put this plan into effect. The McCall group, however, did not desire to pool their project with anyone else, and were insisting on carrying out that agreement.

On April 27, 1905, Harlow-McGaw disposed of all their properties, rights and other assets composing their interest on the Susquehanna to Harvey Fisk & Sons. This was done through the medium of two separate agreements. The first was between Harvey Fisk & Sons and Harlow-McGaw and was made subject to Pullen's prior options from Harlow-McGaw and, therefore, could be carried out only if Harvey Fisk & Sons purchased Pullen's options or waited for them to expire.

Terms of Harlow-McGaw Sale

Under the terms of this agreement, Harlow-McGaw agreed to sell to Harvey Fisk & Sons, subject to the Pullen option:

1. All lands, easements and water rights along the river owned or controlled by Harlow-McGaw.
2. C. R. McConkey's interest in contracts for purchase of the Burkin's tract and the John Bair Estate.
3. All the rights and property of the old Tidewater Canal Company.
4. All the outstanding stocks of:
   (a) Proprietors of the Susquehanna Canal
   (b) Susquehanna Canal and Power Company
   (c) Susquehanna Falls Power Company
   (d) Susquehanna River Power Company
   (e) Susquehanna Storage Lake & Power Company
5. Two-thirds of the issued capital stock of the Conowingo Land Company.
6. An agreement executed by the Susquehanna Canal and Power Company, with the consent of every stockholder, whereby that company would consent to the construction and operation of one or more dams and water power plants at any point or points on the Susquehanna and the resultant flooding of the canal, without any compensation to the Canal and Power Company.
7. A similar agreement executed by the Tidewater and Susquehanna River Railroad regarding its proposed right of way.
8. An option to purchase at $20. per share all capital stock of the Conowingo Bridge Company, owned or controlled by Harlow-McGaw.
9. All property to be unencumbered and all stocks to be accompanied by resignations of all directors.

In return Harvey Fisk & Sons agreed to pay Harlow-McGaw:

1. $200,000. in cash.
2. $250,000. par value of McCall Ferry Power Company Bonds.
3. $100,000. par value of McCall Ferry Power Common Stock.

(See Exhibit No. 15)

Delivery of the deeds and stocks and payment therefor were to be made June 1, 1905, at the office of Simpson, Thacher and Bartlett.

The stocks of five other river companies controlled by Harlow-McGaw were not included in this Harvey Fisk agreement. However, by the second agreement of April 27th, McGaw was to sell to Bertron all the stock owned or controlled by the former of his associates in the following:

1. All the outstanding stock of Susquehanna Construction Company of Baltimore City.
2. All the outstanding stock of Sowego Water and Power Company except that owned by Susquehanna Electric Power Company.
3. All the outstanding stock of Lower Chanceford Water and Power Company.
4. An unstated number of shares of Susquehanna Electric Power Company.
5. An unstated number of shares of the Martic Water & Power Company.

(See Exhibit No. 15)

Delivery was to be made at Simpson, Thacher and Bartlett's offices on June 1, 1905.

A letter from P. G. Bartlett to McGaw, Harlow and Houseman, dated May 1, 1905, sets forth what was purported to be an oral agreement made at the time of execution of the Harvey Fisk purchase of the Harlow-McGaw properties. It states: "Said contract was so delivered upon the express understanding that a certain other contract of the same date, made by George K. McGaw - and S. R. Bertron - was a part of the same transaction and that the obligation of said Harvey Fisk & Sons under said first mentioned contract are conditioned upon the performance of both the aforesaid contracts." It further recited that the two contracts were intended to include a complete transfer of all Harlow-McGaw interests and rights along the river. (See Exhibit No. 15) There was a mortgage of $25,000. on the property of the Conowingo Land Company not owned by Harlow-McGaw which was obtained from R. F. Emory on November 2, 1906.

Pullen Rights Purchased

In order to remove the possibility of Pullen's exercising his options, they were purchased from him by Harvey Fisk & Sons through Bertron, Storrs & Griscom on April 29, 1905. The consideration was $10,000. cash and 150 shares of McCall Ferry Power Company common stock. (See Exhibit No. 12) On May 15th, Harvey Fisk & Sons reimbursed Bertron,

Storrs & Griscom for their $10,000. advance with $22.22 interest, charging the total amount against funds received from the bond subscribers.

With the acquisition of the Harlow-McGaw property and the Pullen option, the possibility of enforcing the agreement of April 14, 1903, had been eliminated.

VIII - COMPLETION OF ORGANIZATION

Incorporation of McCall Ferry Power Company

An Agreement of Merger and Consolidation between The Hillside Water and Power Company and Susquehanna Water and Power Company to form the McCall Ferry Power Company (sometimes hereinafter referred to as McCall Company) was executed under the date of April 1, 1905. The same group of persons which had formed the consolidating companies comprised the incorporators of the McCall Company. The purpose of the McCall Company was that of the two predecessor companies combined, namely:

> "for the purpose of the storage and transportation of water and water power for commercial and manufacturing purposes, in the Townships of Lower Chanceford, York County and Martic, Lancaster County, Pennsylvania, and the supply of the same to the public and such persons, partnerships and corporations residing therein as may desire the same; and in order that the water and water power may be supplied to the public to the best advantage, in furtherance of its corporate purposes, the development by the use of the same of electric current, and power to the public, individuals, firms and corporations, at any place or places at such prices as may be agreed upon."

The capital stock of the McCall Company was to consist of ten shares of $100. par value each. The stock of the merging companies was to be exchanged on a share for share basis for stock in the new or McCall Company.

Directors and Stockholders

W. F. Beyer	2 Shares
Geo. B. Willson	2 "
Jacob Hill Byrne	2 "
W. Frank Jack	2 "
Walter M. Franklin	2 "

Officers

President	- W. F. Beyer
Secretary and Treasurer	- Geo. B. Willson

Although this Agreement of Merger and Consolidation was dated April 1, 1905, it was not filed by Beyer until April 6th and was recorded in the office of the Secretary of the Commonwealth on April 11th. Letters Patent were issued on April 14th.

On May 22, 1905, the first meeting of the stockholders of the McCall Company was held. The only business of this meeting consisted of the election of Directors and a Secretary-Treasurer. On the same date the Directors held their first meeting. They elected Wm. F. Beyer, President, established an office at 33 N. Duke Street, Lancaster, Pennsylvania, and set dates for regular Board Meetings.

Eminent Domain - Act of April 13, 1905

On April 13, 1905, a new Pennsylvania law was passed dealing with the subject of eminent domain and provided:

> "That no water company hereafter incorporated under any law, shall have power or exercise the right of eminent domain as respects the appropriation of the streams, rivers or waters of this Commonwealth or any of them, nor the land covered thereby."

When in December of 1905 the McCall Company seriously began to consider condemnation of the Robert F. Fry tract because of high price, this law became highly important.

The way in which it became important was by reason of the date of the law. The questions arose as to what was the extent of the law and what effect the law would have on McCall Company by reason of its date of passage. Johnson was of the opinion that water companies no longer held rights of eminent domain after the passage of the Act. On the point of whether the law would say that the McCall Company was formed on April 1st by reason of being a merger or on April 14th, date of Letters Patent, it appears that there was serious doubt about the question, but

Johnson believed that the Court would hold McCall Ferry Power Company was formed on April 14th.

There was some difference of opinion on whether the change in the law applied only to water and lands covered by water, thereby still permitting them the rights of eminent domain so far as property for buildings, dams and water works were concerned.

Classes of Bond Subscriptions

The immediate requirements of the McCall Company apparently had been determined by the end of April so that under the date of May 3, 1905, notices were sent to Bond Subscribers informing them of their respective allotments. There were different forms for the deferred and non-deferred subscribers.

Those subscribers who elected to defer payment were, like the non-dererred subscribers, required to make a first payment of twenty per cent based on the net amount of the price of the bonds at ninety. All of the first 20 per cent payments were evidently made promptly, for on May 15th Harvey Fisk & Sons recorded the amount of $1,440,000. to the credit of the proposed Susquehanna Contracting Company. Calls were subsequently made periodically upon the non-deferred subscribers in amounts of ten per cent each. Interest at the rate of five per cent per annum was to be credited upon the amounts paid until the delivery of the bonds and stocks, after final payment had been made. The deferred subscribers were granted until November 1, 1908, to make their final payment of eighty per cent.

Harvey Fisk & Sons' Loan Arrangement with Knickerbocker Trust Company

In accordance with the provisions of the Bond and Stock Purchase Agreement, Harvey Fisk & Sons, on May 15th, made arrangements for loans

from the Knickerbocker Trust Company totaling $4,424,400., the amount of the unpaid deferred subscriptions. The Trust Company was to make installment advances as called for from time to time beginning June 1, 1905. The terms of this arrangement, as contracted for between Harvey Fisk & Sons and Knickerbocker Trust Company, were as follows:

1. Loans to bear six (6) per cent interest per annum.
2. $6,145,000. of bonds and purchase agreements were to be pledged as collateral for $4,424,400. loan.

   The basis of this ratio is better explained in the following schedule:

Total Deferred Subscriptions to Bonds	$ 6,145,000.
Less 10% Discount	614,500.
Net Amount at 90 due from Subscribers	$ 5,530,500.
Less 20% First Payment upon Call	1,106,100.
Balance due from Subscribers, the Amount of Loan by Knickerbocker Trust Company	$ 4,424,400.

3. Loans were to mature at the end of the year in which made, but could be extended for one or two annual renewals to the end of the third year.
4. In addition to interest, the Trust Company was to receive a commission of one-half of one per cent on the full amount agreed to be loaned, viz: $4,424,400. for each year the agreement was in force.
5. Loans to be made to the Susquehanna Contracting Company, then in the formative stage, and through which securities of the McCall Company were to be issued.

(See Exhibit No. 16)

Incorporation of Susquehanna Contracting Company

The necessary ground work for the execution of the major agreements of the McCall Company was completed by the middle of June 1905. Susquehanna Contracting Company was incorporated June 12th. It was a New York Company formed for the following purposes:

1. To acquire or construct hydroelectric developments along the Susquehanna River.
2. To do a general contracting business.

3. To purchase, lease, etc., rights and interests in respect to real estate and water.

4. To acquire and sell machinery, supplies, merchandise, etc.

5. To acquire, use and dispose of rights in respect to construction, manufacture, etc.

6. To acquire, pledge and sell securities of any corporation and to issue in exchange therefor its own securities.

The capital stock consisted of five shares with a par value of $100. each.

Harvey Fisk & Sons Assign Loan Arrangement to Contracting Company

On June 14th, Harvey Fisk & Sons executed an agreement with the Contracting Company which, in effect, assigned their loan arrangement of May 15th with the Knickerbocker Trust Company. In addition to the assignment, the agreement contained the following provisions:

1. Harvey Fisk & Sons assigned to Contracting Company the bond and stock purchase agreements and all their rights thereunder, except the right of Harvey Fisk & Sons to repurchase the bonds at ninety.

2. Contracting Company agreed to discharge all obligations of Harvey Fisk & Sons under the bond and stock purchase agreements and appointed Harvey Fisk & Sons its agent for the performance of all obligations assumed by it. It agreed to deliver to Harvey Fisk & Sons all bonds and stock necessary for delivery to Subscribers under the purchase agreements, authorized Harvey Fisk & Sons to call for and receive further installments of Purchase price and to deliver bonds and stock to Subscribers entitled thereto.

3. The powers vested by this instrument in Harvey Fisk & Sons were stated as being irrevocable because of being coupled with

the interest of Harvey Fisk & Sons in the following:

A. The option to repurchase the bonds.
B. The contract for the sale of the bonds.
C. The loan arrangement.

4. It was understood that the bond and stock purchase agreements of Subscribers who had elected to defer payment of installments, after the initial payment would be assigned by Harvey Fisk & Sons to Knickerbocker Trust Company as security for the loans to be obtained under the loan arrangement.

(See Exhibit No. 16)

Loan Agreement between Contracting Company and Knickerbocker Trust Company

The loan arrangement was consummated by an agreement executed on November 1, 1905, between Susquehanna Contracting Company and Knickerbocker Trust Company. The maximum loanable amount was increased approximately $60,000. over the amount stated in the Harvey Fisk & Sons' loan arrangement. This agreement contained the following provisions:

1. For the immediate payment by the Contracting Company to the Trust Company of $22,410., being the first annual payment of one-half of one per cent commission on the maximum amount of the loan. A like payment was required for each year the loan continued.

2. The Contracting Company could borrow on five days' written notice up to $4,482,000. at any time until November 1, 1908.

3. Interest was to be 6% per annum.

4. The Contracting Company was to give its note for each loan, and deposit with the Trust Company a bond and stock purchase agreement (on which 20% of the purchase price had been paid) whose unpaid 80% would be the amount of the loan. In addition, the McCall Company bonds and stock covered by the purchase agreement were to be deposited with the Trust Company.

(See Exhibit No. 17)

Agreement with Susquehanna Contracting Company for Financing McCall Ferry Power Company

On June 13th, the day following the incorporation of the Contracting Company, an agreement was executed, providing for the transfer of certain properties and a sum of money by the Contracting Company in exchange for sub-

stantially all of the preferred and common stocks to be issued and about $8,000,000. of bonds of the McCall Company. The provisions of the agreement follow:

Susquehanna Contracting Company agreed:

1. To secure the transfer to McCall Company of all the lands, water power rights, or other interests in land, along the Susquehanna River belonging to the following persons:

   Cary T. Hutchinson
   William F. Beyer
   George B. Willson
   York Furnace Power Company (partnership)
   George K. McGaw
   James H. Harlow
   George R. Harlow
   Chas. R. McConkey - rights to certain properties
   Wm. H. Bayless - rights to certain properties

   Also all the canal rights, property and franchises of the old Tidewater Canal Company, (the Maryland Section of the Susquehanna Canal).

2. To secure transfer of the shares of stock of the following companies:

Proprietors of the Susquehanna Canal	-All outstanding stock	(75 sh.)
Susquehanna Canal and Power Co.	- " " "	(2,478 sh.)
Susquehanna Falls Power Company	- " " "	(6 sh.)
Susquehanna River Power Company	- " " "	(9 sh.)
Susquehanna Storage Lake and Power Company	- " " "	(12 sh.)
Conowingo Land Company	-Two-thirds " "	(400 sh.)

   All other stocks in corporations interested in the development of the river that Contracting Company might be able to obtain under its arrangements then existing.

3. To obtain an option for McCall Company to purchase a majority of stock of the Conowingo Bridge Company at $20. per share. Also to obtain an option to all the rights assigned by Chas. D. Pullen on April 29, 1905. (McCall Company never exercised these two options.)

4. To obtain flowage releases from the following companies:

   Susquehanna Canal and Power Company
   Tidewater and Susquehanna River Railroad Company
   Conowingo Bridge Company

5. To pay to McCall Company $6,400,000.

McCall Ferry Power Company agreed:

1. To issue to Contracting Company $8,483,000. principal amount of first mortgage thirty year 5% gold bonds of a total authorized issue of $10,000,000.

2. To issue to Contracting Company $4,116,500. in preferred stock and $4,999,000. in common stock.

(See Exhibit No. 18)

The bonds and stocks were to be transferred to Contracting Company at the time McCall Company received the deeds, transfers and other instruments vesting in it the property, rights, etc., obtained for it by the Contracting Company. The $6,400,000. was to be paid in cash installments to McCall Company over a period of three years as and when called for. It was understood that the Contracting Company might obtain part of the necessary money by pledging the bonds and stock. Interest coupons were to be paid as they matured, but the Contracting Company was to refund to McCall Company the excess of bond interest received over interest and commissions paid by the Contracting Company in obtaining loans. This arrangement was to cover the period from the date of the bonds until full payment of $6,400,000. had been made by the Contracting Company to McCall Company.

Increase of McCall Company Indebtedness and Capital Stock

On the same day but prior to the execution of the preceding agreement, a Directors' Meeting of McCall Company had been held at which this contract was presented for approval. The officers were authorized to execute the agreement, pending the authorization by the Stockholders of an increase in the Company's indebtedness and capital stock to cover the contract requirements. The Stockholders, at a meeting held later in the day, gave their approval to the following increases in bonds and stocks:

Security	From	To
First Mortgage Five Per Cent Gold Bonds due June 15, 1935	None	$10,000,000.
Preferred Stock - $100. par value (5% Cumulative after June 15, 1909)	None	$ 5,000,000.
Common Stock - $100. par value	$1,000.	$ 5,000,000.

The Directors passed another resolution stating that the Contracting Company should be entitled to any profits that might result from this agreement. They also confirmed the contract at a later meeting held on the same day following the Stockholders' Meeting in which the increases in bonds and stocks were approved. The Stockholders also adopted By-Laws at their meeting held on this date.

Acquisition of Hutchinson Interests by Susquehanna Contracting Company

On the next day, June 14th, the Contracting Company made an arrangement for the purchase of all the property, rights and interests of Cary T. Hutchinson. A summary of this agreement follows:

1. Hutchinson was to cause to be conveyed to McCall Company all lands, water power rights and other interests in lands along the Susquehanna River between Columbia, Pennsylvania, and Havre de Grace, Maryland, belonging to any of the following:

   Cary T. Hutchinson
   William F. Beyer
   George B. Willson
   York Furnace Power Company (partnership)

2. Contracting Company was to deliver to Hutchinson:

Preferred Stock (Par Value)	$ 400,000.
Common Stock (Par Value)	4,884,000.
Cash	750,000.
Total	$ 6,034,000.

(See Exhibit No. 19)

The foregoing agreement with Hutchinson shows a very substantial consideration passing to him. From Hutchinson's affidavit and other

records, it can be shown that he was only the temporary recipient and not the beneficiary of much of this consideration. It will be shown later that the $400,000. of preferred stock went to the bankers, either for themselves or for use in adjusting the bonus stock of those subscriptions which had been obtained under the March 1st agreement calling for 50% bonus, instead of 25%. Regarding the common stock, Hutchinson's affidavit states that he and his associates received for their use 18,840 shares and that Harvey Fisk & Sons received 30,000 shares for the banking interests.

On June 20th, Hutchinson executed an agreement with the Contracting Company which provided for the perfecting of titles of the properties conveyed. (See Exhibit No. 19) These properties and rights passed to McCall Company under the agreement between that company and the Contracting Company, dated June 13, 1905.

Acquisition of Harlow-McGaw Interests by McCall Company

Harvey Fisk & Sons had acquired the Harlow-McGaw properties and rights on April 27th, and on June 14th transferred them to the Susquehanna Contracting Company which assumed the obligation of payment to Harlow-McGaw. (See Exhibit No. 15) A confirmatory agreement between the Contracting Company and Harlow-McGaw was signed June 15th. (See Exhibit No. 15) These properties and rights passed to McCall Company under the agreement between that company and the Contracting Company dated June 13, 1905. The Pullen option was transferred by Bertron, Storrs & Griscom to the Contracting Company on June 16th. (See Exhibit No. 12) As this option expired July 1, 1905, it was not assigned to McCall Company.

Mortgage with Knickerbocker Trust Company as Trustee

The McCall Company, having promised to deliver bonds to the

Susquehanna Contracting Company under the terms of the June 13th agreement, created a mortgage dated June 15, 1905, with the Knickerbocker Trust Company as Trustee, on all of its property then held or to be acquired. It provided for an issue of $10,000,000. of First Mortgage Five Per Cent Gold Bonds with a provision for an immediate issue of $8,483,000. upon the property to be acquired from the Contracting Company by the terms of the June 13th agreement. The remaining $1,517,000. of bonds could be issued if the proceeds were to be used for acquiring additional property or making new construction, improvements or additions to the mortgaged property. The mortgage was to run until June 15, 1935, when the bonds were to be redeemed.

Permanent Directors and Officers Elected

The Directors, after approving an increase in the number of members on the Board from five to fifteen on July 31, 1905, proceeded at a meeting held August 8th to fill all existing vacancies with the resulting Board composed of the following members:

Wm. M. Barnum	H. F. Dimock
A. C. Bedford	Pliny Fisk
S. R. Bertron	Rodman E. Griscom
E. J. Berwin	J. J. Hope
Wm. F. Beyer	Cary T. Hutchinson
W. Marriott Canby	Gardiner M. Lane
C. A. Coffin	Wm. Barclay Parsons
Geo. B. Willson	

On the same date, this new Board held a meeting at which the following were elected to the Executive Committee:

H. F. Dimock	Gardiner M. Lane
C. A. Coffin	Wm. M. Barnum
Wm. Barclay Parsons	

The following Officers were elected about this time:

President	- Henry F. Dimock
Vice-President	- J. A. Keppelmen
Secretary and Treasurer	- Wm. H. Barnum
Chief Engineer	- Cary T. Hutchinson

Voting Trust

A voting trust was created under the following provisions of a Stock Deposit Agreement, dated January 20, 1906:

1. Harvey Fisk & Sons were to be depositaries of the McCall Company stock.
2. To be effective until November 1, 1908, unless commercial operation began sooner.
3. Might be terminated by depositors of two-thirds of stock.
4. Harvey Fisk & Sons were to vote stock as directed by Voting Committee.
5. Voting Committee was to consist of:

   Henry F. Dimock
   William M. Barnum
   S. Reading Bertron

6. Vote of two required for acts to be effective.
7. In case of death of any member, the remaining two were to choose his successor.
8. Harvey Fisk & Sons and Voting Committee were to act without compensation.
9. Both Harvey Fisk & Sons and members of the Voting Committee might also be depositors.

(See Exhibit No. 20)

IX - VALUE OF McCALL COMPANY SECURITIES

Securities Issued for Property or Services

The increase in authorized securities by McCall Company placed it in a position to carry out the agreement of June 13, 1905, with the Contracting Company whereby McCall Company was to acquire substantially all the property and cash necessary to proceed with its hydroelectric development. Hereinbefore have been recorded the major purchases of property, services, etc., by the Susquehanna Contracting Company for the McCall Ferry Power Company. The McCall Company, a predecessor of Pennsylvania Water & Power Company, was the first company to devote these properties to public service and therefore it is necessary to determine cost of all acquisitions by McCall Company. Inasmuch as payments were made in several instances in cash and securities, it has been necessary to ascertain the cash value of the securities issued for this purpose in order to comply with the provision of Instruction 3-D of Electric Plant Accounts of the Federal Power Commission, which states:

> "When the consideration given for property is other than cash, the value of such consideration shall be determined on a cash basis."

The McCall Ferry Power Company went into receivership before any of its securities reached the open market and therefore it has been impossible to determine their values by means of market quotations. The only information pertinent to these values which has been located among old records is summarized herewith.

Value of McCall Bonds

1. The McCall Company's bonds were sold to the underwriters at 90 with a bonus of 45 or 50% in preferred stock. Harvey Fisk & Sons had the right to repurchase the bonds at 90 unaccompanied by any bonus stock. Pliny Fisk has stated that

his firm considered this option an obligation to relieve the underwriters from making long time investment. (See Exhibits Nos. 8, 9, 10 and 16)

2. James H. Harlow, in sworn testimony in connection with condemnation proceedings of the Susquehanna Power Company in 1906-07, stated that while he did not think he could get 90 for the bonds alone, he would not be willing to sell them for less than par. He had received no preferred stock with his bonds and when testifying was a witness for those whose interest lay in placing a low value on McCall securities. (See Exhibit No. 21)

3. Bertron, Storrs & Griscom recorded these bonds at 90 in November, 1908, which was the only record of value carried on their books. (See Exhibit No. 22)

Since most of the above sources of information are in agreement as to the $900. value of a $1000. par bond this amount has been determined to be the cash value in cases where bonds were issued as part consideration in the acquisition of property.

Value of McCall Preferred Stock

1. Bertron, Storrs & Griscom's records show the following book values for 1,875 shares of preferred stock:

(a) November 21, 1906 - at $10. per share
(b) December 31, 1906 - from $10. to $40.
(c) April 1, 1907 - held at $50.
(d) December 31, 1907 - held at $25.
(e) December 28, 1908 - held at no value

(See Exhibit No. 22)

Confirming a previously expressed verbal opinion, J. O. Adams, Secretary-Treasurer of Bertron, Griscom & Company stated on January 8, 1940:

"Due to the fact that I was not in the employ of Bertron, Storrs & Griscom at the time of the McCall Ferry Power Company transaction, it is impossible for me to state which, if any, of the recorded amounts represented the appraisal by the firm as the actual value of the stocks when received. It would appear to me that the partners placed various arbitrary amounts in the McCall Ferry Power Company stock accounts, as well as in other stock accounts, probably in accordance with understandings or agreements between them."

(See Exhibit No. 23)

Rodman E. Griscom, who has been head of the firm since Bertron's death, was asked to make a statement which would clarify these entries but replied,

"So many years have elapsed that I have no recollection that would justify me in making and swearing to any statement such as you ask."

(See Exhibit No. 23)

From the records it is apparent that Griscom was in the Philadelphia branch during the McCall Ferry period and that Bertron handled most of the firm's matters in connection with the project.

Because of the variance and unreliability of the foregoing figures, Pliny Fisk, who was senior partner of Harvey Fisk & Sons in 1905, was consulted in the matter. He expressed the opinion that the preferred stock had a value of approximately $50. per share in 1905, when his firm received 1,875 shares for services. (See Exhibit No. 9) As the Fisk firm presents the only case where preferred stock was used as payment for services or property, this value has been used in computing original cost.

Value of McCall Common Stock

1. Bertron, Storrs & Griscom's records show the following book values for the common stock:

   (a) November 21, 1906 - 12,462½ at $1. per share
   (b) December 11, 1906 - 5,000 shares charged out to Lee, Higginson & Company at $1. per share and increase of remaining 7,462½ shares from $1. to $2. per share
   (c) December 31, 1906 - 7,462½ shares from $2. to $10.
   (d) August 9,1907 - Purchase of 150 shares from Pullen at $5. per share
   (e) December 31, 1907 - Increase 150 shares from $5. to $10. per share.
   (f) December 28, 1908 - No value

   (See Exhibit No. 22).

2. James H. Harlow, in his 1906-07 testimony, placed a value of $10. per share on the common stock. (See Exhibit No. 21)

3. The prospectus attached to the March 1st underwriting agreement showed estimated earnings based on Parsons' report of January 13, 1905, equal to 7% on the proposed issue of $4,000,000. par of common stock. (See Exhibit No. 5)

The comments of Griscom and Adams regarding the values shown by Bertron, Storrs & Griscom records have been given under the heading of "Value of McCall Preferred Stock." Harlow's testimony was given as a witness for those whose interest lay in placing a low value on McCall securities. An estimated return of 7% on the par value of common stock does not fix any specific value on that stock. Because of the variance and unreliability of the foregoing figures, statements as to stock values have, therefore, been obtained from persons closely associated with the development of McCall Company, who accepted this stock as compensation for property or services. Before presenting the results of these statements, it seems desirable to give a resume' of the distribution of McCall stocks so that a clearer understanding may be had as to the things of value received for them.

Distribution of McCall Preferred Stock

Under the terms of the agreement between McCall Company and the Contracting Company dated June 13, 1905, McCall Company issued 41,165 shares of preferred stock to the Contracting Company. Of this amount, 4,000 shares were assigned to Hutchinson under his agreement with the Contracting Company dated June 14, 1905. Of the remaining amount, 36,337½ shares were given as the 45% bonus with the bonds and 100 shares were assigned to H. C. Frick for an unknown reason. The balance, 727½ shares, was held by the Susquehanna Contracting Company.

It has been previously mentioned that arrangements had been made to retain the subscribers to the March 1st underwriting by giving

them 5% additional preferred stock bonus, making their bonus 50% as called for under that plan of underwriting. Of the 4,000 shares of preferred stock mentioned in the Hutchinson-Contracting Company agreement, 2,125 were used to provide this additional bonus and the remaining 1,875 shares went to Harvey Fisk & Sons as part of their compensation for banker and management services.

Distribution of McCall Common Stock

At the time of merger of The Hillside and Susquehanna Water and Power Companies to form McCall Ferry Power Company 10 shares of McCall stock were issued in exchange for the stock of the merging companies. Subsequently 4 of these were held by Hutchinson and 6 by Harvey Fisk & Sons under the arrangements whereby the Fisk firm purchased control from Hutchinson. Under the terms of the McCall Company-Contracting Company agreement of June 13th, 49,990 shares of McCall common stock were issued to the Contracting Company. This accounts for the original issuance of the total 50,000 shares.

The Contracting Company used 1,000 shares in carrying out its agreement with Harlow-McCaw and 150 shares for its agreement with Pullen. The balance, 48,840 shares, was required in connection with the agreement with Hutchinson. Of this amount 30,000 shares actually went to the bankers, leaving Hutchinson 18,840 for himself and for settlement of his obligations.

The 30,000 shares going to the bankers were divided as follows:

Harvey Fisk & Sons	17,537½ shares
Bertron, Storrs & Griscom	7,462½ shares
Lee, Higginson & Company	5,000 shares
Total	30,000 shares

The complete distribution of Hutchinson's 48,840 shares is not known, due to the fact that it was made in the form of Voting Trust certificates and no record of the issuance of these certificates could be found.

Summary of Distribution of McCall Stock

Name	Shares of Preferred Stock	Shares of Common Stock
Original Incorporators (10 sh. common)		
(a) Hutchinson		4
(b) Harvey Fisk & Sons		6
Harlow-McGaw		1,000
Pullen		150
Hutchinson Contract		
(4,000 sh. preferred)		
(48,840 sh. common)		
(a) Hutchinson et al		18,840
(b) Harvey Fisk & Sons	1,875	17,537½
(c) Bertron, Storrs & Griscom		7,462½
(d) Lee, Higginson & Company		5,000
(e) Bond Subscribers (5% bonus)	2,125	
Deferred Bond Subscribers	27,810	
Non-deferred Bond Subscribers	8,527½	
H. C. Frick (additional)	100	
Held by Contracting Company	727½	
Unissued	8,835	
Total	50,000	50,000

Value of Services Rendered for Stock

As previously mentioned, in order to determine the proper value to assign to the McCall common stock, statements of recipients have been obtained.

1. Hutchinson has stated that at the time the common stock was issued he and others, who were fully informed concerning the enterprise, were of the opinion that the stock was worth from $20. to $30. per share. (See Exhibit No. 1)

2. Fisk has stated that his firm's banking services had a value of not less than $250,000. and the management services at least an additional $150,000. For these services his firm received 1,875 shares of preferred and 17,537½ of common stock.

His value for the common stock was arrived at by the following process:

Banking Services	$250,000.
Management Services	150,000.
Minimum Total	$400,000.
Less 1,875 preferred shares at $50.	93,750.
Minimum Value of 17,537½ shares of common	$306,250.

Or approximately $18. per share.

(See Exhibit No. 9)

3. George C. Lee has stated that an examination of his firm's records showed that 5,000 shares was the total compensation received for Lee, Higginson & Company's participation in the underwriting. He has also stated that he had carefully reviewed the results of his firm's underwritings between 1900 and 1908 and found that on participations comparable to the McCall Ferry proposition, his firm customarily earned 5 points or more in cash on the par value of bonds handled.

   Furthermore, his firm would not have participated in the McCall Ferry proposition unless they believed their stock compensation had a total value of at least $125,000. at the time they agreed to accept the stock in lieu of a cash commission. This would make the stock worth $25. per share. It was his opinion that a division of the firm's assets, as in the case of a change in members, immediately following the acceptance of this stock as compensation, would have been based on a value of not less than $25. per share for this stock.

   (See Exhibits Nos. 8 and 11)

4. Coudert Brothers received from Hutchinson $20,000. in cash and 1,000 shares of common stock for legal services which James E. Hopkins, a member of that firm, has valued at not less than $50,000. This is equivalent to placing a value of at least $30. per share on the common stock. (See Exhibit No. 24)

Instruction 3-D of Electric Plant Accounts provides for the determination on a cash basis of the value of the consideration given when other than cash instead of the determination of the cash value of the things received. Inasmuch as the foregoing different values for the stock were arrived at by means of a valuation of services rendered, it was necessary to establish one value for the stock in order to determine

the cost of these services to the company. Based upon all the foregoing information, the common stock has been valued on a cash basis at $25. per share.

Original Cost of Property and Services Acquired with McCall Securities

The original cost to McCall Company on a cash basis of property and services acquired in whole or in part with securities is computed herewith, as that company first devoted them to public service.

1. Hutchinson properties and rights:

Cash	$ 750,000.00
18,840 shares common at $25.	471,000.00
Total	$1,221,000.00

2. Harlow-McGaw properties and rights:

Cash (per contract)	$ 200,000.00
Cash (interest)	432.00
250 bonds at $900.	225,000.00
1000 shares common at $25.	25,000.00
Total	$ 450,432.00

3. Pullen option:

Cash (per option)	$ 10,000.00
Cash (interest)	22.22
150 shares common at $25.	3,750.00
Total	$ 13,772.22

4. Harvey Fisk & Sons services:

1,875 shares preferred at $50.	$ 93,750.00
17,537½ common at $25.	438,437.50
Total	$ 532,187.50

On the basis of Pliny Fisk's estimate, 3/8 of the total was for management services and 5/8 for banking services.

Management services	$ 199,570.31
Banking services	332,617.19
Total	$ 532,187.50

5. Bertron, Storrs & Griscom's services:

7,462½ shares common at $25. $ 186,562.50.

6. Lee, Higginson & Company's services:

5,000 shares common at $25. $ 125,000.00

7. Miscellaneous acquisitions.

It is not known what was acquired by the following issuance of stock, therefore no computation as to cost has been made:

H. C. Frick 100 shares preferred

X - CONSTRUCTION PRIOR TO FAILURE OF McCALL COMPANY

Dam, Crest Elevation of 185 Recommended

The original Advisory Board of Engineers of McCall Company consisted of:

Wm. Barclay Parsons, Chairman
Charles T. Main
F. O. Blackwell
Hugh L. Cooper
Cary T. Hutchinson

This Board issued a report dated August 7, 1905, a part of which is quoted herewith:

"This project, as originally undertaken, was to construct a dam at or near McCall's Ferry, Pennsylvania, having a crest elevation of 155 feet above mean sea level which, with the necessary power house and equipment, will have a capacity to deliver 50,000 horsepower to Philadelphia or Baltimore, or any point within the tributary territory. It was understood at the outset that it was possible to build a larger plant; no representations, however, were made for the larger plant, since the building of the higher dam necessary was dependent upon the consent of The Pennsylvania Railroad Company to the elevation of the tracks of the Columbia and Port Deposit Railroad, owned by it, to a height of about forty feet above the present grade. Immediately after the project was placed, this matter was taken up with The Pennsylvania Railroad Company, with the result that the Company has consented, informally to elevate its tracks to the required height, at the expense of your Company. The Chief Engineer of The Pennsylvania Railroad Company estimates the cost of this work to be $580,000. a sum only $180,000. in excess of the amount included in the original estimates for the dam at an elevation of 155 feet necessary to protect the tracks of the Railroad at their present elevation from floods.

"This unexpectedly favorable estimate by the Pennsylvania Company makes it necessary to consider the construction of the higher dam; it is the principal object of this report to give costs of this undertaking for three heights of dam, that is elevation at 155, 170 and 185 feet."

* * * * * * * * * * *

"Our estimates of the total cost of the project, including all property, construction and equipment, right-of-way for pole lines to Philadelphia and to Baltimore, transmission lines and buildings all complete for delivery of power to Philadelphia or Baltimore, but excluding auxiliary steam plant in all cases, including interest during construction, are as follows:

Elev. 155	$ 6,750,000.
Elev. 170	7,600,000.
Elev. 185	8,500,000.

***** we recommend strongly that the dam be now built to a crest elevation of 185."

(See Exhibit No. 25)

Bids for Construction

A call for bids for construction was made on August 11, 1905, based on unit prices of excavation and concrete for a dam and power house, the estimated quantities being for a dam with crest elevation 185 as recommended by the Advisory Board. Invitations were extended to eight companies, five of which submitted bids which were opened September 2nd.

The proposed form of contract required completion of the concrete work as specified by December 1, 1907, with a $1,500. daily penalty for failure to complete by that date. The risk of damage or delay due to floods on the Susquehanna coupled with the penalty clause, caused some of the bidders to add about $500,000. to the price they would have bid without the penalty clause.

The Board of Advisory Engineers then reported:

> "Under a contract this Company is compelled to pay for the sum total of all possible accidents, that is, it binds itself to pay the maximum cost under the worst conditions, whereas in all human probability such a succession of accidents and contingencies as are implied in this excessive sum will not occur, the Company, therefore, cannot possibly come out advantageously by such an arrangement, and gives up all chance of benefits that would accrue to it from the average conditions which have existed for the last fifteen years."

Therefore, the Board recommended that the Company do the work itself by selecting some constructor of ability and experience and paying him a fixed bonus.

(See Exhibit No. 26)

Negotiations for Relocation of C. & P. D. Railroad

In the meantime a conference had been held on August 22nd with A. J. Cassatt, President of The Pennsylvania Railroad. Cassatt overruled the informal arrangements which had been made by his chief engineer and not only demanded that all expense incidental to a double track road-bed be borne by the McCall Company, but also that the maximum new grade be .3% instead of .42% as originally planned. This increased the estimated cost of relocation to $1,772,500. and it was felt this would probably preclude building the higher dam.

The change in attitude of the railroad company when its president set aside its chief engineer's more liberal offer, eventually caused McCall Company to write Cassatt on November 1, 1905, in part, as follows:

> "Our scheme was financed on the theory that we should build the lower dam. When subsequently we saw an opportunity to build a higher dam, if your railroad was moved, we, of course, found that the cost of the dam itself would be very much increased, but when we received the estimates of your chief engineer, as to what your present railroad could be duplicated for in the new place, we made up our mind that we should still have money enough to build the increased dam, and pay the amount he indicated as the cost. Your present idea would add so much to that sum that we could not bring it within our means, and there is no way that we could raise enough money, even if we thought it was well to do so to enable us to accomplish this."

(See Exhibit No. 27)

After some delay, Cassatt made an offer on December 6th to the effect that the railroad would make a refund of $200,000. whenever it utilized the second track road-bed. The estimated cost for a double track road-bed with single track laid was given as $1,437,520. (See Exhibit No. 27)

Cooper to Manage Hydraulic Construction

Following the recommendation of the Advisory Board that the company select some construction superintendent to manage the work, Hugh L. Cooper resigned from that Board in order to submit a proposition

whereby he would be in charge of construction. His original offer was subsequently revised and resulted in a contract dated October 18, 1905, embodying the following provisions:

1. Cooper was to be "Hydraulic Engineer" and "Manager of Construction."
2. He was to prepare plans and specifications for the works, which would be subject to the approval of the Chief Engineer.
3. He was to superintend the building of the dam, power house and other buildings, embankment walls, protecting walls, the railroad changes, and all work near McCall's Ferry incidental to the development of a complete hydroelectric plant but not including design or superintendence of the electrical equipment, transmission lines, or substations.
4. The term of the agreement was to be until the completion of the dam, buildings and all hydraulic works of the plant, ready for permanent operation.
5. Cooper agreed to supply such part of his organization then working at Niagara Falls as was necessary to carry on the work at McCall Ferry, including Beverly R. Value.
6. Value was to be "Engineer in Charge" and his salary paid from Cooper's fee.
7. All other employees under Cooper were to be selected by him but paid by the McCall Ferry Power Company, the latter having the right to dismiss any of Cooper's employees.
8. Salaries, wages, contracts for labor and materials or any other obligations incurred by Cooper for the account of the company, were subject to the approval of the Chief Engineer whose decision was final.
9. If the higher dam (170 to 185) were built, Cooper was to receive:
   A. $125,000. in twenty-five monthly installments of $5,000. each.
   B. $50,000. bonus in monthly installments of $5,000. each if his work was completed by January 1, 1908, to the extent that the dam was finished to crest line, power house substructure completed and all walls, embankments and incidental work done so a flood giving ten feet of water on the dam crest would cause no damage.
10. If the lower dam (155 to 170) were built, Cooper would receive:
    A. $100,000. in $4,000. monthly installments.
    B. $30,000. bonus for completion, as defined in 9B.
11. The foregoing payments were to be net to Cooper and Value, all other expenses of office force, draftsmen, travel and assistants were to be paid by the McCall Company.

(See Exhibit No. 28)

Sanderson & Porter to Superintend Electrical Construction

On October 25, 1905, an agreement was signed by McCall Company and Sanderson & Porter whereby the latter firm was employed as "Superintendent of Electrical Construction."

1. The term of the agreement was to be until the installation of all the electrical equipment, including transmission lines and substations, was complete but not longer than until January 1, 1909.
2. Sanderson & Porter was to prepare the plans and specifications for the electrical work as well as purchase the materials and machinery, employ labor, test, install and supervise, all subject to approval of the Chief Engineer.
3. The firm was to keep a complete set of books and vouchers.
4. Sanderson & Porter was to receive a fee of $50,000. in thirty-eight equal monthly installments.
5. The McCall Company agreed to pay all salaries of engineers, draftsmen or clerks employed on the power company work but no general office expenses.

(See Exhibit No. 29)

Acquisition of Additional Property and Rights

About the time that negotiations with the Railroad had caused consideration to be given to building a dam with crest elevation of 185, an opportunity arose to acquire a group of flowage releases on property which would be affected by a dam at that height. These were acquired in August 1905 from John M. Witmer. Several other parcels, deemed essential to the dam and power house as finally located, were subsequently purchased. Details of these transactions will be presented in Parts XIV and XV, dealing with the acquisition of land and water rights and the ultimate disposal of those not used for the Holtwood development.

Agreements for Relocation of C. & P. D. Railroad

On February 16, 1906, an agreement was executed between McCall Company and the Railroad Company providing for the relocation of the C. & P. D. tracks for a dam crest elevation of 185. The work was to be

done by the Railroad Company and the costs were to be borne by McCall Company. This was superseded by an agreement dated April 14, 1906, whereby McCall Company or its appointee was to do the work instead of the Railroad Company.

On this latter date an agreement was executed between McCall Company and H. S. Kerbaugh providing for the relocation work to be done by Kerbaugh for a fixed sum. Inasmuch as it was later decided to build the dam to elevation 165 instead of 185, new agreements were executed with both the Railroad and Kerbaugh.

McCall Ferry Supply Company Formed

On January 29, 1906, the McCall Ferry Supply Company was incorporated in New York with an authorized capital stock of $10,000., only $500. of which was ever issued. The McCall Ferry Power Company owned this stock and in addition advanced the Supply Company $40,000. on the Supply Company's notes. While it had broad charter powers, it never did more than operate general merchandise stores, dining rooms and the temporary living quarters incident to the construction of the McCall project.

Construction Begins

Construction was started on October 24, 1905, by a clearing gang of 25 or 30 men and was followed by the construction of the temporary camp buildings, railroad sidings, permanent houses for the operators and the erection of construction equipment.

Under the contract with Kerbaugh for railroad relocation work for a dam at elevation 185, McCall Company had reserved for itself grading in the vicinity of the dam and began work on this section in March 1906. During April, Kerbaugh was getting his equipment placed and started con-

struction on May 8th. However, on May 12th he was asked to suspend operations due to a change in plans which might call for a lower dam.

Factors against Dam at 185

It is not evident just what factors were considered in abandoning the idea of a dam at elevation 185. It should be recalled that the relocation of the railroad, as contracted for, would exceed the original estimate by approximately $1,000,000. However, in relocating the railroad for the higher dam, the proposed new location would require acquisition of Paul Heine's hotel. Heine would make only one offer: that he would sell his hotel and 140 acres of land for $165,000. According to good information, it had cost Heine less than $40,000.

Another factor against the higher dam was the cost of acquiring the small hydro plants on Pequea and Conestoga Creeks, the operation of which would be affected by a dam at 185. In his estimate of December 18, 1905, Hutchinson had allowed only $100,000. for all the railroad right of way, another $100,000. for Conestoga Creek properties and damages but nothing for the Colemanville plant on Pequea Creek. Boyd Ehle, Hutchinson's assistant, stated the Pequea Creek rights including the Colemanville plant could be acquired for from $230,000. to $280,000. and that Conestoga Creek rights would cost about the same. It has been reported that, at the final showdown, a price greatly in excess of these figures was demanded for the Pequea Creek properties.

Estimates for Six Different Plants

Under date of June 4, 1906, Cooper prepared a schedule of estimated cost and earnings for six different plants: two at Fry Island site with dam crest at 165 and one at the same location with dam at 185; three at Cully's Falls site, all having dams at 165.

Subsequently, Cooper was asked to make revised estimates based on a different number of units, namely: seven units installed for delivery of 50,000 hp. with provision for three future units for an additional 25,000 hp. A comparison of figures, submitted by Hutchinson on June 19, 1906, showed the following:

Estimate	Hp. Delivered	Total Cost	Cost per hp.
1. Prospectus - March 1, 1905 - (155 dam)	50,000	$5,491,000.	$ 110.
Add for Harlow-McGaw Purchase	-	450,000.	
Total	50,000	$5,941,000.	$ 119.
2. Hutchinson - December 18, 1905 - (185 dam)	50,000	$8,265,000.	$ 165.
Add for extra	25,000	500,000.	
Total	75,000	$8,765,000.	$ 117.
3. Cooper - June 18, 1906 - (165 dam)	50,000	$8,859,000.	$ 177.
Add for extra	25,000	533,000.	
Total	75,000	$9,392,000.	$ 125.

Regarding this, Hutchinson commented:

"* * * * * in spite of the very great increase in the cost of railroad elevation, of property, and sundry expenses, the present estimate, using Mr. Cooper's figures as a basis, (which are unquestionably maximum figures), shows substantially the same cost per horse power as did the original estimate; the proposition is, however, now based on 75,000 horse-power, whereas it was originally based on 50,000 horse-power, - thus insuring materially greater net earnings.

"The conclusion to be drawn from this is that the merits of the original proposition were much understated, and that under existing conditions, the proposition is better than at the outset."

(See Exhibit No. 30)

On the same day (June 19th) Parsons submitted a report to Dimock commenting on Cooper's estimates in part as follows:

"* * * Mr. Cooper has used plans with somewhat larger sections than those heretofore considered by the Board of Engineers, giving a dam of much greater weight, in order to provide an additional margin of safety, and foundations for a power-house on a somewhat larger scale in order to carry the greater power. For the moment it would seem wise to accept Mr. Cooper's enlarged sections, for if there is any error, it is an error on the safe side. The details of Mr. Cooper's

estimates have been gone over very thoroughly, and it would seem that he has included an exceedingly liberal margin for all possible contingencies. The Board may accept, therefore, Mr. Cooper's total estimate as the maximum cost of a dam at elevation 165 feet at McCall Ferry.

" * * * unless some extraordinary contingency occurs, the actual cost should be considerably below Mr. Cooper's estimate, --possibly as much as $500,000."

(See Exhibit No. 30)

Dam Crest Fixed at 165

Cooper recommended suspending work at the Fry Island site and building the dam about a mile farther down river at Cully's Falls. Cooper's drawings had been submitted to Ehle by Hutchinson for comment and criticism. Ehle strongly opposed the Cully's Falls location. Parsons recommended constructing a dam at an elevation of 165 at the Fry Island site. This recommendation was concurred in by Hutchinson and Blackwell. The Executive Committee authorized the execution of these recommendations at its meeting June 19, 1906.

Final Agreements with Railroad for Relocation of C. & P. D.

The change in elevation of the crest of the dam to 165 necessitated new contracts covering the relocation of the C. & P. D. Railroad. After some delay an agreement was signed by the Railroad and McCall Companies, dated August 13, 1906, containing among others the following provisions:

1. The existing C. & P. D. single track would be relocated on a double track road-bed between Safe Harbor and Fishing Creek about 12½ miles with the alignment not less favorable than the old location nor would it be required to be more favorable. Grades must not be more than 0.3% equated for curvature.

2. The McCall Company was to pay for a double track road-bed with a single new track laid and all necessary stations, telegraph lines, sidings, culverts, etc., and also reimburse the Railroad Company for all costs in connection with the acquisition of right of way over property not owned by McCall Company.

3. Between Fishing Creek and Benton, a distance of about 1-1/6 miles, a run-off to the old track was to be permitted on a 0.5% grade, until January 31, 1913, pending construction of another dam downstream. If such construction were not undertaken by that date, this grade would have to be reduced to 0.3% at McCall Company's expense.

4. The Railroad Company was to acquire the right of way for the new location between Safe Harbor and Peach Bottom on terms and at prices approved by McCall Company except where the right of way would be across land owned by the McCall Company.

5. All work to be done in accordance with the plans and specifications of the Railroad Company and subject to approval by the Chief Engineer of the Railroad Company.

6. Whenever the Railroad Company made use of the road-bed for a second track between Safe Harbor and Benton, it was to pay McCall Company $200,000.

7. McCall Company agreed to execute a bond for $250,000. for faithful performance of the contract.

(See Exhibit No. 31)

A supplementary agreement bearing the same date was also signed by these parties providing for the deposit of $250,000. cash with the Knickerbocker Trust Company in lieu of a bond. Acknowledgment of the receipt of $250,000. from McCall Company was made by Knickerbocker Trust Company on August 29th with the understanding that interest would be allowed at the rate of 4½% and would be credited semiannually. A few days later an agreement was signed between McCall Company and Knickerbocker Trust Company whereby the former agreed to "indemnify and hold harmless the Trust Company against any loss or expense occasioned by any controversy" between McCall Company and the Railroad.

Final Agreements with Kerbaugh for Relocation of C. & P. D.

About the time the final contract was signed with the Railroad Company, negotiations were resumed with Kerbaugh for a new contract due

to the decision to build McCall Ferry dam to elevation 165 and relocate the railroad for that elevation. Two contracts were signed by McCall Company and Kerbaugh, both dated August 27, 1906. The main provisions of the first one were:

1. Kerbaugh agreed to do all work and furnish all materials in connection with the relocation of the C. & P. D. R. R. as provided for in the contract between McCall Company and the Railroad Company, dated August 13, 1906, a copy of which was attached. This included all culverts, bridge substructures for double track and superstructures for single track; grading and road-bed for double track; a complete single track railway with necessary sidings; telegraph lines and stations.

2. Kerbaugh was not required to furnish or pay any expense of procuring any part of the right of way.

3. Kerbaugh was not required to bear the expense of removing, repairing or reconstructing any roads incident to the railroad relocation except as directed and for which he was to receive actual cost of the work plus 10%.

4. Except as noted in Items 2 and 3, Kerbaugh agreed to do the entire work acceptable to the Chief Engineer of the Railroad Company for a lump sum of $1,250,000.

5. McCall Company was to be permitted to do the excavation one-half mile above and one-half mile below the dam for which they were to deduct 80 cents per cubic yard from the $1,250,000.

(See Exhibit No. 32)

The second contract signed August 27th between Kerbaugh and McCall Company provided that there should be no lien filed against the relocation work or extra work provided for in the main contract.

Because of difficulties and delays in securing the necessary right of way, the railroad relocation work moved slowly until the middle of November 1906. However, good progress was made after that time and on September 11, 1907, Kerbaugh substantially completed the relocation

of the C. & P. D. R. R. and the Railroad Company resumed operations September 12th.

Contract for Cully's Cut

The Board of Advisory Engineers had recommended, on July 31, 1906, that a cut be made through Cully's Falls which would lower the level of tail water approximately seven feet and that the necessary crib wall be built to utilize this cut for a tailrace. The estimated cost was $300,000. The Executive Committee approved this recommendation on August 8th with the understanding that a contract for the excavation would be made if satisfactory terms could be secured.

A contract for this excavation was executed by McCall Company and Kerbaugh on August 15th, the main provisions being:

1. Kerbaugh agreed to furnish all material, equipment and labor necessary for excavating the "rock canal" shown on the accompanying drawings. This involved removal of approximately 135,000 cu. yds. of rock.

2. Kerbaugh agreed to dispose of the spoil in the locations shown on the drawings adjacent to the cut except such part as McCall Company wished to use which Kerbaugh would load on McCall cars without extra charge.

3. McCall Company agreed to pay Kerbaugh $1.50 per cubic yard of solid rock excavated as specified as full compensation for furnishing all material, equipment and labor.

4. McCall Company agreed to pay Kerbaugh cost plus 10% for all incidental work that McCall's chief engineer ordered Kerbaugh to do.

(See Exhibit No. 33)

The cofferdam which Kerbaugh built across the lower end of Cully's Cut proved inadequate during the higher river flows with the result that backwater not only prevented work on the Cut during these periods but also flooded the excavation for the power house. On January 1, 1907, with the excavation of Cully's Cut considerably less

than half completed, the river reached flood stage to the extent that it passed over the main cofferdam above the dam. For the next month the river continued high enough to keep the tailrace area flooded and it was not until after the middle of February that the area was unwatered so Kerbaugh could remove his equipment and wait for more favorable conditions.

Kerbaugh Abandons Cully's Cut

On April 2, 1907, Cooper wrote to Hutchinson that he believed the excavation of Cully's Cut should be taken from Kerbaugh who had failed to complete it by January 1st as planned, and that McCall Company should complete it under Cooper's supervision. He believed the work would have to be done intermittently, depending on both stream-flow and the dam and power house work.

By April 9th, an arrangement had been made with Kerbaugh whereby McCall Company would take over Kerbaugh's construction plant and complete the tailrace excavation.

McCall Company worked on the Cut from the latter part of April until early July 1907, when it became necessary to open the main cofferdam in the Lancaster channel in order to close the one in the York channel. This flooded Cully's Cut when still less than half completed and no further work was done there until April 1908.

Miscellaneous Contracts

In addition to the major contracts already mentioned a number of contracts, exclusive of those for permanent equipment, were made from time to time. These included contracts for clearing the flowage basin, relocation of township roads necessitated by moving the C. & P. D. tracks, sand, cement, construction equipment, etc. In the cases of sand and crushed rock, the company merely obtained the right to remove the material

and set up its own sand plant and rock crushers. Major contracts for permanent equipment were made with I. P. Morris Company for turbines and General Electric Company for generators, transformers and switchboards.

Construction Expenditures as of October 1, 1906

A statement of McCall Company was prepared, showing expenditures to September 30, 1906, together with estimates of amounts to complete the development with six units and eighty miles of transmission lines. The expenditures included only those items chargeable against the $6,400,000. cash provided for, under the agreement of June 13, 1905, with the Contracting Company.

	Already Spent	Estimated To Be Spent	Total
Real Estate	$ 37,014.	$ 365,000.	$ 402,014.
Hydraulic Construction	1,133,240.	2,300,000.	3,433,240.
Improvement of Tailrace	-	225,000.	225,000.
Electric Construction (6 units)	205.	1,322,000.	1,322,205.
Relocation C. & P. D.	10,375.	1,239,625.	1,250,000.
Removal of Highways	-	50,000.	50,000.
Admin. & Gen'l. Expenses	234,868.	536,000.	770,868.
Net Interest during Const'n.	424,150.	175,850.	600,000.
Total	$1,839,852.	$6,213,475.	$8,053,327.

Available Resources

Cash	$ 578,151.
Susquehanna Contracting Company	3,699,175.
McCall Ferry Supply Company	40,000.
Knickerbocker Trust Company (Money in Escrow)	250,000.
1,517 Bonds in McCall Company Treasury (to be sold at 90)	1,365,300.
Total	$5,932,626.

(See Exhibit No. 34)

It was evident at this time from the above tabulation that approximately $280,000. was required in addition to available resources.

Status of Construction at End of First Year - November 1, 1906

Cooper's program for prosecuting the work had provided for construction of the cofferdam across the Lancaster channel during the winter of 1905-06 and complete installation of entire construction plant during the same period. Actually the first crib was not built until March 1906, and the cofferdam was not completely closed until the middle of July, thus resulting in considerable loss of time during low water season when excavation and concreting could be carried on. Cooper attributed this delay to the difficulty of getting his organization together and of getting experienced crib men from Canada.

The proposed source of sand from Chesapeake Bay proved inadequate and a new source was located at Charlestown. The first sand to arrive from the former source was on September 24, 1906, and in the meantime a local sand bar had to be utilized. Rock was first crushed at the quarry on August 23, 1906.

By November 1, 1906, approximately one year after construction had been started, a considerable amount of work had been done but the project was behind schedule. The cofferdam from the Lancaster shore to Fry Island was in place and the Lancaster channel unwatered, excavation for the dam in Lancaster channel was complete and ready for concrete and some excavation had been done at the power house; the construction bridge was complete along the power house and had been started along the dam; the temporary camp and construction buildings were complete and in use; the twelve permanent residences had been finished, water lines and sewers had been laid, telephone service installed and a temporary electric light plant was in service, one power house and two bridge pelican cranes were in use.

Court Upholds McCall Company's Right to Construct Dam

A Bill in Equity was filed by the Attorney General of Pennsylvania against McCall Company on October 24, 1906, asking for a perpetual injunction restraining McCall Company from constructing and maintaining a dam without adequate provision for the future navigation of the river by canal and without adequate provision for the passage of fish. It further requested a perpetual injunction, preventing McCall Ferry Power Company, Susquehanna Canal and Power Company and Susquehanna and Tide-Water Railroad Company from carrying out their agreements of release and conveyances.

The filing of this Bill was the culmination of agitation which had been started in March 1906, by a group of fishermen and fishery owners of York County.

The case was heard January 14, 1907, and the decree handed down, providing that the right of McCall Company to construct and maintain a dam was to be subject to its making and maintaining adequate provision for the passage of fish and further subject to the installation and maintenance of proper locks whenever the State or Federal government improved navigation of the Susquehanna in such way as to otherwise secure continuous navigation between Columbia and Havre de Grace. (See Exhibit No. 35)

Power Contracts

As early as June 1905, negotiations had been started by McCall Company for a power contract in Baltimore. For almost two years these negotiations continued, during which time many studies were made and various proposals were submitted by the interested parties. Finally, on March 13, 1907, a contract was executed with the Consolidated Gas Electric Light and Power Company of Baltimore. Under the terms of this contract an

annual standby charge of approximately $80,000. was made for 4,000 kw. plus two mills per kwh. taken up to that maximum. The contract was to run for ten years from date of initial delivery of power. A new contract with minor revisions was executed on June 4, 1907. (See Exhibit No. 36)

On June 28, 1907, a contract was executed with United Railways and Electric Company of Baltimore which was to run for ten years from date of initial delivery of power. Under the terms of this contract an annual standby charge of approximately $200,000. was made for 10,000 kw. plus two mills per kwh. taken up to that maximum. (See Exhibit No. 37)

Concurrently with negotiations in Baltimore, power market surveys were being made in towns and cities of Pennsylvania within a sixty-mile radius of McCall Ferry. Tentative arrangements were made with a proposed distributing company for a large portion of that section whereby that company would ultimately purchase approximately half of the McCall output. However, before a formal agreement was executed, McCall Company encountered financial difficulties and further negotiations were suspended.

Additional Financing Considered

It has already been stated that the original financing for McCall Company had been based on estimates of cost for a 50,000 hp. plant with a dam elevation of 155. In June 1906, the decision was made to fix the dam crest at 165 and build a plant to deliver 75,000 hp. In August, it was decided to make the tailrace cut which would add about 20,000 hp. capacity. At both times, it was known that the company would need more cash than had been arranged for and on November 30, 1906, it was estimated that about $1,646,000. additional cash would be required.

On May 8, 1907, a new estimate was made of the total cost of

the project, including purchases of land made subsequent to the original acquisition, interest during construction, and all other expenses up to January 1, 1909, when the plant would have operating 50,000 hp. This total of $9,815,000. exceeded the October 1, 1906 estimate by $526,000. due mainly to the fact that in the latter estimate it had been assumed the plant would be in operation September 1, 1908, and the additional period of time increased both administration and interest costs. The cost of four additional units, making a total of ten, would be $600,000. more. Against this estimate, the Company was expected to have earned by January 1, 1909, $48,000. interest on bank balances and $200,000. from operating the units as they were placed in service between June 1, 1908, and January 1, 1909.

At the anticipated rate of expenditure, the company's cash resources would carry only until the first of October 1907, and in order to continue with the work thereafter, it would be necessary to have available the proceeds of the sale of the Treasury Bonds.

Various plans were considered for selling the Treasury Bonds but apparently actual underwriting was to be delayed until available cash was exhausted.

Knickerbocker Trust Company Failure

Just before the cash available to McCall Company under its agreement with the Contracting Company had been exhausted, the Knickerbocker Trust Company failed on October 21, 1907, as a result of the panic of 1907. At the time of its closing, the McCall Company had no funds on deposit there except the $250,000. which had been made to indemnify the Pennsylvania Rail Road Company in case of failure to complete the relocation of their tracks. The closing did, however, interfere with the arrangements of the McCall Compa-

ny for getting further money immediately for carrying on the work. At that time, approximately $345,000. remained unpaid on the loan arrangements which had been made. The failure of the Trust Company precluded immediate payments under the loan arrangements, and the general financial conditions resulting from the panic made any additional financing impossible at this time.

Status of Construction at End of Second Year - November 1, 1907

McCall Company's current liabilities exceeded the current assets at the end of October by approximately $77,000. Prompt curtailment of construction resulted. On October 23rd, estimates showed that to complete the plant with six units and transmission lines to Baltimore for 50,000 hp. would require the sale at 90 of the $1,517,000. of bonds in McCall Company and $158,000. in Susquehanna Contracting Company's treasuries and also $1,350,000. additional cash. On the first of November, the full working force was reduced to approximately 100 men, and the last of January 1908, work was practically suspended.

Hutchinson made a report on the "Condition of the Work at McCall Ferry on November 1, 1907." An accompanying tabulation of the work done as a percentage of the total showed:

Concrete	
Dam and Abutments	75%
Powef House Sub-structure	74%
Power House Super-structure	42%
Sundry	47%
Total	72%
Steel	
Power House Super-structure	8.5%
Rock Excavation	
Tailrace	40.5%
Sundry	79.0%
Total	59.5%

The expenditure of money as a percentage of the estimated total required is as follows:

Expenditures for Construction	
Construction Plant and Preliminary Work	100%
Dam and Power House Sub-structure	71.5%
Power House Super-structure	16.8%
Hydraulic Equipment	22.4%
Electrical Equipment	0
Tailrace Improvement	47.6%
Elevation C. & P. D. Tracks	92.5%
Total	67%

Making allowance for the time and money spent in preparatory work, Hutchinson estimated the work as a whole, exclusive of equipment, was at least 80% complete.

(See Exhibit No. 38)

Balance of Loan Obtained

By arrangement with the Receivers of the Knickerbocker Trust Company the balance of the loan, approximately $345,000., became available to McCall Company early in 1908. With this money construction proceeded and transmission line rights of way were acquired.

$400,000. Loan Obtained

In the summer of 1908 consideration was given plans for securing additional financing for McCall Company, but because of general financial conditions, nothing definite was done at that time. Satisfactory arrangements apparently could not be made for the sale of additional McCall bonds and the possibilities of utilizing the treasury bonds to secure a loan were considered. On October 2, 1908, Simpson, Thacher & Bartlett sent letters to Lee, Higginson & Company, Harvey Fisk & Sons, C. A. Coffin and Bertron, Storrs & Griscom, setting forth the plan for obtaining a loan. The assets of the Contracting Company were:

1.	Due from McCall Company	$130,000.
2.	Conowingo Land Company Mortgage and Interest	30,000.
3.	Land and rights at cost and interest	50,000.
4.	McCall Company Bonds (Par Value)	158,000.
5.	Cash	2,000.

The McCall Company was in need of an estimated $62,000. for construction work and to maintain its organization until some new arrangements could be made. It was, therefore, proposed to have McCall Company acquire the first three items and $62,000. in cash from the Contracting Company by issuing to the Contracting Company $544,000. par value of McCall bonds at 50. This would give the Contracting Company possession of a total of $702,000. par value of McCall bonds with which it would secure a loan of $400,000. Additional security for the loan would be obtained by having McCall Company pledge its equity in the $250,000. deposit for the railroad relocation and also in the Conowingo Land Company $25,000. mortgage which it would be receiving from the Contracting Company. The consideration the Contracting Company gave to McCall Company for pledging this additional security was the right to purchase at or prior to maturity of the loan the $702,000. par value of bonds by payment of the principal and interest of the loan.

The essence of the proposition was submitted by the Contracting Company to McCall Company on October 20th and accepted by the latter on the 22nd. (See Exhibit No. 39) This $400,000. loan was obtained on October 28, 1908, under four notes executed by the Contracting Company, each for $100,000. in favor of the following:

1. Harvey Fisk & Sons
2. Lee, Higginson & Company
3. Bertron, Storrs & Griscom
4. C. A. Coffin

The $702,000. McCall Company bonds, equity in the $250,000. deposit and the Conowingo Land Company mortgage, were pledged as collateral.

(See Exhibit No. 40)

Knickerbocker Trust Company Extends Loans on Bond Purchase Agreements

The loans aggregating $4,449,600. which the Contracting Company had obtained from Knickerbocker Trust Company fell due on November 1, 1908. These were secured by the bond and stock purchase agreements and the McCall bonds and preferred stock which the agreements covered as heretofore stated. The deferred subscribers were credited with interest on their initial payments and thus the total payments due from them on November 1st would fall short of paying the principal on the loan by $192,816. and after making adjustments for accrued bond interest from June 15th to November 2, 1908, the balance would still fall $74,366. short of the required amount. Arrangements had been completed on October 6th whereby the Trust Company would extend part of the loans on bond and stock purchase agreements for one year. This involved another payment of 20% of the purchase price by the subscribers and execution of notes by the individual subscribers dealing directly with the Trust Company and not through the Contracting Company.

Summary of Work Done by McCall Company

By November 1908, the funds available to McCall Company were exhausted. At this time, except for the tailrace excavation, the plant stood about as it was when work had shut down early in 1908. It was estimated the plant was about 85% completed, with various portions as follows:

Power house	80%	complete
Main Dam	82%	"
Deflection Wall	56%	"
Tailrace Excavation	100%	"
Forebay	98%	"
Ice Protection	95%	"

(See Exhibit No. 41)

More specifically, the physical status was as follows:

Power House: The substructure was complete including the concrete part of the draft tubes but not the steel portion. Between the units, the concrete had been poured to about elevation 420. The operating tunnel floor was complete except for the finished slab. Between the generator room and the gate house, the rheostat gallery arches were complete and the wall carried up to the level of the generator room crane for the entire length of the building. In addition, this wall was finished over the first three units to the level of the gate house crane. Between the generator room and the transformer house, the wall was complete for the length of the building to the height of the generator floor. From the river end to the center line between the exciters and Unit 6, it was finished to the level of the generator room crane and over Units 1, 2 and 3 it had been carried up to the level of the gate house crane. The roof columns, trusses and purlins had been placed over the first four and one-half units. Piers for the submerged intake arches had been placed for the first three units and some concrete poured for the arches.

Main Dam: The Lancaster channel part was complete to full height except for seven of the 40 ft. sections left at about elevation 420 for flood openings. All Fry Island sections were finished, and the York Channel portion was complete except for eight flood openings and approximately the last 200 ft. adjacent to the York County shore. The abutment itself had not been placed.

Deflection Wall: This was complete to approximately elevation 130 except the last portion about 150-200 feet long on Piney Island which was carried to full height.

Forebay and Ice Protection: The skimmer wall was complete and the connecting bulkhead finished to about elevation 160. The two crib foundations for the ice boom piers had been placed but no concrete added. The concrete work on the L-shaped pier at the end of the ramp was about half finished. The rock fill on the ramp was practically complete.

Equipment: The six main turbines and two exciter turbines being built by I. P. Morris Company were approximately 50% completed although no shipments had been made.

Under contracts with the General Electric Company:

1. One generator was completed.
2. One generator was over 60% completed.
3. The remaining four were in various stages, some parts being finished, while others were in the rough. In general, exclusive of material, over 20% of the work had been completed.
4. The transformers were between 50% and 60% completed.
5. Other apparatus, such as compressors, small motors, air tanks, etc., were 100% completed.
6. The switchboard was about 80% completed.

(See Exhibit No. 42)

XI - REORGANIZATION OF McCALL COMPANY

Formation of Bondholders' Committee

As mentioned under the preceding heading, the funds available to McCall Company were exhausted by November 1908. Since the middle of that year various plans had been considered for securing enough additional financing to complete the project, some of which included a reorganization of McCall Company. Various interests not previously identified with the development had been asked to investigate it and submit plans for its completion.

Realizing that the company would have to default on its bond interest due December 15, 1908, notices dated December 7th were sent to bondholders. These notices were issued by the following group:

Harvey Fisk & Sons
Lee, Higginson & Company
Bertron, Storrs & Griscom
H. F. Dimock
C. A. Coffin

In substance, the notice contained the following:

1. The undersigned had been engaged for some time in efforts to secure completion of the McCall project in a manner satisfactory to the bondholders.

2. McCall Company would not have sufficient funds to pay bond interest due December 15, 1908.

3. With the approval of "holders of a large portion of the bonds outstanding" the following had been asked "to act as a Committee in the interests of the holders of bonds and preferred stock" and to continue negotiations to perfect a plan for financing completion of the enterprise:

   William M. Barnum
   A. C. Bedford
   S. Reading Bertron
   Charles A. Coffin
   Gardiner M. Lane

4. To strengthen the committee's hands in the pending negotiations, immediate deposit of all bonds and preferred stock was requested under a preliminary agreement.

5. Bondholders could withdraw their bonds if they did not approve the final plan when presented.

(See Exhibit No. 43)

The preliminary agreement accompanying the foregoing notice was also dated December 7, 1908, and provided for:

1. Deposit of bonds and preferred stock with the Knickerbocker Trust Company or the City Trust Company of Boston to be held subject to order of a majority of the Committee.

2. Continuance by the Committee of negotiations to perfect a plan for financing completion of the project.

3. Submission to the depositors of a plan before June 30, 1909.

4. Privilege of withdrawal from the final plan during a period of at least 30 days after submission.

5. The depositors to give the Committee full power of attorney regarding the bonds and stock until the formation of the plan.

6. The Committee to serve without compensation.

(See Exhibit No. 44).

The group referred to themselves merely as the "Committee" although in effect it was a "Bondholders Protective Committee." Numerous references appear to the "Reorganization Committee."

Negotiations for Reorganization

Negotiations for obtaining additional financing were conducted with the following:

Electric Bond and Share Company
J. E. Aldred - President of Shawinigan Water & Power Company in Canada.
Joseph B. McCall - of the Philadelphia Electric Company.
W. R. Warren and his friends - (Warren was a partner in Warren-Scharff Co., General Contractors of New York.)
James B. Colgate & Co. - Private Bankers, New York.
Randall Morgan - Vice-President and General Counsel for The United Gas Improvement Company.

Aldred has stated that about the latter part of October 1908, Coffin, the President of General Electric Company, had arranged for him to meet with some of the people who were attempting to work out a plan to salvage the McCall Ferry enterprise. He devised several programs during his examination of the Company s affairs to determine the one which would be acceptable to the old bondholders and yet be liberal enough to insure success of the sale of securities for the necessary new money.

Memorandum of Understanding with Aldred

After considering the various plans offered, the Bondholders Committee accepted the one submitted by Aldred after certain modifications had been mutually agreed upon. On April 24th, Aldred attended a meeting of the Committee at which a "Memorandum of an Understanding" was signed by the two parties. This embodied the following:

1. Either a new company would be formed or the old one continued.

2. Capital stock to be $8,500,000

3. $12,500,000. of First Mortgage 30 year 5% Gold Bonds, dated July 1, 1909, to be authorized, of which $7,500,000. were to be issued for refinancing

4. The $8,325,000. of old McCall bonds to be exchanged for:
   a. 40% new bonds ($3,330,000.)
   b. 60% new stock ($4,995,000

5. To be used for construction and other corporate purposes:
   a $4,000,000 of new bonds
   b $3,500,000 of new stock

6. Proceeds from sale of $170,000. of new bonds to be used by the Committee in meeting reorganization expenses and in making settlement with the floating debt of the Company reported as not exceeding $250,000 Any balance to be turned over to the reorganized company.

7. Aldred would endeavor to sell $4,170,000 of the new bonds at 90

8. $3,500,000. of new stock to go to Aldred for use in connection with the sale of the $4,170,000. of bonds, or otherwise, as he might determine

9. The old bondholders to have the privilege of subscribing to $1,000,000. (or to any part thereof) of the new bonds at 90 with a stock bonus equal to 50% of the par of the bonds.

10. All stock to be placed in a voting trust until November 1, 1912.

11. Aldred to nominate two of the trustees of the voting trust, and the Committee, the remaining one.

12. Provision was to be made for the payment of the loan to the Susquehanna Contracting Company of $400,000. and the security thus released, consisting of the following, would be assigned to the reorganized company:

    a. $702,000. of McCall bonds (to be cancelled upon release)
    b. $250,000. indemnification deposit in Knickerbocker Trust Company.
    c. $25,000. Conowingo land mortgage.

(See Exhibit No. 45)

In connection with the negotiations leading up to the foregoing "Memorandum of an Understanding," Aldred has stated the following:

"The Committee desired to secure my services until the plant was in successful operation. The various plans submitted for consideration had caused a difference of opinion and considerable opposition from some of the bondholders and particularly from the common stockholders. It was, therefore, deemed expedient by the Committee to temporarily concentrate control in a voting trust and so far as practicable to bring in new personnel familiar with this type of project.

"In addition to the common stock for bonus for the new money bonds and that necessary for the bankers compensation, as provided in the above capitalization, the Committee stipulated as a part of my plan that I, in consideration of 5,000 shares of stock, would become the active manager of the Company during construction and until the expiration of the proposed voting trust, by which time it was expected that the first group of units would be in service and satisfactory power contracts obtained for their output. I delivered a relatively small amount of the 5,000 shares to engineers whom I had consulted on the feasibility of completing the development and making it a profitable enterprise. Inasmuch as my compensation was to be in common stock and my reputation was staked on the outcome of the project, it was agreed that I should have the right to select two of the three members of the voting trust."

(See Exhibit No. 46)

Aldred's Preparations for Underwriting

Aldred's associates in the reorganization plan were E. R. Wood, Vice President of the Dominion Securities Corporation of Toronto, and H. S. Holt, President of the Montreal Light, Heat & Power Company. After Aldred, Wood and Holt had carefully considered the situation, they became convinced that it would be difficult to underwrite all the new money bonds promptly in America. The old bondholders subscribed to only half a million par of the new bonds.

Aldred therefore proposed that Kitcat & Aitken of London form a syndicate to underwrite $1,835,000. par value of the new bonds at 90. For these services they were to receive $457,500. par value of stock in addition to the 50% bonus to accompany the bonds. Aldred, Wood and Holt were to secure underwriting for an equal amount of bonds with a like stock bonus and receive a similar fee in stock. These two underwritings, together with the $500,000. of bonds purchased by the old bondholders which likewise carried a 50% stock bonus, but no underwriting fee, accounted for the total $4,170,000. of bonds sold to raise the additional money.

English Underwriting Agreement

Kitcat & Aitken's Underwriting agreement, dated May 27, 1909, offered participation on the basis of bonds at 90 with a bonus of 40% in stock. Initial payment was to be 10% of par and arrangements could be made to defer the balance until July 1, 1910. Loans on the deferred subscriptions could be made at 5% plus all expenses of stamps. Deferred subscribers would receive only 30% stock bonus instead of 40%. (See Exhibit No. 47)

Canadian Underwriting Agreement

Aldred, Wood and Holt grouped their underwriting under the

name of Montreal Trust Company. Under the terms of the purchase agreements between the Trust Company and the subscribers, the latter purchased bonds at 90 with a bonus of 50% in stock. Calls were to be made as follows:

10% August 1, 1909
15% October 1, 1909
25% Maximum amount of subsequent calls on 30 days' notice

(See Exhibit No. 48)

Final Plan and Agreement for Bondholders

At a meeting of the Committee held on May 27th, a proposed Circular and a Plan and Agreement were approved for solicitation of McCall bondholders. This was the plan which effected the reorganization of the McCall Company. Under date of May 28, 1909, this "Plan and Agreement" was issued over the names of the members of the Bondholders' Committee. The plan contained the following provisions:

1. Either the McCall Company or a new company was to be vested with the McCall property and with cash as provided therein. (A new company was ultimately formed which was called Pennsylvania Water & Power Company)

2. $12,500,000. of bonds were to be authorized of which at least $4,920,000. were to remain in the treasury after the Plan was carried out.

3. $8,500,000. of stock of one class was to be issued.

4. The old McCall bonds were to be exchanged for:
   a. 40% new bonds.
   b. 60% voting trust certificates for new stock.

5. All such new stock to be deposited under a voting trust until November 1, 1912.

6. The Voting Trust to provide for three voting trustees, two to be nominated by those furnishing the new money, and one by the Bondholders' Committee.

7. From $4,170,000. to $4,750,000. of the new bonds and $3,500,000. of the new stock were to be sold to realize 90% of par of the bonds.

8. The Committee was to have legal title to all McCall bonds and stock deposited, and have full power to carry out the Plan, including the rights to:
   a. Acquire at public or private sale the property and rights of the McCall Ferry Power Company.
   b. Take any action for foreclosure of the mortgage.
   c. Issue Receiver's Certificates.
   d. Employ agents or attorneys.
   e. Adjust and settle any indebtedness of the McCall Company.
   f. Dispose of any new bonds and stock not required for exchange or reserved for the treasury.
   g. Pay a reasonable commission for any underwriting.
   h. Borrow money for Committee expenses or cash payment required at sale.
   i. Organize the new company.
   j. Resume construction.
   k. Make contracts on behalf of the new company prior to its organization.

9. The Committee members were to receive reasonable compensation, the amount to be approved by the directors of the new company.

10. The Committee could abandon the Plan and return the bonds and stock or submit a new plan for approval.

(See Exhibit No. 49)

Of the $3,500,000. of capital stock referred to in 7 above, $500,000. par value was issued to Aldred as compensation for management services as explained in his comments on the "Memorandum of an Understanding." Aldred was referring to $100. par value stock, although the first issue of stock by the new company (Pennsylvania Water & Power Company) was actually $50. par value per share which was immediately exchanged for $100. par value stock.

Opposition to Reorganization Plan

There was some opposition to the Bondholders' Committee which sought the deposit of bonds under the December 7, 1908 and May 28, 1909 Plans and Agreements. Under the date of June 25, 1909, Sanderson and Porter, who owned about $200,000. in bonds and had been retained by McCall Company as managers for the installation of electrical equipment

sent out a letter to the bondholders recommending that all bonds be withdrawn from deposit with the Committee. They claimed that the plan of the Committee was inequitable and might prove disastrous to the former McCall bondholders. (See Exhibit No. 50)

This opposition of Sanderson and Porter was answered by a letter from the Bondholders' Committee on June 28th. It was stated in this reply that, although another plan than the one stated in the May 28th agreement had been suggested, it had later been withdrawn. This reply of the Bondholders' Committee was apparently successful in counteracting the Sanderson and Porter notice, for the Bondholders' Committee continued to act for the bondholders. (See Exhibit No. 51)

There was, however, a minority group which continued to oppose the Aldred plan. An inquiry from Beyer to Semple was answered by the latter on June 29th in part as follows:

> "Hutchinson tells me that Mr. Colgate who is an underwriter to the extent of $250,000., as are also Sanderson & Porter, are backed by substantial financial interests, but of course, I cannot tell whether they are strong enough to prevent the plan advocated by Barnum from being carried out."

(See Exhibit No. 52)

Beyer replied that he had reason to believe that Brown Bros. & Company and Gen. S.B.M. Young had not deposited their bonds. These amounted to $110,000. Hutchinson and Dimock also had not deposited their bonds which totaled $167,000. Subsequently, all these acquiesced and deposited their bonds.

Bonds Deposited with Committee

The Bondholders' Committee had secured a deposit of 80% of the bonds by July 1st, as required by the May 28th Plan. It should

be noted that July 1st was the date after which bonds already deposited could not be withdrawn. Therefore, as of this date, there resulted an irrevocable acceptance of the reorganization plan and the elimination of the interests of all preferred and common stocks. Subsequently, there were sent out circulars granting successive extensions for depositing the outstanding 20% of bonds. On July 6th the Committee notified the Knickerbocker Trust Company that the bond interest due December 15, 1908, had been unpaid for a period of six months. They stated that they represented more than a majority in interest of the bondholders and elected that the entire sum of principal and interest on bonds became due at once. They, therefore, demanded that the Knickerbocker Trust Company foreclose on the mortgage. (See Exhibit No. 53)

Aldred Appointed Receiver

The Knickerbocker Trust Company, acting upon the order of the Bondholders' Committee, instituted foreclosure proceedings in the Circuit Court of the United States for Eastern District of Pennsylvania on July 13th, and requested the appointment of a Receiver. Similar bills were filed in federal courts in Maryland and New York on July 19th and July 28th, respectively. The McCall Company admitted the allegations in the Bill and consented to the appointment of a Receiver. The Bondholders Committee immediately (July 13th) requested the appointment of J. E. Aldred as Receiver. Aldred was appointed Receiver by the Circuit Court of the United States for the Eastern District of Pennsylvania on July 17th. (See Exhibit No. 54) This order was ratified by the Maryland and New York Courts on July 19th and 28th, respectively.

Construction Resumed by Aldred

It was necessary that a certain amount of time would elapse

between the appointment of a Receiver and the reorganization of the Company. In order to get the plant in operation as soon as possible, Aldred settled various claims and personally entered into a number of contracts whereby both construction and the manufacture of needed equipment would be resumed. Among these were contracts for cement, sand and stone for construction, as well as a contract with the Empire Engineering Corporation to carry on the construction work. (See Exhibit No. 55) In addition, he made personal contracts with I.P. Morris Company for completion of the turbines; with General Electric Company for work on the generators, switchboard and transformers, and with the York Bridge Company for intake gates. These contracts were subsequently turned over to Pennsylvania Water & Power Company. All of these services were rendered by Aldred, not as receiver but as Manager of the enterprise, for which he received 5,000 shares of stock.

Committee Arranges Loans

On September 8, 1909, the Bondholders' Committee entered into an agreement with Knickerbocker Trust Company whereby the McCall Bonds deposited with the Committee were placed in trust with the Knickerbocker Trust Company as collateral for loans to be made to the Committee by the Syndicate. (See Exhibit No. 56)

On October 6, 1909, the Committee secured the first of a series of loans from Montreal Trust Company and the Bank of Scotland, the total of which aggregated $1,100,000. The funds were used chiefly by Aldred toward the completion of the plant and by the Committee to purchase the Susquehanna Contracting notes of $400,000. The remainder was used to defray current expenses of the Committee.

Distribution of Pennsylvania Water & Power Company Securities

Under the Final Plan and Agreement for Bondholders, provision was made for the exchange of all the McCall bonds outstanding ($8,325,000.) on a par basis for 40% new bonds and 60% new stock. In addition, $4,170,000. of bonds and $3,500,000. of stock were to be used in acquiring additional money and in payment of services. This resulted in the following distribution of securities:

Explanation	Bonds	Stock
For Exchange of $8,325,000. McCall Bonds	$3,330,000.	$4,995,000.
New Money Bonds (50% bonus)	4,170,000.	2,085,000.
Banking Services		
Kitcat & Aitken		457,500.
Aldred		155,000.
Wood		152,500.
Holt		150,000.
Aldred Management Services		500,000.
	$7,500,000.	$8,495,000.

There were $66,000. of the McCall bonds which were not deposited with the Committee but were purchased for cash. This resulted in $26,400. of Pennsylvania Water & Power Company bonds and $39,600. of stock of the above securities becoming available as treasury bonds and stock.

Value of Pennsylvania Water & Power Company Stock

Inasmuch as bankers' services and management services were acquired by the issuance of stock, it is necessary to determine the cash value of the stock at the time it was issued.

The first evidence of values is revealed in the Company's minute book where Aldred s letter dated March 3, 1910 to the Pennsyl-

vania Water & Power Company accounts for certain expenditures made by him personally. One of these was the purchase of the $66,000. McCall bonds not deposited with the Committee. Regarding their purchase at an aggregate cost of $49,040., Aldred stated:

> "I considered the aggregate price paid for bonds to be probably below rather than above what might be expected to be the fair value of the equivalent new securities at, or soon after, their issue."

(See Exhibit No. 57)

On the basis of exchange, the $66,000. bonds were equivalent to:

$26,400. par value of P.W. & P. Co. bonds (40%)
$39,600. par value of P.W. & P. Co. stock (60%)

The use of a value of 90 for the bonds (the price at which they were sold) would result in a value of approximately $64. per share for the stock.

The first known sale of stock was 100 shares at 38 on January 20, 1911. The next sale was March 1, 1911 - 100 shares at 62½ - and for three months thereafter, thirteen sales, totalling 1,189 shares, were made within the range of 59-5/8 to 63-3/4. Therefore, $60. per share has been used as representing the fair cash value of the stock at the time it was issued for services.

Foreclosure and Sale of McCall Company Property

On October 12, 1909, a decree of foreclosure and sale was obtained in the Pennsylvania Court against the McCall Company. Similar decrees were secured in New York and Maryland on October 15th and 20th, respectively.

On December 1, 1909, a Committee meeting was held at which the action to be taken at the foreclosure sale of the McCall Company was discussed. It was decided to bid $2,000,000. for the property, and as much more as might be necessary to purchase the same in case of com-

petitive bidding, but not to exceed the amount of principal and interest due on the bonds and the debts and expenses of the Committee. They decided that if any qualified bid by another was made in excess of this amount, he should be permitted to purchase the property.

On December 7, 1909, the property of the McCall Company was sold to Wm. M. Barnum, acting for the Bondholders' Committee, for $2,000,000. (See Exhibit No. 58) On December 18th, the order of the Pennsylvania Court, confirming the sale, was issued, (See Exhibit No. 59), and there followed four days later similar orders from the Maryland and New York District Courts.

XII - COMPLETION OF CONSTRUCTION BY PENNSYLVANIA WATER & POWER COMPANY

Formation of Pennsylvania Water & Power Company

On January 13, 1910, a meeting for the reorganization of McCall Ferry Power Company was held in Philadelphia. All the members of the Bondholders Committee were present. The following officers and directors were elected to serve until the first Monday in May 1910:

J. E. Aldred	- President and Director
W. Marriott Canby	- Director
Fayette B. Dow	- Director
John H. Kelly	- Director
Frank C. McCown, Jr.	- Director
Kenneth M. Spence	- Director

The name, Pennsylvania Water & Power Company, was then adopted.

The authorized capital stock was determined to be 170,000 shares of $50. par value each for a total of $8,500,000. Approval was given for the issuance to the Committee of $7,580,000. of one year unsecured bonds and 169,900 shares of stock, in exchange for the property and other assets of the former McCall Ferry Power Company, the benefits of the Committee's expenditures in respect of the property, the remaining cash in the hands of the Committee and other miscellaneous assets. All agreements not fully performed by the Bondholders Committee were to be carried out by the Company. Meetings of the directors and stockholders necessary to complete the organization of the Company were held the same day.

(See Exhibit No. 60)

In February 1910, the number of shares of stock was reduced to 85,000 and the par value of each increased to $100.

Status of Work at Organization of Pennsylvania Water & Power Company

During the period from July 17, 1909, when Aldred was appointed Receiver, to January 13, 1910, when the McCall property was purchased from the Bondholders Committee by the newly-formed Pennsylvania Water & Power Company, additional construction had been carried on, chiefly by Empire Engineering Corporation under its contract with Aldred

Power House: The metal draft tube throats and shell castings for the water wheels were placed for the first five units and concreting brought up to subgrade of the generator room floor for the first four units. The side walls for the first three units and at the river end of the power house were completed and roof tile laid on this area. The wall between the transformer house and generator room had been brought up to the crane level to Unit 7. The submerged intake arches had been completed and concrete poured to the level of the gate house floor as far as Unit 6.

Main Dam: The York County end and abutment had been completed, leaving only 14 flood openings in the whole dam. The seven flood openings on the Lancaster side had been raised ten feet

Deflection Wall: The section between the construction bridge and the skimmer wall had been completed.

Forebay: The connecting bulkhead had been brought up to its full height.

Increase in Indebtedness

On January 22nd, a meeting of the Directors of Pennsylvania Water & Power Company was held for the purpose of securing approval of an

increase in the Company s indebtedness They approved an increase to $12,500,000. subject to stockholder ratification. The Stockholders approved the increase on January 25th, and authorized the execution of a mortgage and deed of trust on the Company s property for the same amount. On January 27th, a mortgage was executed with Knickerbocker Trust Company, as Trustee, effective January 1, 1910, covering the issuance of $12,500,000. of bonds.

Voting Trust

On January 27, 1910, a Voting Trust was formed, the Trustees being Aldred, Barnum and C. E. F. Clarke, Treasurer of the Company. Because of the change in par value of the stock from $50. to $100. per share a new Trust with the same Trustees was formed on February 7, 1910. (See Exhibit No. 61)

Receiver s Report Filed

Aldred, as Receiver for McCall Company, filed his report on February 21, 1910. This showed that he had received cash of $173,166.27, which included $100,000. from the $250,000 original deposit with Knickerbocker Trust Company in connection with indemnification for railroad relocation His disbursements were $33,722 91, leaving a balance of $139,443 36 to be turned over to the Pennsylvania Water & Power Company (See Exhibit No. 62) The Court discharged the Receiver on March 18, 1910.

Bondholders Committee Report

At a meeting of the directors on March 3rd, a report was received from the Bondholders Committee showing the receipts and disposition of all moneys received by it to March 1, 1910 and by Aldred as Manager of the enterprise.

1 - McCall Company Bondholders' Committee

Summary Cash Statement

Receipts		Expenditures	
Proceeds of Committee's Notes	$1,100,000.00	Payment of Committee's Notes principal and interest	$1,103,763.88
Proceeds of Bonds - $2,222,000. par value at 90 and int.	2,007,405.50	Payment of cash to Pennsylvania Water & Power Co. on a/c	750,000.00
		Advances to J.E. Aldred, Receiver, for use in construction	600,000.00
		Purchase of Susquehanna Contracting Co. Notes at par and int.	422,983.32
		Payment to Special Master under decree in foreclosure suit	15,000.00
		Settlement of claims against McCall Ferry Power Co.	51,874.14
		Reorganization Expense: Payments to counsel, depositaries, Secretary, Montreal Trust Co., and for travelling expenses, printing, etc. $38,064.77	
		Committee's compensation 40,000.00	78,064.77
		Balance of cash on hand (of which amount the Committee proposes to turn over to the Pennsylvania Water & Power Co. $62,658.30 and to retain for future disposition 23,061.09)	85,719.39
	$3,107,405.50		$3,107,405.50

Aldred accompanied his statement with an account of his activities both on behalf of the Bondholders' Committee and on his own initiative as Manager of the enterprise.

At this meeting all of the contracts which Aldred had entered into in connection with the McCall development were assumed by Pennsylvania Water & Power Company. The actions and expenditures of both the Committee and Aldred were also approved and accepted.

(See Exhibit No. 57)

Full Board of Directors Elected

The terms of the original directors expired May 2, 1910. On this date the following directors were elected:

J. E. Aldred
R. M. Aitken
Wm. M. Barnum
A. C. Bedford
C. E. F. Clarke
W. M. Canby
A. V. Davis
R. E. Griscom
H. S. Holt
G. M. Lane
S. L. Lewis
F. C. McCown, Jr.
M. E. Olmsted
E. R. Wood
W. R. Warren

On February 7, 1911, Canby and McCown were replaced by J. A. Walls and F. D. Carney.

Consolidated Company Power Contract

A new power contract was executed with the Consolidated Gas Electric Light and Power Company of Baltimore on August 29, 1910, on terms more favorable to Pennsylvania Water & Power Company than the old McCall Company contract had been. Under its terms the amount of power to be taken for a ten year period was two-thirds of the Consolidated Company's peak load of each preceding year. For the first year of the contract 13,333 kw. were to be taken with a minimum of 70,000,000 kwh. The rate to be paid for energy taken was four mills per kwh. Delivery of power under this contract was started on October 23, 1910, with but

one unit in service. (See Exhibit No. 63)

United Railways Power Contract

A new power contract was executed with United Railways & Electric Company of Baltimore on February 8, 1911, effective for fifteen years from that date. Under its terms 12,000 kw. was to be available at all times, for which an annual charge of $24. per kw, would be made. Enough additional power was to be supplied to carry the entire load of the Railways between 10 P.M. of one day and 1 P.M. of the next as well as all day Sundays. For this additional power an energy charge of three mills per kwh. would be made. (See Exhibit No. 64)

XIII - TRANSMISSION COMPANIES

Willis & Homer Retained

As hereinbefore stated the contract with the Consolidated Gas Electric Light and Power Company which was signed on March 13, 1907, provided for delivery of power in Baltimore by McCall Company. At the time, details of a contract with United Railways and Electric Company were being worked out and actual signing of the contract was merely a matter of time. During the period of these negotiations, consideration had been given to the organization of transmission and distributing companies. Surveys and investigations for rights of way for the proposed transmission lines were started the latter part of 1906 and actual acquisition began in June 1907. At this time Willis & Homer, who had previously been appointed attorneys for McCall Company's interests in Maryland, were requested to acquire right of way and incorporate companies necessary for a transmission line from McCall Ferry to Baltimore.

Maryland Pole Line Companies

The Susquehanna Pole Line Company of Baltimore County was incorporated on June 27, 1907, for the purpose of obtaining right of way in Baltimore County and, on August 13, 1907, the Susquehanna Pole Line Company of Harford County was incorporated for the same purpose in Harford County. Each company had authorized capital stock of $50,000. of which only five shares of $100. par value each were issued. The ten shares of outstanding stock of the two companies were owned by McCall Company and the directors for each company were selected from the respective counties with a view of assisting in the acquisition of rights of way.

Pennsylvania Pole Line Companies

Lower Chanceford Township Transmission Company and Peach Bottom Electric Transmission Company were incorporated in Pennsylvania on November 18, 1908, the primary purpose being to provide transmission lines through these townships from the McCall plant to the Maryland state line. Each company had authorized capital stock of $5,000. of which only five shares of $100. par value each were issued. The ten shares of outstanding stock of the two companies were owned by McCall Company.

Rights of Way and Construction

Between June 1907 and December 1908, when McCall Company defaulted on its bond interest, advances totalling approximately $100,000. secured by notes, were made to Willis & Homer for the account of the Pole Line Company of Baltimore County. Expenditure of these funds by Willis & Homer was made for the benefit of all the pole line companies in acquiring rights of way and for surveys. In January 1910, Pennsylvania Water & Power Company resumed the acquisition of rights of way and began construction of the transmission line. The line was constructed by October 1910.

Merger of Pole Line Companies

The two Pole Line Companies in Maryland were consolidated on April 19, 1910, to form the Susquehanna Transmission Company of Maryland and the two companies in Pennsylvania were merged on April 26, 1910, to form the Susquehanna Transmission Company of Pennsylvania. Two shares of stock of the predecessor companies were exchanged for one share of stock of the merged companies.

Financing of Transmission Companies

In 1907-08 McCall Company had advanced approximately $100,000. to the Pole Line Companies. In 1910 Pennsylvania Water & Power Company advanced additional funds on open account for completion of acquisition of right of way and construction. In March 1911, Susquehanna Transmission Company of Pennsylvania issued $183,000. of 5% First Mortgage Bonds at 90 to Pennsylvania Water & Power Company covering practically all advances made to the Transmission Company up to that time. In September 1911, Susquehanna Transmission Company of Maryland issued $1,031,000. of 5% First Mortgage Bonds at 90 to Pennsylvania Water & Power Company covering substantially all of the advances made the Maryland Company up to that date. Additional bonds were issued from time to time to cover other advances.

Both the bonds and the stocks of the Transmission Companies were pledged by Pennsylvania Water & Power Company as additional collateral under its mortgage.

XIV - HISTORY OF ACQUISITION OF PROPERTY AND RIGHTS

General

The following is a summary of the acquisition of property and rights prior to the beginning of commercial operation on October 1, 1911, and disposition of those not needed for the Holtwood development. No attempt has been made to present all property acquisitions but the major ones which are explained, represent practically all of the properties and rights essential to the Holtwood development. In conformity with the scope of the general history, this explanation of property acquisitions has been limited to transactions occurring prior to the beginning of commercial operation.

Resume' of Previously Detailed Acquisitions

Upon the failure of the Dimock-Bertron-Barney Underwriting, Harvey Fisk & Sons acquired all of the Hutchinson property and rights on the Susquehanna! The Fisk firm also purchased all the rights and interests of Harlow-McGaw. These two acquisitions (shown on the accompanying map) constituted substantially all the property needed for a development at McCall Ferry as well as considerable property and rights above and below the area required for the McCall project. Most of this excess property was necessary for other developments along the river, and its retention prevented its use by competing interests and thus gave an opportunity for McCall Company to secure the desirable power markets.

Robert Fry Property

About the first of November 1905, the McCall Company was in the early stages of construction, clearing of the site having been started on October 24th. Robert T. Fry at that time was holding his property, which

was necessary for the development, for an exceedingly high price. Due to the urgency of obtaining this Fry property, Simpson, Thacher and Bartlett obtained an opinion from John G. Johnson on the matter of the McCall Company's power of condemnation.

Our records indicate that as early as 1902, the subject of the right of eminent domain for water power companies had been given serious consideration and much study. Opinions were rendered by Beyer, Semple and Johnson and the consensus was that, while these companies could appropriate the waters of rivers and streams, they must be the owners of land on both sides at the point of erection of a dam and must not injure the rights or privileges of private owners of property on the river. There was thought to be no limitation upon water power companies as to obtaining a supply of water, or acquiring land for their requisite buildings and works, but even this apparent right to condemn for the erection of works had not been tested in the courts.

On October 31, 1905, Simpson, Thacher and Bartlett submitted the question to Johnson and on November 3rd received a reply that the company had such rights as respects terminal and construction purposes. They desired to institute condemnation proceedings as soon as possible since the Fry tract was required for construction buildings, storage sidings, for the abutment of the east end of the dam and to form a portion of the storage reservoir. McCall Ferry Power Company, through Wm. F. Beyer, filed a petition for this purpose in the latter part of November. The hearing was postponed to the latter part of December due to the full Court Docket. During this period of waiting, Johnson was asked to handle the matter because of the importance of the case and the papers in the case were sent to him. Beyer later gave him all of

the details at a personal interview. As a result of this interview, Johnson learned that the McCall Company was incorporated on April 14, 1905, one day after the right of eminent domain to water companies had been further restricted. This new information changed Johnson's opinion in the matter so that he then thought that no right of eminent domain existed for water power companies incorporated after April 13, 1905. His new idea was to stretch the case out over a long period of time and negotiate for a private purchase. In the meantime, commitments had been made, predicated upon the ownership of this tract and immediate possession by the company was necessary. This fact, and Johnson's doubt as to the probable outcome of the condemnation case, very likely were the reasons for the renewal of negotiations to obtain the Fry property by purchase. The parties finally came to an agreement upon a price of $28,000. on January 13, 1906, although Fry had demanded $35,000. in December. The condemnation case was dropped and, consequently, the application of the principle of eminent domain to the McCall Ferry Power Company was never settled. Their doubt as to this right probably had a material effect on the prices later paid for properties, and undoubtedly was a primary cause of the subsequent abandonment of the consideration of a dam at 185 elevation. (See Exhibit No. 65)

Piney Island

In September 1905, the owners of Piney Island, which was situated just below the site of the proposed dam, began negotiations for the sale of the island to McCall Company and threatened to bring suit for damages unless the island was purchased. This island was the upper one of a chain of islands which separated the proposed tailrace from the main river and the one upon which a deflection wall from the

main dam would have to abut. After more than a year of negotiations, Piney Island was purchased for $27,000.

Witmer Properties

The Witmer properties consist of land in fee and flowage releases extending from the Mt. Atlas Tract to Long Level, in York County, and from Safe Harbor to Washingtonboro, in Lancaster County, but the properties are not contiguous on either side of the River. The group of properties had been assembled by John M. Witmer, in conjunction with John F. Brimmer and John W. Holman, who were apparently working under some sort of an understanding with the firm of Pepper & Register.

The properties were acquired between the years 1900 and 1902 and title was taken in the name of Witmer. The firm of Pepper & Register did not exercise its option, so that by agreement dated August 25, 1905, Witmer sold these properties and rights to the Susquehanna Contracting Company, for a consideration of $40,000., of which $7,500. was paid at the time of the signing of the agreement and the balance ($32,500.) on January 22, 1906 upon delivery of the deeds. These properties were acquired because they were deemed necessary for a project having a dam crest elevation of 185, which was the elevation contemplated at the time of this acquisition.

Miscellaneous Properties

In addition to the foregoing properties and rights, various other minor acquisitions were made to complete the requirements for flowage basin, railroad relocation, etc.

XV - DISPOSAL OF NON-USEFUL PROPERTY AND RIGHTS

Consolidation of 1908

It has been mentioned in "I General Description of the Susquehanna River and Its Early Utilization," that there were three major interests competing in the development of the river. In addition to McCall Company these were Susquehanna Electric Power Company and Susquehanna Power Company. Harlow-McGaw had been associated with the Electric Power interests but the properties they sold to McCall Company had been held in their individual names. In addition to these properties, the Electric Power Company held certain properties and rights which did not pass to McCall Company. Following the sale, Harlow became Chief Engineer of Susquehanna Power Company.

In July 1906, Susquehanna Power Company instituted condemnation proceedings in order to acquire certain properties of McCall Company in Maryland. Subsequently similar proceedings were instituted against Susquehanna Electric Power Company. McCall Company made an unsuccessful attempt to secure an injunction restraining Susquehanna Power Company.

The McCall interests had no particular objection to the amount of damages which the juries had awarded in August and September 1906, but were primarily concerned with preventing any competing company from acquiring sufficient property for a development. Their entire handling of the matter in subsequent proceedings shows an effort to deny the right of condemnation to the Susquehanna Power Company and to delay the result as long as possible in order to permit the McCall Company to complete power contracts for desirable markets. By requesting new trials, transfers to other courts and appeals to higher courts, McCall Company succeeded in preventing a final decision.

After an unsuccessful attempt to acquire control of Susquehanna Power Company, Bertron, Storrs & Griscom secretly secured control of Susquehanna Electric Power Company in April 1907, but notified McCall Company of the fact. (See Exhibit No. 66)

Realizing that the condemnation proceedings were becoming costly and that the final outcome was uncertain, Susquehanna Power Company proposed a consolidation of what it still believed were three competing interests, for the development of the river below McCall Ferry. At a meeting of the McCall Company Executive Committee held February 5, 1908, a consolidation of interests of Susquehanna Power Company, Susquehanna Electric Power Company and McCall Company was approved and the firm of Bertron, Storrs & Griscom was appointed to represent the McCall interests. It should be recalled that the Susquehanna Electric Power Company interest had passed to Bertron, Storrs & Griscom in 1907 and consequently in arranging the consolidated agreement they represented two of the three parties. This fact was unknown to Joel H. De Victor, who represented the Susquehanna Power Company.

The Consolidation Agreement was signed February 20, 1908, between

1. Joel H. De Victor for the Susquehanna Power Company
2. John Henry Miller and Wm. H. Surratt for the Susquehanna Electric Power Company
3. Bertron, Storrs & Griscom for the McCall Ferry Power Company

The agreement called for the pooling of all holdings by the three companies between Cully's Falls (elevation 103) and elevation 12 in the river. The proration of shares of the pooled interests was on the basis of original control of river property in terms of feet of fall of the river past the property in question. On the basis of 103' 12' =

91' fall, the division of holdings was determined to be:

1.	Susquehanna Power Company	30/91
2.	Susquehanna Electric Power Company	23/91
3.	McCall Ferry Power Company	38/91

(See Exhibit No. 67)

All property in Maryland was transferred to the Susquehanna Power Company and that in Pennsylvania to the Sowego Water and Power Company, all of whose common stock was owned by the Susquehanna Power Company. The Susquehanna Power Company had been selected as the vehicle by which the merger of interests was to be effected, as at that time it had broader corporate power than any of the other companies.

Distribution of Susquehanna Power Company's Securities

All the outstanding capital stock of the Susquehanna Power Company was issued to the three parties of the agreement as follows:

Susquehanna Power Company	1,319 shares
Susquehanna Electric Power Company	1,011 shares
McCall Ferry Power Company	1,670 shares
Total	4,000 shares

In addition to the common stock, each of the three parties received its proportional share of the 5% First Mortgage Gold Bonds, the division being:

1.	Susquehanna Power Company	$ 600,000.
2.	Susquehanna Electric Power Company	460,000.
3.	McCall Ferry Power Company	760,000.
	Total	$1,820,000.

Except for such shares of common stock of the Susquehanna Power Company as might be required to qualify directors, all stock was to be transferred to a holding company having a nominal capital, and the stock of this holding company was to be divided on the same foot-fall of river basis, namely, 30/91, 23/91, 38/91.

McCall Properties Transferred to Susquehanna Power Company

The following securities and properties were transferred to the new Susquehanna Power Company and its subsidiaries by McCall Ferry Power Company as the result of this agreement:

Capital Stock	No. Shares Outstanding	No. Shares Owned and Transferred
Proprietors of the Susquehanna Canal	75	75
Conowingo Land Company	600	400
Susquehanna Construction Company	10	10
Susquehanna River Electric Company	1,000	985
Susquehanna Electric Power Company	81,568	1,760
Susquehanna River Power Company	9	9

Canal Properties

Tide Water Canal Company

Canal rights, property and franchises from Maryland-Pennsylvania State Line to Havre de Grace.

Included 29 town lots in Havre de Grace, eleven with improvements.

Archers Island.

Subject to right of way grant to Tide Water and Susquehanna River Railroad Company.

Susquehanna Canal and Power Company

Consent to construction of dam and release of damages to all property, rights, etc., below foot of Cully's Falls.

Other Companies: Consents and Releases

Conowingo Bridge Company.
Tide Water and Susquehanna River Railroad Company.

Other Properties and Releases

River frontage		
East Bank, Penn.	approx. 24,550 ft.	
West Bank, Penn.	" 23,000 ft.	47,550 ft.
Acreage in Maryland (additional)		112 A.
River bed in Maryland		1,395 A.
Islands in Pennsylvania		6

(See Exhibit No. 67)

In return for the aforegoing property and rights, the McCall Company received $760,000. of Susquehanna Power Company 5% First Mortgage Gold Bonds and 1,670 shares of Susquehanna Power Company common stock. The latter were exchanged for stock of the Susquehanna Properties Company described hereinafter. Subsequently, McCall Company used $57,000. par of the bonds and 170 shares of stock of Susquehanna Properties Company in connection with payment of legal services for these proceedings.

The original consolidation agreement dated February 20, 1908 was modified on June 30, 1908, chiefly for the purpose of issuing additional bonds to cover preliminary expenses. (See Exhibit No. 67)

Condemnation Cases Dismissed

The execution of the agreement of February 20, 1908, permitted the delay of argument of the pending cases successively to the April and October Terms of the Maryland Court of Appeals when they were dismissed by request of McCall Company.

Incorporation of Susquehanna Properties Company

On June 6, 1908, the Susquehanna Properties Company was formed as the "holding company" mentioned in the consolidation agreement of February 20th. Susquehanna Properties Company stock, having a par value of $1.00 per share, was issued in exchange for the Susquehanna Power Company stock on a share for share basis.

Harlow-McGaw Properties

Under the provisions of the consolidation agreement of February 20, 1908, all the property and rights of McCall Company lying below the foot of Cully's Falls were transferred to Susquehanna Power Company and its subsidiary Sowego Water and Power Company. Substantially all of this property had been acquired from Harlow-McGaw. The net consideration to

McCall Company was $703,000. par value of bonds of Susquehanna Power Company and 1,500 shares of Susquehanna Properties Company stock. By an agreement dated March 12, 1912, Pennsylvania Water & Power Company surrendered the bonds and stock for the sum of $200,000. in cash and the assumption by the purchasers, Bertron, Griscom & Jenks, of the benefits and obligations remaining in the McCall Company under certain agreements with Pennsylvania Railroad dated July 2, 1906 and August 13, 1906. (See Exhibit No. 68) These properties had a fair market value of approximately $163,000. at the time they were transferred to the Susquehanna Power and Sowego Companies.

At the beginning of commercial operation on October 1, 1911, the portions of the property and rights acquired from Harlow-McGaw which lay above the Holtwood pond were no longer useful for that development. In June 1930, they were sold to Safe Harbor Water Power Corpo ration for $61,740. As of beginning of commercial operation of the Holtwood plant, these properties had a fair market value of approximately $29,000.

Witmer Properties

The Witmer properties and rights were acquired at the time that a dam to elevation 185 was contemplated. The subsequent decision to build to 165 rendered practically all of these properties useless to the Holtwood project and, except for flowage rights over that part of the Mt. Atlas Tract located south of the Safe Harbor dam and 15 flowage releases at Washingtonboro, these properties which had cost approximately $39,000., were sold to Safe Harbor Water Power Corporation in June 1930 for $96,230. The sale price was based on fair market value as of the date of transfer and was approved by the Federal Power Commission and the Pennsylvania

Public Service Commission.

Miscellaneous Properties

Certain of miscellaneous properties and rights which had been acquired at a cost of $5,537. in connection with the proposed 185 dam were not useful for the dam at 165. In June 1930, these were sold to Safe Harbor Water Power Corporation, on a basis of fair market value, for $35,575.

XVI - STATUS ON OCTOBER 1, 1911, THE DATE OF BEGINNING OF COMMERCIAL OPERATION

Financial

On the date of beginning of commercial operation, October 1, 1911, the Pennsylvania Water & Power Company and its wholly-owned transmission companies had the following securities outstanding:

	P.W.&P.Co.	S.T.Co.of Md.	S.T.Co.of Pa.
Capital Stock	$8,495,000.	$ 500.	$ 500.
Less: Treasury Stock	37,100.	-	-
Net Capital Stock	$8,457,900.	$ 500.	$ 500.
First Mortgage 5% Bonds	$7,580,000.	$1,031,000.	$ 183,000.
Less: Treasury Bonds	15,000	-	-
Net First Mortgage 5% Bonds	$7,565,000.	$1,031,000.	$ 183,000.

All of the stocks and bonds of the transmission companies were owned by the Pennsylvania Water & Power Company, the bonds having been issued to Pennsylvania Water & Power Company at 90 against advances for construction of the Baltimore transmission line and substation.

At this date all the funds obtained from the sale of bonds had been used in furthering the development. Subsequently, additional bonds were issued from time to time up to 1915 to obtain funds to complete the original project.

Ownership of Other River Companies

In addition to the transmission companies, the Pennsylvania Water & Power Company at this time owned the following securities of other companies along the river:

A - Stocks

Company Name	Number of Shares Owned	Outstanding
Lower Chanceford Water and Power Company	10	10
McCall's Ferry Company	200	200
Susquehanna Canal and Power Company	2,478	2,478
Susquehanna Falls Power Company	6	6
Susquehanna Storage Lake and Power Co.	12	12
York Furnace Electric Company	24	24
Martic Water and Power Company	1,637	1,900
Susquehanna Properties Company	1,500	4,000

B - Bonds

	Principal Amount
Susquehanna Power Company	$703,000.

The Tidewater and Susquehanna River Railroad Company, which had been controlled by Harlow-McGaw from its formation until 1905, remained under the control of Houseman thereafter. Since this company had granted flowage rights to both McCall Company and Susquehanna Power Company, it no longer presented any obstacle to a development by either of these companies.

Physical Status of Plant

As of October 1, 1911, all of the plant necessary for commercial operation was complete. This included the dam, power house substructure, deflection and wing walls, ramp, ice booms, etc. The power house superstructure had been completed for the generator room and transformer house to the center line between Units 6 and 7 where a temporary end wall had been installed. The gate house superstructure extended to the center line between the intakes for the exciters and Unit 6. The status of the equipment will be described in the succeeding section.

Difficulties Encountered in Beginning Commercial Operation

It has previously been mentioned that the first unit of the

plant began the delivery of power to Consolidated Gas Electric Light and Power Company on October 23, 1910.

Although this unit remained in almost continuous operation until the end of 1912, it was kept in operation part of the time with considerable difficulty. Trouble developed with the bearings, the exciter, the relays, and the governors. Eventually the generator had to be rewound due to faulty insulation.

Repeated delays on the part of I.P. Morris, General Electric, and Standard Roller Bearing Company resulted in all units being installed weeks or months behind schedule. Number 2 Unit was tried out on November 5, 1910 but immediately developed bearing trouble. It was not until the middle of October 1911 that this unit was in anything like continuous service. Early in 1913 this unit also had to be rewound.

Unit 3 was placed in service March 25, 1911, Unit 4 on May 18, 1911, and Unit 5 on July 25, 1911. Unit 2 was still out of service; thus, only four of the five original units were serviceable. However, two of the five transformers had burned out and it was not until the latter part of November 1911 that all five units were in operating condition, with sufficient transformer capacity available to take care of their output. This condition lasted only until February 19, 1912, when two transformers broke down. During 40% of the entire year of 1912 there were less than five transformers available for service.

Early in September 1911 four of the five units were in service, with sufficient transformer capacity available. As a result of the study of the early operation of the plant, October 1, 1911 has been taken as the date of termination of the original construction period. Although sufficient equipment had been installed for commercial operation to begin October 1, 1911, the original project consisting of eight 25 cycle units was not actually completed until December 31, 1915.

CHRONOLOGY OF HOLTWOOD DEVELOPMENT

		Page
1894	Harlow-McGaw began formation of companies and acquisition of properties.	5
July 1896	Sale of Canals to Harlow-McGaw.	5
Spring 1899	Hutchinson assisted Bogart in investigation of a proposed development on the lower Susquehanna.	6
9/28/99	Partnership of York Furnace Power Company organized by Beyer & Willson.	6
1900	Several small hydroelectric plants in operation on lower tributaries of Susquehanna River.	3
8/15/00	York Furnace Electric Company incorporated.	6
Fall 1900	Hutchinson consulted in regard to effort of Beyer & Willson to develop power for use in iron ore reduction near York Furnace.	6
1901	Beginning of competition between three major interests.	3,
June 1901	Hutchinson became personally interested in York Furnace Development.	6
10/1/01	Hutchinson obtained option on property held by York Furnace partnership.	7
4/3/02	Susquehanna Canal Company reorganized as Susquehanna Canal and Power Company.	5
5/23/02	Muddy Creek, Pequea, Chanceford, Conestoga, Lower Windsor, Manor, Drumore, Fulton and Peach Bottom Water & Power Companies incorporated.	5
8/14/02	Susquehanna Falls Power Company, Susquehanna Storage Lake and Power Company and Susquehanna River Power Company formed as consolidations of various township companies.	5
9/2/02	The Hillside and Susquehanna Water and Power Companies incorporated.	8
3/2/03	Bill introduced in Pennsylvania Legislature to have Susquehanna Canal and Power Company charter revoked for non-user.	9

		Page
4/14/03	Agreement between Hutchinson and Harlow-McGaw, providing for elimination of conflicting interests.	9
1/13/05	Wm. Barclay Parsons submitted engineering report on McCall Development.	12
2/8/05	Hutchinson's plans submitted to Johnson for approval.	12,13
2/28/05	Agreement between Chas. D. Pullen and Harlow-McGaw for Pullen to consolidate all interests on the river.	26
3/1/05	Prospectus and underwriting agreement of Dimock-Bertron-Barney.	14
March 1905	Acquisition of control of McCall development by Harvey Fisk & Sons upon failure of Dimock-Bertron-Barney underwriting.	19,21
3/21/05	Agreement between Pullen and Susquehanna Power Company for Pullen to consolidate all interests on river.	27
3/25/05	Underwriting Agreement of Harvey Fisk & Sons.	22
4/5/05	Agreement between Pullen and Harlow-McGaw to place in control of Susquehanna Canal and Power Company, all property of Harlow-McGaw and Susquehanna Power Company.	28
4/13/05	Pennsylvania passed law further restricting right of eminent domain for water power companies.	35
4/14/05	Incorporation of McCall Ferry Power Company through consolidation of The Hillside and Susquehanna Water & Power Companies.	34
4/18/05	Houseman proposed to Harvey Fisk & Sons a consolidation of Harlow-McGaw interests with McCall Ferry Power Company.	29
4/27/05	Agreement by Harlow-McGaw to sell to Harvey Fisk & Sons all their interests on the river.	30
	Geo. K. McGaw individually sold to S. R. Bertron stock control in certain companies.	32
4/29/05	Assignment by Pullen to Bertron, Storrs & Griscom of three agreements to consolidate Harlow-McGaw and Susquehanna Power Company interests.	32
5/15/05	Arrangement by Harvey Fisk & Sons with Knickerbocker Trust Company for loans on bond and stock purchase agreements.	36

Hutchinson's Affidavit

STATE OF FLORIDA)
SS:
COUNTY OF DADE)

Personally appeared before me, a Notary Public in and for the State and County aforesaid, DR. FRANZ HAHR STEWART, who upon oath, deposes and says that he is the physician for Cary T. Hutchinson, who is now residing at 1818 Granada Boulevard, Coral Gables, Florida, and that he has been advised that on January 13, 1939, Cary T. Hutchinson affixed his signature in the form of a cross mark to an affidavit, and that the signature was witnessed by Hollis Rinehart, Jr., and made before Clyde E. Pendley, a notary public; that on the date of the above signature Mr. Hutchinson was capable of understanding the purport of his actions; that several of Mr. Hutchinson's vertebrae show x-ray evidence of some metastatic process, probably a malignancy, and one vertebra is seriously damaged by the process, which has resulted in a paralysis extending below the waist, a weakened physical condition, which has not yet affected his mind or his mental facilities.

Franz Hahr Stewart

Subscribed and sworn to before me, this 14th day of January, A. D. 1939, at Miami, Florida.

Evelyn Marik
Notary Public, State of Florida at large

STATE OF FLORIDA)
SS:
COUNTY OF DADE)

Personally appeared before me, a Notary Public in and for the State and County aforesaid, HOLLIS RINEHART, JR., who upon oath, deposes and says that Mr. Donald Gunn, representing the Pennsylvania Water & Power Company, conferred with him in Miami, Florida, for several days with reference to information and in particular a statement to be obtained from Mr. Cary T. Hutchinson of Coral Gables, Florida; that during the several conferences with Mr. Gunn, Affiant went over in detail the data and information to be obtained from Mr. Hutchinson and prepared an affidavit setting forth in detail information which Mr. Hutchinson was in a position to give; that Affiant at the time was not only serving as Mr. Hutchinson's personal counsel, but had been acquainted with Mr. Hutchinson and his family for many years; that on January 13, 1939, Affiant conferred with Mr. Hutchinson at his home in Coral Gables, at which time he read to him the aforesaid affidavit and after due discussion Mr. Hutchinson endeavored to subscribe his name to the instrument; that he was unable to do so, but then and there did affix his signature in the form of his cross mark, which was witnessed at the time by Affiant and by Clyde A. Pendley, notary public; that at the time Mr. Hutchinson was thoroughly capable of understanding the contents of said affidavit and was thoroughly informed of the statements contained therein.

Hollis Rinehart Jr.

Subscribed and sworn to before me at Miami, Florida, this 14th day of January, A. D. 1939.

Evelyn E. Marik
Notary Public, State of Florida at large

My commission expires:
November 10, 1941.

STATE OF FLORIDA)
SS:
COUNTY OF DADE)

Before me, the undersigned authority, personally appeared CARY T. HUTCHINSON of 1818 Granada Boulevard, Coral Gables, Florida, who upon oath deposes and says:

1.

That this affidavit is given principally for the purpose of assisting the Pennsylvania Water & Power Company in establishing the original cost of its properties under the requirements of Public Utility Regulatory Authorities. In this connection, Affiant has held numerous conferences in Miami, New York and Baltimore with representatives of the aforesaid corporation, reviewed and examined pertinent data and records, including the pertinent records and data of McCall Ferry Power Company, and thoroughly refreshed his mind and memory in connection therewith.

2.

That during the year 1899, Affiant first became interested in the possibilities of power development on the Susquehanna River; Affiant, in cooperation with John Bogart, a hydro-electric engineer, undertook a study of these possibilities on behalf of Charles Fairchild, a private banker in New York. Following this, Affiant, through a Mr. Coho, who had been associated with Affiant in the General Electric Co., met Messrs. Beyer and Willson. These latter gentlemen were seeking advice in connection with the reduction of iron ore through the use of electricity, and were members of the York Furnace Partnership, which had been acquiring property on the Susquehanna River in the vicinity of York Furnace for a small hydro-electric development. As a result of the contacts thus established, Affiant became

personally interested in the development of electrical power from the Susquehanna River. Affiant's investigations established the fact that the reduction by electricity of the iron ore available in that vicinity would not prove feasible, but Affiant purchased from the York Furnace Partnership, with his own funds, an option on the partnership's holdings in that vicinity, including land and water power rights acquired by the Partnership, in contemplation for use in connection with the reduction of iron ore, being personally impressed with the possibilities of creating power from the Susquehanna River in that vicinity. Following this, Affiant in partnership with Mr. George S. Morison undertook to buy up and acquire sites and other properties on the Susquehanna River near McCall's Ferry, having reached the opinion that the York Furnace site was not the most desirable. Mr. Morison withdrew from the partnership and Affiant, using his own funds, took over his interest therein. The Affiant's funds were exhausted and Affiant's father-in-law, Mr. Henry F. Dimock, undertook and did lend his own funds and obtained other financial aid for Affiant in the furtherance of the project. During this period, Affiant conferred with his attorney, Mr. Lorenzo Semple of Courdert Brothers, on both the legal and business phases of the enterprise. Affiant found Mr. Semple an able attorney and of inestimable help on the business phases of the project.

3.

After protracted negotiations Affiant secured properties near McCall Ferry known as the Fry Tracts. Messrs. Harlow, McCaw & Houseman owned the canal rights on the Susquehanna River near McCall Ferry, thereby blocking Affiant's efforts to develope power in that locality. As a result, Affiant found it necessary in order to protect his position at the McCall Ferry site to acquire property in the lower section of the River. The competition in the purchase of land and water power rights offered by Messrs. Harlow, McCaw & Houseman and others resulted in a

material increase in prices demanded for the properties and brought about legal difficulties which were handled by counsel and concerning the details of which Affiant has no recollection at this time. Several attempts were made to buy out the opposing interests, to consolidate with them or to sell to them, but these negotiations were consistently unsuccessful. After numerous delays, a compromise arrangement was finally reached, which resulted in Messrs. Harlow, McGaw & Houseman withdrawing their opposition to the development proposed by Affiant. Affiant recalls, however, that as a result of these negotiations and legal entanglements, he had incurred by the year 1905 large expenditures in the purchase of the land, water power rights, legal and engineering fees and services, etc. and in addition Affiant had not only devoted practically all of his own time and efforts to the enterprise, but it had required much time and effort on the part of others. It became apparent, as the situation then stood, that Affiant's investments and committments could not be recovered unless his holdings were sold or additional monies were obtained for the development of the project.

4.

By the early part of the year 1905, Affiant had completed his preliminary designs for the proposed development and employed William Barclay Parsons, a consulting engineer, to verify his plan for the development. Following this Affiant and his father-in-law, Mr. Dimock, placed the matter before Mr. S. R. Bertron, a private banker in New York City, who undertook to form and head a syndicate to finance the project. At this time it was contemplated by Bertron for the bankers, that upon the formation of a corporation to take over the development project, not less than one half of the common stock and $750,000.00 in cash would be issued and delivered to Affiant as compensation for his efforts and monies invested, and as a means of enabling Affiant to pay off

and meet his obligations and for expenses, legal fees, etc. incurred to that date. Pursuant to this understanding, Mr. Bertron formed a syndicate to underwrite the finances required. Mr. Bertron soon concluded, however, that the proposition was more than his firm could complete, he thereupon suggested that the matter be placed before Harvey Fisk & Sons of New York City and that that firm be asked to head a new syndicate. The Fisk firm agreed to undertake the formation of the new syndicate and save the underwriting, but insisted as consideration for its efforts that a majority of the common stock of the proposed development corporation be issued to Harvey Fisk & Sons, or its nominees. Affiant recalls that of the 50,000 shares of common stock to be issued under the Harvey Fisk & Sons plan, the bankers were to receive 30,000 shares and that the remaining shares, plus $750,000.00 in cash, were to be given to Affiant to be utilized for the same purpose as under the Bertron plan. Affiant considered this to be a rather exorbitant demand, but in view of the impending failure of Bertron's attempt to finance the project and particularly in view of the large amounts which Affiant had already invested in the enterprise and the demands made upon him by those to whom he was indebted, it was finally agreed to accept the proposition as submitted by Fisk. Following the arrangement then agreed upon, an agreement dated June 14, 1905, was entered into by Cary T. Hutchinson, the Affiant, and Susquehanna Contracting Company, a corporation organized under the laws of the State of New York, under the terms of which agreement, Affiant conveyed to McCall Ferry Power Company, a corporation organized under the laws of the State of Pennsylvania, all of the lands, water power rights, etc. which had been acquired to date in connection with the proposed development project. The ultimate consideration to Affiant arising out of the above negotiations was agreed upon to be $750,000.00 in cash and the delivery to Affiant of 18,840

shares of the common stock of McCall Ferry Power Company, which stock was so delivered to Affiant. As previously stated, Affiant had incurred expenses and obligations for which he considered himself personally responsible in connection with the development of the enterprise. In addition to repayments in cash, which exhausted the entire $750,000.00, Affiant used about 50% of this stock in McCall Ferry Power Company in payment of attorneys' fees, engineering and other fees, and in the payment of obligations arising out of the purchase of land, water power rights, etc.

5.

Following the completion of negotiations with Harvey Fisk & Sons and execution of the foregoing contract, the total sum of $750,000.00 was paid to Affiant in the form of two checks. One check was in the sum of $155,500.00, which Affiant endorsed to the order of Messrs. Beyer & Willson in payment of option acquired by Affiant known as the York Furnace Option. The other check in the sum of $594,500.00 was deposited by Affiant to Affiant's account with the Mercantile Trust Company of New York City. This latter sum was disbursed by Affiant in the repayment with interest of monies loaned to Affiant which had been used for the acquisition of land and water power rights and was further disbursed in payment of legal and engineering fees, travelling and office expenses and other obligations incurred in the development of the project. Affiant has not been engaged in active business for many years and has no longer available any records of his expenditures, obligations, etc. incurred by him in connection with the enterprise, nor of the disbursement of monies received as herein set out. Affiant has requested of the successors of the Mercantile Trust Company of New York City that a search be made for cancelled checks and other records evidencing the disbursements above set out, but has been advised by the Bankers Trust Company, present successor to the Mercantile Trust Company, that the records for June, 1905, are no longer in existence.

Affiant further states that in addition to the above sum of $594,500.00, it was necessary to utilize, as heretofore stated, a large portion of the 18,840 shares of the common stock of McCall Ferry Power Company to pay off and meet the obligations incurred by him in connection with the project, so that as a result the interest which he was able to retain for himself in the project was a much smaller interest than he considered his services and his financial investment to justify, particularly in view of the risks assumed by Affiant and the obligations incurred prior to the date of the sale to Susquehanna Contracting Company. That at the time, Affiant was of the opinion, based on his knowledge of the project as an engineer, that the common stock should return a dividend of from 2% to 3% of its par value, which would make it worth from $20.00 to $30.00 per share, based on earnings alone. This opinion was concurred in by those who were fully informed concerning the enterprise.

The financing was successfully completed by Harvey Fisk & Sons, and the organization of McCall Ferry Power Company was completed and the plan for development of the enterprise which has been worked out by Affiant was adopted and Affiant was offered and accepted the position of chief engineer of the corporation. Affiant from that time on devoted his abilities to the design and construction of the plant and was not concerned with the financial and legal aspects of the business. It was decided to increase the capacity from 50,000 H. P. to approximately 100,000 H. P., which required more financing than had been originally provided and Affiant so reported. Due to delays in arranging for the additional finances, the monies originally provided became exhausted. This occurred at a time when the market had become unfavorable for the raising of money and

resulted in a receivership and reorganization of the corporation. Affiant opposed the plan of reorganization sponsored by Harvey Fisk & Sons, but foreclosure proceedings were consummated so hurriedly as to render it impossible for him to formulate an effective opposition within the time available.

Agreement Between Hutchinson Interests and Harlow-McGaw Providing for Elimination of Conflicting Interests

THIS MEMORANDUM, made this 14th day of April, 1903, by and between ---------- and ---------- parties of the first part, and ----------, party of the second part, SHOWS:

The parties of the first part represent that they own and control all the shares of the capital stock of the Susquehanna Falls Power Co., a corporation existing under the laws of Pennsylvania and formed and organized under the corporation act of 1874, and its supplements; that they own and control a majority of the shares of the capital stock of the Susquehanna Canal & Power Co., a corporation organized and existing under the laws of Pennsylvania; that they own and control a majority of the shares of the capital stock of the Susquehanna & Tidewater Co., a corporation organized and existing under the laws of Pennsylvania; that they and their associates own and control certain lands water-rights and easements, and have options upon other lands, located in Martic Township, Lancaster County, and in Lower Chanceford Township, York County, which have been secured in the interest of the Susquehanna Falls Power Co; and that they have also procured and have had assigned to such company, releases from various persons, of damages which may be caused by it upon lands located in said township.

And whereas, the party of the second part, and his associates for whom he is acting, contemplate erecting, or causing to be erected, a dam and water-power plant, in the Susquehanna River, about one mile below McCall's Ferry and thereby raising the level of the water in said river, between such dam and a point in said river, at or near Shenk's Ferry, about six miles above the proposed dam; and the parties of the first part are willing to aid and facilitate the construction, and maintenance of the proposed dam and water-power plant upon conditions hereinafter named:

NOW THEREFORE IT IS AGREED AS FOLLOWS:

The parties of the first part, for one dollar and other valuable considerationsunto them paid, by the party of the second part, the receipt of which is acknowledged, agree that they will upon request, at any time within six months from the date hereof, assign or cause to be assigned unto the party of the second part, or as he shall direct, all of the shares of the capital stock of the Susquehanna Falls Power Co., and that they will convey or cause to be conveyed and assigned, unto the party of the second part, or as he sha ll direct, all their right,title, interest and claim in and to the lands, water-rights and easements, owned and held by them and their associates and intended for the benefit of the Susquehanna Falls Power Co., free from all incumbrances created by the grantors, PROVIDED, that they shall then be reimbursed all moneys expended by them, in and about the organization of the Susquehanna Falls Power Co., and in making surveys and plans, etc., with respect to its proposed plant or works; and also be reimbursed all moneys expended by them, and their associates, in procuring lands and releases of damages, intended for the benefit of the Susquehanna Falls Power Co., together with interest on all such sums, which amounts shall not exceed in the aggregate, $20,000.00 and for all of which vouchers shall be submitted; AND PROVIDED: that the subscribers and holders of the shares of the capital stock of the Susquehanna Falls Power Co., shall be indemnified against all liability with respect to the unpaid subscription thereon; AND PROVIDED FURTHER that at the same time, or at such earliest time as the same shall be requested, the party of the second part shall convey or cause to be conveyed unto the parties of the first part, or as they shall direct, all the right, title, interest and claim of the associates of the party of the second part, in and to the lands water-rights and easements, acquired by them and located in and near the Susquehanna River, in Peach Bottom Township, York County, and Drumore and Fulton Townships, Lancaster County, free of incumbrances created by them, upon

upon their being reimbursed the cost thereof, with interest, which will amount to a sum not exceeding $8,000.00 and for which vouchers shall be submitted.

The parties of the first part further agree that they will cause or procure, the Susquehanna Canal & Power Co., by means of lawful corporate action, on its part, to enter into a contract with the party of the second part and his associates, or such corporation as shall hereafter be formed in their behalf, for the purpose of constructing, maintaining and operating a dam and water-power plant, about one mile below McCall's Ferry, as before mentioned, in pursuance of which contract, the Susquehanna Canal & Power Co., will consent and agree to the construction, maintenance and operation of such dam and water-power plant, UPON CONDITION, that if the level of the water shall be raised by reason of such dam above that of the present canal the Susquehanna Canal & Power Co., its successors and assigns, shall have the right of passage for vessels along the route of said canal, and within the pool formed by such dam, and that the persons owning or operating such dam and water-power plant, shall at its or their expense, make provision, in accordance with good engineering requirements, for and shall lock or otherwise move vessels in and out of such pool and to the end that the canal and water-way may be successfully operated for transportation purposes. In case any controversy arises at any time or times, with respect to whether or not the provision made for locking or otherwise moving vessels in and out of said pool, and past said dam, is in accordance with good engineering requirements, thereupon either party interested therein shall have the right to have said controversy arbitrated and upon giving a written notice to the other party with respect thereto, it shall be the duty of each of the parties to select an arbitrator and the two so chosen shall immediately select a third, and all of such arbitrators shall be disinterested and be civil or hydraulic engineers, of good repute.

Such arbitrators shall without delay make full investigation with respect to the matter in controversy and the award in writing signed by such arbitrators, or a majority of them, shall be binding upon the parties.

The parties of the first part further agree that they will cause the Susquehanna and Tide-water Railroad Co., by proper corporate action, to locate its route along the west bank of the Susquehanna River, opposite the pool caused by the erection of the proposed dam at an elevation above the level thereof, and so as not to interfere with the plant or works of the Water Power Co., upon condition that the party of the second part or his associates, or the company owning or controlling the proposed dam, will without further or other consideration, grant unto the said Railroad Company, and its successors and assigns, the right of way for its tracks, through over and upon the lands now or hereafter belonging to or held in the interest of the said water-power company.

The parties of the first part agree that they will not attempt to construct any dam and will not interfere with the party of the second part, or his associates, at any point between the lower end of the tail race of the proposed dam, (which shall not exceed one mile in length) and Shenk's Ferry and the party of the second part and his associates shall not attempt to construct any dam nor interfere with the parties of the first part, at other places upon said river.

This instrument is executed in triplicate and either thereof may be deemed the original.

This agreement shall be binding upon and inure to the parties hereto, their executors, administrators, and assigns, respectively.

Report on Power Development of Susquehanna River at McCall's Ferry, Pennsylvania

---

Dr. Cary T. Hutchinson,
56 Pine St.,
New York City.

Dear Sir.—In compliance with your request, I have made an examination of the data collected with regard to the Susquehanna River, and beg leave to submit the following report on the water power development to be located at McCall's Ferry, Pennsylvania.

This is a project to dam the Susquehanna River near McCall's Ferry, Pennsylvania, about ten miles north of the Maryland State line; to build a water power plant to generate electricity; and to transmit the current to places where a market can be found.

McCall's Ferry is situated in Pennsylvania, about 60 miles from Philadelphia, 40 miles from Baltimore, 35 miles from Harrisburg and 15 miles from Lancaster. In addition to these places, there are within a radius of 45 miles from the site the cities of Lebanon, Reading, Wilmington, Chester and York. The location is favorable to the transmission of power. The territory between Philadelphia and Harrisburg is being developed by electric railways and small electric lighting plants. There can be no question that all the power generated at this site can be readily sold.

The general plan of the development is to build a concrete dam across the river, with a power-house at one end equipped with water wheels and electric generators. The surveys and plans on which this project is based were made by the late George S. Morison, M. Am. Soc. C. E., and are the results of examinations extending over a period of nearly three years. The proposed site was chosen as a good location for a dam; and also because the topography of the river at this point makes it reasonably certain that it will be practically free from disturbance from ice. Above the dam site the river narrows and also bends, while at the proposed site the river widens and is straight. When the ice gorges above break, the floes are discharged through the "Neck" broken into small pieces, and owing to the bend are deflected to the side of the river away from the power-house.

The heaviest ice gorge known occurred during the Spring of 1904. Observations and photographs taken during that period show that the expectations were justified, and that the power-house side was practically free from ice during the period.

The records of the river for the last fourteen years are available, having been kept for that period by the U. S. Geological Survey. In addition, the observations that have been made at the

site have added materially to the knowledge of the flow of the river, and the regimen of the river may be considered a known quantity. There is some dispute, however, as to the minimum flow in the dryest year. You have taken this to be 3,000 cubic feet per second at McCall's Ferry, while there is some evidence that it may be greater. In this report I accept your figure of 3,000 cubic feet per second, as it is unquestionably safe. The maximum flood discharge has been estimated from various data and in all probability is between 650,000 and 760,000 cubic feet per second. I have used the larger figure in determining the depth of water on the crest of the dam during maximum floods.

The dam will have an elevation of 155 feet above the mean sea level at Havre de Grace; a length of approximately 2830 feet; a maximum height above tail water of 55 feet; and an average height of about 32 feet above the rock surface.

The dam will be of monolithic concrete construction. At the east end the power-house will be located, the elevation of the power-house floor being placed above the maximum flood level. Vertical shaft turbines will be used, with direct-connected electric generators; and the electric current will be transmitted in the usual way to Philadelphia, Baltimore or any other points that may be determined.

The situation is such that as the flow of the river increases the tail water below the dam will rise more rapidly than the depth of water flowing over the crest. This increase of rise of back water will diminish the head, but the discharge of the river increases so rapidly that there is more than an abundance of water to develop the power required. The maximum head will be 54 feet and the minimum head, occurring in the average flood season, will be approximately 30 feet. Turbines will be set in having a capacity to deliver the maximum power contemplated under a head of 30 feet; and will, of course, have excess capacity under the higher heads.

The pond formed by the dam will have an area of approximately 60,000,000 square feet. The water contained in one foot depth of this pond is sufficient to deliver about 50,000 horse-power (the proposed capacity of the development) for 75 minutes; and the storage is sufficient to provide for the load fluctuations such as will obtain in Philadelphia or Baltimore, having an average load equal to half of the maximum.

There is a further possibility of damming two small streams and impounding enough water to avoid the necessity of the auxiliary steam plant mentioned below.

Some question has been raised as to the feasibility and practicability of a dam of the character described, on a river subject to great floods. However, a concrete dam of similar construction, of slightly greater length and somewhat greater height at Betwa, India, has passed a flood calculated to be 970,000 cubic feet per second, with a depth of water on the crest of the dam equal to 16.4 feet.* The amount of water per foot of length of dam was greater than it would have been at the McCall's Ferry dam, assuming a repetition of the extraordinary conditions producing the great flood of 1889. In my opinion, a dam at McCall's Ferry is practicable, and can be built without unusual difficulty for the amount stated in the estimates.

The following estimate of the cost of construction is based on the surveys and examinations made by the late George S. Morison, and is substantially a repetition of the figures given by him. I have gone over his data in detail and have checked his conclusions.

The estimate provides for the delivery of 50,000 horse-power at the low pressure side of the transformers in Philadelphia; it includes the cost of construction of the dam, power-house, tail-channel cut, embankment for railroads, and some minor work in the river; complete hydraulic equipment of the power-house, with wheels having a capacity of 75,000 horse-power at full discharge and electric generating equipment of 42,500 kilowatts; three separate transmission lines to Philadelphia of a total length of 200 miles, and the equipment for three sub-stations.

* See Water Supply and Irrigation Paper No. 87, U. S. Geological Survey, Page 179.

These costs, exclusive of land, will be:

1. Dam, power-house, superstructure and sub-structure, tail-race channel, protection to railroad, all permanent construction, and three sub-station buildings	$1,724,000
2. Complete hydraulic equipment, having a capacity of 60,000 h. p. on the shaft at 30 ft. head, including governors, shafts and all appliances	500,000
3. Complete equipment of power-house, capacity of 42,500 k.w. and of three sub-stations, having a total capacity of 50,000 h. p. output	950,000
4. Three complete transmission lines, each 67 miles long	500,000
	$3,674,000
Unclassified and Engineering at 10%	367,000
Total	$4,041,000

Owing to the variable flow of the river, there are years in which 50,000 horse-power cannot be delivered at, say, Philadelphia, although in some years there is more than enough water for this purpose. The records for the last fourteen years, which include two periods of very low water, show that in the average year it will be necessary to supplement the water power for thirty days, and in the dryest year for one hundred days.

The size of the steam plant necessary to supplement the water is determined by the minimum flow of the river,—that is, by the power that the steam plant must deliver when the river is lowest. This will depend somewhat upon the distribution of load during the twenty-four hours. The minimum flow of the river occurs in summer, at which time the maximum demand for power will probably be the least. A steam plant having a maximum capacity of 25,000 horse-power will be ample for the purposes. The rated capacity of such a steam plant, used for short periods, need not be more than two-thirds of its maximum,—that is a steam plant having a rated capacity of 17,000 horse-power will probably be sufficient. Such a steam plant could be of a simple character, and need not be designed for high economy. It would not cost more than $1,000,000, bringing the total cost of the project, equipped to deliver 50,000 horse-power under all conditions, to $5,041,000. This steam plant could be used to supplement the water power plant in case an extraordinary flood should lower the head so that sufficient power could not be obtained from the water, although it is not expected that such use will be necessary.

To deliver 50,000 horse-power in the average year, at 50 per cent. load factor, it will be necessary to supply 2.3 per cent. of the total power by means of steam. For different amounts of power delivered the proportion of the total that must be made by steam would be as follows:

50,000 horse-power	2.3%
60,000 " "	3.7
75,000 " "	6.0

This table indicates that it might be economical to develop a power for delivery of over 50,000 horse-power. This increased development can be made at a cost per horse-power less than that used for the above estimates of cost, since it requires only an increase in the size of the power-house and in the equipment, but no increase in the cost of the dam or river works.

It would be possible, at a comparatively slight increase in investment, to install at any time surplus generating equipment in addition to that covered by the above estimates for 50,000 horse-power, so as to utilize, say, 75,000 horse-power for nine months of the year. This would mean an electrical installation of 25,000 horse-power additional, which would not be available for use during, say, three months of low water.

Yours respectfully,

(Signed) Wm. Barclay Parsons.

Johnson's Legal Opinion Re: Organization of Company

McCJ/C-91

(2)

Susquehanna Electric Power Development.

February 8th, 1905.

John G. Johnson, Esq.,

Land Title Building,

Philadelphia, Pa.

My dear Mr. Johnsoon:

In order to refresh your memery as to the facts relating to the development of power on the Susquehanna River at McCall's Ferry, I beg to call your attention to the standing of the matter in May, 1903, which conditions exist, as I am informed, at the present.

You will remember that Mr. Cary T. Hutchinson is the owner in fee of lands on each side of the Susquehanna River in York and Lancaster Counties at McCall's Ferry. He either owns in fee or has releases from damages from the owners in fee of all property above and below McCall's Ferry along the Susquehanna River on each side which will be affected by the erection of a dam across the said River at that point to an elevation of 160 feet above tide water. Houseman and Harlow owned the bed of the old Susquehanna Canal and had also organized Water Power Companies on each side of the River and had also projected a line of railroad upon one side of the River. All of these properties would have been affected by the proposed development of Mr. Cary T. Hutchinson.

We have an agreement with Houseman and Harlow under the terms of which all opposition upon their part, by reason of their ownership of the above, will be removed.

--2--

You advised us in May, 1903, that in your opinion Water Power Companies organized in the townships on each side of the Susquehanna River and owning in fee the lands affected thereby had authority under the laws of Pennsylvania to erect and construct a plant in the two townships in which they are authorized to transact their business and as owner of the adjoining lands on the Susquehanna River to erect and construct a dam across the said River subject to the provisos contained in the Mill Dam Act and that upon the completion of said plant the said Company would only have power to supply water power for commercial and manufacturing purposes within the two townships in which they are authorized to transact business.

That the said Company would also have power to develop electric power for commercial purposes by means of water power and to supply current and power to the public and to distribute the same, but that its power to distribute and transmit and sell current might be confined to the two townships within which it was authorized to transact business.

Your opinion as to this latter limitation was based upon the case of Fly v. Mt. Pocr Water Co., 197 Pa. 97, though the phraseology of the Act of 2nd July, 1897, would lead one to believe that such Companies might furnish electric power without limitation as to the territory.

Is there not a distinction between Companies organized to

supply water to the public and Companies organized to supply water power for commercial and manufacturing purposes, and does not the Act of 2nd of July, 1895, (P. L. 425) confer upon the latter Companies power to distribute electric current to any place or places and thus eliminate the territorial limits placed upon Companies for the supply of water to the public?

You advised us, however, that this territorial limitation in any event could be eliminated by establishing a line of Water Companies in different townships through the territory intended to be served by electric power.

You also advised us that the Act of the 8th of May, 1889, (P. L. 136) provides for the incorporation of Companies for the supply of light, heat and power, or any of them, to the public by electricity, and that the Merger Act of the 29th of May, 1901, (P. L. 349) is operative in the case of this class of incorporation and that it would be possible by merger to have the corporation which could supply electric power through all the districts covered by the different merged companies.

We desire that our proposed Company shall be authorized to issue eight millions of capital stock, one-half preferred and one-half of common, and eight millions of bonds.

The Water Power Company will own in fee all of the lands on each side of the Susquehanna River affected by the dam; it will also own flowage rights and releases of damages from such

--4--

lands as are not owned in fee; it will own the dam, power house and development plant. If we are compelled to organize Electric Power Companies, then all of the capital stock of the merged electric power company will be owned by the water power company, and this stock could be also used as security for the bonds issued under the mortgage of the Water Power Company.

The Act of March 24, 1887, (P. L. 39) Provides that gas and water companies may borrow money and issue bonds to an amount not exceeding in the aggregate one-half of the capital stock of such Company paid in.

The Act of May 21st, 1889, (P. L. 257) provides: "It shall be lawful for all corporations to borrow money or to secure any indebtedness created by them by issuing bonds with or without coupons attached thereto and to secure the same by a mortgage or mortgages to be given and executed to a trustee or trustees for the use of the bondholders upon their real estate and machinery, or on their real estate alone to an amount not exceeding one-half of the capital stock of the corporation paid in and at a rate of interest not exceeding six per cent. Provided, that it shall be lawful for such corporations as belong to the classes named in Clauses 4, 5, 6, 7, 9 and 11 of Corporations for Profit of the second class as set forth in section two of the Act, of which this is a supplement, and also for such corporations as belong to the

class named in Clause 24, Section 2 of the Act of Assembly, approved April 17, 1876, so to borrow and so to secure the payment of the same by a mortgage or mortgages on its property and franchises to an amount not exceeding double the amount of the capital stock of the corporation actually paid in and at a rate of interest not exceeding six per centum.

Clause 9 of the Corporation Act of 1874 reads: "The supply of water to the public or the supply, storage and transportation of water and water power for commercial and manufacturing purposes."

Clause 11 of the same Act reads: "The manufacture and supply of gas or the supply of light, heat and power by means of electricity or the supply of light, heat and power to the public by any other means."

The original Corporation Act of 1874 was amended by Act of May 16, 1889 (P. L. 226) so as to include water and water power companies. It will be noted that the Act of May 21st, 1889, just quoted, which authorized Companies to borrow double the amount of their capital stock was not passed until five days after the incorporation of water power companies had been inserted in the water company clause so that this right to issue bonds applies to water power as well as water companies. It also applies to electric light and power companies.

6

Will you advise me whether the statutes above referred to would authorize our proposed water power company to issue bonds equal to the amount of the stock paid in and issued?

Pardon me for having gone so much in detail, but I thought that I could save you trouble by putting the matter before you in this way.

The plan I now propose for your consideration and opinion as to its legality is as follows:

1. The Pennsylvania Power Company, a corporation formed by the merger of the two Companies organized under the Act of 1824, and the supplements and amendments thereto, now has a capital stock of $10,000; increase the capital stock of this Company to a total authorized issue of $8,000,000., one-half preferred and one-half common stock, and have this Company by proper proceedings authorize the issue of bonds to the extent of $8,000,000.

2. Organize a chain of electric power companies covering the territory from McCall's Ferry to Lancaster, Pa., and from McCall's Ferry to Philadelphia, Pa., merge these corporations into one company and have this company sell to the Pennsylvania Power Company its capital stock in consideration of an agreement by the Power Company to erect and construct a complete transmission line and plant for delivering electric power to Lancaster and Philadelphia, and such other places as may be necessary.

--7--

3. Cary T. Hutchinson will then make a contract with the Pennsylvania Power Company under the terms of which, in consideration of the issue and delivery by the said Company to the said Hutchinson of capital stock of the par value, of say, $3,000,000. of preferred and $3,000,000. of common stock, and bonds secured by mortgage upon its franchise and all of its property of the par value of $6,000,000. The said Cary T. Hutchinson would convey to the said Pennsylvania Power Company all of the real estate, riparian rights, releases of damages, &c., which would be owned by him at and about McCall's Ferry along the Susquehanna River, which would be affected by the erection of a dam on the Susquehanna River to a elevation of 160 feet above tide water and would agree to construct the said dam, buildings, machinery, appliances, reservoirs, &c. for a complete electric water power plant and to erect poles, wires &c. for the transmission of electric power to Philadelphia and Lancaster and Baltimore, or such places as might be necessary in accordance with the plans and specifications to be attached to the said contract.

4. The remaining stock and bonds in the treasury of the Company, which it is authorized to issue, shall be used in the future to acquire, if deemed advisable, all of the other water power rights along the Susquehanna River to tide water.

--8--

5. We desire at the very earliest possible moment to prepare an underwriting agreement to be signed by underwriters of the bonds of the Company proposed to be organized, the details of which we will explain to you as soon as you can give us an appointment.

Yours very truly,

O P I N I O N.

My opinion has been asked in connection with the Susquehanna Electric Power development, concerning certain matters which will appear hereafter. This opinion is intended to be supplementary to an opinion heretofore rendered in letters bearing date 5th, 9th and 13th May, 1903, and is given subject to what is said in those letters.

I assume that the Water Power Companies organized in the townships on each side of the Susquehanna River, were organized for the purpose of supplying water and water power for commercial and manufacturing purposes with this additional right:-

"In order that the water and water power may be supplied to the Public to best advantage, in furtherance of its corporate purpose, the development by use of the same, of electric current and power to the public, individuals, firms and corporations at any place or places at such price as may be agreed upon."

I am still of the opinion heretofore expressed, that the Companies organized for the purpose of supplying water and water power were organized under such circumstances as preclude them from exercising their powers outside of the limits of the townships specified in their charters.

Had these Companies been organized under the 18th Clause of the Corporation Act of 1874, as finally amended by the Act of 9th July, 1901 (P. L. 624), it is probable that they would not have been territorially limited. Had they been thus incorporated, they would have

been organized "for the storage, transportation and furnishing of water, with the right to take rivulets and lands and erect reservoirs for holding water, for manufacturing and other purposes, and for the creation, establishing, furnishing, transmission and using of water power therefrom."

As I recall the charters, such were not the powers inserted therein, and the probability is that they will be taken as being in existence under the 9th Section of the Corporation Act of 1874, amended by the Act of 21st May, 1889 (P.L. 259), and as finally amended by the Act of 9th July, 1901 (P.L. 624).

The Act of 2nd July, 1895 (P.L. 425) granting the right to develop electric power for commercial purposes, is applicable to Pennsylvania corporations organized "for the purpose of supplying water power to the public and other corporations owning or controlling water power."

I think this Act is applicable to corporations created under amended section 18 of the Corporation Act; but there can be no doubt that it is applicable to corporations created under amended section 9 of said Act, because under that section there is an express authorization of the incorporation of companies "for the supply • • • of water and water power for commercial and manufacturing purposes."

The Legislature of Pennsylvania has confused the subject of Water Power Companies to such an extent, by almost simultaneously, by Acts of 16th and 21st May, 1895, amending Sections 9 and 18 by allowing incorporations for purposes which interlace, that it may not be amiss to incorporate into this opinion, before giving my conclusions, a recapitulation and summarization of the law upon the subject.

The Corporation Act of 1874 contained two clauses of Section 2nd, relating to Water Companies, viz:

"IX. The Supply of Water to the Public."

"18. The carrying on of any mechanical, mining or manufacturing business, including * * * * the storage and transportation of water, with the right to take rivulets and land and erect reservoirs for holding water."

The Act of May 16th, 1889, (P.L. 226, amended Clause 9, so that it read:

"IX. The supply of water to the public, or the supply, storage or transportation of water and water power for commercial and manufacturing purposes."

The Act of May 21st, 1889 (P.L. 259) amended Section 18, so that it read:

"Section 18. The carrying on of any mechanical, mining, quarrying or manufacturing business, including * * * * companies for the storage, transportation and furnishing of water, with the right to take rivulets, and lands and erect reservoirs for holding water for manufacturing and other purposes; and for the creation, establishing, furnishing, transmission and using of water power therefrom."

Section 34 of the Act of 1874, defined the powers of Water and Gas Companies, and under the language of this section, the Supreme Court of Pennsylvania, in the case of

Bly v. White Deer,&c. Water Co., 197 Pa. 81,

held that a Water Company had no authority to supply water or condemn property outside

"the town, borough, city or district where they may be located."

There does not appear to be in the Act of 1874 any language relating to companies incorporated under the 18th Clause of Section 2nd for the storage and transportation of water, similar to the

language which the Supreme Court has held to be a restriction in the case of Water Supply Companies, and the reference to the companies for the storage and transportation of water in Clause 4 of Section 34, of the Act, seems to differentiate them from companies for the supply of water to the public, in respect to their privileges.

It will be seen from the above that under the Act of 1874, there were two classes of Water Companies authorized, one under Clause 9 of Section 2nd, for the supply of water to the public, and one under Clause 18 for the storage and transportation of water, and that the Supreme Court has held that the first class are restricted to the particular municipality in which the Company is located, but has not made any similar decision with regard to companies for the storage and transportation of water; and further, that there does not appear to be any language in the Act which would lead to the probability of such a decision.

It will be seen also that in 1889, the Legislature added Water Companies to both clauses of Section 2 of the Act of 1874, namely, to Clause 9 and to Clause 18, so that companies for the supply of water power may be incorporated under either clause. Whether a Water Power Company, incorporated under Clause 9 of the Act of 1874 is restricted in locality to the same extent as the Water Supply Companies incorporated under that Clause, has not been expressly determined, although the language of the Court in Bly vs. White Deer &c. Co., already quoted, seems to intimate this. The opinion of the Attorney General, hereinafter referred to, is to the same effect. There would seem to be no reason for supposing that Companies incorporated for the supply of water power, under Clause 18 of the Act

of 1874, as amended, are restricted as to locality.

The Act of July 2nd, 1895 conferred on corporations organized under the laws of Pennsylvania "for the purpose of supplying water power to the public", and on "other corporations owning or controlling water power", the right to develop electric power for commercial purposes, by means of water power, and to supply current and power to the public, individuals, &c. This Act seems to be broad enough to include corporations, whether formed under Clause 9, or formed under Clause 18.

In an opinion of the Attorney General, delivered February 5th, 1904,

Portland Water & Power Co., 29 C. Ct. Reps. 180,

the question of the classification of water and water power companies was reviewed by him, and he reached the conclusion that there were three classes of Water Companies, namely;

1. The supply of water to the public, which companies might be incorporated under Clause 9 of the Act of 1874, as amended;

2. The supply of water and water power for manufacturing and commercial purposes, which companies might be incorporated under Clause 9, as amended;

3. Companies for the storage, transportation and furnishing of water for manufacturing and other purposes, and for the creation, establishing, furnishing, transmission and using of water power therefrom, which companies could be incorporated under Clause 18, as amended.

He comes to the conclusion that although two of these clauses overlap each other, so that companies for the furnishing of water power may be incorporated under Clause 9 or Clause 18, yet that the classes of corporations are distinct. He also reaches the conclusion that companies either for the supply of water, or for the furnishing of water power, if incorporated under Clause 9, are restricted as to locality, while companies incorporated for water power under Clause 18 are not restricted as to locality.

In my opinion the Attorney General is right in saying that it is permissable, under the laws of Pennsylvania, to organize Water Power Companies under amended section 18 which will not be obliged to be limited in their extent to any township or other territorial sub-division.

After reflection I retain the opinion heretofore expressed as to the propriety of organizing Electric Power Companies in each township, to be merged subsequently into one company. I find no Act of Assembly which will authorize the creation of an Electric Power Company unrestricted as to territory. I think there can be no possible doubt under the case of

Hey v. Springfiled Water Co., 207 Pa. 44

that these local Electric Companies can be so merged that the merged corporation will possess the right of supplying electric power within all the districts covered by the special powers of the merging companies.

Under the opinion of the Attorney General it would be well to consider whether or not it would be well to re-cast the scheme so that a company shall be created under amended Section 18 of the Cor-

poration Act, unrestricted as to territory, which will be organized "for the storage, transportation and furnishing of water, with the right to take rivulets and lands and erect reservoirs for holding water, for manufacturing and other purposes, and for the creation, establishing, furnishing, transmission and using of water power therefrom," but for the fact that such company would probably be restricted in its power to mortgage. Such company might also have difficulty in acquiring the properties belonging to the Houseman Water Power Company. I do not at present recall, although I made no special search, any Act authorizing such Water Power Companies to sell their property.

This brings me to the question of a right of Water Power Companies to mortgage their franchises and other property, and the relations which must necessarily be established between the bonded indebtedness authorized and the stock of the corporation.

I still retain the opinion expressed in my former letters, to the effect that it is not advisable to interpret the Act of 1901 as destroying the relations theretofore established between the amount of Bonds and capital stock of corporations.

In this connection I will give a summarization of the legislation which is pertinent.

The Act of March 24th, 1877 (P.L. 39) authorized any Gas or Water Company, incorporated under the Act of 1874, to borrow money not exceeding one half of the capital paid in, secured by a mortgage of "all its real and personal property, rights, privileges and franchises."

This Act enlarged the capacity of Gas and Water Companies, not as to the amount of the money to be borrowed, but as to the amount

of property which could be included in the mortgage, and gave such companies the right to include all their real and personal property and franchises.

The Act of May 21st, 1889, page 257, amending the 13th Section of the Act of 1874, authorized all corporations to borrow money, to the extent of one half of the capital stock paid in, secured by a mortgage on the real estate and machinery, or the real estate alone,

> "Provided, That it shall be lawful for such corporations as belong to the classes named in clauses four, five, six, seven, nine and eleven of corporations for profit, of the second class, as set forth in section two of the act of which this is a supplement, and also for such corporations as belong to the class named in clause twenty-four, section two, of the Act of Assembly approved April seventeenth, one thousand eight hundred and seventy-six, so to borrow money and so to secure the payment of the same, by a mortgage or mortgages on its property and franchises, to an amount not exceeding double the amount of the capital stock of the corporation actually paid in, and at a rate of interest not exceeding six per centum, and this section shall not be construed to prevent mortgages for a greater amount and at a higher rate of interest, where the power to make the same is expressly given by the terms of this statute to certain classes of corporations accepting this act, or in the statutes under which certain other classes thereof are by the provisions of this statute to be controlled, governed and managed."

This Act of May 21st, 1889 was entitled "Supplement to the Act of April 29th 1874." It enlarged the powers of certain corporations, so as to give them power to mortgage their franchises and property for a debt not exceeding double the amount of the capital stock paid in. Among these corporations were the corporations named in clause 11 of the Act of 1874, viz: Corporations formed for "the supply of water to the public." The enlarged power was not given to corporations formed for the storage and transportation of water under clause 18 of Section 2 of the Act of 1874.

As has been already stated, clause 11 was amended May 16th, 1889, five days before the Act extending the power of the mortgage so as to include corporations for "the supply, storage or transportation of water and water power for commercial and manufacturing purposes; and on May 21st, 1889, the same date as the Act enlarging the power to mortgage, clause 18 was amended so as to include companies "for the storage, transportation and furnishing of water, with the right to take rivulets and land and erect reservoirs for holding water for manufacturing and other purposes, and for the creation, establishing, furnishing, transmission and using of water power therefrom."

With regard to Water Power Companies incorporated under clause 18 of the Act of 1874, as amended May 21st, 1889, the question as to their right to borrow money on mortgage, depends upon whether they are within the terms of the Actof March 24th, 1877. They are clearly not within the terms of the enlarging Act of May 21st, 1889, as they are not formed under the clause therein specifically referred to.

The Act of March 24th, 1977 is entitled an Act "to authorize Gas and Water Companies to borrow money and secure the same by bond and mortgage", and it confers the powers of borrowing on "any Gas Company or Water Company incorporated under the provisions of the Act of the General Assembly of this Commonwealth, entitled "An Act to provide for the incorporation and regulation of certain corporations, approved 29th day of April, A. D. 1874." The sole question under this Act is whether the powers conferred by it are confined to companies for the supply of water to the public incorporated under the 9th clause of Section 2 of the Act of 1874,

or companies for the storage and transportation of water, incorporated under the 18th clause of Section 2; or whether its provisions include water power companies the creation of which was first authorized by the two Acts of 1889, amending clauses 9 and 18 respectively. The question is not entirely free from doubt, since the Water Companies which were grouped in the Act of 1874, under the head of "Water and Gas Companies" are evidently the companies for the supply of water to the public, and it may be a question whether the Act of 1877 was intended to include other companies, such as companies for the storage and transportation of water, and it is still more doubtful whether it was intended to include companies for the supply of water power, the creation of which was not authorized until twelve years later, namely in 1889. At all events, companies for the furnishing of water power, under the 18th clause of Section 2 of the Act of 1874, as amended in 1889, if theu are within the Act of 1877, can only mortgage to the extent of one half their paid up capital, and if they are not within the Act of 1877, they can only mortgage their real estate and machinery.

With regard to Water Power Companies incorporated under the 9th clause of Section 2 of the Act of 1874, the question arises as follows:-

The Act of May 21st, 1889, which extended the power of certain corporations, was entitled "A supplement to the Act of April 29th, 1874," and it confers the powers on corporations by reference to the clauses of Section 2 of the Act of 1874, in which they are set forth, its language being:

"It shall be lawful for such corporations as belong to the classes named in clause four, five, six, seven, nine and

eleven of corporations for profit, of the second class, as set forth in section two of the act of which this is a supplement."

Section 2nd of the Act of 1874 was amended by the Act of April 17th, 1876. This Act, however, made no changes in clauses four, five, six, seven, nine and eleven, although it did make some changes in some of the other clauses, by adding to those clauses additional members of the classes included therein. It also added four additional classes, among which was the class included in Clause 24 of the Act of 1876, namely, the formation and operation of inclined planes for the transportation of passengers and freight.

The Act of 1889, after conferring the extended mortgage powers upon the corporations in clauses four, five, six, seven, nine and eleven of Section 2 of the Act of 1874, conferred the same powers on the corporations in Clause 24, Section 2 of the Act of April 17th, 1876, so that the Act of 1889, specifically referred to certain corporations, identifying them as the corporations which belonged to certain classes named in certain clauses of the Act of 1874, and to the class named in another clause added in the amending Act of 1876. Subsequently to 1874, by Act of 16th of May, 1889, the Legislature added to Clause 9 of Section 2 of the Act of 1874, corporations for the "supply, storage or transportation of water and water power for commercial and manufacturing purposes." The question therefore is, whether the addition of these Water Power Companies to Clause 9 of the Section 2 of the Act of 1874, brings them within the extended powers conferred by the Act of 1889, on corporations "belonging to the class" "named in Clause 9" of Section 2 of the Act of 1874.

In my opinion Water Power Companies under this clause do have the power conferred by said Act.

On the 16th May, 1889 the Corporation Act was so amended as that, after said date, it read as though originally drafted in the amended form. I think, therefore, that when the Act of 21st May, 1889 was passed, it necessarily included all corporations within the classes as they then existed.

I think the Pennsylvania Power Company, a corporation formed by the merger of the two companies organized as Water Power Companies under Section 9 of the Act of 1874, may increase its capital stock, issuing one-half preferred and one-half common, in payment of property at a reasonable value to such extent as such valuation will justify.

I think a chain of Electric Power Companies covering the territory from McCaul's Ferry to Lancaster, Pennsylvania, and from McCaul's Ferry to Philadelphia, may be created which may be merged into one corporation.

I am also of the opinion under the Act of 2nd July, 1901 (P.L. 603) the Power Company "may purchase, hold, sell, assign, transfer, mortgage, pledge or otherwise dispose of the shares of the capital stock or any bonds, securities or evidences of indebtedness created by" any of said Electric Power Companies.

I am not so clear that the Power Company will have authority "to erect and construct a complete transmission line and plant for delivering electric power to Lancaster and Philadelphia and such other places as may be necessary." The merged Electric Power Company, however, may create a bonded indebtedness within the limits

authorized by our Statutes, and may issue its shares of stock for the purpose of creating such line and plant. The Pennsylvania Power Company can purchase such bonds and stock and may include them within the premises it will mortgage. Perhaps it will be advisable to include in the large mortgage which is to be created an actual lien upon the electric power plant.

I think it will be legal for Mr. Carey T. Hutchinson to make a contract with the Pennsylvania Power Company in consideration of the issue, and deliveryto him by said Company, of its stock and bonds secured by mortgage upon its franchises and property, to convey at a reasonable valuation all the real estate, riparian rights, releases of damages, etc. owned by him, he agreeing further to construct the necessary dam, buildings, machinery, appliances, reservoirs, etc.

If it is deemed advisable to put a mortgage upon the electric power plant, this can be done under a contract between Mr. Hutchinson and the merged Electric Power Companies covering the purpose.

24th February, 1905. John G. Johnson

PROSPECTUS

OF

McCall's Ferry Power Company.

At a point near McCall's Ferry, on the Susquehanna River, in the State of Pennsylvania, a favorable site for the development of a large water power plant to generate and transmit electric power has been located.

The engineering features have been investigated for the past three years under the direction of the late George S. Morison and by Cary T. Hutchinson; more recently the whole matter has been gone over thoroughly and reported upon favorably by William Barclay Parsons; these reports are subject to inspection.

The statistics of the flow of the river are well known, Government records having been kept for fourteen years; there are many local records supplementing the official records; the drainage area is about 27,000 square miles. The site is free from ice troubles; Mr. Parsons reports:

"The proposed site was chosen as a good location for a dam; and also because the topography of the river at this point makes it reasonably certain that it will be practically free from disturbance from ice. Above the dam site the river narrows and also bends, while at the proposed site the river widens and is straight. When the ice gorges above break, the floes are discharged through the "Neck," broken into small pieces, and owing to the bend are deflected to the side of the river away from the power-house. The heaviest ice gorge known occurred during the Spring of 1904. Observations and photographs taken during that period show that the expectations were justified, and that the power-house side was practically free from ice during the period."

It is proposed to make a first development for 50,000 horse-power at this site; 75,000 and possibly 100,000 horse-power can be developed economically.

The first development will have capacity to deliver 50,000 horse-power to any point within a radius of 100 miles of the site. The estimates are based on the delivery to Philadelphia as the largest market for power, but within a radius of 100 miles are the cities of Washington, Baltimore, Wilmington, Chester, Philadelphia, Harrisburg, Reading, Wilkesbarre, Lancaster, Allentown, Bethlehem, Trenton, and many others of less importance. Within the 100 mile radius are included the entire States of Maryland, Delaware and the District of Columbia, together with a large part of New Jersey, and all that part of Pennsylvania south of Wilkesbarre and east of Huntingdon; the aggregate population of this district exceeds five million; New York City, 150 miles distant, is well within the

limit of commercial transmission. There are more than 150 electric light and power plants of various kinds, with an aggregate capacity greater than 100,000 horse-power, in this territory excluding Philadelphia and the other large cities. These plants are in general uneconomical, and are all possible users of this power. The market for the sale of this power is without equal in the United States; within the territory tributary to this development there is at present more than 500,000 horse-power in use. The question of there being sufficient demand for the power developed, within a satisfactory distance, at a profitable price, is conceded by all who have investigated the subject.

The legal status has been investigated and favorably reported on by John G. Johnson, Esq., of Philadelphia and by Coudert Brothers of New York.

The estimated cost of this development, equipped to deliver 50,000 horse-power to Philadelphia, is:

1. Estimate of W. B. Parsons for dam, power house, all hydraulic and electric equipment, including three transmission lines to Philadelphia, with sub-station	$4,041,000
2. Cash for property and rights of way, in addition to stock to be issued by the Company	1,000,000
3. Interest during construction	450,000
Total cost, without steam plant	$5,491,000
4. Auxiliary steam plant, maximum capacity of 30,000 horse-power.	1,200,000
	$6,691,000
5. Working capital	509,000
	$7,200,000

A considerable portion of this expenditure, as for the dam, is applicable to an enlarged development, which can on this account be made for a comparatively slight additional cost per horse-power.

Operation

The total cost of operating this plant, including general expenses, labor, supplies, maintenance of plant, stoppages, taxes, insurance and cost of auxiliary steam power, is estimated at $320,000 yearly. This includes a greater cost of operation for a plant of 50,000 horse-power than it costs at Niagara for a plant of 100,000 horse-power; it can probably be operated for considerably less.

Basis of Earnings

In estimating the gross earnings, on a basis of 50,000 horse-power only, it is assumed that 25,000 horse-power will be sold in Philadelphia at the very low price of $25 per year; the other 25,000 horse-power can be sold at figures ranging from $30 to $40 per horse-power. A conservative figure for this 25,000 horse-power is $30 per horse-power.

The operating account of the plant will then be:

RECEIPTS

25,000 horse-power at $25	$625,000
25,000 horse-power at $30	750,000
Total	$1,375,000
Total operating expense, as above	320,000
Net earnings from operation	$1,055,000
Special reserve fund to provide against extraordinary contingencies, failure to sell full output during first five years of operation, etc., and to provide sinking fund for bonds after first five years.	175,000
Balance	$880,000

FIXED CHARGES.

5% on $8,000,000 bonds	$400,000
Net income	$480,000
Dividend, 5% on $4,000,000 preferred stock	200,000
Surplus applicable to common stock	$280,000

Equal to 7.0 per cent. on $4,000,000 common stock.

The plant is capable of considerable increase in capacity; for a comparatively small additional cost per horse-power 75,000 horse-power can be delivered to Philadelphia for a lighting and power load; or it is possible to utilize the surplus power for eight or nine months in the year for electro-chemical purposes. Such increase in the plant will involve a slight increase in the operating expenses and fixed charges, but the earnings would be largely increased. A conservative estimate of increase in net earnings for the additional 25,000 horse-power will be $300,000, making the total surplus applicable to common stock dividends, after deducting fixed charges on additional investment, of $580,000.

FINANCIAL PLAN.

An issue of $10,000,000 five per cent. gold sinking fund bonds will be authorized, of which not more than $8,000,000 will now be underwritten at 90 per cent., and issued. The proceeds of this underwriting will be sufficient to complete the construction of the first 50,000 horse-power development, including auxiliary steam plant, transmission lines, substation, with all equipment necessary to deliver power to Philadelphia. It will also provide interest on bonds during construction, and leave sufficient margin for working capital. Strict provision will be made regarding the issuance of additional bonds.

The company will have an authorized capitalization of $10,000,000 stock, one-half of which will be cumulative five per cent. preferred stock; the cumulative period to begin in the year 1909. Of this, not more than $4,000,000 will now be issued. There will also be $5,000,000 in common stock, of which $4,000,000 will now be issued.

This Agreement, made at the City of New York, this first day of March, 1905, between Henry F. Dimock, S. R. Bertron and Charles T. Barney, President of Knickerbocker Trust Company (hereinafter called the "Managers"), and Knickerbocker Trust Company, a corporation organized under the laws of New York, or such other trust company, bank or financial institution as the Managers may select (hereinafter called the "Trust Company") and Susquehanna Securities Company (hereinafter called "Securities Company"), a corporation organized or to be organized under the laws of the State of New York, and the undersigned subscribers hereto (hereinafter called the "Subscribers").

WHEREAS, it is intended to secure underwritings for Eight million Dollars ($8,000,000) par value of the First Mortgage sinking fund thirty year Five per cent. Gold Bonds of a corporation to be organized and to be called McCalls Ferry Power Company or some other suitable name (hereinafter called the "Power Company") at Ninety per cent. of their par value, and to arrange whereby the Trust Company will advance on the bonds so underwritten Seventy-five per cent. of their par value as herein provided;

NOW, THEREFORE, THIS AGREEMENT WITNESSETH:

That the Subscribers, in consideration of the premises and of the sum of One Dollar to each of them paid by the Securities Company and by the Trust Company, the receipt whereof is hereby acknowledged, hereby severally but not jointly agree with the Securities Company to purchase the bonds of the Power Company, of the said issue to the amounts set opposite the Subscribers, several signatures hereto respectively (or such lesser amounts as shall be allotted to them by the Securities Company) at the price of Ninety per cent. (90%) of the par value thereof, upon the following terms and conditions:

First.—Each accepted subscription for Ten thousand Dollars ($10,000.) of such bonds shall entitle the Subscriber therefor to receive that amount of bonds and Five thousand dollars ($5,000.) par value in the cumulative Five per cent. (5%) preferred stock of the Power Company or voting trust certificates therefor, cumulative from 1909. Subscriptions for larger or smaller amounts shall participate in like proportion.

Second.—Subscriptions hereunder shall be payable as follows:-Ten per cent. (10%) of the par value of the bonds allotted shall be payable to the Trust Company for the account of the Securities Company within ten (10) days after notice of allotment is mailed by the Securities Company to the Subscribers at their respective addresses, as given below, or if no such addresses are given, to their last known post-office addresses; and five per cent. additional one year from this date, upon similar notice, if the Securities

Company elect to make such call; the balance, being Seven Hundred and Fifty Dollars ($750) per bond with accrued interest, shall be payable upon the maturity of the loan herein provided for.

Third.—The Trust Company agrees to advance to the Securities Company from time to time as called for the unpaid balance of the allotted subscriptions hereunder, being Seven Hundred and Fifty Dollars ($750) for each bond subscribed for, upon the pledge of all the bonds and shares of preferred stock to which the subscribers are respectively entitled, such advances to be repayable two years from the date of the first advance with interest at six per cent. (6%) per annum, payable semi-annually, with a commission of one per cent. (1%) on the amount that the Trust Company agrees to loan; and the Securities Company is to have the right to a further extension of one year at the same rate of interest, with an additional commission of one-half of one per cent. Each Subscriber, in consideration of such advance, hereby guarantees to the Trust Company the repayment of a *pro rata* proportion of such advance with interest. The amount of each such guarantee, however, shall not exceed the unpaid proportion of the Subscriber's respective subscriptions, being Seven Hundred and Fifty Dollars ($750) per bond with accrued interest.

Fourth.—The Subscribers agree that the Managers shall have a right, prior to the maturity of said loan, or its extension, to sell the bonds subscribed for, or any part thereof, for the account of the subscribers, *pro rata*, at not less than Ninety per cent. (90%) of the par value thereof and accrued interest, with a bonus of the preferred stock of the Power Company not to exceed Fifteen (15%) per cent. of the par value of the bonds so sold, and the Trust Company shall deliver said bonds or any part thereof so sold and the stock bonus when and as directed by the Managers upon receipt of such moneys as the Managers shall in writing certify to the Trust Company to be the net purchase price of the bonds sold. The proceeds of all sales of bonds shall be credited upon the said loan, and the amount of such credit shall *pro rata* reduce the Subscribers' several guaranties hereunder.

Fifth.—Payment by the Subscribers to the Trust Company of the amount of their several guaranties shall relieve them of liability to the Securities Company upon their several subscriptions. Such payment may be made in advance of the maturity of the loan at the option of the Subscribers, and upon such payment being made, the Trust Company shall deliver to the respective Subscribers, making the said payments, the bonds and shares of stock held for their respective accounts. The Subscribers making such payment shall upon delivery of the bonds, execute and deliver an agreement in such form as shall be required by the Managers, that the bonds so delivered will not be sold or disposed of until the power plant shall have been in operation for one year except on such terms as shall be fixed by the Managers.

Sixth.—The installments paid by the Subscribers and the moneys advanced by the Trust Company hereunder shall be deposited with the Trust Company and held by it for the account of the Securities Company, to be disbursed only under the authority of the

Managers for the purposes of paying for properties to be acquired by the Power Company, construction and improvement of the Power Company's plant and transmission lines, payment of legal and other expenses, commissions and interest upon advances, reasonable compensation of the Managers, working capital for the Power Company, and such other purposes of the Power Company and of the Securities Company as the Managers in their discretion may deem proper. The certificate in writing of the Managers shall be conclusive upon all concerned as to the propriety of payments made upon their direction, and the Trust Company shall be under no obligation to see to the application of moneys so paid.

Seventh.—The Trust Company may from time to time detach and collect coupons upon the bonds held by it, applying the coupon interest so collected upon the interest due or to grow due on the said loan.

Eighth.—The right is reserved to the Securities Company to reduce or reject any subscription and after allotment in their discretion to reduce all accepted allotted subscriptions by an amount not exceeding twenty per cent. (20%) and no Subscriber shall be released because of the reduction or rejection of the Subscription of any other Subscriber hereunder. It shall not be necessary for a Subscriber whose subscription has been so reduced to resign this agreement for the reduced amount, but his subscription shall be in force for such reduced amount as shown by the allotment of the Securities Company.

Ninth.—In case any Subscriber shall fail to pay the installments as and when called for, the Securities Company shall have the option of excluding such Subscriber from all interest in this agreement and in the profits thereof, without any proceeding at law or in equity, and new subscriptions may be taken in the place of such defaulting Subscriber.

Tenth.—In case any Subscriber shall make default in the payment of the amount guaranteed by him or any part thereof, the Trust Company may, upon ten days' notice in writing by mail, addressed to such defaulting Subscriber at his address as given below or if no such address is given to his last known post-office address and in such manner as it may determine, either at broker's board or at public or private sale, sell the bonds and shares of stock to which such Subscriber would be entitled upon making full payment, applying the net proceeds to the payment of the guaranty of such defaulting Subscriber and accounting to such Subscriber for the surplus if any. Upon any such sale the Managers or the Trust Company may become the purchaser of any bonds and shares of stock sold, free of any equity of redemption of the Subscribers. In case of any deficiency after such sale the Subscriber for whose account such sale may have been made promises to pay to the Trust Company the amount of such deficiency forthwith with legal interest.

Eleventh.—The Managers shall not be liable under any provision of this agreement or in any matter herewith connected or incidental thereto except for fraud and wilful negligence. They may be subscribers hereunder and may be otherwise interested in the Power Company in the Securities Company or in property to be sold to the Power

Company and in any other matters connected with the enterprise. In case of the death, resignation or refusal to act of a Manager or Managers, his or their successor shall be named by the remaining Managers or Manager and such successor or successors shall have all the powers of a Manager hereunder. In case of the death, resignation or refusal to act of all the Managers, then the Trust Company shall name their successors and such successors shall have all the powers of Managers hereunder. The Managers assume no responsibility for the statements of fact in the annexed prospectus and reports though they believe that such statements are true.

Twelfth.—The Trust Company is not to be responsible for any informalities in or invalidity of the bonds or shares of stock nor for any of the acts of any of the other parties hereto and no Subscriber shall be released from his guaranty because of any such matter or for any defense to the obligations of this agreement which he may have against any of the other parties hereto.

Thirteenth.—Pending the engraving or lithographing of the definitive bonds or shares of stock, temporary or interim bonds or shares of stock may be executed and deposited with the Trust Company in lieu thereof. The Managers may in their discretion provide for a Voting Trust for the shares of stock of the Power Company herein referred to, and for the shares of stock held by any other person or persons, and in such event the term "shares of stock" as herein used shall in all cases be construed to mean Voting Trust Certificates issued upon the deposit of such shares.

Fourteenth.—The Subscribers hereby severally appoint the Managers their respective agents and attorneys to do and perform all acts and execute and deliver all instruments which said Managers may deem necessary to carry out the purposes of this agreement.

Fifteenth.—This agreement shall not become effective until subscriptions for Six Million Dollars ($6,000,000) of the bonds of the Power Company shall have been received, accepted and allotted by the Securities Company.

Sixteenth.—Nothing in this agreement shall be so construed as to constitute the Subscribers jointly and the Managers or either of them co-partners in this enterprise.

Seventeenth.—The audit of the President of any Bank or Trust Company in the City of New York shall conclusively establish the correctness of any accounts the Managers may render hereunder and settlement in accordance therewith shall operate to discharge them of all liabilities.

Eighteenth.—This agreement may be signed upon a number of counterparts with the same effect as if all the signatures hereto were upon one instrument. It shall bind and is for the benefit of the parties hereto and for their respective successors, executors, administrators and assigns, but no Subscriber shall be released from his obligations as a guarantor by any assignment of his interest herein.

IN WITNESS WHEREOF, this agreement has been executed the day and year above written.

Susquehanna Securities Company Draft of Certificate of Incorporation

CERTIFICATE OF INCORPORATION

OF

SUSQUEHANNA SECURITIES COMPANY.

WE, THE UNDERSIGNED, ALL being persons of full age, and citizens of the United States, and residents of the State of New York, desiring to form a stock corporation pursuant to the provisions of the Business Corporations Law of the State of New York, do hereby make, sign and acknowledge this Certificate for that purpose as follows:

FIRST. The name of the proposed corporation is "SUSQUEHANNA SECURITIES COMPANY."

SECOND. The purposes for which it is to be formed are as follows:

To do any and all of the things hereafter set forth to the same extent as a natural person might or could do, as principal, agent, contractor or otherwise, either alone, or associated with other corporations or natural persons, and in any part of the world, and to receive, have and exercise all the rights, powers and privileges of natural persons in connection therewith.

To aid in the formation, promotion, organization and carrying on of other corporations, and in the marketing, un-

guaranteeing

~~underwriting~~ or in any wise disposing of their bonds, stocks, or other obligations or securities.

guarantee

To ~~underwrite~~, subscribe for, purchase or otherwise acquire, for cash, or otherwise, to hold, sell, assign, transfer, mortgage, pledge, or otherwise deal in or dispose of, the stocks, bonds and other obligations or securities of any other corporation or corporations, domestic or foreign, and while holder or owner thereof, to exercise all the rights, powers and privileges of ownership including the rights to vote on all stocks or other securities of other corporations held or owned by it.

To issue in ~~exchange for~~ the stocks, bonds, and other obligations or securities of other corporations, its own stocks, bonds, or other securities or obligations.

~~To purchase or otherwise acquire for cash or otherwise, its own stock, after the same shall have been issued and fully paid according to law, and to sell or otherwise dispose of the same when so acquired, for cash or otherwise, and at any price whatever whether greater or less than the par value of said stock.~~

To carry on the business of contracting and construction in all its branches.

To build, erect, promote, construct, provide, acquire,

repair, equip, develop, improve, sell, lease, let, license to use, and otherwise dispose of all necessary or convenient dams, bridges, tunnels, viaducts, roads, ways, reservoirs, acqueducts, buildings, plant, machinery, fixtures and apparatus, for the utilization and distribution of [redacted] water power, and the generation and transmission of electricity and electric power, but not to operate the same or any of them.

To make, enter into, carry out, and perform all lawful contracts with any individuals, associations or corporations, in furtherance of or connection with its corporate purposes as herein set forth.

To buy or otherwise acquire, to hold, own, use, occupy, rent, lease, mortgage, pledge, sell or otherwise deal in or dispose of real property to any amount in any part of the world, and any and all manner of personal property, except bills of exchange and other commercial paper, gold and silver bullion and foreign coins.

To carry on any and every lawful business which may be necessary, profitable or convenient in connection with business and purposes of the corporation as herein set forth.

None of the objects and purposes herein specified shall be in anywise limited or restricted by reference to or inference from the terms of any other clause or paragraph, but

each and every object and purpose shall be regarded as independent and separate.

All of the powers herein specified are to be regarded as in furtherance and not in limitation of the powers conferred by the laws and statutes of New York upon corporations generally.

THIRD. The amount of the capital stock is fifteen hundred DOLLARS.

FOURTH. The number of shares of which the capital stock shall consist is fifteen SHARES of one hundred DOLLAR each, and the amount of capital with which said corporation will begin business is fifteen hundred DOLLARS.

FIFTH. Its principal business office is to be located in the Borough of Manhattan, in the County, City and State of New York.

SIXTH. Its duration is to be PERPETUAL.

SEVENTH. The number of its directors is to be THREE.

EIGHTH. The names and post office addresses of the directors for the first year are as follows:

NAMES.	POST OFFICE ADDRESSES.
CARY T. HUTCHINSON,	56 Pine St. & 4 Cal[illegible]
BENJAMIN BARKER,	" "
HOWARD THAYER KINGSBURY,	71 Broadway "

NINTH. The names and post office addresses of the subscriber to this Certificate, and the number of shares of stock which each agrees to take in the corporation, are as follows:

NAMES.	POST OFFICE ADDRESSES.	NUMBER OF SHARES
CARY T. HUTCHINSON,		13
BENJAMIN BARKER,		1
HOWARD THAYER KINGSBURY,		1

TENTH. The Board of Directors of the corporation shall have power, without the assent or vote of the stockholders, to make, alter, amend and rescind By-Laws for the regulation of the affairs of the company, ~~to fix the amount to be reserved as working capital, or to be held as a reserve fund, and, except as otherwise provided by law, to determine whether and to what extent and at what times and places and under what conditions and regulations the accounts and books of the corporation, or any of them, shall be open to the inspection of the stockholders. No stockholder shall have the right to inspect any accounts, books, or documents of the corpora-~~

tion, except as provided by statute or authorized by the directors,

With the consent in writing of the holdersof a majority in interest of the stock issued and outstanding, the Board of Directors shall have power and authority to sell, assign, transfer or otherwise dispose of all the property, rights and franchises of the corporation.

The Board of Directors may, by a resolution duly passed and adopted by vote of a majority of the whole Board, desig-nate of their number to constitute an Executive Committee which Committee shall, whenever the Board of Directors is not in session, have and exercise all the powers in the management of the business and affairs of the corporation, which may lawfully be delegated to such Committee either by such resolution, or by the By-Laws of the corporation, and shall have power to authorize the seal of the corporation to be affixed to any and all instruments requiring it.

The Board of Directors shall have power to appoint all officers, agents, representatives and employees of the corporation, to prescribe their duties, and to fix their compensation.

The Board of Directors, in addition to the powers and authority by statute and by this certificate expressly conferred

upon them, may exercise all such powers and do all such acts and things as may be exercised or done by the corporation, subject, nevertheless, to the provisions of the statutes and of this certificate, and to any regulations that may from time to time be made pursuant to a vote of a majority in interest of the stockholders, provided that no regulations so made shall invalidate any provisions of this certificate, or any prior acts of the Board of Directors which would have been valid if such regulations had not been made.

The corporation may, by a resolution duly adopted by vote of the stockholders, confer additional powers upon the Board of Directors, and prescribe the number necessary to constitute a quorum of the Board of Directors.

IN WITNESS WHEREOF, We have made, signed and acknowledged this Certificate in duplicate, this day of March, in the year One thousand nine hundred and five.

ON this day of March, 1905, before me personally came, CARY T. HUTCHINSON, BENJAMIN PARKER and HOWARD THAYER KINGSBURY, to me personally known and known to me to be the persons described in and who executed the foregoing Certificate, and severally duly acknowledged to me that they executed the same.

Letters by Lee, Higginson & Company Re: McCall Development

M'CFPC0-11

OFFICE OF
LEE, HIGGINSON & CO.
44, STATE STREET,
BOSTON.

L. March 10, 1905

PER S. S. ST. PAUL

Robert Fleming, Esq.,
London, England.

My Dear Mr. Fleming:

We have given a good deal of time and attention to studying a proposed development of water-power on the Susquehanna River at McCall's Ferry. Ten years ago I looked into a water-power at a lower point on the river, I studied the possibilities for the sale of power in Baltimore where it was intended to take it, and concluded, after a week's work, that this power was not worth taking up at that time. Some time ago, Mr. Coffin, President of the General Electric Company, brought the McCall's Ferry power to our attention. This power is about forty miles distant from Baltimore, and about sixty-five miles from Philadelphia. McCall's Ferry is in Lancaster County, or on the borders of Lancaster County. This is one of the richest agricultural sections in the United States. The surrounding country is full of trolley cars and electric light companies.

This is not a new project. It has been under investigation for some years. Mr. George S. Morrison, now deceased, who was very well known to us, and was one of the most eminent engineers in this country, investigated the project most thoroughly and made plans for the dam, etc. Mr. William Barclay Parsons, who was the chief engineer of the Rapid Transit Commission of New York, and who is now the consulting engineer of

R.F.-S. March 10,1905.

the Interborough Rapid Transit Company, took up the work where it was left by Mr. Morrison, and has completed it. In general I will say that the engineers report that there is no difficulty in building the dam, that there can be no danger of ice and that in every way the project is feasible.

The cost of the development has been figured by Mr. Parsons, by Mr. Morrison, and in part by Mr. Coffin and other officials of the General Electric Company. The cost of the dam, power house, all hydraulic and electric equipment, including three transmission lines to Philadelphia, with sub-station is estimated at $4,041,000

Cash for property and rights of way, in addition to stock to be issued by the Company,	1,000,000
Interest during construction,	450,000
Total cost without steam plant	$5,491,000

This development will be for 50,000 horse-power.

In the territory tributary to this development there is at present more than 500,000 horse-power in use. There is, in our opinion, no question whatever of there being sufficient demand for the power developed within a satisfactory distance at a profitable price.

The figures given to us are much larger than the actual estimates of the engineers. They have been increased in every possible way in order to make them most conservative. Mr. Coffin has, himself, given a good deal of attention to these figures. He thinks them very conservative.

In Mr. Parsons's report, of which I enclose a copy, you will find full statements in regard to the sufficiency of water.

The estimate of receipts and fixed charges of the Company is

R. F., -3.

as follows:

Receipts.

25,000 h. p. at $25	$ 625,000
25,000 " " $30	750,000
Total,	$1,375,000
Total operating expense,	320,000
Net earnings from operation,	$1,055,000
Special reserve fund to provide against extraordinary contingencies, failure to sell full output during first five years of operation, etc., and to provide sinking fund for bonds after first five years,	175,000
Balance,	$880,000

Fixed Charges.

5% on $8,000,000 bonds	400,000
Net income,	$480,000
Dividend, 5% on $4,000,000 preferred stock	200,000
Surplus applicable to common stock	$280,000

Equal to 7.0 per cent. on $4,000,000 common stock.

We believe that it will be possible to sell a great deal of this power at a good deal over $30 per horse-power, but for our own purposes we should prefer to estimate all the receipts from horse-power at $25 per horse-power. This will make the surplus applicable to the common stock $125,000 less than that above stated.

It is proposed to issue $10,000,000 five per cent. gold sinking fund bonds, of which not more than $8,000,000 will now be underwritten at 90 per cent. The underwriters will be called upon for 10 per cent. of their underwriting, possibly for 5 per cent. in addition. It is not expected that they will be called upon for more than 15 per cent. in all. We see no reason why it will not be possible

R. F., -4.

to sell these bonds from time to time while this development is under construction, or after it has been completed. An arrangement has been made with a Trust Company to advance all such funds as may be necessary with the exception of the 15 per cent. to be paid in by the underwriters.

With the $8,000,000 of bonds underwritten will go $4,000,000 of 5 per cent. cumulative preferred stock. This will be the profit to the underwriters. The syndicate managers believe that they will be able to sell the bonds when the proper time comes without giving any of this preferred stock.

In addition to this issue of preferred stock there will be an issue of common stock, all of which will be used in acquiring the rights from the promoters, who have been out a large sum of money for several years.

The authorized issue of bonds will be $10,000,000, the authorized issue of preferred stock $5,000,000, and the authorized issue of common stock $5,000,000. Two million of bonds, $1,000,000 of preferred and $1,000,000 of common stock will remain in the treasury of the company.

The engineers estimate that two years will be required to complete this development. We think, ourselves, that it is safe to estimate three years. We do not believe that the transmission lines to Philadelphia will ever be built, because it seems as if a market will be found for all the power developed near McCall's Ferry long before the development is completed.

This is the only considerable water-power between New York and Washington, with the exception of a possible later development on the Susquehanna River at a lower point. The McCall's Ferry Power

R. F., -5.

Company is obtaining rights to this other power.

There is a small power above McCall's Ferry near York on the Susquehanna River. This has been developed, and all the power is now used in York. The dam at this point has withstood heavy ice, though it is not nearly so well constructed as will be the dam at McCall's Ferry.

We propose to take a block of this underwriting for ourselves. We hope that you will feel like taking some also. Please cable us upon receipt of this letter.

Very truly yours,

Enc. (Signed.) Gardiner M. Lane

P.S. Mr. Higginson thinks very highly of this undertaking, and thinking that it would interest you, he asked me to write you regarding it.

OFFICE OF
LEE, HIGGINSON & CO.,
44, STATE STREET,
L. BOSTON

PER S.S. OCEANIC. March 13, 1905.

Robert Fleming, Esq.,

London, England.

Dear Mr. Fleming:

In looking over my letter to you of March 10th, I regret to find that the estimate of cost, through a stenographic mistake was given in part only. The following is a correct statement of the estimated cost:

1.	Estimate of W. B. Parsons for dam, power house, all hydraulic and electric equipment, including three transmission lines to Philadelphia, with sub-station, . .	$4,041,000
2.	Cash for property and rights of way, in addition to stock to be issued by the company, ...	1,000,000
3.	Interest during construction, ...	450,000
	Total cost, without steam plant,	$5,491,000
4.	Auxiliary steam plant, maximum capacity of 30,000 horse-power, ...	1,200,000
		$6,691,000
5.	Working capital, ...	509,000
		$7,200,000

You will see from this that the estimate of cost of auxiliary steam plant and working capital were omitted from my letter of the 10th.

Very truly yours,

(Signed.) Gardiner Martin Lane.

This letter confirms our cable of this date on the same subject.

Lee's Affidavit

STATEMENT

of

GEORGE C. LEE, A PARTNER OF LEE, HIGGINSON & CO.

At the request of Mr. Donald Gunn, representing the Pennsylvania Water and Power Company, I have placed a value on 5,000 shares of McCall Ferry Power Company common stock which Lee, Higginson & Co. received as compensation for placing more than $2,000,000 par value of McCall Ferry Power Company bonds.

I was a member of the firm of Lee, Higginson & Co. at the time these bonds were placed and had been a member since September, 1900. I was first associated with the firm in 1894.

It is difficult for me to place a value on this stock, because of the long lapse of time since the transaction and also because the enterprise passed through a receivership and the stock untimately became worthless. I have examined the documents which were submitted to me; I have also examined my firm's records of the McCall Ferry development and have made a careful analysis of the underwritings immediately prior and following the McCall Company transaction. My investigation of this matter has developed the following facts concerning my firm's connection with this enterprise.

(1) About 1898 the development of the Susquehanna River for hydro-electric purposes came to the attention of our firm, and we employed Stone & Webster to make an examination and report independently of other engineers whose reports had been submitted to us. After receiving the report of Stone & Webster, my firm decided against taking action in the matter at that time.

(2) About 1903, Charles A. Coffin, then President of the General Electric Co., called our attention to the proposed development at McCall Ferry on the Susquehanna River. At that time and for a year following, the market for that type of security was rather weak and no attempt was made to underwrite the project until early 1905.

2

(3) A report on the proposed development at McCall Ferry was made in January 1905 by William Barclay Parsons, a well-known engineer. His estimates were reviewed by Mr. Coffin and both men believed the estimates conservative and the proposition sound. — Our firm participated in underwriting under the syndicate managed by Henry F. Dimock, S. Reading Bertron and Charles T. Barney. This underwriting agreement was dated March 1, 1905. We obtained approximately two and a half million dollars of subscriptions, but the other interests in the underwriting had not been successful in obtaining the remaining necessary subscriptions and the financing encountered difficulties.

(4) The Syndicate managers then decided to ask Harvey Fisk & Sons to head a new Syndicate. The Fisk firm agreed to head a new Syndicate to complete the financing. The Fisk underwriting agreement provided for a 45% bonus of preferred stock with the bonds, while our commitments had been made on a basis of 50% bonus. Harvey Fisk & Sons were desirous of retaining the subscriptions already obtained under the Dimock-Bertron-Barney underwriting. Accordingly, they agreed to provide our subscribers with a 50% bonus, thus continuing in force the agreements between our firm and our customers. Our firm became a subscriber to Harvey Fisk & Sons' underwriting to the extent necessary to cover our subscriptions. This had the effect of our firm and not our customers being directly liable to Harvey Fisk & Sons for over two and a half million dollars of underwriting.

(5) Our records show that our total compensation was 5,000 shares of common stock and that it was based on handling $2,000,000 par value of bonds. We actually handled a few additional bonds besides the firm's own subscription, but did not receive additional compensation. I have carefully reviewed the results of my firm's underwritings between 1900 and 1908 and find that on participations comparable to the McCall Ferry proposition we customarily earned 5 points or more in cash on the par value of bonds handled.

(6) My firm would not have participated in the McCall Ferry proposition unless they believed their stock compensation had a total value of at least $125,000 at the time they agreed to accept the stock in lieu of a cash commission. This would make the stock worth $25 per share. It is my opinion that a division of the firm's assets, as in the case of a change in members, immediately following the acceptance of this stock as compensation, would have been based on a value of not less than $25 per share for this stock.

(7) Subsequent to the original financing, apparently the plans were changed to increase the capacity of the plant which necessitated obtaining more money. In the summer of 1907 it was decided to sell another half million of bonds, and it was suggested that my firm handle $100,000 par value of them. Before they were placed, the financial market became unfavorable and was followed by a financial panic in the fall of 1907.

(8) Toward the close of 1907, construction work was suspended. In view of the obligations of Lee, Higginson & Co. in connection with the loan on the bond purchase agreements of its customers, we asked Stone & Webster to make an investigation of the McCall Ferry Power Co. project. It soon developed that a very lengthy investigation would be necessary. As this entailed more time and expense than we had anticipated, we terminated the proposed investigation. However, in July 1908, our firm joined with Harvey Fisk & Sons and the General Electric Company in sharing the cost of an investigation by Electric Bond & Share Co.

(9) In October 1908 our firm was one of four each of whom loaned the McCall Ferry enterprise $100,000. In November, 1908, default on the notes of the enterprise which were held by the Knickerbocker Trust Company, made the deferred bond subscribers liable for the principal. By arrangement, an additional payment by the deferred bond subscribers of 20% of the price of the bonds was made and new notes were drawn in the names of the subscribers.

This resulted in my firm incurring an obligation of 60% of the purchase price on $2,350,000 par value of bonds. In December 1908, McCall Ferry Power Co. defaulted on its bond interest and a bondholders committee was formed on which my firm was represented by Gardiner M. Lane, the member who had represented us in the McCall Ferry Power Company affairs. In the fall of 1909, this committee redeemed the note for our loan of $100,000. A reorganization followed and the assets of the McCall Company passed to the Pennsylvania Water & Power Company, an exchange of McCall bonds having been made for securities of the new Company.

July 10, 1939.

Geo C. Lee

Notary Public

My commission expires Dec 15, 1941

Examination of PLINY FISK by W. D. Cole at the Memorial Hospital, 106th Street and Central Park West, New York, N. Y., held on the 29th day of December, 1938, at 1:30 o'clock P.M., before Wilton D. Cole, Notary Public.

Q. What is your name?

A. Pliny Fisk.

Q. What is your business?

A. I am retired from business. From 1884 to 1923 I was associated with the firm of Harvey Fisk & Sons, a banking firm which was organized by my father, Harvey Fisk, and of which I became a senior partner in or about the year 1890. From that time until 1923 I was the active head of the firm and controlling partner.

Q. What was the business of Harvey Fisk & Sons?

A. It was started as a private banking firm by my father, but from about 1890 until 1923 it was one of the leading Government Bond investment houses in New York, and for many years the outstanding firm in that field.

Q. Did your firm also engage in the underwriting and origination of new issues for private companies?

A. Yes.

Q. Do you recall financing of the McCall Ferry Power Company?

A. Yes.

Q. About what year did that financing take place?

A. In the year 1905.

Q. Do you recall the details of that financing?

A. Naturally my recollection of this business had been dimmed due to the many years that have elapsed since 1905, but during the past six months my recollection has been refreshed. In June, 1938, a representative of the Pennsylvania Water and Power Company, Mr. Donald Gunn, called on me and asked for permission to examine the records of my old firm relating to the McCall Ferry Power Company. I told Mr. Gunn that I would be very glad to have my son, Pliny Fisk, Jr., and my personal attorney, W. D. Cole, make a search for these records. That was the only occasion upon which I spoke with Mr. Gunn. My son, Pliny Fisk, Jr., and Mr. Cole made a very thorough search for records of the old company. Their search established the fact that all of the

records of Harvey Fisk & Sons relating to the McCall Ferry Power Company deal had been destroyed. However, I have examined the photostatic copies hereto attached and identified by my initials, which photostatic copies I believe are true and correct copies of the original documents or of true and correct copies thereof.

Q. As a result of your examination of the records and papers connected with the above, would you explain the manner in which this business originated?

A. This business was brought to my attention by William M. Barnum, a partner in my firm. He had, as I recall, about a 15% interest in the profits of the firm. His interest was either second or third largest interest of any of my partners. I had a great deal of respect for Mr. Barnum's ability and judgment, both as to business matters and as to legal matters, and during the time that he was with my firm I placed confidence and reliance upon him with respect to the matters he was handling.

I took very little active interest in the McCall Ferry Power Company management or supervision. I turned the matter over to Mr. Barnum to handle and gave him complete authority and discretion in the handling of this deal. It was the practice of our firm for partners who were handling matters such as the McCall Ferry Power Company to meet weekly or oftener with the other partners for a general discussion of them. This practice was followed with respect to the McCall Ferry Power Company matter. Mr. Barnum managed the affairs of the company and reported weekly or oftener at these general partners' meetings, and discussed with the other partners the policies to be followed. The execution of these policies with respect to the McCall Ferry Power Company deal was left with Mr. Barnum.

Q. During what period did Mr. Barnum represent the firm of Harvey Fisk & Sons with respect to the management of McCall Ferry Power Company deal?

A. During a period of more than three years, that is, from the organization of the company until the affairs of the company were taken over by the Reorganization Committee, which, as I recall, was some time in 1908.

Q. I hand you this paper. Are you familiar with it?

A. Yes, this is the underwriting agreement, dated March 25, 1905, between Harvey Fisk & Sons and the subscribers for the bonds and preferred stock of the McCall Ferry Power Company.

Q. Is this the agreement under which the McCall Ferry Power Company was financed?

A. Yes.

Q. Will you describe briefly the substance of this financing?

A. My firm took over and headed the financing, and dominated the entire picture from the date we first decided to participate in the business and dictated the policies and all important decisions. Subscription agreements were obtained from subscribers in the form of this agreement to the amount of approximately $8,000,000. Under this agreement each subscriber received one $1,000 par value bond and $450 par value preferred stock of the McCall Ferry Power Company for a consideration of $900. The total consideration paid by subscribers under these subscription agreements totalled approximately $7,200,000, which were the funds estimated as necessary to adequately finance this project.

Q. What did your firm agree to do in connection with the financing of the McCall Ferry Power Company and what compensation did you receive?

A. My firm undertook to act in two capacities in connection with this matter. As bankers we underwrote the issue and arranged for the sale of the approximately $8,000,000 of bonds and the preferred stock. In addition to this, however, my firm also undertook to manage the project while it was being built. I am unable at this date to give an exact statement of the total compensation to my firm for acting in both of these capacities, and I cannot give any exact segregation between the portion of the consideration applying to the banking services and the portion applying to the supervisory services. However, it would have been the custom of my firm for services of these natures to demand and receive at least 51% of the common stock of the enterprise on behalf of my firm and other banking interests in the deal. I certainly do not recall that there was any exception made in the case of McCall Ferry Power Company and I believe that my firm and banking interests in this deal initially received more than half of the common stock. It is my opinion that the value of the banking services of my firm was at least $250,000. This estimate is based upon Harvey Fisk & Sons acting as syndicate managers and actually selling approximately one-half of the $8,000,000 bond issue. In my opinion, the management services performed by my firm for the McCall Ferry Power Company were of a value of not less than $150,000. The primary responsibility for supervising the construction of the project, the selection of personnel, and the selection of experts, engineers and contractors was imposed upon Harvey Fisk & Sons. Mr. William M. Barnum, one of my principal partners, as I have pointed out, devoted a very considerable portion of his time to this project and was, in fact, in active charge of and had full responsibility for the entire project. Mr. Barnum's share of my firm's profits averaged $115,000 per year. This represented his share of net profits after deduction of overhead and expenses and would indicate that my firm would charge for his time on a considerably higher basis.

Q. Do you consider that such management services by your firm were services of a banking nature?

A. No. They clearly were not. The services of a banking firm such as Harvey Fisk & Sons at that time in connection with this project would ordinarily have involved only the underwriting and sale of the securities, as I have just stated to you, and our responsibility, as bankers, would at most have been only to keep familiar with the development and operations of the project. We would not have undertaken the far greater responsibility of actual supervision and management merely for the banking fee and without substantial additional compensation.

Q. Do you consider that the above mentioned sum of $150,000, which you have estimated for such management services, is in addition to the sum of $250,000 for banking services?

A. Yes We could not and would not have undertaken such management responsibility without additional compensation at least in the amount that I have stated.

I have read the foregoing questions and answers and the same are true to the best of my knowledge and belief.

Pliny Fisk

Subscribed and sworn to before me this 29th day of December, 1938.

Re: Determination of Original Cost -
Pennsylvania Water & Power Company.

Mr. Wilton D. Cole,
233 Broadway,
New York City.

Dear Sir:

Under separate cover I am sending you today a copy of our story of Harvey Fisk & Sons' connection with the McCall Ferry development, together with a substantial volume of exhibits. The latter are mostly photostats of original documents in our files here in Baltimore. We will appreciate your arranging for Mr. Pliny Fisk, Sr., to go over our story of his firm's connection with the McCall Ferry Power Company and indicate such changes as are necessary to bring it into conformity with his memory and judgment.

The exhibits accompanying our write-up cover all the important documents we have been able to locate. Because many essential facts in this story are not now available, we have found it necessary to draw freely upon suppositions and conjectures. We desire Mr. Fisk to give us the benefit of his memory and judgment as to how these events transpired without regard to whether his statements may or may not conflict with our suppositions.

Mr. Fisk will remember some of the facts and circumstances recited in our version of the McCall Ferry financial history, but many of them he will not recall. Regarding the facts and transactions which Mr. Fisk does not recall, we will greatly appreciate his giving us the benefit of his judgment as to the conclusions we have drawn. It will be helpful if he will, in his comments and remarks, distinguish between the things he recollects and those on which he gives us his judgment.

There are a number of important points in the history of the McCall Ferry financing as we have developed it on which we are uncertain and particularly desire Mr. Fisk's opinion. These are as follows:

1. How did Harvey Fisk & Sons look upon the arrangement through which they became interested in the McCall Ferry proposition? Did they consider the transaction a purchase of control from the Hutchinson-Dimock interest? Was it a partnership arrangement between Harvey Fisk & Sons and the Hutchinson-Dimock interests, or was it some other kind of relationship?

2

Mr. Wilton D. Cole
New York City.

January 9, 1939.

2. What relationship did S. R. Bertron of the firm of Bertron, Storrs & Griscom bear to Harvey Fisk & Sons under the financing and management plan for the McCall Ferry development?

3. Why was Harvey Fisk & Sons willing to have only one of three positions on the Voting Trust under the Stock Deposit Agreement, thus risking possible loss of voting control of the enterprise?

4. How was Harvey Fisk & Sons' control over the McCall Ferry enterprise actually exercised?

5. How did Harvey Fisk & Sons plan to exercise control over the enterprise after the expiration of the Stock Deposit Agreement on November 1, 1908?

6. How, or through what arrangement was Harvey Fisk & Sons represented in the McCall Ferry enterprise after Wm. Barnum resigned from the firm in July, 1908?

7. Did Harvey Fisk & Sons look upon their option right to repurchase the McCall Ferry Power Company bonds at 90 as an asset or a liability?

8. Was the 80% loan on the bond subscription agreements made by Knickerbocker Trust Company considered a privilege or an obligation by the Trust Company?

9. Why was the stock transfer agency changed from Harvey Fisk & Sons to the Knickerbocker Trust Company in November, 1908?

10. What form of compensation did Harvey Fisk & Sons receive for the services they rendered the McCall Ferry development?

11. What did Mr. Fisk consider the common stock of the McCall Ferry Power Company worth when he accepted it?

We realize that our requests in this matter are going to be very burdensome to Mr. Fisk, and that we probably cannot get as much of his time as we might like to have. While we are, of course, anxious to complete this work, we want Mr. Fisk to take as much time as he is willing to devote to this matter. Anything that he can add to our story, or any particular in which he feels it should be changed, will add materially to its authenticity.

It is desirable that we have an authentic record of Mr. Fisk's recollections and comments. We have left a wide margin on the copy of our version of the McCall Ferry financial history, and hope that he will record his notes in this margin. It is also desirable that he initial the exhibits. We suggest that any answers he may be able to give us to the specific questions in this letter be witnessed.

Yours very truly,

DG/H

Donald Gunn

cc: Messrs. J. A. Wells, Jas. L. Rintoul.

WILTON D. COLE

233 BROADWAY
NEW YORK

January 28, 1939

Pennsylvania Water & Power Company,
Lexington Building,
Baltimore, Maryland.

Attention: Mr. Donald Gunn.

Dear Mr. Gunn:

Pursuant to your letter of January 9, 1939, I have had several talks with Mr. Fisk, during which I have read to him and discussed with him the 23-page summary of McCall Ferry financing and Harvey Fisk & Sons connection with it, with the attached exhibits, which you forwarded to me with your letter.

We had, of course, discussed most of the facts set forth in such summary on a number of occasions during the past four months and he confirmed to me that the story seemed to him a fair statement of the deal as he recalled it and of his firm's position in it.

I am returning herewith such summary to you with his comments on page 23 thereof.

I also discussed with Mr. Fisk the points referred to by you in your above letter and in accordance with our discussions, prepared the enclosed summary of his comment on them. The statement, of course, is in my words, not his, but sets forth accurately, I believe, his views. I read such statement to him and he signed it, after stating his approval of it. I also enclose such statement herewith.

Very truly yours,

Wilton D Cole

Memorandum of Comments of Pliny Fisk to Points Raised in Letter from Donald Gunn, dated January 9, 1939

1. In financing projects such as this with appreciable development risk and particularly where the Bankers' compensation was principally or entirely in the form of stock, Harvey Fisk & Sons would certainly insist on having control. We considered the deal a "buy-out" of the Hutchinson-Dimock interests by ourselves and Bertron, Storrs & Griscom. We certainly did not have, in any sense, a partnership relationship with the Hutchinson-Dimock interests.

2. As S. R. Bertron of Bertron, Storrs & Griscom brought the McCall Ferry deal to Harvey Fisk & Sons in a partially financed condition, Bertron, Storrs & Griscom were joint account with Harvey Fisk & Sons but, because of our greater prestige, their name did not appear on the subscription agreements. We dealt with S. R. Bertron as representative and principal partner of Bertron, Storrs and Griscom.

3. The interests of Bertron, Storrs & Griscom and Harvey Fisk & Sons were identical in financing the McCall deal. We were both bankers and Harvey Fisk & Sons knew that Bertron, Storrs & Griscom would vote with Harvey Fisk & Sons on all matters of policy. Harvey Fisk & Sons thus clearly held control of the McCall Ferry Power Company under the voting trust arrangement.

4. The three banking interests; ourselves, Bertron, Storrs & Griscom, and Lee, Higginson & Co. held a majority of the

common stock and, as the principal banking interest, Harvey Fisk assumed responsibility for the management of the company. Under the circumstances it was clear that we would and did have no difficulty in exercising such control. Such control was actually exercised by us through our partner, Mr. William M. Barnum.

5. We believed that even after expiration of the voting trust, the banking group, in view of their large holdings, would have no difficulty in retaining working control.

6. Wm. M. Barnum continued to represent Harvey Fisk & Sons in the McCall Ferry enterprise after his withdrawal from the firm. There had been no trouble or dissension which caused him to leave the firm and he continued on excellent terms with me.

7. We considered options of this type as obligations to the subscribers to take them out of their investment. If we failed to do so, as in this case, we felt it was harmful to the reputation and interests of the firm.

8. I don't know.

9. Have no idea as to the reason for it, except convenience.

10. Stock only: common stock, in my opinion at least as much as the 12,000 odd shares that went to Bertron, Storrs & Griscom and probably the difference between that amount and the 30,000 shares represented by one of the two large certificates issued; also apparently the 1800 odd shares of preferred stock that went to my firm.

11. I have already figured that the value of services of my firm in handling the financing of this deal was $250,000. and in undertaking the responsibility for management during the construction and development period was not less than $150,000. It is difficult for me to fix at this time a value for this stock, particularly, because of the later developments. But I am of the opinion that the common and preferred stock of the McCall Ferry Power Company, at the date we received it, had a value in our judgment of at least $400,000. Otherwise we would not have undertaken the financing. I am of the opinion, therefore, that the preferred stock we received might be figured at 50, or a value of about $95,000., leaving $305,000. as the value of the common stock we received, or approximately $18. a share.

Susquehanna Power Company.

Bond and Stock Purchase Agreement.

Agreement, dated March 25, 1905, between the Subscribers, severally, of the one part, and HARVEY FISK & SONS, Bankers, of the City of New York, hereinafter called the "Bankers," of the other part:

WHEREAS, a plan has been devised for acquiring certain riparian lands and interests on the Susquehanna River, in the Counties of Lancaster and York, in the State of Pennsylvania, near McCall's Ferry, and for developing the power and storage capacity thereof which it is estimated will produce a supply of at least fifty thousand (50,000) horse-power, which plan is acceptable to the owners of said lands and interests, and is as follows:

PLAN.

A corporation, hereinafter called the "Power Company," is to be formed, with the name "SUSQUEHANNA POWER COMPANY," or other appropriate name, capitalized as follows, namely:

(1) Five million dollars ($5,000,000) of common stock;

(2) Five million dollars ($5,000,000) of preferred stock entitled, in preference to the common, to par on distribution, and to dividends of five per cent. per annum, which dividends shall be cumulative after four years from the organization;

(3) Ten million dollars ($10,000,000) of thirty-year five per cent. Gold Bonds, secured to be paid by a mortgage which shall be a first lien (either directly or by pledge of stocks representing the unencumbered ownership thereof) upon such lands and interests, easements, water rights, dam, power plant, equipment, lines for distribution of electric current and other property as shall be acquired or produced by or for the Power Company in consideration of the issue of its said stocks and bonds, such mortgage to require the payment of one hundred and sixty thousand dollars ($160,000) annually after five years into a sinking fund for retiring the bonds;

All of said bonds and stock, except two million dollars of bonds and one million dollars of preferred stock, which are to be reserved for other corporate purposes, are to be issued in acquiring said riparian lands and interests, and in providing for the construction of the dam and other works estimated to be necessary to produce a continuous supply of fifty thousand horse power and equipping the same with the lines of transmission and distribution deemed requisite to render such power marketable, for all profits in connection with the bringing together and turning in of the said properties, for compensation for financial assistance except as hereinafter stated and for organization, corporate, legal and other proper expenses in connection with the acquisition of said lands and interests and the said construction;

WHEREAS, the Bankers have been requested and are willing to aid in financing the said Plan to the extent of taking agreements from the Subscribers for the purchase of bonds and preferred stock of the Power Company, of acquiring the bonds and stocks for delivery under such purchase, and of making or procuring the loans hereinafter mentioned;

NOW, THEREFORE, each Subscriber hereby agrees with the Bankers, upon the terms and conditions hereinafter stated, to purchase from them bonds and preferred stock of the Power Company to the amount written after his signature hereto, or such smaller amount as they may allot, and to pay therefor at the price and times hereinafter mentioned.

The price is nine hundred dollars, and accrued interest, if any, for each one thousand dollar bond, together with preferred stock of the par value of four hundred and fifty dollars, and is payable to the Bankers at their office No. 62 Cedar Street, New York City, in instalments of not more than twenty per cent. each, the first upon five days' notice on or after allotment, and the others upon call of the Bankers on twenty days' notice. Subscribers are to be credited with interest at five per cent. per annum upon all instalments from times of payment until delivery of bonds and stock.

Subscribers have the option, by signing a copy of this agreement which so provides by its last clause, to defer for at least three years call and payment of all instalments after the first, and each Subscriber so electing and signing hereby guarantees payment of interest and commissions upon as much of the loan or loans hereinafter provided for as the total amount of the instalments of his purchase price so deferred.

It is understood that all interest and commissions herein mentioned will be paid as part of the cost of producing the plant and equipment.

Upon the pledge of these purchase agreements of Subscribers so deferring payment, together with the bonds and stocks to be taken thereby, the Bankers will, as money shall be required for construction and equipment, procure a loan or loans up to the aggregate amount of such deferred payments, at a cost of not exceeding interest at six per cent. per annum upon the amounts actually loaned, and a commission of not over one-half of one per cent. per annum upon the amounts agreed to be loaned, as and if required, and such Subscribers hereby severally authorize such pledge.

In case, after allotment, less than the above-mentioned issue of bonds should be found requisite, each Subscriber consents to a proportionate reduction of the amount of his allotment hereunder.

Appropriate receipts of the Bankers, negotiable in the manner therein provided, will be issued for all payments, calling for delivery of bonds and stock when ready.

after full payment, and not later than one year after completion of construction for producing and distributing power; such receipts to be expressly subject to the option hereinafter provided. No assignment, transfer or other disposition of any such receipt shall discharge or diminish any obligation of any Subscriber hereunder.

The Bankers have the option at any time before final delivery of bonds and stock to re-purchase from the Subscribers all or any part of said bonds at ninety dollars for each one hundred dollars of aggregate principal amount, upon thirty days' notice mailed to holders of receipts at their last known addresses. In case of such purchase of less than all the bonds taken by the Subscribers hereunder, the same shall be made from all the Subscribers proportionately. Upon maturity of such notice all interest payable to Subscribers shall cease, to the extent of interest on the purchase price so to be repaid, and all receipts must be surrendered in exchange for such price and for new receipts calling only for the remainder, if any, of the bonds and for the preferred stock.

No partnership or joint relation of any kind results from this agreement, nor do the Bankers assume any fiduciary relation of any kind, or any obligation to cause the plan aforesaid to be undertaken or carried out.

The Subscribers intend their agreements herein to be relied upon by the Bankers in their arrangements to acquire the bonds and stock hereby agreed to be purchased from them, and severally waive notice of acceptance.

Signatures to this agreement, though made upon different papers, some of which differ from the others in the last clause, shall be deemed signatures of one agreement, and the Bankers may be Subscribers.

The Subscribers to this paper **do not elect to defer payment,** as hereinbefore provided, of installments after the first.

Gentlemen:-

We agree that you shall receive through us or the Bankers, Messrs. Harvey Fisk & Sons, 25% of common stock on the SUSQUEHANNA WATER POWER Underwriting on $2,000,000 subscriptions to be furnished by you, or $500,000 par value of the same, together with 5% of preferred stock, making the total amount of preferred stock 50% of the subscriptions, instead of 45% as called for in this subscription. The same to be transferred to you as soon as issued.

Very truly yours,

A. Bertron Storrs & Griscom

New York, March 30, 1905.

Messrs. Lee, Higginson & Co.,

44 State St., Boston, Mass.

Gentlemen:-

I have arranged with Messrs. Harvey Fisk & Sons to provide you with an additional $50,000 subscription on the subscription basis, namely 45% percent of preferred stock, but will also secure the additional 5% for you later.

I am glad to have been of this service to you. For your own information I would say that Mr. Frick is among the Underwriters.

Very truly yours,

A.

BERTRON, STORRS & GRISCOM

BANKERS

40 WALL STREET, NEW YORK — LAND TITLE BUILDING, PHILADELPHIA

New York, March 8, 1906.

Messrs. Lee, Higginson & Company,

44 State St.,

Boston, Mass.

Gentlemen:-

Would you be good enough to send us a memorandum of the amount of common stock which is due you on the McCALL FERRY POWER proposition, according to your memorandums, as we desire to get this matter straightened out with Messrs. Harvey Fisk & Sons.

Thanking you in advance for your kindness, we are,

Very truly yours,

A.

...ch 9, 1906.

Messrs. Bertron, Storrs & Griscom,

40, Wall Street, New York, N. Y.

Dear Sirs:

We beg to acknowledge the receipt of your letter of March 8th in reference to the amount of common stock which it was agreed to allow us on account of our underwriting of Susquehanna Water Power.

We quote from your letter of March 25th, 1905, as follows:

"We agree that you shall receive through us or the bankers, Messrs. Harvey, Fisk & Sons, 25% of common stock on the Susquehanna Water Power Underwriting of $2,000,000, subscriptions to be furnished by you, or $500,000 par value of the same, etc. . . . The same to be transferred to you as soon as issued."

The total underwriting taken by us is $2,620,000, on $500,000 of which it is clearly stated in the letter of your Mr. Bertron to our Mr. Lane of March 25th, 1905, that you could not allow us any commission in common stock. On the balance of $120,000 we do not find any memorandum as to whether we were to receive a commission in common stock.

Our inference is that $500,000 in common stock covers the ... to be allowed to us.

Yours very truly,

Agreement for Acquisition of Pullen's Options by Susquehanna Contracting Company

ASSIGNMENT and AGREEMENT, dated April 29, 1905, by and between CHARLES D. PULLEN, of the City of New York, (hereinafter called "Assignor"), and BERTRON, STORRS & GRISCOM, Bankers, of the City of New York, (hereinafter called "Assignees").

Assignor, in consideration of ten thousand dollars ($10,000), receipt whereof is hereby acknowledged, and in consideration also of the agreement of Assignees hereinafter stated, hereby assigns, transfers and sets over absolutely unto Assignees, their successors, heirs and assigns, forever, a certain agreement between Assignor as party of the first part, and George K. McGaw, James H. Harlow and M. H. Houseman, parties of the second part, (a copy whereof is hereunto annexed marked "A"), and also a certain agreement between Assignor as party of the first part and B. Harvey Welsh and others, parties of the second part, dated March 21, 1905 (a copy whereof is hereunto annexed marked "B"), and also a certain agreement between Assignor, party of the first part, and said Harlow, McGaw and Houseman, parties of the second part, dated April 5, 1905 (a copy whereof is hereunto annexed marked "C"), and all and every right, title and interest, claim, demand, option, privilege, advantage and opportunity belonging to, vested in, enjoyed by, conferred upon or arising or existing in or in favor of Assignor by, under or pursuant to, or that may arise or grow out of, any or all of the said contracts or any of the provisions thereof.

Assignor hereby authorizes and empowers Assignees, their successors, heirs and assigns, in his or their names, but at their own cost and charge, to do and perform every

thing, exercise every right, option, privilege, advantage and opportunity which Assignor might or could do under or pursuant to, or in carrying out, the said contracts or any thereof, or any provision of any thereof, if this assignment were not made.

Assignor states and represents that this assignment conveys and transfers to Assignees every right, title and interest of the Assignor either in land, water, easement, option, corporate stock or of any other character connected with or relating to the Susquehanna River between Columbia, in the State of Pennsylvania, and Havre de Grace in the State of Maryland, or connected with, or that might be useful or of advantage to own in connection with, any development of water power or water storage of said part of said river, or in or in connection with transmission of power therefrom; and in case it should be found that the Assignor has any right, title or interest which does not pass by the assignment hereinbefore made, then for the same considerations aforesaid Assignor hereby assigns, transfers and sets over absolutely to Assignees, their successors, heirs and assigns, forever, every such right, title and interest, and hereby agrees to make, execute and deliver ~~every~~ such further instrument of assignment or transfer as may be reasonably required to vest title to every such right, title and interest in Assignees; and Assignor further states and represents that none of said contracts hereby assigned, nor any right, title or interest therein has been assigned or in any way encumbered by him or in his behalf, and that he has good right and clear title to assign and transfer the same as he does hereby.

In consideration of the assignments of Assignor hereinbefore stated, Assignees hereby agree, in addition

to the cash payment hereinbefore mentioned, to cause to be transferred and delivered to Assignor fifteen thousand dollars ($15,000) in aggregate par value of the common stock of the corporation described in the Bond and Stock Purchase Agreement hereto annexed, marked "D", as the company "to be formed with the name Susquehanna Power Company or other appropriate name"; such stock to be delivered as soon as such corporation has been capitalized as in said agreement set forth and its common stock is ready for issue to others.

IN WITNESS WHEREOF said parties have hereunto set their hands and seals the day and year first above written.

Chas. D. Tullis (L.S.)

[illegible] (L.S.)

In consideration of $10,022.22 and of the agreement of the assignees hereinafter stated, Bertron, Storrs & Griscom, called assignees in the agreement and assignment hereto prefixed, hereby assign, transfer and set over to Susquehanna Contracting Company, a corporation of the State of New York, the said assignment and agreement, and all rights, titles and interests of said Bertron, Storrs & Griscom therein or thereunder.

In consideration of the foregoing assignment, the Susquehanna Contracting Company hereby assumes and agrees to perform the obligation of Bertron, Storrs & Griscom under the assignment and agreement aforesaid to cause to be transferred and delivered to Charles D. Pullen $15,000 in aggregate par value of common stock.

IN WITNESS WHEREOF said parties have executed this instrument this 10th day of June, 1905.

Susquehanna Contracting Co.

A Feb. 28, 1905

THIS AGREEMENT, made by and between CHARLES D. PULLEN, of the City of New York, party of the first part, and GEORGE K. McGAW, JAMES H. HARLOW, and M. H. HOUSEMAN, of Baltimore, Maryland, parties of the second part;

W I T N E S S E T H :

THAT, WHEREAS the said party of the first part has been engaged for sometime in efforts to acquire the ownership and control of certain lands, water rights and easements located in and along the Susquehanna River, within the Counties of York and Lancaster in the State of Pennsylvania and in the Counties of Harford and Cecil in the State of Maryland, with a view to causing the same to be conveyed, transferred and assigned to a suitable corporation, and thereupon cause the stock and bonds of such corporation to be financed in order to pay for said lands and other properties and to cause the same to be developed by the construction and establishment of one or more hydro-electric works thereon, within and along said river, for the benefit of the stock- and bondholders of said corporation; and

WHEREAS the said parties of the second part hereto own and control a portion of the said lands, water rights and easements necessary to be acquired for said project, which they have agreed to convey, transfer and assign to a proper corporation in order to carry ont said enterprise, on terms and conditions as hereinafter set forth; and

WHEREAS the said party of the first part claims the ability on his part to acquire upon reasonable terms, for such corporation, the ownership and control of all the lands and other properties now owned and controlled by Cary T. Hutchinson and his associates in and along said River in Pennsylvania, and also all of

the lands and other properties owned and controlled by B. Harvey Welch and his associate Stockholders, in the Susquehanna Power Company, and located in and along said River in Maryland, whether the title papers to said last mentioned necessary lands and properties now stand in the name of the said Susquehanna Power Company or otherwise;

NOW, THEREFORE, THIS AGREEMENT FURTHER WITNESSETH:

THAT for and in consideration of the premises and of the sum of One Dollar by each party to the other paid, the receipt whereof is hereby acknowledged, it is agreed by the parties hereto as follows: That if the said Pullen is successful in his efforts to combine under one united ownership and control all of the necessary lands, water rights, easements and properties located within and along said Susquehanna River as now contemplated, at any time before the first day of July 1905, thereupon the parties of the second part hereby agree to sell, convey, transfer and assign to such proper corporation as he, the said Pullen or his assigns may direct, all the lands, water rights, easements and properties now owned by the said parties of the second part jointly or as individuals, and located in and along the said Susquehanna River, in consideration of the payment of the full sum of Five Hundred Thousand Dollars ($500 000.) in cash and One Million of Dollars ($1 000 000.) par value of the stock in the united or controlling corporation which is to be ~~organized and~~ used for the carrying out of said project; said lands and property which are to be so conveyed, transferred and assigned by the said parties of the second part being more particularly designated as follows:

a. All of the Capital Stock at that time issued and outstanding of the Susquehanna Canal and Power Company, a corporation of Pennsylvania, which owns

-2-

and controls the canal and water power rights thereunto belonging, extending along the western bank of said Susquehanna River between Wrightsville, Pennsylvania, and the Maryland and Pennsylvania State Line, a distance of Thirty (30) miles, more or less.

b. All the canal rights and property of the Old Tide-Water Canal Company in Maryland now held by Geo. K. McGaw and James H. Harlow in trust for said Susquehanna Canal and Power Company, being the canal lands and property extending along the West bank of the Susquehanna River from the Maryland and Pennsylvania State Line to Havre de Grace, Maryland, a distance of Fourteen (14) miles, more or less.

c. All of the Capital Stock issued and outstanding of the "Proprietors of the Susquehanna Canal" in Maryland, a corporation owning and possessing the canal lands and property, including the special and exclusive water power rights granted to said corporation by several special Acts of the General Assembly of Maryland, which said Canal lands and property extend within and along the Eastern shore of said Susquehanna River a distance of Nine (9) miles, more or less.

d. Four Hundred (400) Shares of the Capital Stock of the Conowingo Land Company of Cecil County, out of a total issue of Six Hundred (600) Shares, which carried the control of all that certain tract of land located in Cecil County, Maryland, containing Eight Hundred and Fifty (850) Acres, more or less, and having a frontage of about Six Thousand Two Hundred (6 200) feet along the east shore of said Susquehanna River.

And also all the lands, islands, river bed and shore-rights now owned or controlled by said Harlow and McGaw, whether by deed in fee or release or under contract of option or otherwise.

f. That the said McCaw and Harlow, by reason of their ownership and control of a majority of the Capital Stock of the Conowingo Bridge Company, hereby agree to cause the said Bridge Company to co-operate in any reasonable manner with any such water power company, in connection with the construction, operation and maintenance of its hydro-electric works, and they further agree with the said Pullen that he shall have the option, until July 1st, 1905, to purchase all of the Stock which they now own in said Conowingo Bridge Company, which is more that a majority, at the price of Twenty Dollars ($20.) per Share; provided that the purchase of the properties are made as herein contemplated.

g. The said parties of the second part further agree to at once cause to be made a map showing the River frontage of all the lands and properties now owned and controlled by them, and which they have hereby agreed to sell, convey and transfer as aforesaid, and they will also cause to be shown on said map such other lands and properties lying in and along the said River, located between the lands and properties of the said Hutchinson and others on the North, and the said Welch and others on the South, which may be deemed necessary to be acquired by said Pullen from the various owners thereof, for the purposes of carrying out the said project; and in this connection the parties of the second part further agree to co-operate with and assist the said Pullen in negotiating for and acquiring any of said lands and properties, whenever they may be able to aid him in that behalf.

And the said Pullen, party of the first part hereto, hereby agrees to continue to devote his best efforts and energies to the consummation of the said plans for the carrying out of said project, and in that connection to co-operate with the parties of the second part hereto.

It is further understood and agreed that if the said project has not been carried out to the extent of the conveyance, transfer and assignment of all of the said lands and properties by the said parties of the second part hereto, and the receipt by them of the money and Stock in payment therefor, as contemplated to be made and paid, on or before July 1st, 1905, and if in the meantime material progress has been made by the parties hereto towards the completion of the things to be done and accomplished under this agreement, and if an extension of time, beyond said first day of July, 1905, is required in order to enable the said Pullen or his assigns to carry out the terms of this Agreement, then upon the written request so to do made by the said party of the first part or his assigns, together with the payment therewith to the parties of the second part hereto of Twenty Per Cent. (20%) of the full cash price herein named, being One Hundred Thousand Dollars ($100 000.), thereupon an Agreement in writing granting an extension of Ninety (90) days will be given by the parties of the second part to the said party of the first part, and if any other or further like extension of time be so required and requested and granted in writing, a like amount of money shall be paid therefor; It being further understood and agreed that if any such extension or extensions of time are so granted, the money paid from time to time therefor shall be applied to and credited on account of the purchase price named in this Agreement, but in the event of the failure by the said party of the first part, or his assigns, to make and complete the full and final payments of the said Five Hundred Thousand Dollars ($500 000.) of purchase money to the said parties of the second part, on or before December 31st, 1905, then and thereupon the entire sum of money theretofore paid for extensions and otherwise, is forfeited, to the said parties of the second part, and the right, title and possession of any and all lands, properties and stock, or other interests therein, which may have been previously conveyed, transferred or assigned

by them under this Agreement, shall likewise be forfeited and returned to and vested in the said parties of the second part, and thereupon this Agreement shall be null and void.

It is further understood and agreed that the payment and delivery of the One Million Dollars ($1 000 000.) of Stock to the parties of the second part by the party of the first part, shall be waived until the said lands and properties have been conveyed, transferred and assigned, under this Agreement, as aforesaid, or otherwise the time for payment and delivery of said Stock shall be extended until such time as Stock of such controlling corporation is ready to be issued to other persons as Stockholders therein.

This Agreement shall be binding upon the heirs, executors, Administrators, successors and assigns of the respective parties hereto.

WITNESS the hands and seals of the persons herein named as parties of the first and second parts hereto, respectively. "Dated Feby 28th 1905"

"B"

MEMORANDUM OF AGREEMENT made this Twenty first day of March A. D. 1905, by and between CHARLES D. PULLEN, of the City of New York, in the State of New York, hereinafter called the party of the first part, and B. HARVEY WELCH and C. WILLIAM WODDROP, individually and trading as Woddrop & Welch, of Hughesville, in the State of Pennsylvania, L. H. WODDROP, SAMUEL MASON, HENRY W. STOKES, JONATHAN EVANS, individually and as Trustee, and JOEL H. DeVICTOR, all of the City of Philadelphia, in the State of Pennsylvania, THOMAS H. SAVERY, WILLIAM H. SAVERY and PUSEY & JONES COMPANY, of Wilmington, in the State of Delaware, being stockholders of the Susquehanna Power Company, hereinafter called the parties of the second part, WITNESSETH, that

WHEREAS, the said Charles D. Pullen is engaged in acquiring the ownership and control of certain lands, water-rights, easements, etc., in and along the Susquehanna River, from McCaul's Ferry, in the State of Pennsylvania, to tide water in the State of Maryland, with the view of having the same conveyed, transferred and assigned to a corporation hereafter to be selected by him.

AND WHEREAS, the said Susquehanna Power Company is the owner of a certain portion of said lands, water-rights and easements in the State of Maryland, near Conowingo, necessary to be acquired in connection therewith.

AND WHEREAS, the said party of the first part has represented to the parties of the second part that he has arranged to acquire all the following properties:

(a) Property known as the McCaul's Ferry Development, owned and controlled by Carry D. Hutchinson and others.

(b) All the property owned and controlled by George K. McGaw, James H. Harlow, George R. Harlow, M. H. Houseman, the

Conowingo Land Company, the Susquehanna Canal Company, the Tide Water Canal Company, the Old Maryland Canal Company, both in Maryland and Pennsylvania.

(c) And also all the property owned and controlled by the parties of the second part.

NOW THIS AGREEMENT WITNESSETH,

FIRST. That for and in consideration of the premises and of the sum of One dollar, by each party to the other in hand paid, the receipt whereof is hereby acknowledged, the parties of the second part, for the consideration hereinafter mentioned, hereby agree to sell, assign and transfer to the party of the first part all their capital stock of the said Susquehanna Power Company standing in the names of the several parties of the second part on the books of said Company at the date and time of this agreement, as follows:

NAME:	SHARES:
Woddrop & Welch,	1887
B. Harvey Welch,	5
C. William Woddrop,	5
L. H. Woddrop,	3
Joe' H. DeVictor,	100
Henry W. Stokes,	388
Jonathan Evans,	333
Pusey & Jones Company,	499
Samuel Mason,	321
Thomas H. Savery,	165
William H. Savery,	1
Jonathan Evans, Trustee,	4
Hanson H. Haines, Henry W. Stokes and Samuel Mason,	1
	3612

And the said party of the first part hereby agrees to purchase and pay for the said stock at its par value, to wit, the sum of One hundred dollars per share, on or before July 1st, 1905.

SECOND. It is further agreed that in case the party of the first part is, for any reason, unable to pay for said stock, in full, on or before July 1st, 1905, and shall tender and pay in cash to the parties of the second part at least Twenty per cent. of the par value thereof, then this agreement shall be extended for a period of ninety days from July 1st, 1905, and in the event of any further extension being asked for, an additional Twenty per cent. of the par value of said stock shall be paid to the parties of the second part and applied by them on account of the purchase thereof, and so on upon the same conditions until three extensions of ninety days each have been made, provided, however, that the party of the first part shall pay legal interest to the parties of the second part on all unpaid purchase money on and after July 1st, 1905. And in the event of the failure of the party of the first part to pay the balance on said stock at the expiration of the third extension as aforesaid, then all payments made by him on account of said stock shall be forfeited to the parties of the second part as liquidated damages, and this agreement shall be considered cancelled and of no effect.

THIRD. It is further agreed that the title or titles to the properties owned by the said Susquehanna Power Company, or which may be in the name of any individual but understood by the parties of the second part to comprise the land or lands belonging to the Susquehanna Power Company, as shown by their property maps, are to be good and marketable and clear of all incumbrances

FOURTH. It is also understood and agreed that all rights or easements owned by the said Susquehanna Power Company upon and

along said river as aforesaid, are included in this agreement of sale.

FIFTH. It is further agreed that the stock of the said Susquehanna Power Company now held and owned by the said parties of the second part, shall be placed in the hands of Joel H. De Victor, of 505 Chestnut Street, in the City of Philadelphia, to be held IN TRUST by him for all parties in interest, named in the within agreement, and further IN TRUST to carry out all the provisions of this agreement, and that all payments of money provided for herein shall be made to the said Trustee IN TRUST to be applied by him as follows:

(a) In the payment of taxes chargeable upon the property of the said Susquehanna Power Company.

(b) In payment of the principal and interest of any and all obligations legally owing by said Company of record or otherwise, when so directed by a majority of said stockholders.

(c) And the balance to the several stockholders named herein as the parties of the second part, or to such person or persons as may be designated by them as justly and legally entitled to receive the same, in proportion to their stockholdings in said Susquehanna Power Company.

SIXTH. It is further agreed that the parties of the second part shall at once loan to the party of the first part all maps and briefs of title now in the possession of the said Susquehanna Power Company relating to its said property, for the purpose of aiding in the investigation of the title thereto.

SEVENTH. It is further agreed that the sale of the stock of the parties of the second part is conditioned upon the securing by the party of the first part, by purchase, within the time

limit of this agreement, the following properties, to wit: All the property, or as much thereof as may be agreed upon by them, on the Susquehanna River and adjacent thereto, owned and controlled by George K. McGaw, James H. Harlow, George R. Harlow, M. H. Houseman, the Conowingo Land Company, the Susquehanna Canal Company, the Tide Water Canal Company, the Old Maryland Canal Company, both in Maryland and Pennsylvania.

EIGHTH. It is further agreed and understood that in case settlement is not made for said stock on or before the First day of July, 1905, nor extensions made at the dates and times herein provided, then the said Trustee shall, within fifteen days after any failure on the part of the party of the first part to comply with the provisions of this agreement, return said stock so held by him IN TRUST as aforesaid to the several owners thereof, or to such person or persons they may designate to receive the same.

NINTH. It is further agreed that in case any of the stockholders of the Susquehanna Power Company shall fail or refuse to sell their stock to the party of the first part, such failure or refusal shall in no way affect or interfere with the carrying out of all the conditions and provisions herein agreed to be kept and performed by the parties hereto who have executed the same, provided, however, that upon the delivery of their said stock to the party of the first part and settlement therefor by him, the sum to be received by each of the parties hereto shall be par value for the number of shares of stock standing opposite his or their name or names herein, less the pro rata of the indebtedness of the said Company, which shall be distributed pro rata against the entire capital stock, and to determine such indebtedness an accurate and complete itemized list thereof verified under oath shall be produced and attached to this agreement

at the time of settlement, which said indebtedness is approximately $125,000.00.

TENTH. It is further agreed that all conditions herein contained or agreed to be kept and performed by the said parties hereto, shall extend to the heirs, Executors, Administrators, successors and assigns of the said parties of the first and second parts.

WITNESS the hands and seals of the persons herein named who compose the parties of the first and second parts the day and year first above written.

C IV

THIS AGREEMENT, Made this Fifth day of April, A. D., 1905, by and between CHARLES D. PULLEN, of the City of New York, party of the first part and JAMES H. HARLOW, GEORGE K. McGAW, and M. H. HOUSEMAN, of Baltimore, Maryland, parties of the second part,

WITNESSETH:

THAT WHEREAS the said party of the first part, by virtue of a certain Agreement made and entered into by him with the said parties of the second part under date of February 28th, 1905, has purchased and acquired certain lands, water-rights and easements located in and along the Susquehanna River within the States of Pennsylvania and Maryland, for the uses and purposes as in said Agreement stated and set forth, a copy of which said Agreement is hereto attached and referred to as a part hereof, marked "A".

AND WHEREAS the said Pullen has also made and entered into a certain other Agreement, dated March 21st, 1905, with B. Harvey Welch, et al., as Stockholders in the Susquehanna Power Company, a corporation of the State of Maryland, under which he agreed to acquire by purchase the capital stock of said Susquehanna Power Company, and thereby own and control certain other lands, water-rights and easements lying in and along the said Susquehanna River, belonging to said Power Company, within the State of Maryland, as in said Agreement is more fully stated and set forth a copy of which Agreement is likewise hereto attached and referred to as a part hereof, marked "B".; and

WHEREAS the said parties of the second part hereto own and control the capital stock of the Susquehanna Canal and Power Company, a corporation which owns and is possessed of the canal property, water-rights and easements connected therewith, extending along the western bank of said River between Wrightsville,

Pennsylvania and the Maryland and Pennsylvania State Line, formerly known as the Susquehanna Canal; and

WHEREAS the said parties of the second part hereto now propose to cause to be increased the capital stock of said Susquehanna Canal and Power Company up to One Million Five Hundred Thousand Dollars ($1 500 000.), the same to be hereafter issued in Thirty Thousand (30 000) shares of the par value of Fifty Dollars ($50.) each, for the purpose, inter alia, of acquiring or causing to be acquired from said Pullen and others, for and on behalf of said Canal and Power Company, certain additional lands, canals, canal properties, water-rights, franchises and easements located in and along said river, including those mentioned and described in said two Agreements marked "A" and "B", as therein proposed to be purchased and acquired by said Pullen from Harlow, et al. and from Welch, et al., respectively; and also to hereafter acquire or organize proper corporations with charters possessing the necessary franchises and rights for the making of one or more Hydro-Electric developments on said River; and

WHEREAS to that end the said Pullen has agreed and is willing to sell, assign, transfer and set over to the said Susquehanna Canal and Power Company, all of the lands, water-rights, franchises and easements and other property, including the capital stock of the said Susquehanna Power Company and other Companies and corporations purchased and acquired or to be acquired by him, including all his rights under and by virtue of said two agreements heretofore marked and designated as "A" and "B", for the consideration as hereinafter set forth:

NOW, THEREFORE, THIS INDENTURE WITNESSETH:

That for and in consideration of the premises and of the sum of One Dollar by each party to the other paid, the receipt whereof is hereby mutually acknowledged, it is agreed by the parties hereto as follows:

FIRST: The said Pullen hereby agrees and binds himself that upon the signing of this Agreement by the parties hereto, he has thereby sold, assigned, transferred, set over and delivered to the Susquehanna Canal and Power Company, its successors and assigns, all his rights, interests and claims, granted to and possessed by him under the said two agreements hereinbefore referred to as a part hereof, and designated as "A" and "B", respectively.

SECOND: The said parties of the second part hereto will proceed without unnecessary delay, under the advice of Counsel to cause the capital stock of the Susquehanna Canal and Power Company to be increased to an authorized issue of Thirty Thousand (30 000) shares of the par value of Fifty Dollars ($50.) per share.

THIRD: The said parties hereto will co-operate with each other promptly in causing to be sold, conveyed, transferred, assigned and delivered to or for the use and benefit of the said Susquehanna Canal and Power Company, its successors and assigns all the lands, water-rights, franchises, easements and properties covered by and included in the said agreement marked "A", in consideration of the payment and delivery to and for the use and benefit of said parties of the second part hereto of Ten Thousand (10 000) Shares of the capital stock of said Susquehanna Canal and Power Company, said lands and water-rights, franchises, easements and properties which are to be so sold, conveyed, transferred, assigned and delivered being more particularly described and designated as follows:

All the canal rights and property of the Old Tide Water Canal Company, in Maryland, now held by George K. McGaw and James H. Harlow, in trust for said Susquehanna Canal and Power Company, being the canal lands and property extending along the west bank of the Susquehanna River from the Maryland and Pennsylvania State Line

to Havre de Grace, Maryland, a distance of Fourteen miles more or less.

All of the capital stock issued and outstanding of the "Proprietors of the Susquehanna Canal" in Maryland, a corporation owning and possessing the canal lands and property, including the special and exclusive water power rights granted to said corporation by several special Acts of the General Assembly of Maryland, which said canal lands and property extend within and along the eastern shore of said Susquehanna River a distance of nine miles, more or less.

Four Hundred (400) shares of the capital stock of the Conewingo Land Company of Cecil County, out of a total issue of Six Hundred (600) shares, which carries the control of all that certain tract of land located in Cecil County, Maryland, containing Eight Hundred and Fifty (850) acres more or less, and having a frontage of about Sixty-Two Hundred (6200) feet along the east shore of said Susquehanna River.

And also all the lands, islands, river bed and shore rights, now owned or controlled by said Harlow and McGaw, whether by Deed in fee or Release, or under Contract of Option, or otherwise.

That the said McGaw and Harlow by reason of their ownership and control of a majority of the Capital stock of the Conowingo Bridge Company, hereby agree to cause the said Bridge Company to co-operate in any reasonable manner with the said Susquehanna Canal and Power Company, its successors and assigns, in connection with the construction, operation and maintenance of any such Hydro-Electric works that may hereafter be constructed and maintained on that part of the said Susquehanna River, which will cross over or under or affect the said Bridge of said Company, or the approaches thereto; and they further hereby agree that the said Susquehanna Canal and Power Company shall have the option until July 1st, 1905, to purchase all of the Stock which they now own in said Conowingo Bridge Company, which

is more than a majority, thereof, at the price of Twenty Dollars ($20.) per share;

And it is further understood and agreed by and between the parties hereto that the Tide Water and Susquehanna River Railroad Company, a corporation of the States of Maryland and Pennsylvania, which has heretofore caused to be located its proposed railroad tracks on, over and along portions of the lands and properties of the said Susquehanna Canal and Power Company, and the lands and property formerly owned by the Old Tide Water Canal Company on the western side of said River between Havre de Grace, Maryland and Wrightsville, Pennsylvania, will so construct, maintain and operate its said railroad so that it shall not interfere with the use of said canal property as a transportation canal, when reconstructed, widened, deepened, enlarged and otherwise improved and established for navigation purposes, nor with the development, establishment and use of water power plants, water works, Hydro-Electric works and other works for the storage, transportation, conveyance and supply of water and water power, or structures connected therewith, which may be developed and established in and along said Susquehanna River by the said Susquehanna Canal and Power Company, or its Lessees, Successors or assigns.

FOURTH: The said Pullen, party of the first part hereto is hereby granted the right and option, until the first day of July, 1905, to purchase and acquire the shares of the capital stock of the Susquehanna Power Company, together with all of the lands, water-rights, franchises and easements owned by said Company, as described and optioned to him under agreement "B", as aforesaid, and to sell, assign, transfer and deliver the same to and for the use and benefit of the said Susquehanna Canal and Power Company, its successors and assigns, free and discharged from all debts and liens, claims and incumbrances whatsoever, and thereupon the said Pullen shall be entitled to receive as full consideration and in full payment therefor, the delivery in trust (as hereafter designated) for the use and benefit of

himself, his heirs and assigns, Ten Thousand (10 000) shares of said capital stock of said Susquehanna Canal and Power Company, or in the event that he is unable to deliver that portion of said capital stock of said Susquehanna Power Company now owned and held by H. H. Haines, and not included in said option covered by Agreement "B", then two shares of said Susquehanna Canal and Power Company's Stock shall be withheld and not paid and delivered to said Pullen for each share of the said Haines' stock which he fails to acquire and deliver to said Canal and Power Company.

It is further understood and agreed by and between the parties hereto that they will co-operate with each other during the life of this Agreement, in all steps taken in the promotion of the interests of the present and future Stockholders of the Susquehanna Canal and Power Company, and in the event that the said Pullen has not, on or before the 15th day of June, 1905, acquired and delivered the stock and property of the Susquehanna Power Company to the Canal and Power Company, he hereby Agrees to make to said Canal and Power Company a report in writing, setting forth in full the then status of his negotiations for the money with which it is his purpose, under this agreement, to pay for the capital stock of the Susquehanna Power Company, in order to enable him thereby to deliver the same over to the ownership and control of the Susquehanna Canal and Power Company, as is intended to be done under the option granted to him by this Agreement.

FIFTH: It is further understood and agreed that the capital stock of the Susquehanna Canal and Power Company, when increased and issued as provided for under this Agreement, shall be placed in the hands of a Trustee or Trustees, to be hereafter selected and designated, for the purpose of acquiring, uniting, and holding the valuable properties, franchises, water-rights and easements of said Company under one control and management, and thereby enable all parties in interest to cause to be effectively carried out their purposes and intentions for the estab-

lishment of a number of Hydro-Electric works in and along said Susquehanna River.

THIS AGREEMENT shall be binding upon the heirs, executors, administrators, successors and assigns of the respective parties hereto.

WITNESS the hands and seals of the persons herein named as parties of the first and second parts hereto, respectively; dated the day and year aforesaid.

witness the signatures of the parties hereto

Memorandum on River Situation, April 1905

Cont. Trust Co.

RECEIVED

APR 4 1905

ANS'D

TENTATIVE MEMORANDA.

Charles D. Fullen is the owner of two options to purchase property on the Susquehanna River, one know as the Peach Bottom and the other as the Conewingo property.

The Continental Trust Company and Alex. Brown are owners of other parts of the River and of other interests in connection therewith.

Certain other properties along the River must be purchased.

It is desirable that the properties be purchased for, and the options be exercised for and in the name of, a corporation instead of an individual.

The tentative agreement made between Houseman, Harlow and Quay must be definitely agreed upon and settled. It is desirable that this be done between corporations instead of individuals.

The Harrisburg agreement finally arranged, the Hutchinson development defined as to its boundaries, the entire of the River to be dealt with in the name of a corporation. The proposed corporation to be used will be a clearing holding Company. All of its stock to remain in the hands of a Trustee. Stockholders in said Company will participate in the future profits of promotion.

The proposal is as follows:

Use the Susquehanna Canal & Power Co Company, which is now owned and represented in the options above named, increase the Stock of said Company to one million and a half dollars. The Officers and Directors of said Company will be the Stockholders who will be few in number. These will select a Trustee, which will be, for instance, the Colonial Trust Company or some other such institution. Or if it is thought best, an individual may act as Trustee. The Trustee will receive with the Trust detailed instructions as to

ownership. (None of the Stock will be delivered except to the Trustee).

Pullen to agree to transfer or assign to said corporation both of his options now held by him. Corporation agrees to purchase the Peach Bottom and all other properties named in the option signed by McGaw, Harlow, Houseman and Pullen, paying therefor $.; and Pullen to agree to assign said option to the said corporation.

Corporation agrees to purchase from Pullen the options on the Conowingo and the Harlow or Walch properties, paying therefor $50 000. in its stock.

Corporation to set aside $115 000. of its Capital Stock to purchase the interest now owned by the Continental Trust Company and Alexander Brown as proposed by Mr Warfield in N.Y.

Corporation to issue to Patrick Calhoun $50 000. of its capital stock for services rendered.

All of the foregoing will amount to $1 115 000. There will then remain in the Treasury of the Corporation $385 000. of its capital stock. It is proposed to use the stock remaining in the Treasury for the purpose of acquiring the assistance of able Counsel, as well as to acquiring of other lands along the shores of the River and perhaps the purchase of charters which it may be deemed desirable to own.

The Stock in the Treasury of the Company will also furnish new money when required.

McGaw, Harlow and Houseman contingent to have control in the Board of Directors.

The Trustee need not be given the power to vote the Stock.

It is thought the foregoing cleans up the situation and places all the interests under one head, (the Directors of the corporation) and that the corpor-

ation owning what are known as the Harlow properties and the Warfield-Brown properties, having stock or cash to purchase the additional necessary properties, and owning the op ion to purchase the Welch properties, will be in a strong position for carrying out any attempt, or desired plan/[redacted]

Regarding the option on the Welch property, it runs to July 1st, with no provision for payments until July 1st; and it appears that having three month in which to negotiate, and having cleaned up the entire of the River, with the settlement of the Harrisburg agreements and the taking over of all these other interests [redacted] the actual cash to be paid [redacted], as it now stands in the Welch option being about $296 000., [redacted] this can be arranged either by paying the parties to the option in stock, or by raising the necessary money to carry out the option.

The understanding which we have of the movements of the Hutchinson development indicate that if no time is lost that we are in a good position to carry out our own development on the Peach Bottom, and in the raising of any funds for this purpose the Welch proposition will be easily taken care of.

If, however, on July 1st, nothing has been accomplished other than this general organization of all interests, there is only 20% of the purchase price on the Welch option due to be paid at this time, for which we acquire 90 days' extension. And its seems to be clearly evident that a situation such as this will be for all interests much stronger than any other that could be obtained at the same price. The present owners being the corporation managers.

There seems to be no reason why this corporation should not continue to be a holding Company, and when the money for a development is raised or a sale of the development property contemplated, it can dispose of it in parcels instead of as a whole. It is in this way it would appear that the profits accruing would be much larger than from any heretofore contemplated action.

Letter From Harlow-McGaw Proposing Consolidation With Harvey Fisk & Sons

M. H. HOUSEMAN,
ATTORNEY AT LAW,
No. 3 E. LEXINGTON STREET.

BALTIMORE, MD. April 18th, 1905.

Messrs. Harvey Fiske & Sons, Bankers,
New York, N. Y.

Gentlemen:

A number of printed copies of a plan or underwriting agreement have been submitted to some of our friends in Philadelphia and Baltimore within the past two weeks. This agreement bears date March 25th, 1905, and purports to be between Subscribers on the one part and Harvey Fiske & Sons, Bankers, on the other part. The corporation named therein is "Susquehanna Power Company", which purports to be capitalized with $5,000,000 of Common Stock, $5,000,000 of Preferred Stock, and $10,000,000 of 30 year 5% Gold Bonds, etc.

A mistake seems to have been made in this matter by some person to us at present unknown, as the name given therein is the same as that of one of our Water Power corporations which has been established for the past five years on the Susquehanna River in Maryland, where it owns extensive property and water-power rights.

A number of Bankers and Brokers, representing investors in Philadelphia, Wilmington, Baltimore and some of the other Cities and towns in Pennsylvania were inclined to subscribe to this enterprise, thinking it was a part of the comprehensive project which has been worked out on the Susquehanna River, under the ownership and direction of the Susquehanna Canal and Power Company.

Under the plans of the Susquehanna Canal and Power Company its canals extending along the Susquehanna River southward from Columbia and Wrightsville, Pa. to the head of Chesapeake Bay, are being widened, deepened, enlarged and otherwise improved, so as to extend the tide-water navigation of the Chesapeake Bay northward along the Susquehanna River to the large storage dam or pool at Columbia, Pa., where docks and landings will be established, and direct connections made with the main line of the Pennsylvania Railroad System, as well as with the Reading Railroad System. In connection with this general slackwater in navigation improvement, there has also been adopted a plan for the development of the more than 200 feet of fall in the river for Hydro-Electric purposes, all of which is described more in detail on a small sketch or plan, and in a communication from James H. Harlow, President and Chief Engineer of the Susquehanna Canal and Power Co., under date of April 6th, 1905, which I enclose herewith for your information.

This comprehensive project for the development of the extensive water power of the Susquehanna River has, as you will see, been carefully worked out under the supervision of Mr. Harlow, in connection with this important canal or water-way extension. These plans show that 250,000 Electrical H.P. can be developed at the Five powerhouses, as proposed, a large part of which current is expected to be utilized in the City of Baltimore, Md. and vicinity, as well as in Wilmington, Del. and Chester and Philadelphia, Pa. Negotiations are pending with the Baltimore & Ohio Railroad Company as well as with the Pennsylvania Railroad Company, in connection with the utilization of a part of this current for operation of their respective railroads through the tunnels in the City of Baltimore. It is also in contemplation to supply power for use at their terminals within the adjacent territory, and for suburban use from Philadelphia, from Baltimore, and from Washington, D. C.

In connection with investigations which the writer has been working out with the Westinghouse people, we find that the proposed underground railways and terminals of the Pennsylvania Railroad System in New York, as well as the demand for electric

M. H. HOUSEMAN,
ATTORNEY AT LAW,
No. 3 E. LEXINGTON STREET.

Messrs. H. F. & Sons, No. 2. 4/18/05 BALTIMORE, MD.

light and power purposes generally within the City of New York, bring it entirely within the probabilities that a large portion of the current and power from the Susquehanna River can be used there to advantage.

It is also proper to suggest to you that a large amount of that power will be used for industrial works along the River, the same as are now established for diversified uses in connection with the Niagara Falls Power developments.

It is further proposed by my clients to establish a high-class electric railway on, over and along the old canal towing path on the western shore of the River for use as a connecting railroad between these various industrial works and the Pennsylvania and B. & O. Railroads, where they cross the River at Havre de Grace, Maryland, and also with the main line of the Pennsylvania Railroad system at Columbia, Pa., and likewise with the Reading Railroad system, thus affording first-class Railroad facilities, as well as tide-water navigation for the handling of raw materials to those works and the finished product to the general markets.

I am writing this letter somewhat in detail to your house, for the reason that your present interests on the river are apparently in conflict with our plans, which were being worked out on the river long before Dr. Hutchinson had acquired any property rights there. We feel sure that the merits of the enterprise are worthy of very careful consideration and investigation by your house, with a view to harmonizing and adjusting the conflicting plans for the development of the entire water power of the River

The writer therefore respectfully asks that someone connected with your house read over carefully these papers, and as he expects to be in New York the latter part of this week, will take the liberty of calling upon you, and if by that time you have determined that this matter is not of sufficient interest to warrant a conference, he would be pleased to have you return the papers to him. Otherwise, if you desire to join with him and his clients in an effort to adjust this unnecessary complication, he desires to offer his services to that end.

Respectfully yours,

M. H. HOUSEMAN.

JAS. M. HARLOW,
PRESIDENT AND CH'F ENGINEER.

GEO. K. McGAW,
TREASURER.

CHAS. R. McCONKEY,
SECRETARY.

SUSQUEHANNA CANAL AND POWER COMPANY, -15

ROOM 207, No 2 PLEASANT STREET.

BALTIMORE, MD. April 6th, 1905.

Taken fr McCall Ferry Co. - Copies of 20 1905 - 1909

Mr. M. H. Houseman,

Counsel for Susquehanna Canal and Power Company,

Baltimore, Md.

Dear Sir:--

I desire to submit for consideration a brief history, covering the general plans of the Susquehanna Canal and Power Company for the development of the water power on that portion of the Susquehanna River between Wrightsville and Columbia, Pennsylvania, on the north, and Tide Water in Maryland, on the south; and also the relation of the same to the present McCall's Ferry project, together with the serious damages which will accrue to the vested interests of the Canal and Power Company and others in the event that the McCall's Ferry dam is actually constructed at the point of its proposed location.

The proposed works, power-houses and plants of the Susquehanna Canal and Power Company were all located upon the River pursuant to detailed surveys and soundings, etc., prior to the date of the so-called "Harrisburg Agreement", which was made and signed in the month of April, 1903.

The Attorneys and Agents who arranged this Agreement on behalf of Dr. Cary T. Hutchinson and others, had been engaged during the entire session of the Pennsylvania Legislature in endeavors to obtain legislation repealing the Charter of the Susquehanna Canal and Power Company, and also to secure special rights, powers and privileges to enable them to appropriate to their own use by condemnation proceedings the property and rights of said Canal and Power Company and its associate corporations, notwithstanding the fact that these plans had been prepared and the locations made, long prior to the time when Dr. Hutchinson and his associates had purchased or acquired any property on the river.

A brief statement of the property rights and plans of the Canal and Power Company may be made as follows:

(1). The total fall of the Susquehanna River between the top of the old Columbia Dam of the Canal and Power Company and Tide Water in Maryland, is 231 feet.

(2). The Canal and Power Company has the legal right to raise the old dam to about El. 233 feet above Tide.

(3). Our plans for the development of the water power of the river assume that there would be some losses in this head between Columbia and Tide Water in connection with the several developments, and that possibly not more than 210 or 215 feet of this fall can be utilized.

(4). It was deemed advisable to divide 200 feet of this fall into five developments of an average of 40 feet each, with a possible head of say 45 feet at two of said power houses.

Mr. H. H. H. No. 2. 4/6/05/

(5). Then, at these locations of the several dams, while we would develop under a nominal head of 40 feet, the maximum head upon our wheels during low water may equal about 48 feet, and the minimum head in high water may be cut down to from 32 to 35 feet, all of which can be regulated for a uniform operation by the adjustment of the electrical machinery within the usual 10% allowance above or below the normal.

(6). The location of the five developments have been heretofore made on the ground with plans prepared for construction, as follows:

"A" is the down-stream location, with the power house near the Village of Conowingo, Maryland.

"B" is the power-house location on the westerly side of the River near to the Maryland and Pennsylvania State Line with the dam extending from the eastern shore of the River at the lower end of the Peach Bottom Pool, and diagonally across and down the river to the head-race wall, a short distance above power-house "B"; the tail-race from power-house "B" extending down the river into Maryland, so as to utilize the same water for the operation of the machinery in passing through power-house "A".

"C". The head of the dam for this development extends from the eastern shore of the river, at a point about 3000 feet more or less below McCall's Ferry across the east channel of the river at that point to a chain of islands, thence extending over said islands and over the bed of the river down stream to the head of Road Island, thence with an embankment still down the river through and over Road Island and Upper and Lower Bear Islands, to a point about 4000 feet above the mouth of Muddy Creek on the westerly shore of the river, where power-house "C" will be located, extending between the said embankment and the westerly shore across the head-race or dam thus formed, thence a short tail-race from power-house "C" will discharge the water into the head of the Peach Bottom Pool.

"D" & "E". Power-houses "D" and "E" are designed in combination with a dam extending from the easterly side of the Susquehanna River from a point below "Turkey Hill with the said dam extending across and down the river toward the westerly shore to a point in conjunction with a head-race wall, which head-race wall is continued down the river parallel with the western shore to a point at or near "Lockport", where power-house "E" is located, then with a tail-race embankment from said power-house "E" extending further down stream parallel with the westerly shore of the river to a point a short distance above Shenk's Ferry where power-house "D" is located upon this canal; then with a short tail-race from power-house "D", which discharges the water into Pool "C".

In this manner the five power-house developments have been designed and located in conjunction with the proposed work to widen, deepen, enlarge and otherwise improve the transportation canal of the Susquehanna Canal and Power Company, to permit the passage of vessels between the head of Chesapeake Bay and Columbia and Wrightsville, Pennsylvania, located at the head of the large storage dam or pool above power-house "E", some 40 miles further north than present tide-water navigation; and also, in this connection, the various water-power corporations

Mr. H. H. H. No. 3. 4/6/05/

which have been chartered and organized in the States of Pennsylvania and Maryland have arranged to work in conjunction with the development plans of the Susquehanna Canal and Power Company in the construction of necessary locks around the several dams and power-houses for the passage of vessels, and as you are aware, these several development corporations have heretofore proceeded to acquire by purchase, as well as by appropriation proceedings, necessary lands, water-rights, and easements for their respective power-house developments.

Under this general plan the Susquehanna Falls Power Company of Pennsylvania was organized for the purpose of constructing, owning and operating the power-house and development hereinabove designated as "C", and prior to the "Harrisburg Agreement" of April, 1903, had acquired a large part of the necessary lands, islands, water-rights and easements for that purpose, and proposed to develop its water-power canal in connection with the transportation canal of the Susquehanna Canal and Power Company, and its surveys, soundings and plans had also been worked out in detail and a large expenditure of money had been made and much time had been consumed by its Engineers and Experts in the study and preparation of said plans; and in connection therewith the said Dr. Cary T. Hutchinson, as an Electrical Engineer and Expert for certain New York Bankers, acquired his first knowledge of the proposed development of the water-power of the Susquehanna River sometime prior to 1903, when these preliminary plans were submitted to him at the instance of the said Bankers during their consideration of a proposition for financing the project; and it was sometime thereafter, when Dr. Hutchinson and his associates, having acquired certain lands and water-rights on the river, between the locations of dam and power-house "C" and power-house "D", that the attempt was made in the Legislature at Harrisburg, at the January Session of 1903, to repeal the charter of the Susquehanna Canal and Power Company and to appropriate its property and water-rights as above referred to. This attempt was finally defeated and this expensive contest resulted in the signing of the "Harrisburg Agreement", as a tentative Agreement or plan for the adjustment of the interferences and differences between the prior plans and locations of the Susquehanna Canal and Power Company, the Tide-Water and Susquehanna River Railroad Company and the Susquehanna Falls Power Company on the one part, and such corporation as might thereafter be organized to carry out the alleged plans of Dr. Hutchinson and his associates for a Hydro-Electric development near McCall's Ferry, on the other part. The undersigned and yourself were present at Harrisburg and, acting together, constituted the "parties of the first part" who signed the "Harrisburg Agreement", with Mr. P. P. Quay as "the party of the second part", who at that time purported to represent the said Dr. Hutchinson and his associates, and likewise the corporation to be thereafter formed in their behalf for the purpose of constructing, maintaining and operating the proposed dam and water-power plant near McCall's Ferry, as above mentioned, etc. In this connection I quote from the said "Harrisburg Agreement" as follows:

"The parties of the first part further agree that they will cause, or procure, the Susquehanna Canal and Power Co., by means of lawful corporate action, on its part, to enter into a contract with the party of the second part and his associates, or such corporation as shall hereafter be formed in their behalf for the purpose of constructing, maintaining and operating a dam and

Mr. M. H. H. No. 4. 4/6/05/

(Extract from Harrisburg Agreement Cont.)

water-power plant, about one mile below McCall's Ferry, as before mentioned, in pursuance of which contract, the Susquehanna Canal & Power Co., will consent and agree to the construction, maintenance and operation of such dam and water-power plant, UPON CONDITION, that if the level of the water shall be raised by reason of such dam above that of the present canal, the Susquehanna Canal & Power Co., its successors and assigns, shall have the right of passage for vessels along the route of said canal, and within the pool formed by such dam, and that the persons owning or operating such dam and water-power plant, shall at its or their expense, make provision in accordance with good engineering requirements, for and shall lock or otherwise move vessels in and out of such pool and to the end that the canal and water-way may be successfully operated for transportation purposes. In case any controversy arises at any time or times, with respect to whether or not the provision made for locking or otherwise moving vessels in and out of said pool and past said dam, is in accordance with good engineering requirements, thereupon, either party interested therein, shall have the right to have said controversy arbitrated and upon giving a written notice to the other party with respect thereto, it shall be the duty of each of the parties to select an arbitrator, and the two so chosen shall immediately select a third, and all of such arbitrators shall be disinterested and be civil or hydraulic engineers, of good repute.

"Such arbitrators shall without delay make full investigation with respect to the matter in controversy and the award in writing signed by such arbitrators or a majority of them, shall be binding upon the parties.

"The parties of the first part further agree that they will cause the Susquehanna and Tide-Water Railroad Co., by proper corporate action, to locate its route along the west bank of the Susquehanna River, opposite the pool caused by the erection of the proposed dam at an elevation above the level thereof, and so as not to interfere with the plant or works of the Water-power Company, upon condition that the party of the second part or his associates, or the company owning or controlling the proposed dam, will without further or other consideration, grant unto the said Railroad Company, and its successors and assigns, the right of way for its tracks, through, over and upon the lands now or hereafter belonging to or held in the interest of said water-power company.

"The parties of the first part agree that they will not attempt to construct any dam and will not interfere with the party of the second part, or his associates, at any point between the lower end of the tail-race of the proposed dam (which shall not exceed one mile in length) and Shenk's Ferry and the party of the second part and his associates shall not attempt to construct any dam nor interfere with the parties of the first part, at other places upon said river.

I further deem it proper to suggest that at the time we signed the Agreement in April, 1903, we were both aware that the plans for a water-power development then said to be in contemplation by Dr. Hutchinson and his associates, had been submitted to and disapproved by a number of the best known Hydraulic Engineers

Mr. M. - H. No. 5. 4/6/05/

to be found in this country; and you will no doubt recall that it was with a knowledge of this fact in view, that we caused to be inserted in that Agreement, by the Attorney for Mr. Shay who drew it, the above quoted paragraph, making the provision for submitting the whole question of location and heighth of dam and method of construction, maintenance and operation of the said proposed McCall's Ferry power plant to a Board of Arbitrators, composed of disinterested Civil and Hydraulic Engineers of good repute, before the Susquehanna Canal and Power Company and the Tide Water and Susquehanna River Railroad Company could be called upon to provide the necessary plans and surveys to change the location and grades of the transportation canal and water way of the Canal and Power Company on the one hand and the right of way and railroad tracks of the Railroad Company on the other hand, and this for the very manifest reason, that if such a dam, Fifty (50) feet or more in heighth is actually to be constructed and maintained on the location as now claimed by the McCall's Ferry Company, then it will necessitate very extensive changes of location and grade of these works for a distance of five or six miles or more of both the transportation canal and water way and the railroad, on the western side of the river, and it will also interfere with the present location and grade of the Pennsylvania Railroad on the eastern side of the River, and in the latter connection will cause a general shifting and change of plans for all of the other water-power developments along the river, so as to develop the remaining water power and also prevent their interferences with the Pennsylvania Railroad tracks, as well as with the transportation canal and railroad tracks on the wester. side of the river, throughout the entire distance above and below McCall's Ferry.

I deem it essential also to call your attention in this connection to the fact that the original proposed plans and locations for the works and powerhouses heretofore designated as "A", "B", "C", "D", and "E" have met with the approval of the foremost Hydraulic and Electrical Engineers of the country, and the same when carried out would develop and utilize all of the water-power of the river between Columbia and Wrightsville on the north and Tide-Water on the south, and such plans for the said uniform and comprehensive development would not interfere with and damage the Pennsylvania Railroad on the eastern side of the River, nor with the transportation canal and water-way and railroad locations, as aforesaid, on the western side of the River.

It may also be further suggested that if the water-power of the River is owned, controlled, developed and operated under the uniform system as originally designed and laid out, as above stated, then the large storage pools formed by the dams to be constructed in accordance with developments "B" and "E" could be so utilized as to store and supply the water during the low seasons, and thereby furnish a uniform supply of current and power for distribution, without the necessity of resorting to the expensive construction and maintenance of steam supplemental plants, at least until the entire output of 250 000 electrical H. P., capable of being developed on the river is in actual use, after which time the advisability of supplementation by steam power could be considered, and it seems to me that it might be found advisable to either locate and distribute the steam auxiliary stations at the several centres of distribution and thus save transmission losses, or it might perhaps be found advisable to locate the same in one large central plant at some one point on the river, with proper railroad facilities for the handling of coal and so that it could also be under the more direct management and control of those in charge of the river power plants; and further, by postponing this question of steam installation, the operating Company owning the river power-plants will have by that time learned what kind of a power curve it has to meet, and also how much of its power curve and peak-loads can be supplied from the large storage pools along the River.

Mr. H. H. H. No. 6. 4/6/05/

I call your attention to the fact that the proposed high dam development at McCall's Ferry will entirely obliterate and destroy the usefulness of the works and power house development designated as "C", and it will also very seriously impair the head and fall of the works and power-house designated as "D".

Therefore, one of the questions to be first determined by this Board of Hydraulic Engineers under the arbitration as suggested, will be to determine the extent of the serious damage thus caused to the property and plans originally designed for the Susquehanna Canal and Power Company, in the event that this unnecessary interference and damage is permitted to be done and caused to its developements "C" & "D", as well as the amount of increased cost which will thereby be placed upon all of the proposed power-house developments by reason of their forced change of plans, which will thereby also cause serious interference thereafter with the location, grades, maintenance and operation of the Pennsylvania Railroad for a distance of 40 miles or more on the eastern bank of the river, as well as with the Susquehanna Canal and Power Company's transportation canal, and the Railroad location and grades and right of way of the Tide Water and Susquehanna River Railroad, for a like distance on the western shore of the River.

It would therefore seem that this unnecessary increased cost and damage when added to the cost and damage which will accrue by reason of the total destruction of "C" and the serious impairment of "D", would certainly cause the Bankers and investors to at least hesitate until these questions are determined by competent Engineers as Arbitrators, how this vast water power can best be developed as one uniform system of works, and with the least possible damage to all other vested interests.

I deem it proper to suggest that you are authorized to take the necessary steps for the full protection of our rights in the premises, whether by peaceable negotiations and arbitration, or otherwise, as may become necessary in the premises.

All of which is respectfully submitted.

(Signed) JAMES H. HARLOW,
President and Chief Engineer.

P. S. Since writing the above, I have seen and read over the report made by Mr. Wm. Barclay Parsons, on the proposed McCall's Ferry project, as well as a copy of the Underwriters Agreement alleged to have been prepared and signed, for the financing of said single project, in connection with which it has been stated to me that almost all of the $20 000 000. of securities therein provided for have been appropriated for use by the Bankers and others, in order to secure the necessary money to

Mr. M. H. H. No. 7. 4/6/03/

construct and complete this one Hydro-Electric Works under the construction plans as reported upon by Mr. Parsons.

It is therefore very evident to me that neither Mr. Parsons or the Bankers have made a personal inspection of the Susquehanna River before compiling this report and signing the underwriting agreement, and it is likewise evident that they were not furnished with the full information and data covered by the detailed plans, showing the surveys, soundings and locations of our proposed works and power houses as hereinabove stated and set forth. And indeed it is quite probable that they were not made aware of any of the material facts connected with the property and plans of the Susquehanna Canal and Power Company on the river, and of the unnecessary interference therewith which would be caused by the development of the McCall's Ferry proposition.

I might further suggest in connection with this financial proposition for the disposition of stock and bonds valued at $20 000 000. that we would be entirely willing to undertake the construction and completion of at least three of our proposed developments on the river, with the three power-houses connected therewith, containing an installation of machinery for the production of 50 000 H.P. each, aggregating an installation of 150 000 H.P., for a gross expenditure of less than $20 000 000., and also settle and adjust with the lawful owners of all vested property rights and interests which would be damaged by the building and construction of such works; and we further believe that if Mr. Parsons were made fully aware of our prior plans as above set forth he would join with us in their approval.

(SIGNED) J.H.H.

Agreement for Acquisition of Harlow-McGaw Properties by Susquehanna Contracting Company

A G R E E M E N T, made this 27th day of April, 1905, between GEORGE K. McGAW, JAMES H. HARLOW and M. H. HOUSEMAN, all of Baltimore, Maryland (hereinafter called "Vendors"), parties of the first part, and HARVEY FISK & SONS, Bankers, of the City of New York (hereinafter called "Purchasers"), parties of the second part,

Vendors, in consideration of the agreements of Purchasers hereinafter stated, hereby agree to sell and transfer, make and deliver, or cause to be sold and transferred, made and delivered to Purchasers, or to their nominee or nominees, the following properties, stocks and contracts:

1. All lands, islands, river bed, interests in lands, easements, shore and riparian rights now owned by the Vendors or by any of them within the State of Pennsylvania or Maryland in and along the Susquehanna River from Columbia to Havre de Grace, including all so-called "releases of damages" so owned. Also all the right, title and interest of one Charles R. McConkey under contracts for the purchase of the Burkins tract and John Bair Estate tract, in the district known as "Peach Bottom". A schedule and map showing said properties in detail is hereto annexed marked "A".

2. All the canal rights, property and franchises of the old Tide Water Canal Company, being the canal and property extending along the west bank of the Susquehanna River from the Maryland and Pennsylvania state line to Havre de Grace.

3. All the capital stocks issued and outstanding of the following named corporation of Maryland:

Proprietors of the Susquehanna Canal chartered under Chapter 23 of the Laws of Maryland, A. D., 1783;

and of each of the following corporations of Pennsylvania:

Susquehanna Canal and Power Co.

Susquehanna Falls Power Co.

Susquehanna River Power Co.

Susquehanna Storage Lake and Power Co.

4. Two-thirds of the issued capital stock (being all of that owned by any of Vendors) of the Conowingo Land Company of Cecil County, a corporation of Maryland.

5. A valid agreement duly executed by the Susquehanna Canal & Power Company above named, with the consent of every stockholder thereof, whereby said Company shall consent and agree to the construction, maintenance and operation by the company which makes and issues the bonds hereinafter mentioned as to be delivered to Vendors or by any company which Purchasers may organize or use for that purpose, of a dam or dams and water power plant or plants at any point or points upon the Susquehanna River selected by such Company, and of such character and extent as may be determined upon by it, and to the impounding of, and flooding by, water and other consequences of such construction, maintenance and operation, and whereby said Company shall waive and release all claims of or for damage or expense of any kind to its property or rights by reason of such construction, maintenance or operation; a valid agreement to the same effect, to be executed in like manner and with like consent by the Tide Water and Susquehanna River Railroad Company, a corporation of Penn-

sylvania and Maryland; and a valid agreement to the same effect, to be executed by the Conowingo Bridge Company below named, the latter agreement and consent, however, to be conditioned upon the other party thereto agreeing that in case any such water power development should interfere with the existing bridge or its approaches, then all cost and expense of alteration or reconstruction attributable to such development or its consequences shall be paid by such party.

6. An agreement vesting in Purchasers the same option to purchase all the capital stock of said Conowingo Bridge Company owned or controlled by Vendors, or any of them (being a majority of such stock), that is contained in a certain agreement dated April 5, 1905, between Charles D. Pullen, of the City of New York, as first party, and Vendors as second party.

All Vendors' agreements herein to sell, transfer and deliver, and all transfers and deliveries and instruments thereof, made pursuant hereto, are and are to be subject to the agreement with Charles D. Pullen last above mentioned, a copy whereof is hereto annexed marked "C".

It is understood and agreed that in the case of each company, all of whose capital stock is hereby agreed to be sold and transferred by Vendors, such capital stock shall represent and carry the ownership of all the properties, rights and franchises of such corporation free and clear of lien, incumbrance or debt; and it is further understood and agreed that together with the transfer of such stocks there shall be delivered to Purchasers or their nominees, resignations of all officers and directors of such corporations.

-4-

In consideration of the agreements hereinbefore stated, Purchasers hereby agree, upon being satisfied as to titles, corporate organizations and forms of agreement as hereinafter stated, and subject to the abandonment of the enterprise as hereinafter stated, to pay and deliver, or cause to be paid and delivered, to Vendors at the time hereinafter stated, and upon delivery of everything as hereinbefore provided, (a) $200,000 in money, (b) $250,000 in aggregate principal amount of bonds out of the issue of $10,000,000 in aggregate principal amount described in the "Bond and Stock Purchase Agreement", a copy whereof is hereto annexed, marked "B", and (c) $100,000 in par value of the common stock of the Company so to issue said bonds; and Purchasers further agree, upon such delivery, to assume and perform, or cause to be assumed and performed the aforesaid agreement, copy whereof is hereto annexed, marked "C".

The time and place for delivery and payment hereunder shall be the first day of June, 1905, at the office of Simpson, Thacher & Bartlett in the City of New York.

Vendors are to provide and secure to Purchasers and their attorneys forthwith access to all books and corporate records of the corporations hereinbefore mentioned, and to all briefs and abstracts of title and all other papers and documents pertinent to an inquiry into titles and corporate history, standing and stock issues; and it is understood and agreed that titles to the properties set forth in Schedule A, hereto attached, and the validity of the corporate organizations, franchises and stock issues of the corporations hereinbefore named, shall be satisfactory to Purchasers and their counsel; otherwise the obligations hereof to cease.

It is further understood that if, prior to the consummation hereof, Purchasers should abandon the carrying out of the Plan set forth in said agreement marked B, hereto attached, then all obligations of both parties hereunder shall cease.

It is further agreed that in case the bonds and stock agreed to be delivered by Purchasers to Vendors should not be issued or ready for delivery at the consummation hereof, then Vendors shall accept in lieu thereof the agreement of the Purchasers to cause such bonds and stock to be issued and delivered to them on or before September first, 1905, interest at the bond rate from time of consummation hereof to date from which bonds carry interest, to be paid to Vendors.

IN WITNESS WHEREOF said parties have hereunto set their hands and seals the day and year first above written.

GEO. K. McGaw, (L. S.)

JAMES H. HARLOW, (L. S.)

M. H. HOUSEMAN, (L. S.)

HARVEY FISK AND SONS, (L. S.)

For valuable consideration the undersigned hereby assigns to Susquehanna Contracting Company the foregoing contract, and all right, title and interest of the undersigned therein and thereunder.

Dated, New York, June 14th, 1905.

HARVEY FISK & SONS.

It is further understood that if, prior to the consummation hereof, Purchasers should abandon the carrying out of the Plan set forth in said agreement marked B, hereto attached, then all obligations of both parties hereunder shall cease.

It is further agreed that in case the bonds and stock agreed to be delivered by Purchasers to Vendors should not be issued or ready for delivery at the consummation hereof, then Vendors shall accept in lieu thereof the agreement of the Purchasers to cause such bonds and stock to be issued and delivered to them on or before September first, 1905, interest at the bond rate from time of consummation hereof to date from which bonds carry interest, to be paid to Vendors.

IN WITNESS WHEREOF said parties have hereunto set their hands and seals the day and year first above written.

Geo K McGann (L.S.)
James H Harlow (L.S.)
M H Thomsen (L.S.)
Henry Titus Oertel (L.S.)

of the corporations hereinbefore named, shall be satisfactory to Purchasers and their counsel, otherwise the obligations hereof to cease.

It is further understood that if, prior to the consummation hereof, Purchasers should abandon the carrying out of the Plan set forth in said agreement marked B, hereto attached, then all obligations of both parties hereunder shall cease.

It is further agreed that in case the bonds and stock agreed to be delivered by Purchasers to Vendors should not be issued or ready for delivery at the consummation hereof, then Vendors shall accept in lieu thereof the agreement of the Purchasers to cause such bonds and stock to be issued and delivered to them on or before September first, 1905, interest at the bond rate from time of consummation hereof to date from which bonds carry interest, to be paid to Vendors.

IN WITNESS WHEREOF said parties have hereunto set their hands and seals the day and year first above written.

IT IS HEREBY MUTUALLY AGREED that the time for delivery and payment under the agreement, of which the foregoing is a copy, be, and the same hereby is, further changed from the first day of June, 1905, to the 15th day of June, 1905, at the same place, with the same effect in all respects as if the words "the 15th day of June, 1905" had been written in said contract in the second paragraph on page "4" thereof, in place of the words "the first day of June, 1905."

Dated, June 6th, 1905. Earl L. Gilbert
James N. Harlow
M. T. Heinemann

Harvey Fisk & Sons
by Simpson Thacher & Bartlett
attys.

Above time further extended to and including June 16th 1905

Earl L. Gilbert
James N. Harlow
M. T. Heinemann

Harvey Fisk & Sons
by Simpson Thacher & Bartlett

WHEREAS the aforesaid agreement of sale and purchase dated April 27th, 1905, require the delivery of a consent and release made by the Conowingo Bridge Company, and

WHEREAS the undersigned have not as yet procured the execution and delivery thereof:

NOW THEREFORE, for the same considerations mentioned in the foregoing agreement between the undersigned and Purchaser, the undersigned further agree to cause such a consent and release in the form hereto annexed to be duly and lawfully executed by said Conowingo Bridge Company and delivered to Purchaser on or before July 1st, 1905.

Geo. K. McGaw,
James H. Harlow,
M. H. Houseman.

CONSENT AND RELEASE, made this day of June, in the year one thousand nine hundred and five, by the CONOWINGO BRIDGE COMPANY, a corporation of the State of Maryland, to McCALL FERRY POWER COMPANY, a corporation of the State of Pennsylvania, WITNESSETH:

In consideration of five dollars and other valuable considerations, the receipt and benefit whereof are hereby acknowledged, the Conowingo Bridge Company consents and agrees to the construction, maintenance and operation by said McCall Ferry Power Company, and by any other corporation or corporations authorized so to do by said McCall Ferry Power Company, and by the successors and assigns of them and each of them, of a dam or dams and water power plant or plants and appurtenances, at any point or points upon the Susquehanna River selected, and of such character and extent as may be determined by said McCall Ferry Power Company, or by the corporation or corporations so authorized by it; and further consents to the impounding of water and flooding of any of its property, and to all other consequences of the construction, maintenance and operation of such dams, water power plants and appurtenances, and does hereby waive, release and forever discharge the said McCall Ferry Power Company and every corporation so authorized by it, and the successors and assigns of them and of each of them, of and from all damages, expenses, costs, actions, causes of actions, suits, controversies, claims, demands and liabilities whatsoever, of every kind and nature, both in law and in equity (except the costs and expenses hereafter agreed to be paid by said McCall Ferry Power Company) which

may arise by reason of such construction, maintenance or operation of dams, water power plants and appurtenances in, along or across the said Susquehanna River, or by any thereof.

The said McCall Ferry Power Company, for itself, and for and on behalf of every Company authorized by it to construct or maintain or operate any such dam or dams, or water power plant or plants, hereby agrees that in case any such water power development should interefere with the existing bridge of said Conowingo Bridge Company, or its approaches, then said McCall Ferry Power Company will promptly pay or cause to be paid all costs and expenses of alteration or reconstruction attributable to such development or its consequences.

It is intended that this Consent and Release shall be relied upon by said McCall Ferry Power Company in acquiring properties and rights for such dams, ponds, water power, hydro-electric plants and appurtenances, and the maintenance thereof, and by others in acquiring any such properties with the object of conveying the same to said McCall Ferry Power Company.

IN WITNESS WHEREOF, the said Conowingo Bridge Company has caused its corporate seal to be hereunto affixed, and attested by its Secretary, and these presents to be signed by its President the day and year first above written.

A G R E E M E N T, dated April 27th, 1905, between GEORGE K. McGAW, of Baltimore, Maryland, hereinafter called Vendor, party of the first part, and S. R. Bertron hereinafter called Purchaser, party of the second part.

In consideration of one dollar and other valuable considerations, receipt whereof is hereby acknowledged, Vendor agrees to sell, transfer and deliver, or cause to be sold, transferred and delivered to Purchaser at his option, and for the same considerations aforesaid, all the capital stock of each of the following corporations: The Susquehanna Construction Company of Baltimore City, a Maryland corporation, The Sowego Water & Power Company and Lower Chanceford Water & Power Company, corporations of Pennsylvania, and shares of the capital stock of the Susquehanna Electric Power Company, a Maryland corporation, and shares of the capital stock of the Martic Water & Power Company, a Pennsylvania corporation, said amounts of stock respectively being all of the stock owned or controlled by Vendor or his associates.

It is understood, however, that in case the stock or any thereof of the aforesaid Sowego Water & Power Company is owned by the aforesaid Susquehanna Electric Power Company, then to the extent that such stock is so owned, Vendor shall not be obligated hereby to deliver the same.

Vendor further agrees upon delivery of such stocks as hereinafter provided, to turn over to Purchaser or his

nominees resignations of all the officers and directors of such corporations (except that as to the Susquehanna Electric Power Company the resignations are to be only of a majority of the directors, and of Vendor, such officers as are in his employ), and the corporate books and records thereof.

Delivery of all of the foregoing is to be made at the office of Simpson, Thacher & Bartlett in the City of New York on the first day of June, 1905, provided Purchaser has theretofore notified Vendor of his election to exercise this option.

IN WITNESS WHEREOF, said parties have hereunto set their hands and seals the day and year first above written.

IT IS HEREBY MUTUALLY AGREED that the time for delivery and payment under the agreement, of which the foregoing is a copy, be, and the same hereby is, changed from the first day of June, 1905, to the eighth day of June, 1905, at the same place, with the same effect in all respects as if the words "the eighth day of June, 1905" had been written in said contract in the last paragraph but one thereof in place of the words "the first day of June, 1905."

Dated, May 25, 1905.

Above time further changed to 15th of June, 1905, at the same place.

Dated, June 5th 1905.

SCB-20-8 PGB/MMB

Ex II

May 1, 1905.

George K. McGaw,
James H. Harlow and
O. H. Housman, Esqs.,
Baltimore, Md.

Dear Sirs:

On behalf of Messrs. Harvey Fisk & Sons, parties of the second part to an agreement made with yourselves, as parties of the first part, dated April 27, 1905, we write this letter pursuant to the oral understanding that we should do so, at the interview at which said contract was delivered.

Said contract was so delivered upon the express understanding that a certain other contract of the same date, made by George K. McGaw, as party of the first part, and S. R. Bertron, as party of the second part, was a part of the same transaction, and that the obligation of said Harvey Fisk & Sons under said first mentioned contract are conditioned upon the performance of both the aforesaid contracts; and upon the further express understanding that the two contracts in question cover and agree to transfer all the property interests, whether in or in respect to lands or water rights, or corporate stock or interests, or other rights, useful or valuable in the development of the water power

of the Susquehanna River between Columbia and Havre de Grace, or which might be prejudicial thereto, if not so transferred, which the said parties of the first part in said contracts or any of them or of their associates, now own or control.

As above stated, this letter merely confirms the oral understanding had at the time of delivery, and is sent pursuant to the statement then made by the writer that such a letter would be written and sent.

Very truly yours,

S T & B 55 55

A G R E E M E N T, dated June 15th, 1905, between GEORGE K. McGAW, JAMES H. HARLOW and M. H. HOUSEMAN, all of Baltimore, Maryland, hereinafter called "Vendors", parties of the first part, and SUSQUEHANNA CONTRACTING COMPANY, a corporation of New York, hereinafter called "Purchaser", party of the second part.

W H E R E A S Vendors heretofore made with Harvey Fisk & Sons an agreement of sale and purchase, dated April 27, 1905, a copy whereof is hereunto attached, which agreement has been extended until this date and assigned to Purchaser and is now about to be carried out; and

W H E R E A S it has been agreed that this present agreement shall be made as a part of such sale and purchase.

N O W T H E R E F O R E, in consideration of the premises and for the considerations of said sale and purchase, and to induce the same, Vendors hereby jointly and severally guarantee and agree to and with Purchaser as follows:

1. That Vendors have, and each of them has, good right, title, power and authority to convey and transfer, or cause to be conveyed and transferred, to Purchaser or its nominees, all the lands, corporate stocks and other properties described in said agreement of sale and purchase, which Vendors are conveying or transferring, or which any of them is conveying or transferring, or causing to be conveyed or transferred, to Purchaser or its nominees in carrying out said sale and purchase in form and manner as the same are so being conveyed or transferred.

2. That the Susquehanna Canal and Power Company, all of whose stock is among that being transferred to Purchaser in carrying out said sale and purchase, retains, and shall continue to have until July 1st, 1905, the option that is contained in a certain agreement dated April 5, 1905, between Charles D. Pullen, of the City of New York, as first party, and Vendors as second parties, to-wit, the option to purchase all the stock of the Conowingo Bridge Company, a corporation of Maryland, which on said 5th day of April, 1905, was, or now is, owned or controlled by Vendors or any of them (being a majority of such stock) at the price of twenty dollars per share.

3. That the conveyances and transfers now being made by Vendors or any of them cover and transfer to Purchaser all the property interests in or in respect to lands or water rights or corporate stocks or interests or other rights useful or valuable in the development of the water power of the Susquehanna River between Columbia and Havre de Grace, or which might be prejudicial thereto if not transferred, which the Vendors or any of them or of their associates now own or control.

In consideration of the premises and of the said conveyances and transfers by Vendors, Purchaser agrees:

1. That all transfers and deliveries and instruments thereof made by Vendors or any of them to or for account of Purchaser pursuant to or in carrying out the said agreement of sale and purchase, are and are to be subject to the agreement between Charles D. Pullen and Vendors, a copy whereof, marked "C", is annexed to said agreement of sale and purchase, and Purchaser hereby as-

sumes and agrees to perform the obligations of Vendors under the said agreement marked C.

2. That inasmuch as the bonds and stock forming part of the purchase price to be paid Vendors under said agreement of sale and purchase are not ready for delivery, Purchaser will, on or before September 1, 1905, procure and obtain the same, to-wit, $250,000 in aggregate principal amount of such bonds and $100,000 in aggregate par value of such stock, and transfer and deliver, or cause to be transferred and delivered the same and all thereof to Vendors.

IT IS UNDERSTOOD AND AGREED that the making and delivery hereof does not discharge, extinguish or negative any obligation, agreement or guaranty of any of the parties hereto in, by or under the said agreement of purchase and sale dated April 27th, 1905, or implied by law.

The properties and stocks so being conveyed and transferred to Purchaser, or some of them, are, however, subject to debts, taxes and other matters or defects as set forth in the schedule hereto attached, all of which Vendors are to cause to be paid, discharged and cleared off on or before September 1st, 1905.

All obligations and provisions hereof are binding upon and for the benefit of and enforceable by the heirs, representatives and assigns of Vendors and the successors and assigns of Purchaser.

IN WITNESS WHEREOF Vendors have hereunto in duplicate set their hands and seals, and Purchaser the signature of its President and its seal, attested by its

-4-

Secretary, the day and year first above written.

Geo K McGee L.S.
James H. Hardenbergh L.S.
M. H. Housman L.S.

Susquehanna Contracting Co.
by A. P. Bartleff
President.

Attest.
Geo A Hackley
Secretary.

FOR VALUE RECEIVED the undersigned hereby guarantee to Vendors, their personal representatives and assigns, the performance by Susquehanna Contracting Company of its agreements stated in the foregoing instrument.

Dated, New York, 1905.

Harvey Fisk & Sons

SCHEDULE TO BE ATTACHED TO AGREEMENT DATED JUNE 15, 1905, BETWEEN GEORGE K. McCAW, JAMES H. HARLOW AND M. H. HOUSEMAN, PARTIES OF THE FIRST PART, AND SUSQUEHANNA CONTRACTING COMPANY, PARTY OF THE SECOND PART.

Property of Old Tide Water Canal Company in Harford County, Maryland.

1. Pay proper proportion of any local taxes due.

2. Furnish information about leases and adjust rents.

Proprietors of The Susquehanna Canal.

1. Pay proper proportion of any local taxes due.

2. Pay any current debts due.

3. Furnish information about leases and adjust rents.

Susquehanna Canal and Power Company.

1. Have certificate for four shares of stock standing in the name of C. R. McConkey duly endorsed by him for transfer in blank.

2. Make report to State of Pennsylvania for State taxes accrued and pay same.

3. Pay any current debts of Company due up to June 15,1905, and arrange for surrender of lease of Baltimore office.

4. Record deed from S. Johnson Poe and George L. Van Bibber, Receivers, to E. J. D. Cross, and from E. J. D. Cross to Susquehanna Canal and Power Company, in Lancaster County.

5. Have certificate for three shares of stock issued to J. H. Harlow countersigned by McConkey as secretary and have transfer on back of certificate duly signed by J. H. Harlow.

6. Pay sums, if any, due for local taxes.

7. Furnish information about leases and adjust rents.

8. Adjust bills of local counsel who examined titles.

Lower Chanceford Water and Power Company.

1. Get resignation of G. W. Rupp, director.

2. Have G. W. Rupp assign his right to subscribe for one share of stock of the Company.

SUSQUEHANNA POWER CO. LOAN

Messrs. Harvey Fisk & Sons,

62 Cedar Street,

New York City.

Dear Sirs:-

We duly received your favor of the 29th inst. and would have replied earlier were it not for the absence of our President for a few days.

The change that you suggest, i.e., reducing the loan by $72,000. - making the total amount borrowed, - $4,337,600.- is quite agreeable to us.

Very truly yours,

(signed) Wm. B. Randall,
Trust Officer.

IT IS UNDERSTOOD AND AGREED that the time fixed in the Agreement between us, dated June 15th, 1905, for the delivery of certain stock and bonds of McCALL FERRY POWER COMPANY, is hereby extended to and including October 5th, 1905.

Agreement Between Susquehanna Contracting Company and Knickerbocker Trust Company for Loans

(Copy of agmt. as executed)
Marked for indentification, Jan. 26. 1906
Rec'd. Nov. 1st 1905 Chas A. Peabody Secy.

AGREEMENT dated Nov. 1st, 1905, between KNICKERBOCKER TRUST COMPANY, a corporation of New York, (hereinafter called "Lender"), party of the first part, and SUSQUEHANNA CONTRACTING COMPANY, also a corporation of New York, (hereinafter called "Borrower"), party of the second part:

In consideration of the sum of $22,410, receipt whereof from Borrower is hereby acknowledged, and in consideration further of the agreements of Borrower hereinafter expressed, Lender hereby agrees:

To loan to Borrower for the times, at the rate of interest and upon the terms and conditions hereinafter specified, such amounts, not exceeding the aggregate of $4,482,000 at any one time, as Borrower may in writing request (at least five days in advance) at any time and from time to time within three years from the first day of November, 1905.

Every such loan is to bear interest at the rate of six per cent. per annum for the whole period thereof, is to be evidenced by note of Borrower (substantially in the form hereto annexed) for the amount thereof, and is to be secured by pledge of (a) Bond and Stock Purchase Agreements (first instalment of twenty per cent. paid) out of those listed in the Schedule hereto annexed marked "A", aggregating, in total purchase price, one hundred and twenty five per centum of the principal amount of such loan, and (b) the whole amount of first mortgage bonds of McCall Ferry Power Company (secured by mortgage to Lender dated June 15th, 1905) and of preferred stock of said Power Company agreed to be purchased by the Bond and Stock

M E M O R A N D U M.

Harlow, McCaw and Houseman, by their agreement of April 27th, 1905, agreed to transfer, inter alia, "all lands, inlands, river bed, interests in lands, easements, shore and riparian rights now owned by the Vendors or by any of them within the State of Pennsylvania or Maryland in and along the Susquehanna River from Columbia to Havre de Grace, including all so-called "release of damages" so owned."

By their agreement of June 15th, 1905, they further agreed as follows: "That the conveyances and transfers now being made by Vendors or any of them cover and transfer to Purchaser all the property interests in or in respect to lands or water rights or corporate stocks or interests or other rights useful or valuable in the development of the water power of the Susquehanna River between Columbia and Havre de Grace, or which might be prejudicial thereto if not transferred, which the Vendors or any of them or of their associates now own or control."

Arrangement by Harvey Fisk & Sons for Loans From Knickerbocker Trust Company

A G R E E M E N T, dated June 14th 1905, between HARVEY FISK & SONS, Bankers, of the City of New York, hereinafter called "Bankers," parties of the first part, and SUSQUEHANNA CONTRACTING COMPANY, a corporation of New York, hereinafter called "Contracting Company", party of the second part.

W H E R E A S, Bankers hold agreements hereinafter called "purchase agreements", substantially in the form of "Exhibit A", hereto attached, for the purchase of bonds and stock of the proposed Company described therein, to the aggregate amount of eight million dollars of principal of such bonds; and

W H E R E A S, Bankers have, pursuant to said purchase agreements, arranged for loans from the Knickerbocker Trust Company of New York City, hereinafter called "Trust Company", as set forth in the correspondence, a copy whereof is hereto attached, marked "Exhibit B"; and

W H E R E A S, Contracting Company represents that it has made arrangements with the owners of the riparian lands and interests on the Susquehanna River mentioned in said purchase agreements and with the owners of the other properties hereinafter mentioned, as follows: said riparian lands and interests and other riparian lands and interests, corporate stocks, contracts, options, rights, privileges and franchises of value to the enterprise are to be transferred to Contracting Company or its assignee, for considerations agreed upon, and Contracting Company has agreed with McCall Ferry Power Company, hereinafter called "Power Company," a corporation of

Pennsylvania having appropriate powers, to convey and transfer to it all the aforesaid lands, interests, stocks, contracts, options, rights, privileges and franchises, and to pay to it a sum of money sufficient, according to estimate (a) to construct the dam and other necessary works and equip the same with transmission lines, and (b) to pay all interest, commissions, organization, corporate, legal and other expenses which will remain payable by said Power Company, all as stated in the "plan" set forth in said purchase agreements, (all other compensations and all profits mentioned in said Plan being covered under the aforesaid arrangements of Contracting Company for obtaining from the present owners said lands, interests, corporate stocks, privileges and franchises) for all of which said Power Company has agreed to issue eight million four hundred and eighty-three thousand dollars in aggregate principal amount of bonds, and four million one hundred and sixteen thousand five hundred dollars in aggregate par value of preferred stock, both of the character described in said Plan, and all its unissued common stock;

NOW, THEREFORE, each in consideration of the premises and of the agreements of the other herein, said parties hereby agree as follows:

Bankers hereby assign and transfer unto Contracting Company, all the said purchase agreements and all Bankers' rights and interests therein and thereunder, except, and reserving, Bankers' right and option as in said purchase agreements set forth, to purchase the bonds covered thereby at 90, and subject to the pledge of cer-

tain of said purchase agreements to the Trust Company as hereinafter provided, and Bankers also assign and transfer to Contracting Company the aforesaid arrangement for loans made with said Trust Company, and all the rights and interests of Bankers thereunder, and also assign and transfer to said Contracting Company all moneys due and to become due (including all heretofore paid) on or under any and all of said Purchase agreements.

Contracting Company agrees to obtain from Power Company, pursuant to the arrangements hereinbefore recited, bonds and preferred stock of Power Company sufficient for delivery to all Subscribers under said purchase agreements, and hereby assumes and agrees to perform and discharge all the obligations and liabilities of every kind of Bankers, now existing or that may hereafter properly arise, under said purchase agreements, both to Subscribers and for interest, commissions or expenses, and hereby constitutes and appoints Bankers its agents for the performance of all obligations so assumed by it, and agrees to deliver to them all bonds and stock necessary for delivery to Subscribers under said purchase agreements, and authorizes and empowers Bankers to make calls for and receive further instalments of purchase price, and to make deliveries of bonds and stock to Subscribers entitled thereto, and Contracting Company further agrees to do and carry out all that is required from it by or under the aforesaid arrangement with the Trust Company for loan or loans, and execute all contracts, agreements, notes and other instruments that may reasonably be required in that regard.

-4-

IT IS UNDERSTOOD that the powers hereby vested in Bankers are irrevocable, being coupled with the interest of said Bankers in the subject matter thereof, both as holding the option upon said bonds and as having contracted for the sale thereof and in reference to the loan arrangement aforesaid.

IT IS FURTHER UNDERSTOOD that the purchase agreements aforesaid of Subscribers who have elected to defer payment of all instalments after the first will be assigned by Bankers to said Trust Company, in pledge, as security for the loans to be obtained under the loan arrangement aforesaid.

All provisions hereof shall be binding upon and are for the benefit of, and shall be enforceable by the successors, heirs, representatives and assigns of Bankers, and the successors and assigns of Contracting Company.

IN WITNESS WHEREOF, said parties have respectively duly executed this agreement the day and year first above written.

Sec. 20-9

EXHIBIT B.

III

May 15, 1905.

Knickerbocker Trust Company,
Charles T. Barney, Esq., President,
66 Broadway, New York City.

Dear Sir: Referring to the conversation between yourself and our Mr. Barnum, we beg to say:

As we have explained to you, a Power Company is now being formed to develop the water power at or near McCall's Ferry, in the Counties of York and Lancaster, in the State of Pennsylvania, which will issue securities in accordance with the Plan set out in the stock and bond purchase agreement, dated March 25, 1905, a copy of which agreement we herewith enclose.

Of the bonds which it is proposed said Company shall issue, namely $10,000,000. of Thirty-year, five per cent. Gold Bonds, secured by a mortgage, either directly or by pledge of stocks, upon the lands, water rights, power plant equipment, etc. of the Power Company, we have sold bonds for the principal sum in the aggregate of $6,145,000 at the price and upon the terms set forth in said agreement of March 25, 1905, and bonds for the principal sum in the aggregate of $1,855,000 at the same price and upon the same terms, except that the purchasers thereof elect not to defer their payments.

We understand it to have been agreed upon between us that the Knickerbocker Trust Company will make loans or ad-

See

vances up to an aggregate of $4,424,400 as money may be called for, at any time and from time to time within three years from the first day of June, 1905, on the following terms:

The loans are to bear interest at the rate of six per cent. per annum, and are to be secured by the pledge of, (a) bonds of the Power Company issued in compliance with the said Plan, for the principal sum in the aggregate of $6,145,000, and (b) agreements to purchase such bonds in the form of that enclosed, to the amount of $6,145,000; the bonds and bond purchase agreements pledged to be proportionately less than $6,155,000 if the loans shall aggregate less than $4,424,400.

The loans are to mature at the end of the year during which they are made, but may be extended, at borrower's option by one or two yearly renewals, as the case may be, to the end of the third year, provided that sixty days' notice of the intention to renew be given in each case.

In addition to interest, the Construction Company is to pay the Trust Company a commission of one-half per cent. upon the full amount agreed to be loaned, viz: $4,424,400, for each year during or for which any loan or renewal shall be made, and this agreement shall be in force.

The whole or any part of said loan may be paid off at any time on thirty days' notice.

lcc 20-7

K.T. Co. -3-

The loan or loans are to be made to the Construction Company which is being formed to carry on the work of construction and equipment, and through which securities of the Power Company will be issued.

It is understood that as soon as this Company is organized, a formal agreement between such Company and the Trust Company will be made embodying the terms hereof and providing for th pledge of the bonds and the said agreements of purchase.

We shall be glad of a note from you confirming the terms hereof, if your understanding of the agreement between us corresponds with ours as stated herein.

Meantime, we remain,

Very truly yours,

LCCo 20-9

Charles T. Barney, Esq., President,

66 Broadway, New York City.

Dear Sir:-

In addressing you the letter with reference to loan on Susquehanna Power bonds, the draft of which letter, we understand, has been approved by you, we have taken the liberty of changing the amount of the loan by a reduction of $14,400. This comes about through a request made by one of the subscribers that he be permitted to change from a deferred payment subscriber to a non-deferred payment subscriber, to which we have acceded.

Trusting that this change will be acceptable to you, we remain,

Very truly yours,

Messrs. Harvey Fisk & Sons
62 Cedar Street,
New York.

Dear Sirs:

Refering to your letters of the 15th inst., in reference to the Susquehanna Power Company, the terms of the loan, as expressed in your letter, conform to our understanding.

It is of course understood that the underwriters are to be satisfactory to us, and we have no doubt that they will be so. We also understand that we are to be Trustee under the mortgage.

We should be glad if you would send, at your convenience, a draft of the mortgage and other papers to Mr. Cornell (of Messrs. Davies, Stone & Auerbach) for approval on our behalf.

Very truly yours,

(signed) Wm. B. Randall,
Trust Officer.

Sec. 209

May 29, 1905.

Charles T. Barney, Esq., President,
Knickerbooker Trust Company,
66 Broadway, New York.

Dear Sir:-

Confirming our understanding, and referring to our letters of May 15th, we beg to request that you will change the amount of the loan on Susquehanna Power bonds by a reduction of $72,000., making the total amount to be borrowed $4,337,600.

As we have already explained to you, this reduction is made in order to permit the United Electric Securities Company, of Boston, who have been given an underwriting through Mr. C. A. Coffin, to make their payments as called, instead of being placed on the deferred list.

Kindly confirm, and oblige,

Yours very truly,

Purchase Agreements so pledged. Every such loan is to mature on the first day of November following the date on which it is made, but may be extended, at Borrower's option, by one or more renewals, as the case may be, to November first, 1908, provided that sixty days' notice of the intention to renew be given by Borrower to Lender in writing in each case. The whole or any part of any such loan may be paid off at any time on thirty days' notice in writing by Borrower to Lender.

In consideration of the foregoing agreements of Lender, Borrower herewith pays to Lender the sum of $22,410 for the year ending November 1st, 1906 (being the same sum receipt whereof by Lender is hereinbefore recited), and agrees to pay to Lender the further sum of $22,410 for each of the other two years during which this agreement shall be in force and during or for which any loan or renewal shall be made hereunder, and hereby represents and guarantees to Lender that said McCall Ferry Power Company has been formed, capitalized and vested with properties in all respects in conformity with the "Plan" set forth in said "Bond and Stock Purchase Agreements", and that its said first mortgage bonds and preferred stock are the bonds and stock agreed to be purchased by said agreements, and that Borrower is the corporation referred to as "the Construction Company" in a letter dated May 15th, 1905, relating to the subject matter of this agreement, from Messrs. Harvey Fisk & Sons to Lender.

All obligations hereof shall be binding upon, and enforceable by, the successors and assigns of the parties hereto respectively.

IN WITNESS WHEREOF, hereunto in duplicate, in the

City of New York, said parties respectively have affixed their seals, duly attested, and their signatures, the day and year first above written.

Signed by both parties with Schedules and form of note attached, the latter being attached hereto

PROMISSORY NOTE

PURSUANT TO

KNICKERBOCKER TRUST COMPANY—SUSQUEHANNA CONTRACTING COMPANY LOAN AGREEMENT.

NEW YORK, , 190

FOR VALUE RECEIVED, on the first day of November, 190 , the undersigned SUSQUEHANNA CONTRACTING COMPANY promises to pay to the order of Knickerbocker Trust Company, at its office, No. 66 Broadway, New York City, _____ dollars, with interest at the rate of six per cent. per annum, having deposited with said Trust Company as collateral security

$_____ in aggregate purchase price (first instalment of twenty per cent. paid) of agreements for purchase of bonds and stock of McCall Ferry Power Company;

$_____ in aggregate principal amount of first mortgage bonds of said McCall Ferry Power Company;

$_____ in aggregate par value of preferred stock of said McCall Ferry Power Company;

and said Trust Company is hereby authorized, in case of the non-performance of this promise, to sell in such manner as it may determine, either at brokers' board or at public or private sale, and without notice if such sale is public, the whole or any part of said collaterals, applying the net proceeds to the payment of this note, including interest, and accounting to the undersigned for the surplus, if any.

The undersigned hereby consents and agrees that upon any such sale of any collateral held hereunder, said Trust Company may become the purchaser thereof, and shall hold the same thereafter not as pledgee, but in its own right and absolutely.

In case of deficiency after sale hereunder, the undersigned promises to pay to said Trust Company the amount thereof forthwith, with legal interest.

All collaterals held under this loan and the proceeds thereof shall be held and treated as collateral security for any and all other debts or claims held against the undersigned by said Trust Company and which may be outstanding and unpaid at any time.

In case the undersigned shall be adjudged a bankrupt or shall file a voluntary petition in bankruptcy, or shall make a general assignment for the benefit of creditors, this note shall become forthwith due and payable.

The whole or any part of the principal of the loan evidenced by this note may be paid off at any time at the option of the undersigned on thirty days' notice in writing by the undersigned to said Trust Company.

Agreement for Issuance of McCall Ferry Power Company Securities to Susquehanna Contracting Company for Property, Cash, etc.

A G R E E M E N T made June 13th, 1905, between SUSQUEHANNA CONTRACTING COMPANY, a corporation of New York, hereinafter called Vendor, and McCALL FERRY POWER COMPANY, a corporation of Pennsylvania, hereinafter called Purchaser.

Said parties, each in consideration of the agreements of the other herein, mutually agree as follows:

V e n d o r a g r e e s:

1. To convey and transfer, or cause to be conveyed and transferred to Purchaser, all the lands, riparian rights, islands, river bed, interests in lands, flowage rights and "releases of damages", in, along, or connected with, the Susquehanna River in the County of Lancaster or the County of York, Pennsylvania, or in the County of Harford or the County of Cecil, Maryland, belonging to any one or more of the following: Cary T. Hutchinson, William F. Beyer, George B. Willson, [redacted], the partnership formerly known as "York Furnace Power Company", George K. McGaw, James H. Harlow, George R. Harlow; also all the right, title and interest of one Charles R. McConkey in or to four certain tracts of land in or along said portion of said river, under certain contracts for the purchase thereof; and also all the right, title and interest of one William H. Bayless in two certain tracts in or along said portion of said river in Maryland, known respectively as "Progress" and "New Enterprise"; and also all the canal, rights, property and franchises of the old Tide Water Canal Company, being the canal and property extending along the west bank of said river from the Maryland and Pennsylvania state line to Havre de Grace.

2. To transfer and set over, or cause to be transferred and set over to Purchaser shares of corporate stock as follows:

a. All the capital stock issued and outstanding of the following corporation of Maryland: Proprietors of the Susquehanna Canal chartered under Chap. 23 of the Laws of Maryland, A. D. 1783, and of each of the following corporations of Pennsylvania: Susquehanna Canal and Power Company; Susquehanna Falls Power Company; Susquehanna River Power Company; Susquehanna Storage Lake and Power Company.

b. Two-thirds of the issued capital stock of the Conowingo Land Company of Cecil County, Maryland.

c. All other shares of capital stock in corporations interested in, or in connection with, said river or the development thereof, which Vendor may be able to obtain under any of its existing contracts or arrangements.

3. To vest in or cause to be vested in Purchaser, either by assignment of contracts therefor, or otherwise, the following rights of option:

a. The right and option until July 1, 1905, to purchase a majority of the stock of the Conowingo Bridge Company, a corporation of Maryland, at and for the price of twenty dollars per share.

b. All the rights and options assigned and transferred by Charles D. Pullen by a certain assignment and agreement dated April 29, 1905.

4. To procure to be made with, or transferred to, Purchaser, agreements consenting to the construction, maintenance and operation by Purchaser, or by any corporation or corporations authorized by it, of a dam or dams and water power plant or plants, at any point or points upon the Susquehanna River, and to the impounding of and flooding by water and other consequences of such construction, maintenance and operation, and waiving and releasing all claims for damage or expense by reason of such construction, maintenance or operation, by each of the following companies: Susquehanna Canal and Power Company, above named; Tide Water & Susquehanna River Railroad Company, a corporation of Pennsylvania and Maryland, Conowingo Bridge Company, above named; the latter agreement and consent, however, to be coupled with Purchaser's agreement that in case any such water power and development shall interfere with the existing bridge of said Bridge Company or its approaches, then all cost and expense of alteration or reconstruction shall be paid by Purchaser.

5. To pay or cause to be paid to Purchaser the sum of six million four hundred thousand dollars.

Purchaser agrees:

1. To issue and deliver to Vendor, or upon its order, eight thousand four hundred and eighty-three bonds of Purchaser, each for the principal sum of One thousand dollars, to be dated 1905, and to be payable in gold thirty years after date, with interest at 5% from date, payable semi-annually on the days of and in each year, such

bonds to be out of a total authorized issue of ten million dollars in aggregate principal amount, all to be secured by mortgage and pledge covering all the property, real and personal, (except money) hereby agreed to be conveyed or transferred to Purchaser and upon all property to be acquired or produced by the money herein agreed to be paid by Vendor, and also upon all other property which may be acquired by Purchaser through the issue of any of said bonds or of any of its ten million dollars of capital stock; and to be further secured by provision requiring the payment of one hundred and sixty thousand dollars annually after five years into a sinking fund for retiring the bonds at not exceeding one hundred and five per cent. of par.

2. To deliver to Vendor, in certificates made out in such names and amounts as it shall request, preferred stock of Purchaser, of the par value in the aggregate of ~~three million seven hundred and five thousand dollars~~ four million one hundred and sixteen thousand five hundred dollars ($4,116,500), and common stock of Purchaser of the par value in the aggregate of four million nine hundred and ninety-nine thousand dollars.

The bonds and stocks aforesaid of Purchaser are to be delivered to Vendor upon receipt of deeds, transfers and other instruments, vesting in Purchaser the properties and rights hereby agreed to be so vested, which shall be within sixty days of the date hereof, and the money hereby agreed to be paid by Vendor to Purchaser shall be so paid within three years from the date hereof, in instalments from time to time as and when demanded by Purchaser by thirty days' notice; and it being understood that Vendor may obtain some part of the moneys

so to be paid by borrowing the same upon pledge of, or otherwise raising the same upon or with, any or all of the bonds and stocks of Purchaser coming to it, pursuant hereto; and that in these ways Vendor may be obliged to pay interest and commissions; it is further agreed between the parties hereto that all coupons upon the bonds deliverable to Vendor hereunder shall be payable as they mature, but that Vendor shall account for, and pay over to Purchaser the excess of the total amount of such coupon payments, during the period until full payment by Vendor to Purchaser hereunder, over and above the total amount so paid by Vendor for interest and commissions.

All provisions of this agreement are for the benefit of, and may be enforced by, the successors and assigns of the parties hereto respectively.

I N W I T N E S S W H E R E O F, said parties have executed this agreement in duplicate the day and year first above written.

Agreement for Acquisition of Hutchinson Properties by Susquehanna Contracting Company

1148 ST&B 353

A G R E E M E N T made June 14th, 1905, between CARY T. HUTCHINSON, of the City of New York, hereinafter called Vendor, and SUSQUEHANNA CONTRACTING COMPANY, a corporation of New York, hereinafter called Purchaser.

Said parties, each in consideration of the agreements of the other herein, mutually agree as follows:

Vendor agrees to convey and transfer, or cause to be conveyed and transferred, to McCall Ferry Power Company, a corporation of Pennsylvania (or its nominees) with which Purchaser has agreed to cause these and other properties to be so conveyed, all the lands, riparian rights, islands, river bed, interests in lands, flowage rights, easements, releases of damages and real estate and water interests of every sort, in, along, upon or connected with the Susquehanna River between Columbia, in Pennsylvania, and Havre de Grace, in Maryland, belonging to any one or more of the following: Vendor, William F. Beyer, George B. Willson, the partnership formerly known as "York Furnace Power Company."

Purchaser agrees to issue and deliver to Vendor, or upon his order, in certificates made out in such names and amounts as Purchaser shall request, four thousand shares of the par value in the aggregate of four hundred thousand dollars of the preferred stock and forty eight thousand eight hundred and forty shares of the par value in the aggregate of four million eight hundred and eighty four thousand dollars of the common stock of said McCall Ferry Power Company, and also to pay to Vendor seven hundred and fifty thousand dollars in money.

Payment of said money shall be made to Vendor upon delivery of deeds and other instruments of transfer

conveying and transferring in accordance with the provisions hereof the properties hereby agreed to be so conveyed and transferred, which shall be within fifteen days from the date hereof, and delivery of certificates for said stock shall be as soon thereafter as the mortgage to secure the proposed bond issue of said McCall Ferry Power Company of ten million dollars in aggregate principal amount, shall be delivered, and not later than July 15th, 1905.

All provisions of this agreement are for the benefit of, and may be enforced by, the heirs, representatives and assigns of Vendor and the successors and assigns of Purchaser.

IN WITNESS WHEREOF said parties have duly executed these presents in duplicate the day and year first above written.

AGREEMENT dated June 20, 1905, between CARY T. HUTCHINSON, of New York, hereinafter called "Vendor", and SUSQUEHANNA CONTRACTING COMPANY, a corporation of New York, hereinafter called "Purchaser".

WHEREAS Vendor heretofore made with Purchaser an agreement dated June 14, 1905, whereby Vendor agreed to transfer and convey, or cause to be transferred and conveyed, to McCall Ferry Power Company or its nominees certain lands, interests and other property and rights as in said agreement described, for all of which Purchaser agreed to pay to Vendor the considerations stated in said agreement; and

WHEREAS it has been agreed that this present agreement shall be made as part of the carrying out of the sale and purchase aforesaid:

NOW THEREFORE, in consideration of the premises and for the considerations of said sale and purchase, and to induce the same, Vendor hereby, for himself, his heirs, representatives and assigns, hereby guarantees and agrees to and with Purchaser, its successors and assigns, that all the taxes, charges, incumbrances, defects or other matters enumerated in the schedule hereto attached which affect some of the properties so being sold and purchased, shall be paid, discharged, cleared off and disposed of on or before August 1st, 1905.

IN WITNESS WHEREOF Vendor has hereunto set his hand and seal the day and year first above written.

SCHEDULE TO BE ANNEXED TO CONTRACT BETWEEN
CARY T. HUTCHINSON and Susq. & Penna Contracting Co.
DATED JUNE 20, 1905.

I.

Record in Lancaster and York Counties the following deeds made by partners interested in York Furnace Power Company:

(1) Frederick Shoff and wife to William F. Beyer, dated November 18, 1903.

(2) Deed from John W. Holman and wife to William F. Beyer, dated February 11, 1904.

(3) Deed from Walter M. Franklin and wife to George B. Willson and William F. Beyer, dated February 11, 1904.

II.

Make searches against Walter M. Franklin from January 1, 1899 to date, covering all premises in York and Lancaster Counties in which the York Furnace Power Company was interested.

III.

Taxes are due and payable about this time. The sums payable for taxes should be apportioned so that the vendor will pay the proportion from January 1, 1905 to date, and the purchaser the amount due for the balance of the year.

IV.

Coleman Tract, Lancaster No. 9.

The original release of damages for this tract was

limited in time for five years from this date. This release is turned over by Messrs. Beyer and Willson. Subsequently a new release was obtained, unlimited as to time. This release has not been conveyed by Messrs. Beyer and Willson. Mr. Beyer and his wife and Mr. Wilson should execute a conveyance of this release.

House Rock Fishery, Lancaster No. 12.

(1) Abstract and affidavits showing title of this tract are to be prepared by William F. Beyer. They should be submitted to Simpson, Thacher & Bartlett after their completion.

(2) Subsequently to the preparation of the abstract examined by Simpson, Thacher & Bartlett, it was discovered that an undivided one-half interest in the property had not been acquired by Messrs. Beyer and Willson when the original transaction took place. Deeds have now been obtained from two sources for this undivided one-half interest. These deeds run to George B. Willson as grantee. Mr. Beyer and his wife and Mr. Willson should execute a conveyance of these releases to Cary T. Hutchinson, and Cary T. Hutchinson and his wife should then execute a conveyance to the purchasers.

Rolandus Brubaker, Lancaster No. 13.

Cary T. Hutchinson should agree to hold purchasers harmless against any claim that might be made on behalf of lessees under a mineral lease made to Stouch et al for 15 years from 1899.

John T. Brubaker, Lancaster No. 14.

Wife of John T. Brubaker did not join in release to Cary T. Hutchinson. Release should be obtained from her.

Walton Tract, Lancaster No. 18.

I.

The following judgments are outstanding upon an undivided 1/24 interest in the property.

(1) Robinson v. Patton, $1,000, entered April 21, 1904.

(2) Rieker v. Patton, $1,000, entered Oct.17,1895.

Cary T. Hutchinson should agree to hold purchaser harmless against any claims arising on these judgments.

II.

There is a claim for dower in favor of widow of Samuel Ankrim, amounting to $324. outstanding upon this property. When Cary T. Hutchinson purchased this property he took a bond indemnifying him against any claim arising on account of this dower. William F. Beyer says that this bond is assignable. Bond should be assigned to the purchaser. (This same dower is also outstanding on Hartman's Island. Island Abstract No. 5).

Lewis and Thomas Creamer, Lancaster Nos. 20 and 21.

There are outstanding mineral leases on these properties similar in their general terms to lease mentioned under Rolandus Brubaker, supra, No. 13. Cary T. Hutchinson should agree to indemnify purchaser against any claims that might be asserted on behalf of lessees.

Stoner's Island, Island Abstracts Nos. 6 and 7.

I.

Submit proof that James Galen who conveyed to Krous and Frylye in 1901 was unmarried.

II.

Submit proof that Jacob M. Eshleman who conveyed

to William and Clayton Erb in 1900 was unmarried.

Josiah Haugh, York No. 7.

There is an outstanding dower interest on this property amounting to $92. in favor of Susan Detwiler. She is entitled to 6% on this amount, and principal is payable at her death to her heirs. This encumbrance should be removed, or some disposition of it made satisfactory to the purchasers.

Urey Farm, York No. 4.

I.

The record title to this tract became vested in Frederick Shoff, one of the partners in the York Furnace Power Company. He conveyed to William F. Beyer, who has conveyed to Mr. Hutchinson. This tract of land was acquired for the benefit of the York Furnace Power Company, all of the interest in which is now vested in Messrs. Willson and Beyer. They should execute a confirmatory deed in which Mr. Beyer's wife should join, and thereafter Cary T. Hutchinson and his wife should execute a new deed.

II.

The deed from Samuel Fulton to Frederick Shoff should be recorded in Lancaster County.

York Furnace Farm, York No.5.

Deed from Samuel Fulton, assignee of John Bair to John W. Holman should be recorded in Lancaster County.

Samuel B. and Milton L. Fry, York No.11.

I.

There is an outstanding dower interest on a portion

of the property in favor of the wife of Michael Donohoe, amounting to $264.48 1/3. The widow is entitled to 6% on this amount during her life and at her death the principal is payable to her heirs. This encumbrance upon the property should be removed, or some disposition should be made of it satisfactory to the purchaser.

II.

Release of dower in favor of Elizabeth Richardson should be recorded in York County.

John Stokes, York No. 12.

Affidavit of John Stokes as to adverse possession to be furnished.

Properties below dam in Lower Chanceford and Peach Bottom Townships.

Abstract of title for ~~their perfection~~ three properties to be furnished by William F. Beyer.

In consideration of the sums of one dollar and other valuable consideration, we the undersigned hereby agree to perform all of the obligations undertaken by Cain T. Hutchinson in the written agreement at our own cost and expense except those relating to the Amos Waters Road, Lewis Creamer & Hiram Creamer, and S. B. and M. L. Fry

W. F. Biggs
Geo. B. Williams

Dated June 20, 1905.

Stock Deposit Agreement, McCall Ferry Power Company

McCALL FERRY POWER COMPANY.

STOCK DEPOSIT AGREEMENT.

WHEREAS, the subscribers hereto deem it desirable, in view of the existing arrangements under which the construction of the works and plant of this Company is to be financed, that the stock of the Company should be held together and voted as hereinafter provided during the period of construction:

NOW, THEREFORE, each subscriber hereto, in consideration of the premises, of the agreements of the other subscribers hereto and of the acceptance by Messrs. Harvey Fisk & Sons of the duties of depositaries, and by the Voting Committee of their duties, hereunder, hereby agrees to and does deposit all the stock owned by him in said McCALL FERRY POWER COMPANY (being the number of shares written after his signature hereto) with Messrs. Harvey Fisk & Sons as depositaries under the following terms and regulations:

Stockholders are to duly assign their certificates for transfer to said Harvey Fisk & Sons, who are to procure transfers pursuant thereto and hold the stock until November 1, 1908, unless the works and plant of said McCALL FERRY POWER COMPANY should be completed and put in actual commercial operation prior to that date, in which case this deposit arrangement is to terminate then. It may also be terminated prior to said November 1, 1908, by the concurrent action to that effect (evidenced by written instrument duly acknowledged) of the depositors of two-thirds of all the stock deposited hereunder. Until the termination of this deposit arrangement, said Harvey Fisk & Sons are to vote each share of stock deposited hereunder, at every stockholders' meeting, as directed by a writing signed by the Voting Committee hereinafter provided for. Upon the termination of this deposit arrangement, said Harvey Fisk & Sons will turn over to the depositors respectively, or to their personal representatives or successors, certificates for the shares of stock deposited hereunder.

The Voting Committee to direct the voting of all stock deposited hereunder shall be Henry F. Dimock, William M. Barnum and S. Reading Bertron, all of New York; and any direction or other appropriate writing shall be deemed to be the act of such committee if signed by any two members thereof. In case any member of such committee shall die, resign or for any other reason cease to act as such, the remaining members shall, by writing to be filed with said Harvey Fisk & Sons, appoint a successor.

Said Harvey Fisk & Sons accept the duties of depositaries and said Voting Committee accept their duties under this arrangement as herein defined, and agree to act in these capacities respectively without compensation. Any of them may be depositors of stock hereunder.

IN WITNESS WHEREOF, said Harvey Fisk & Sons, said Voting Committee and the subscribers have severally set their hands and seals hereto this twentieth day of January, 1906.

NAME.	NUMBER OF SHARES.
	..... Preferred
	..... Common

For Value Received, Harvey Fisk & Sons hereby assign and transfer to Knickerbocker Trust Company, a corporation of New York, the foregoing "Bond and Stock Purchase Agreement," and all their rights and interests therein and thereunder, excepting and reserving, however, the right and option of said Harvey Fisk & Sons, as stated in said Purchase Agreement, to purchase the bonds covered thereby at ninety, which right and option remains in said Harvey Fisk & Sons unaffected by this assignment. We hereby certify that the subscriber to said Agreement has paid the first instalment of 20 per cent. of his subscription and no more.

NEW YORK,

McCALL FERRY POWER COMPANY.

STOCK DEPOSIT RECEIPT.

of certificates for ..... *shares of the Common Stock and* ..... *shares of the Preferred Stock of McCALL FERRY POWER COMPANY, to be held by the undersigned as depositaries under the terms and regulations of the Stock Deposit Agreement, a copy whereof is endorsed hereon.*

Dated New York, ... *190* .

Testimony of James H. Harlow Regarding Values of McCall Ferry Power Company Bonds and Common Stock. Susquehanna Power Company v. The Proprietors of The Susquehanna Canal, in the Circuit Court for Cecil County, January 28, 1907.

J. H. Harlow

Q At what price ?

A We received $200,000 in cash - 200 $1,000 bonds and 1,000 shares of stock at the par value of $100.

Q You still hold these bonds, you and your associates ?

A Yes, sir.

Q What do you consider them worth ?

A Well, that is a difficult matter to say.

Q Well, what would you take for them ?

A The Underwriters got them at 90 cents on the dollar.

Q Would you take 90 for them ?

A No, sir ; I don't think I would ; I think I would want par for them.

Q It would be fair to assume that they were worth 90 then, would it not ?

MR. WILLIAMS: Don't cross examine.

Q Well, in your opinion would they be worth 90 ?

A I don't think I could get 90, but I would not take 90 I don't think.

Q You would not take less than par ?

A No, sir ; I don't think I would.

Q And the stock ?

A That is such a prospective matter that I think 10 cents

J. H. Harlow

on the dollar would be enough for that.

Q That would be how much ?

A $10,000.

Q And taking the bonds at 90 would be how much ?

A That would be $435,000.

Q Including the cash ?

A Yes, sir.

Q $435,000 ?

A Yes, sir ; $435,000.

Q That would be a fair appraisement you think ?

A That would be fair I suppose.

Q Well, now Mr. Harlow will you tell me whether or not it is possible to construct a dam across the Susquehanna River at a point at or near Broad Creek ?

A It is.

Q That dam would be upon the land on each side of the river upon the land of the McCall's Ferry Power Company, wouldn't it ?

A If you put it above Broad Creek the west end would be on the property of the McCall's Ferry Power Co. ; if it ran right straight across, the east end would not.

Re: Determination of Original Cost

Messrs. Bertron, Griscom & Company, Inc.
40 Wall Street
New York, N.Y.

Attention: Mr. Joseph O. Adams,
Secretary and Treasurer

Gentlemen:

Mr. Gunn has advised me of his conversation with you last Friday, in which you requested formal communication from this Company before making a search of your files for old McCall Ferry Power Company material. As he probably told you, in order to comply with recent requirements of the Public Utility Commission of Pennsylvania and of the Federal Power Commission, this Company must establish the original cost of its property to the person first devoting it to public service. This makes necessary an exhaustive study of the old records having to do with the early history of the hydroelectric development at Holtwood, Pennsylvania.

The Pennsylvania Water & Power Company originated as a reorganization of the McCall Ferry Power Company. The latter Company was organized in 1905 for the purpose of developing hydroelectric power from the Susquehanna River near McCall's Ferry in Lancaster and York Counties, Pa.

We believe that your firm was active in preliminary development work which led to the formation of the McCall Ferry Power Company. We are endeavoring to ascertain the identity of the recipients of the McCall Company common stock and the nature and scope of any services that may have been rendered. Do your firm records of the period 1900-1910, inclusive, reveal ownership of any McCall Company stock or the nature of services rendered in connection with that company? If so, we will appreciate your

granting us an opportunity to examine any records that you have retained which relate to the affairs of the McCall Ferry Power Company and will be glad to bear any expense that our examination may occasion.

Very truly yours,

Jas. L. Rintoul,
Vice President.

May 27, 1938

Mr. James L. Rintoul, Vice Pres.,
Pennsylvania Water & Power Company
Lexington Bldg., Baltimore, Maryland

Dear Sir:

Your letter of May 23rd has been received and noted.

We are not able to be of a great deal of assistance to you in this matter, as several months ago we had all of our correspondence files prior to 1914 destroyed to reduce storage space. Mr. Bertron probably could give you some information from memory, but he, unfortunately, is ill at present. Upon his return to the office we will bring the matter to his attention.

Records of our firm investments show that on November 21, 1906 there was recorded the receipt of 1,875 shares of preferred stock and 12,462½ shares of common stock of the McCALL COMPANY. On December 11, 1906, 5000 shares of the common stock were transferred to Lee, Higginson & Co. On August 9, 1907, there is recorded the receipt of 150 additional shares of common stock from Charles D. Pullen. On December 28,1908 all of this common stock was written off. On November 9, 1908 there is recorded the receipt of 360 additional shares of preferred stock described as "from syndicate". On December 28, 1908, all except 160 shares of this preferred stock was written off.

On the sheet recording the charging out of these 2075 shares of preferred stock there is the following tabulation in the margin, which appears to relate to the entry:

To C. A. Coffin interest		775 shares
To Lee, Higginson & Company		1,025 "
Owe H. F. Dimock Sanderson & Porter M.W.D. T.H.McKittrick	not del.	275 "
		2,075 "
Less our		1,875 "
		200 "

2,235
Less 2,075
160

On a separate sheet there are recorded the following entries relating to the McCall Ferry Power Company preferred stock with the certificate numbers stated:

November 18, 1908..Received Certificate No. 243 for 1,100 shares
November 19, 1908..Transferred on Certificate No. 320 1,025 shares to Lee Higginson & Company
November 19, 1908..Certificate No. 321 for 75 shares received in the n/o Bertron, Storrs & Griscom.

Apparently Certificates No. 320 and 321 were exchanged for Certificate No. 243.

We understand from our conversation with Mr. Gunn you have a record of our ownership of eighty (80) McCall Company bonds.

I hope that the above information will be of assistance to you, pending Mr. Bertron's return.

Very truly yours,

Secretary and Treasurer

July 21, 1938

Mr. James L. Rintoul, Vice President
Pennsylvania Water & Power Company
Lexington Building
Baltimore, Maryland

Dear Sir:

Your letter of the 18th instant addressed to my son, Richard S. Storrs, Jr. is forwarded here for my reply. It deals with the McCall Ferry Power Company and asks for information concerning its earlier history as dealt with by Bertron, Storrs & Griscom.

There are absclutely no records in my possession concerning this Company nor does my memory recall any detail concerning its early history. I am sorry I cannot be of service to you.

If any records exist they are in the files of Bertron, Griscom & Company. Mr. Bertron died within the month. He had most to do with the McCall Ferry Power Company and the negoitations dealing with its formation.

Regretting my inability to serve you I am,

Very truly yours,

Richard S Storrs

Attention: Mr. Gunn

My dear Sir:

Referring to the draft of the letter addressed to the Pennsylvania Water & Power Company which you want me to sign, together with the story of the transaction, I have read both with interest and now advise you that I don't care to sign the letter.

I have no quarrels with any part of this statement, but so many years have elapsed that I have no recollection that would justify me in making and swearing to any statement such as you ask.

Very truly yours,

Bertron, Griscom

REG/E

RECEIVED
DEC 5 1939
CHIEF ENGINEER

Draft of Letter from Mr. Griscom

Attention of Mr. Gunn

Pennsylvania Water & Power Company,
Lexington Building,
Baltimore, Maryland.

Dear Sirs:

You have asked me for a sworn statement of the participation of my firm, then known as Bertron, Storrs & Griscom, in the financing in the spring of 1905 of McCall Ferry Power Company.

My firm commenced as head of the underwriting group but eventually took a position junior to that of Harvey Fisk & Sons who took over leadership of the financing. We received an aggregate of 12,462½ shares of Common Stock of the Company out of which we delivered to Lee, Higginson & Co. 5,000 shares for their participation, leaving us 7,462½ shares as our compensation as bankers or underwriters. At this late date it is difficult for me to recall what value we placed upon the Common Stock of McCall Ferry Power Company in the spring of 1905. However, I do recall that the prospects for the enterprise at that time were very bright and that the best engineering and operating talent were engaged to carry out the enterprise. All of the people who were familiar with the undertaking felt confident that substantial earnings on the Common Stock would

2

be available in a reasonably brief period and it is my ~~best estimate at this time~~ opinion that a valuation of between $ and $ a share in 1905 would not be out of line with the consensus of opinion of those best qualified to make a valuation.

Very truly yours,

Subscribed and sworn to
before me this day
of , 1939.

Re: Determination of Original Cost -
McCall Ferry Power Company

J. O. Adams, Esq., Secretary and Treasurer
Bertron, Griscom & Co., Inc.
40 Wall Street
New York, New York

Dear Mr. Adams:

We have received Mr. Griscom's letter of December 4, 1939 stating that he could not at this time estimate for us the value of McCall Ferry Power Company Common Stock which was received by your firm at the time the stock was received. We also have received your letter of December 8, 1939 referring to Mr. Griscom's inability to estimate this stock value for us, and stating that you would hold at your office our Company's records which you and I used in preparing the facts which were submitted to Mr. Griscom. I expect to be in New York shortly and will call for these records.

We take it that since Mr. Griscom was unable to give us a direct estimate of the value of this stock at the time it was received by your firm, and in view of the fact that he is the only living member of the firm who was familiar with the enterprise at that time, the possibility of your firm giving us an estimate of this value has been exhausted. There are, however, one or two points in connection with the amounts at which your firm carried these stocks on their books, in connection with which we would like to have your advice. Your records show that the Common Stock was carried from time to time at amounts ranging from $1 up to $10, and that the Preferred Stock was carried at amounts ranging from $10 up to $50. It would be helpful to know which of these amounts represented the appraisal by your firm as to the actual value of these stocks when they were received.

Our need for the foregoing information arises from the fact that the regulatory authorities require that we establish the value of these stocks in connection with the determination of the original cost of the Company's property.

CC: Messrs. J.A. Walls, J.L. Rintoul, F. A. Allner, M. B. Higgins

2

J. O. Adams, Esq.
January 8, 1940

We are sorry to make repeated requests for your assistance in this matter as we realize that they are bothersome and make demands upon your time. However, if you can give us an explanation in connection with the foregoing matters, it will assist us materially in interpreting the information we have obtained from your firm's records, which it is very doubtful if we can do without your assistance.

Very truly yours,

Donald Quam
Assistant to Chief Engineer

January 9, 1940

Pennsylvania Water & Power Company
Lexington Building
Baltimore, Maryland

Attention: Mr. Donald Gunn
Asst. to Chief Engineer

Gentlemen:

Your letter of January 8th is received. I am not surprised that Mr. Griscom has no recollection of details regarding the McCall Ferry Power Company transaction. I believe Mr. Bertron originated and handled this deal. Unfortunately, his death on June 30, 1938 has removed any possibility of obtaining information which he might have recalled and which I hoped he could furnish, as stated in my letter of May 27, 1938. I was never able to discuss any business matters with him after that date as he died at the end of June 1938.

Due to the fact that I was not in the employ of Bertron, Storrs & Griscom at the time of the McCall Ferry Power Co. transaction, it is impossible for me to state which, if any, of the recorded amounts represented the appraisal by the firm as the actual value of the stocks when received. It would appear to me that the partners placed various arbitrary amounts in the McCall Ferry Power Co. stock accounts, as well as in other stock accounts, probably in accordance with understandings or agreements between them.

Hoping the above may be of some assistance to you, we are

Very truly yours,

BERTRON & CO., INC.

Secretary-Treasurer

JOA:L

RECEIVED
JAN 10 1940
CHIEF ENGINEER.

Hopkins' Affidavit, Correspondence Re: Coudert Bros.' Fee for Legal Services

STATE OF NEW YORK,)
) ss.:
COUNTY OF NEW YORK,)

JAMES E. HOPKINS, being duly sworn, says:

I first became associated with the law firm of Coudert Brothers in 1899 and was acquainted with and worked with Lorenzo Semple until his death in 1928. Mr. Semple was a member of the firm for over thirty years and during that time was certainly one of the outstanding lawyers in the City of New York.

Mr. Semple was a friend of and personal attorney for Dr. Cary T. Hutchinson and represented and advised him and his associates in connection with a development on the Susquehanna River for hydro-electric power generation. Mr. Semple was not only an especially capable lawyer, but was gifted with an unusually keen sense of business ability and judgment. Because of his outstanding position, his time and advice were at a premium and commanded substantial fees. In handling his cases, he was very thorough and spent a vast amount of time in studying the various aspects of the problem and the law pertaining thereto. He rendered formal opinion only after very careful study and research and continually revised and redrafted his plans for a proposed corporation - such as the McCall Ferry enterprise. When he undertook a case, it was his custom to work on it continually, frequently working until late at night.

An examination of the firm's files has established that several hundred letters were written by Mr. Semple in connection with this Susquehanna River development including several opinions which necessarily required a thorough study of Pennsylvania corporation law and court decisions. Mr. Semple

worked on the McCall project over a period of more than four years prior to the incorporation of the McCall Ferry Power Company.

From the character and volume of work done by Mr. Semple on the McCall project during these years; my knowledge of Mr. Semple's status in the firm at that time; the firm's method of reckoning its fee on work of this character; and the rate at which fees were charged for work on which Mr. Semple was engaged; it is my opinion that the firm's fee for services rendered in connection with the McCall Ferry Development prior to the incorporation of the McCall Ferry Power Company would have been not less than $50,000. This amount would be in addition to a fee of $5,000. which was paid by the McCall Company after that Company was formed. This latter payment was made to the firm for services rendered during the five months following the formation of McCall Company, at which time Simpson Thacher & Bartlett became principal counsel for the company. This change in legal advisors came about as the result of control of the enterprise vesting in Harvey Fisk & Sons and other bankers rather than in Dr. Hutchinson and his associates.

The fee received by our firm from Dr. Hutchinson for services prior to the incorporation of McCall Ferry Power Company was paid with $20,000 cash and 1,000 shares of common stock of the McCall Ferry Power Company. I am not qualified to place a value on that stock as such, but I believe and am of the opinion that the services rendered warranted a charge of at least $50,000 and that unless the firm had believed that

the $20,000 cash, plus the 1,000 shares of stock, were equivalent to this amount, they would not have accepted it as payment for their services.

Dear Semple:-

I am very glad that the occasion has arisen for sending you the enclosed cheque for $20,000; Mr. Dimock tells me that he and you have agreed on a basis of $20,000 and $100,000 stock of the Company.

I feel that a large portion of our success is due to your efforts in the matter, and I congratulate myself that I got hold of you in the first instance.

Yours very sincerely,

Cary T. Hutchinson

My dear Hutchinson:

I have your check for $20,000. and confirm Mr. Dimmock's statement that we have agreed on the basis of $20,000 and $100,000 in stock of the Company. I thank you very much for the check and equally as much for the kind expressions contained in your letter.

Yours sincerely,

To the Board of Directors,

Susquehanna Water Power Co.: ---

Gentlemen:-

This report is intended to give a general statement of the present status of the affairs of your Company; the statements made and recommendations have the approval of every member of your Advisory Board of Engineers, although owing to the absence from the City of three members, it is signed only by your Chief Engineer and Consulting Engineer.

This project, as originally undertaken, was to construct a dam at or near McCalls Ferry, Pennsylvania, having a crest elevation of 155 feet above mean sea level which, with the necessary power house and equipment, will have a capacity to deliver 50,000 horse power to Philadelphia or Baltimore, or any point within the tributary territory. It was understood at the outset that it was possible to build a larger plant; no representations, however, were made for the larger plant, since the building of the higher dam necessary was dependent upon the consent of the Pennsylvania Railroad Company to the elevation of the tracks of the Columbia and Port Deposit Railroad, owned by it, to a height of about forty feet above the present grade. Immediately after the project was placed, this matter was taken up with the Pennsylvania Railroad Company, with the result that the Company has consented, informally, to

elevate its tracks to the required height, at the expense of your Company. The Chief Engineer of the Pennsylvania Railroad Company estimates the cost of this work to be $580,000, a sum only $180,000 in excess of the amount included in the original estimates for the dam at an elevation of 155 feet necessary to protect the tracks of the Railroad at their present elevation from floods.

This unexpectedly favorable estimate by the Pennsylvania Company makes it necessary to consider the construction of the higher dam; it is the principal object of this report to give the costs of this undertaking for three heights of dam, that is, elevation at 155, 170 and 185 feet.

In order to secure control of the river, your Company has purchased the property formerly known as the Peach Bottom Development; the ownership of this property brought up the question of the most favorable location for the dam within the entire range of territory owned. Your Advisory Board made a careful examination, with estimates, of the cost of a power development, for the dam located at the three possible points, and unanimously recommends that the dam be placed on the McCalls Ferry site.

The economical development of this river is for a discharge several times greater than the lowest known discharge; under these circumstances it is necessary to supply a part of the power by steam during the season of low water. The auxiliary steam power may be furnished by a plant built by your Company or arrangements may be made with customers of your Com-

pany for the use of the customers' steam plant. Negotiations have been begun for the sale to Baltimore interests of approximately 25,000 horse-power at a profitable price, one condition of the agreement being the use of their steam plants in Baltimore; these steam plants are more than sufficient to supply the needs of your Company for steam auxiliary for its entire output. If a contract of this kind be made, there will then be no occasion for your Company to invest money in an auxiliary steam plant, and the amount so included in the original estimates of the cost of this project will be left for other use. There is practically no question that such an arrangement can be made on good terms, it being obvious that it is to the advantage of both interests to avoid the duplication of investment involved in the construction of a steam plant by your Company.

Our estimates of the total cost of the project, including all property, construction and equipment, right of way for pole lines to Philadelphia and to Baltimore, transmission lines and buildings all complete for delivery of power to Philadelphia or Baltimore, but excluding auxiliary steam plant in all cases, including interest during construction, are as follows:

Elevation 155 ft.	$6,750,000
" 170 "	7,600,000
" 185 "	8,500,000

4

The capacity of the power plant will be as follows:

Elevation 155 ft.	50,000 horse-power
" 170 "	60,000 " "
" 185 "	75,000 " "

And the investment per horse-power will be ---

Elevation 155 ft.	$135
" 170 "	126
" 185 "	113

The surplus after charging off operating expenses, interest and sinking fund in bonds, will be ---

Elevation 155 ft.	$418,000
" 170 "	485,000
" 185 "	820,000

The surplus per horse power will be ---

Elevation 155 ft.	$ 8.33
" 170 "	8.10
" 185 "	10.90

Comparing elevations 155 and 185 feet, the additional 25,000 horse power is obtained for $1,750,000, equal to $70 per horse power, and the increased surplus after paying all charges is $302,000.; that is, this additional investment earns 18 % plus interest and sinking fund,---a total of more than 25 %.

In view of these estimates and the impossibility of later on developing the power that is lost by failure at this time to build the dam to the highest possible point, we recommend strongly that the dam be now built to a crest

elevation of 185.

For various reasons, there has been a delay of more than two months in beginning this work. Your financial arrangements have been made on the basis of a three-year period; if the time of the completion of work is prolonged beyond this three-year period, another year will be necessary for the completion of the work. The cost to your Company of this year for interest charges will be approximately, $400,000; it is, in our opinion, urgent that this work should be undertaken at the earliest possible moment.

We believe that all conditions being considered, the lowest cost of work and the greatest expedition, can be attained by your Company doing the work itself, eliminating contractors entirely, but employing the best contracting firm that can be found, for a fixed fee, to do the work under its direction and at its cost. The employment of such a contracting firm is in lieu of getting together an organization by your Company. Several well-known contracting firms have been asked to name the fee for which they will do the work on this basis and have submitted bids. We strongly recommend your Board to do the work by this method, and in case of a decision so to do the work, we are prepared to submit to your Board the proposals that we have received.

The alternate method of doing the work, is to issue plans and specifications in sufficient detail to represent the work fairly and to get bids from responsible contractors

for the work on the unit price basis. We have prepared such plans and specifications, and if so directed by you, can obtain bids within one month from date of issuance of specifications. This time is necessary to enable the contractors to examine the site of the proposed work and to collect the necessary local information.

We believe that this will be a more costly way to do the work, will take more time and that it has no advantage of any kind over doing the work by the Company directly, the sole apparent advantage of the contract method being the assumption that a contractor can be found of sufficient financial strength to stand back of his losses, if such there be. Experience, however, of other work of this character has proved that there is no such contractor and that the insurance feature of the contract is deceptive.

7

We therefore recommend to your Board,

1. That the dam be built at a crest elevation of 185 feet.

2. That the Company do this work itself, as in manner described above; that every effort be made to begin work by September first.

Messrs H. L. Cooper, F. O. Blackwell and Charles T. Main, the other members of your Advisory Board, all of whom have been consulted either personally or by letter, concur in these recommendations.

Very respectfully,

Capt Hutchinson
Chief Engineer.

Wm. Barclay Parsons
Consulting Engineer.

August 7, 1905.

McCALL FERRY POWER COMPANY,
60 Wall Street, New York,
September 11, 1905.

Report of Board of Advisory Engineers.

H. F. DIMOCK, Esq., President.
McCall Ferry Power Company.

DEAR SIR.—Under the direction of your Executive Committee, your Chief Engineer issued specifications and a call for bids on August 11th, for the construction of a dam at elevation of 185 feet, and sub-structure of a power-house at McCall's Ferry. The invitation to bid was issued to the following:

Westinghouse, Church, Kerr and Co.
T. A. Gillespie Co.
J. Breuchaud.
Sanderson and Porter.
J. G. White and Co.
Arthur McMullen and Co.
MacArthur Bros. Co.
Atlantic, Gulf and Pacific Co.

On September 2nd the following bids, in strict accordance with the specifications, were received:

Arthur McMullen and Co.	$2 538 700
Sanderson and Porter	2 950 200
J. G. White and Co.	3 134 300
MacArthur Bros. Co.	3 630 500
Atlantic, Gulf and Pacific Co.	4 051 500

In addition to these bids, J. G. White and Co. made two

informal bids,—the first for $2 500 900, based on one year's additional time to do the work, the second for $2 377 600, on one year's additional time and requiring the Company to take over at the completion of the work a double track railroad from the dam site to Havre de Grace, that it proposes building for construction purposes, and to pay $160 000 for it.

Westinghouse, Church, Kerr and Company, the T. A. Gillespie Company and Mr. Breuchaud declined to bid.

Your Board of Advisory Engineers has considered these bids, and begs leave to report as follows:

The bids are based on the supposition that the dam can be built at an elevation of 185 feet. This elevation was fixed by your Board on the assumption that a substantial agreement had been reached with the Pennsylvania Railroad Company regarding the removal of its tracks. Since then a difference in the views of the officers of the Railroad Company has developed, and possibly there will be a delay in reaching a satisfactory agreement. The correspondence with the Railroad Company, showing the status, is given further on. In our opinion it is, therefore, only fair that all these bids should be rejected and the deposits of $10 000 be returned to each of the contractors, and we so recommend.

The regular bids requiring completion in two seasons, vary from a minimum of $2 538 700 to a maximum of $4 051 500. The details of these bids, together with the letters accompanying them, are attached to this report. The estimate prepared by the Chief Engineer, and approved by the Consulting Engineer of this Company, amounts to $2 338 500.

A letter has been received from Mr. Breuchaud,—the contractor for the new Croton dam, one of the largest dams ever constructed,—in which he declines to bid, and states his reason. On account of the importance of this letter, we quote it in full:

3

(Copy)

J. BREUCHAUD,
Contractor,
Mem. Am. Soc. C. E.
Yonkers, N. Y.

Sept. 1, 1905.

CARY T. HUTCHINSON, Esq.,
Consulting Electrical Engineer,
60 Wall St., New York.

DEAR SIR.—I wish to thank you for remembering me among those whom you have asked to bid on the construction for the dam for the Susquehanna Water Power Co., near McCall's Ferry. I have given the project much thought, and find that the sum which I would name in my bid is so great that I have decided not to make a proposal. But I would like to say that I have visited the site of the dam, and my representative, Mr. B. Goldsborough, has spent four days there, studying local conditions. The plan which I feel is best suited to meet these and the one which I should adopt and which I feel sure would meet with your approval were I to do the work and assume the risks outlined in your proposed contract, would bring my bid if made to $3 909 812. The possibility of an extraordinary flow of water during the first or second season, makes it necessary to add one year's penalty to the bid, which, with the possible loss of one set of coffer dams, accounts for this high figure. Under average conditions, as shown by the flow of the river during the last fourteen years, the same work could be done for $2 321 000, and with favorable conditions, I think the cost might be reduced to about $2 000 000.

If, after considering your bids, you should then have an inclination to do the work as outlined in your letter of June 28th, 1905, I would be pleased to confer with you.

My experience in constructing the new Croton Dam and other difficult work would be of great service in enabling me to handle the very difficult conditions which exist at McCall's Ferry, and the approaching completion of the new Croton Dam would enable me to make use of the organization which from years of service there has become so nearly perfect.

Yours very truly,
(Signed) J. BREUCHAUD.

By this letter you will see that after a careful examination both of the plans and of the site, Mr. Breuchaud believes that

4

the work might be done for $2 000 000, or should be done for $2 321 000,—practically the Engineers' estimate. On account of Mr. Breuchaud's experience, these figures are a gratifying confirmation of the estimate. Mr. Breuchaud goes on to state, however, that if he were to bid under the terms of the contract submitted to the bidders, in which he would have to guarantee all possible contingencies that might arise, his bid would amount to $3 909 812. In other words, Mr. Breuchaud adds $1 600 000 to what he considers a fair estimate solely for reasons of insurance, equal to the full amount of the total possible risk. The Atlantic, Gulf and Pacific Company has stated to your Chief Engineer that in making its bid, it has added $550 000 to cover a possible penalty for one year's failure to complete the work, and $250 000 to cover possible loss of plant,—a total of $800 000 for insurance for these two items alone; the bid of this company differs from the bid that Mr. Breuchaud would have made by only $200 000. Other bidders have made similar statements to your Engineers to the effect that they too have added to what they consider a fair cost, sums of large amount to cover all extraordinary contingencies. They have also stated, quite independently of Mr. Breuchaud, that they believed that this work should be completed for a sum between a minimum limit of $2 000 000 and a maximum limit of $2 500 000, practically the sum that has been estimated, so that the letter of Mr. Breuchaud may be taken as representing the views not only of himself but of the various bidders. There is also a very material sum included in these bids for contractor's plant adapted to the needs of the remainder of this work,—that is, to the buildings and equipment, so that the entire contractor's plant is, in the bids, charged against, say one-half of the work. In your Engineers' estimate the cost of plant was distributed over the whole work, dam, power house, machinery, etc.; some allowance should be made for this.

This work is one of uncertainty in its execution, and no contractor of means and repute will be willing to make a contract for a fixed sum unless he has included in such sum the maximum amount to cover all accidents and contingencies

that can possibly be imagined; in other words, under a contract this Company is compelled to pay for the sum total of all possible accidents, that is, it binds itself to pay the maximum cost under the worst conditions, whereas in all human probability such a succession of accidents and contingencies as are implied in this excessive sum will not occur; the Company, therefore, cannot possibly come out advantageously by such an arrangement, and gives up all chance of benefits that would accrue to it from the average conditions which have existed for the last fifteen years. Furthermore, it is almost certain that during the progress of the work, as experience is gained, means can be found for the better carrying on of the work, and improvements in methods not now foreseen will be effected. Under a fixed contract the benefit of all such improvements will go to the contractor; under the plan recommended by this Board, all such benefits will accrue to the Company; in order, therefore, to obtain insurance against a maximum total cost the Company would have to pay as much as 100 per cent. insurance premiums under the estimated bid of Breuchaud. Although these contractors are all reputable it must be borne clearly in mind that, in all similar work, when the contractor finds himself threatened with a heavy loss, he either stops work and gives the company an opportunity to bring suit to collect on his bond,—a long and tedious proceeding,—or, as is usually the case, he compromises; the loss is never borne by the contractor in full.

In our opinion, the advantages of the plan that we recommend are:

1. The possibility of the Company starting work promptly, and without the preparation of detailed plans.

2. The ability of the Company to change the plans and methods of work as the work progresses and as circumstances arise.

3. The fact that the Company will reap the benefit of all improvements in methods and alterations in the plans.

4. The fact that there is no incentive to the contractor to slight the work.

Or, briefly, better results at less cost.

On the other hand, the only advantage claimed for the fixed sum plan is the assumed insurance against excessive cost.

In view of these bids and the letters and statements of the bidders, this Board strongly recommends to the Board of Directors the building of this dam and the dependent works by selecting some constructor of ability and experience, and paying him either a fixed bonus or a bonus plus a portion of such saving as he can effect below a previously agreed on maximum.

Very respectfully,

BOARD OF ADVISORY ENGINEERS

WM. BARCLAY PARSONS, Chairman.

Correspondence Re: Relocation of C. & P. D. R. R.

November 1, 1905.

A. J. Cassatt, Esq.,

President of the Pennsylvania Railroad,

Broad Street Station, Philadelphia, Pa.

Dear Sir:-

I am in receipt of yours of October 31st, giving me your ideas of what your railroad should receive in case you permitted it to be moved, as we requested. It is needless to say that I am very much disappointed, and if this really is your ultimate conclusion on the matter, we shall be obliged to build the lower dam, as we had first contemplated.

Our scheme was financed on the theory that we should build the lower dam. When subsequently we saw an opportunity to build a higher dam, if your railroad was moved, we, of course, found that the cost of the dam itself would be very much increased, but when we received the estimates of your chief engineer, as to what your present railroad could be duplicated for in the new place, we made up our mind that we should still have money enough to build the increased dam, and pay the amount he indicated as the cost. Your present idea would add so much to that sum that we could not bring it within our means, and there is no way that we could raise enough money, even if we thought it was well to do so to enable us to accomplish this. If you stand, therefore, inflexibly on that amount, it would be beyond our power, and we shall be obliged to proceed upon our original plans.

I will have the matter carefully gone over, and see if

there is any possible opportunity for us to advance anything within our means. We had supposed that the advantage to the Pennsylvania Railroad of having the same kind of a railroad as it now has in a place so much better than it is now, would make it very desirable for your railroad to have it done, and we have understood that that was the opinion of all connected with your railroad until we received your own ideas on the subject.

Yours very truly,

H. F. Alexander

McC. F. P. C. No. 1

The Pennsylvania Railroad Company

Office of the President

General Office
Broad Street Station

Philadelphia, December 6th, 1905.

Mr. Hugh L. Cooper,
Manager of Construction,
McCall Ferry Power Company,
60 Wall St., New York.

Dear Sir:

Your telegram of to-day is at hand. I did not understand that you were waiting for us to submit a proposition.

When you were here last I proposed that your Company should build the new line between Shenk's Ferry and Fishing Creek, connecting with the old road with a 0.3 grade; the graduation and masonry to be for double-track, but a single track only to be laid by you. I further offered to refund to you a part of the increased cost that you would incur for the graduation and masonry for the second track whenever we made use of it by laying track upon it. I now have to propose that the sum we pay you in accordance with the above be $200,000.

We are willing to make the same arrangement with reference to your development at Conowingo, you to do the grading and masonry on the new line for a double track and lay one track on it, we to pay you $175,000. when we make use of the second track grading by laying a track on it.

Mr. Brown estimates the cost of the new line, with grading and masonry for double-track, between Shenk's Ferry and Fishing Creek,

with one track laid on it at $1,437,520.00, and of the line between Fishing Creek and Canal Station, also with grading and masonry for double-track and with a single track laid on it, at $2,127,500.00. You understand, of course, that these are simply estimates of cost, and we expect you to do the work whatever it costs and to obtain the right-of-way at your expense.

Yours truly,

President.

Contract With Cooper for Hydraulic Construction

THIS AGREEMENT made and entered into this 18th day of October, 1905, by and between McCALL FERRY POWER COMPANY, herein called the "COMPANY", a corporation organized under the laws of the State of Pennsylvania, and having its principal office at 60 Wall Street, New York City, and HUGH L. COOPER, herein called "COOPER", a Consulting Engineer, with business offices at 60 Wall Street, New York City,

WITNESSETH:

WHEREAS the Company is about to construct a dam and power-house on the Susquehanna River near McCall's Ferry, in the State of Pennsylvania, with complete hydraulic and electric equipment and transmission lines to such points as it may select, and wishes to retain the services of Cooper in this work,

NOW, THEREFORE, in consideration of the payments and agreements hereunder, it is mutually agreed:

1. The Company agrees to employ and hereby does employ Cooper as "Hydraulic Engineer" and "Manager of Construction", of the works at McCall's Ferry, and Cooper agrees to serve in this capacity under the Company and its officers, for the term of this agreement.

2. Cooper's duties under this agreement shall include the preparation of plans and specifications for the works and for the method to be followed in the construction of the works, all of which plans and specifications shall be subject to the approval of the Chief Engineer of the Company. His duties shall also include the superintendence of the building of the dam, power-house and other buildings, embankment walls, protecting walls, the railroad changes, and all work at or near McCall's Ferry incidental to the development of a complete hydro-electric plant, including the entire hydraulic equipment of the plant; but Cooper's duties shall not include the design or superintendence of the electrical equipment of the plant, of the transmission lines, or of the sub-stations.

3. The term of this agreement shall be until the entire construction of the dam, buildings and all hydraulic works of the plant is completed, and ready for permanent operation.

4. Cooper agrees also to supply to the Company such part of the organization now working at Niagara Falls for the Electrical Development Company as may be sufficient to carry on the work at McCall's Ferry at the rate contemplated under this agreement; and if this organization is not sufficient, as determined by the Chief Engineer, Cooper agrees to supplement it by the best available men. All such persons shall be paid by the Company, except Value.

5. Cooper agrees also to supply the services of Beverly R. Value, now at Niagara Falls, as "Engineer in Charge" of the work at McCall's Ferry, and agrees for Value that his services shall be continuous, and that his entire time shall be given to this work. In case of incapacity, sickness or death of Value, Cooper will then supply a substitute for Value who shall be satisfactory to the Company; Cooper agrees to pay the salary of Value, or of his substitute. The term of Value's services shall be conterminous with Cooper's.

6. It is agreed that Cooper shall not be called upon to give his entire time to this work, but that he shall give as much time as is necessary, in the opinion of the Chief Engineer, for the completion of the work at the earliest possible date, and that he will undertake no other work which will conflict in any way with the prompt and economical execution of this work.

7. Cooper shall select and be responsible for all employes under him on the work at McCall's Ferry; and shall make all purchases of materials.

The Company may, however, require the dismissal of any employe or employes selected by Cooper, but the Company may not demand that Cooper shall employ any special person or persons. The salaries and rate of wages agreed to be paid by Cooper, all

obligations incurred for the account of the Company, all contracts made by Cooper for materials and for labor shall be subject to the approval of the Chief Engineer, whose decision shall be final.

8. It is understood between Cooper and the Company that the Company cannot now decide the elevation of the crest of the dam, which may be from 170 to 185 feet above sea level, called herein "approximately 180 feet", or 155 to 170 feet above sea level, called herein "approximately 155 feet."

9. In case the dam is built to an elevation of approximately 180 feet above sea level, the Company agrees to pay Cooper in full for the services of himself and Value, under this agreement, the sum of One Hundred and Twenty-five Thousand Dollars ($125,000), to be paid in twenty-five monthly installments of Five Thousand Dollars ($5000) each, the first payment to be made the first day of November, 1905; and the Company further agrees to pay Cooper, in case the work hereunder shall be so far completed as is defined in Clause 11, on or before the first of January, 1908, the additional sum of Fifty Thousand Dollars ($50,000); this sum to be paid in monthly installments of Five Thousand Dollars ($5000) each, until the remainder of the work to be done, up to and including the setting of the wheels, which terminates Cooper's term of service, shall have been finished, or until the entire amount shall have been paid; but nothing herein shall be held to release Cooper from his obligations under this agreement to complete all the works up to and including the setting of the wheels. The Company further agrees that if the failure to so far complete the work as is defined in Clause 11, on or before the first of January, 1908, shall be due to the act or omission of the Company, then the Company will continue to pay Cooper at the rate of Five Thousand Dollars ($5000) per month until the Fifty Thousand Dollars ($50,000) additional shall have been paid him,- after which no additional sums shall be paid,- or until Cooper's term of service shall have expired, when the balance, if any, of

the Fifty Thousand Dollars ($50,000) shall be paid to him.

10. In case the dam is built to an elevation of approximately 155 feet, it is mutually agreed that in Clause Nine, One Hundred Thousand Dollars ($100,000) shall be substituted for One Hundred and Twenty-five Thousand Dollars ($125,000), Four Thousand Dollars ($4000) for Five Thousand Dollars ($5000), and Thirty Thousand Dollars ($30,000) for Fifty Thousand Dollars ($50,000), and that all other provisions of Clause Nine shall be unchanged.

11. The work shall be deemed to be "completed"as far as earning the bonus of Fifty Thousand Dollars ($50,000) or Thirty Thousand Dollars ($30,000) is concerned, when the dam is finished to the crest line, the power-house substructure completed, all walls, embankments and incidental work completed, so that the dam and power-house are in such condition that a flood giving ten (10) feet of water on the crest of the dam shall cause no damage to any of the structures. The determination of this fact shall be made by the Chief Engineer, whose decision shall be final.

12. It is mutually agreed that the sums of One Hundred and Twenty-five Thousand Dollars ($125,000) or One Hundred Thousand Dollars ($100,000) to be paid Cooper shall be net payments to him, and that all expenses incurred by Cooper in the design or execution of this work, such as expenses of office force, draughtsmen, traveling expenses of himself and assistants, (but excepting Value's salary), shall be for the account of and payable by the Company.

IN WITNESS WHEREOF to this agreement executed in duplicate the said HUGH L. COOPER has set his hand and seal, and the said McCALL FERRY POWER COMPANY the signature of its President, and its seal, the day and year first above written.

W. H. Barnum, Esq., Treasurer,

McCall Ferry Power Co.,

62 Cedar St., New York City.

Dear Sir:-

The Executive Committee of this Company yesterday decided that the dam should be built to elevation 165, thus bringing it within the height called "approximately 155 feet" in Mr. Cooper's contract. You will therefore see that under these circumstances, Mr. Cooper's monthly compensation should be changed from $5000 to $4000, and should be continued until he has been paid a total of $100 000, and that $30 000 additional should be paid him after January 1st, 1908, in case he shall have complied with the completion clause in the contract. As you have been paying Mr. Cooper at the rate of $5000 a month for some time, the total of $100 000 will have been paid before January 1st, 1908, and I assume these payments to him should then cease until January 1st, 1908, and the additional payments provided for in the agreement should again begin. On this matter I would suggest that you get the opinion of Mr. Bartlett.

Yours very truly,

Cary T. Hutchinson

Chief Engineer.

Contract With Sanderson & Porter for Electrical Construction

THIS AGREEMENT, made and entered into this 25th day of October, 1905, by and between McCALL FERRY POWER COMPANY, herein called the "COMPANY", a corporation organized under the laws of the State of Pennsylvania, and having its principal office at 60 Wall Street, New York City, and SANDERSON AND PORTER, herein called the "FIRM", a partnership doing business as Engineers and Contractors, with offices at 52 William Street, New York City, WITNESSETH:

WHEREAS the Company is about to construct a dam and power-house on the Susquehanna River near McCall's Ferry, in the State of Pennsylvania, with complete hydraulic and electric equipment, and transmission lines to such points as it may select, and wishes to retain the services of the Firm in this work,

NOW, THEREFORE, in consideration of the payments and agreements hereunder, it is mutually agreed

1. That the Company hereby employs the Firm as Superintendent of Electrical Construction of its works, and that the Firm will serve in this capacity under the Company and its officers for the term of this agreement:

2. That the term of this agreement shall be until the installation of all the electrical equipment, including transmission lines and sub-stations, is complete and ready for permanent operation,- except that in no case shall the term of this agreement be for a longer period than until January first, 1909:

3. That all work the Firm shall do and all duties that are assigned to it under this agreement, shall be subject to the approval of the Chief Engineer of the Company, and shall be executed under his direction, and that his decision shall be final in all questions arising under this agreement:

4. That the Firm's duties under this agreement shall, in general, include the preparation of plans and specifications for the work; the purchase of materials and machinery, apparatus and equipment; the employment of labor; the testing, either at the factories or on the ground, of all machinery and apparatus; the installation

of machinery and apparatus; the keeping of a complete set of books and vouchers covering its disbursements; the examination, audit and approval of bills and accounts for labor, materials and equipment, and the preparation of drafts for their payment. Furthermore, the Firm will, when requested, give the Company the benefit of its skill and experience relating to the policy and operation of this plant, and, in general, will use its best efforts to further the interests of the work. The scope of its duties shall begin with the electric generators, and shall include the switchboard, transformers and all appurtenances; the transmission lines, including poles and substations, and all incidental equipment; and in addition, the superintendence of such related work as may be requested by the Chief Engineer. The duties of the Firm shall not at any point touch upon the hydraulic equipment of the plant:

5. That the Firm will supply to the Company the services of such part of its organization as may be necessary and sufficient for the carrying on of this work at the rate of progress contemplated:

6. That the Firm shall not be called upon to give its entire time to this work, but that it shall give as much time as is necessary, in the opinion of the Chief Engineer, to ensure the completion of the work in due season, and that it will undertake no other work which will conflict with the satisfactory discharge of its duties hereunder:

7. That in consideration of the services to be rendered by the Firm, the Company will pay to the Firm the sum of Fifty Thousand Dollars ($50,000) in thirty-eight equal monthly installments, the first installment to be paid November first 1905; but in case the work is completed before January first, 1909, the Company will pay the Firm upon the completion of the work, whatever balance may be due to it.

8. That the Company will pay all the expenses in connection with the work done by the Firm under this agreement, it being the intent that the fee paid the Firm shall be subject to no deductions for expenses; but the Company will not pay any part of the general office expenses of the Firm in New York, as, for instance, such items as office rent, local telephone service, and general expenses of office operation; but the Company will reimburse the Firm for all disbursements for engineers, draftsmen, clerical force and other employes employed directly on work for the Company.

IN WITNESS WHEREOF to this agreement executed in duplicate, the said SANDERSON AND PORTER has set its hand and seal, and the said McCALL FERRY POWER COMPANY the signature of its President and its seal, the day and year first above written.

June 19, 1906 .

Henry F. Dimock, Esq., President,

McCall Ferry Power Company.

Dear Sir:-

I wish to call your attention to the following comparison of the various estimates that have been made for the development of the McCall Ferry property.

The comparison is made between (1) the original estimate of the underwriting papers, (2) the estimate of December 18, 1905, for the 185 foot dam, and (3) Mr. Cooper's recent estimate for the 165 foot dam at McCall Ferry. The costs per horse-power are respectively $119, $117 and $125.

These estimates are as follows:-

Comparison of Estimates of McCall Ferry Development

	Power Delivered	Total Cost	Cost per Horse-power.
(1) Original Estimate.			
	50 000 h.p.	$5 491 000	$110
Add for Peach Bottom Purchase		450 000	
		$5 941 000	$119
(2) Estimate of December 18, 1905:			
	50 000 h.p.	$8 265 000	$165
Add for	25 000 h.p.	500 000	
Making for	75 000 h.p.	$8 765 000	$117
(3) Cooper's Estimate of June 18, 1906:			
	50 000 h.p.	$8 859 000	$177
Add for	25 000 h.p.	533 000	
Making for	75 000 h.p.	$9 392 000	$125

H. F. D.:-

That is to say, in spite of the very great increases in the cost of railroad elevation, of property, and sundry expenses, the present estimate, using Mr. Cooper's figures as a basis (which are unquestionably maximum figures), shows substantially the same cost per horse-power as did the original estimate; the proposition is, however, now based on 75 000 horse-power, whereas it was originally based on 50 000 horse-power,- thus insuring materially greater net earnings.

The conclusion to be drawn from this is that the merits of the original proposition were much understated, and that under existing conditions the proposition is better than at the outset.

Yours very truly,

Cary J. Hutchinson

Chief Engineer.

BOYD EHLE,
RESIDENT ENGINEER.
R. H. ANDERSON,
ASSISTANT ENGINEER.

WM. BARCLAY PARSONS,
CONSULTING ENGINEER.

June 19, 1906.

H. F. Dimock, Esq.,
President, McCall Ferry Power Company,
60 Wall St., New York City.

My dear Sir:-

In accordance with your request, I asked Mr. Hugh L. Cooper, Manager and Engineer of Hydraulic Construction, to furnish me with his estimate of the construction of dams with a crest elevation of 165 feet and 185 feet, or at such other height as in his judgment would not require the purchase of additional land. In transmitting this request to Mr. Cooper, I told him that he was at entire liberty to make any suggestions that he might wish.

Mr. Cooper has submitted six different projects. These projects cover three plans for dams at McCall Ferry and three at Cully's Falls. Of the dams at McCall Ferry one would have a crest elevation of 185 feet and would be designed to deliver 90 000 kilowatts at Baltimore; the other two would have an elevation of 165 feet, with a capacity to deliver 45 000 kilowatts and 65 000 kilowatts in Baltimore. The Cully's Falls dams would all have a crest elevation of 165 feet, one to deliver 45 000 kilowatts in Baltimore, another to deliver 45 000 kilowatts, with foundations for machinery for generating 45 000 kilowatts more, and one to deliver 90 000 kilowatts.

As you will see by these figures, Mr. Cooper estimates that the fall of the river is sufficient to economically install a larger amount of electric power than the Chief Engineer had previously, but more conservatively, estimated. The details of Mr. Cooper's plans and estimates are summarized as follows:

No.	Location	Crest Elev.	No. Units in Generating Station	Kilowatts Delivered in Balto.	Estimate of Cost	Cost per kw. Delivered
1	McCall Ferry	165'	13	65 000	$10 447 400	$160.76
2	"	"	9	45 000	9 132 200	202.93
3	"	185	12	90 000	12 476 000	138.60
4	Cully's Falls	165	6	45 000	9 106 600	202.35
5	"	"	12	90 000	11 240 000	124.90
6	"	"	6 *	45 000	9 384 000	208.60

* (Plus foundations for six additional)

Mr. Cooper's estimates are considerably higher than the estimates heretofore considered by the Board. This, in the case of the dam at elevation 185 feet at McCall Ferry, is due largely to the fact that Mr. Cooper has added $990 000 to the amount of property to be acquired. He has also increased the construction estimates above what he had previously submitted or what had been considered by the Board. His reasons for increasing the construction estimates, which in the case of the dam at elevation 185 feet amounted to $750 000, are to allow a very generous, an apparently unnecessarily generous,- amount for contingencies, to cover the increased expenditure for tools, which his plan has shown to be necessary, and a rise in the price of cement, against which he had not taken options.

After a general discussion between the Chief Engineer, Mr. Blackwell and Mr. Cooper, it would seem that the most economical development at the McCall Ferry site would be a total output of 75 000 horse-power, of which approximately 50 000 horse-power would be installed immediately, generated by seven units, and 25 000 horse-power postponed until the future, to be generated by three additional units,

3

the foundations of which, however, would be put in at the outset.

Mr. Cooper was then requested to submit estimates on the McCall Ferry and Cully's Falls sites, for plants of the same capacity, and with dams built to an elevation of 165 feet; these estimates are as follows:

McCall Ferry.

Hydraulic Installation	$3 429 000
Electrical Installation	1 305 000
Engineering	300 000
Fixed Charges	3 140 000
Loss of Interest during Construction	675 000
	$8 859 000

Cully's Falls.

Hydraulic Installation	$3 453 000
Electrical Installation	1 247 000
Engineering	300 000
Fixed Charges	3 180 000
Loss of Interest during Construction	750 000
	$8 930 000

In the making of these estimates, Mr. Cooper has used plans with somewhat larger sections than those heretofore considered by the Board of Engineers, giving a dam of much greater weight, in order to provide an additional margin of safety, and foundations for a power-house on a somewhat larger scale in order to carry the greater power. For the moment it would seem wise to accept Mr. Cooper's enlarged sections, for if there is any error, it is an error on the safe side. The details of Mr. Cooper's estimates have been gone over very thoroughly, and it would seem that he has included an exceedingly liberal margin for all possible contingencies. The Board may accept, therefore, Mr. Cooper's total estimate as the maximum cost of a

dam at elevation 165 feet at McCall Ferry. In this estimate Mr. Cooper has increased the previous estimate for right of way for the transmission line to Havre de Grace and Baltimore from $65 000 to $185 000, and the right of way for the Pennsylvania Railroad diversion from $100 000 to $180 000,- an increase of $80 000; and an arbitrary increase of $100 000 for other unknown damages, a total increase in the real estate of $295 000. I personally have no means of knowing the correctness of these real estate estimates.

In regard to the increase of $100 000 for additional lands I beg leave to refer to a letter of the Chief Engineer, attached hereto, in which he states that there is no further land to be acquired above the dam or damages to pay, provided the dam is built not to exceed elevation 165.

It is impossible to say at just what cost Mr. Cooper can complete this dam. It may be stated, however, that unless some extraordinary contingency occurs, the actual cost should be considerably below Mr. Cooper's estimate,- possibly as much as $500 000.

Mr. Cooper makes the recommendation that the work be suspended at McCall Ferry, and that a dam be built at Cully's Falls about one mile further down the river, at crest elevation 165 feet, with machinery installed to doliver 45 000 kilowatts at Baltimore and with foundations for machinery having a capacity of 45 000 kilowatts more; in other words, plan number six in the table first above.

As this involves a complete change in plans, the opening of a number of new uncertainties, and the probable delay in the completion of the work for at least one year, it is my opinion that the work should be carried out as heretofore planned, at the McCall Ferry site, and that the dam should be built at an elevation of 165

feet, unless the Board should see its way clear to carry out a scheme at a greater elevation to make a more economical installation.

Very truly yours,

Wm. Barclay Parsons
Consulting Engineer.

In view of the existing circumstances, we concur in the recommendation to build the dam at the McCall Ferry site, at elevation 165 feet, and we believe that the cost will be within the amount fixed by Mr. Cooper.

Chief Engineer.

F. O. Blackwell
Jr. U.S.C.

AGREEMENT

BETWEEN

COLUMBIA AND PORT DEPOSIT RAILWAY COMPANY,

PHILADELPHIA, BALTIMORE AND WASHINGTON RAILROAD COMPANY,

AND

McCALL FERRY POWER COMPANY.

DATED 13th AUGUST, 1906.

REGARDING THE RECONSTRUCTION OF THE COLUMBIA AND PORT DEPOSIT RAILWAY BETWEEN SAFE HARBOR AND A POINT 500 FEET SOUTH OF BENTON STATION, PENNSYLVANIA.

THIS AGREEMENT made and entered into this thirteenth day of August, 1906, between the **Columbia and Port Deposit Railway Company,** a corporation of the States of Pennsylvania and Maryland, and the **Philadelphia, Baltimore and Washington Railroad Company,** a corporation of the States of Pennsylvania, Delaware and Maryland, operating as Agent the railway of the said Columbia and Port Deposit Railway Company, parties of the first part, hereinafter called "Railway Companies," and the **McCall Ferry Power Company,** a corporation of the State of Pennsylvania, party of the second part, hereinafter called "Power Company."

Whereas by agreement dated July 2nd, 1906, between the Railway Companies and the Power Company, a copy whereof is hereto annexed, the Columbia and Port Deposit Railway Company agreed, *inter alia*, to construct its relocated roadbed, tracks and appurtenances between Safe Harbor and a point 500 feet south of Benton Station, Lancaster County, Pennsylvania, in accordance with the terms and conditions in the said agreement fully set forth, the Power Company therein agreeing, *inter alia*, to pay the cost of grading said relocated roadbed and constructing the masonry for a double track railway beteewn Safe Harbor and a point 500 feet south of Benton Station, and the cost of laying upon such grading and masonry a single track railway in accordance with plans and specifications to be prescribed by the Railway Companies, and also the cost of erecting telegraph lines, stations and other facilities and appurtenances of the same general

character and to take the place of those now used in connection with the present railway line, all of the said work to be performed under authority to be conferred by the Columbia and Port Deposit Railway Company and the said construction payments to be made monthly by the Power Company on demand of the Columbia and Port Deposit Railway Company.

And Whereas the Power Company now desires to undertake the said work of constructing its dam at or near McCall's Ferry, Lancaster County, Pennsylvania, and in connection therewith and to facilitate the said work and avoid unnecessary expense and delay it is essential that the work of constructing the said roadbed, tracks, telegraph lines, stations and other facilities and appurtenances should forthwith be undertaken.

Now, Therefore, This Agreement Witnesseth, that in consideration of the premises and of the covenants and undertakings herein expressed to be observed, kept and performed, as well as of the sum of one dollar by each party to the other in hand paid before the sealing and delivery hereof, the receipt whereof is hereby acknowledged, each of the parties hereto for themselves, their successors and assigns, mutually covenant, stipulate and agree as follows:—

First:—That the Columbia and Port Deposit Railway Company hereby authorizes the Power Company, acting as its agent and for and on its behalf, to cause the said relocated roadbed, tracks, telegraph lines, stations and other facilities and appurtenances between Safe Harbor and a point 500 feet south of Benton Station to be constructed in accordance with plans and specifications prescribed and approved by the Chief Engineer of the Railway Companies, and to cause the said work to be prosecuted and completed without delay under the supervision and

to the satisfaction of the Chief Engineer of the Railway Companies, or his representative, and paid for in accordance with the covenants and undertakings contained in the said agreement of July 2nd, 1906.

Second:—The Power Company hereby agrees, acting for and on behalf of and under authority hereby conferred by the Railway Companies, to cause the work of constructing the said relocated roadbed, tracks, telegraph lines, stations and other facilities and appurtenances to be prosecuted and completed without delay in accordance with plans and specifications prescribed and approved by the Chief Engineer of the Railway Companies and under his supervision and to the satisfaction of the said Chief Engineer, or his representative, and to make all payments therefor in accordance with the terms and conditions of the said agreement of July 2nd, 1906; and report to the Columbia and Port Deposit Railway Company, within twenty days after the end of each month, the payments made to the Contractor for the work performed during the preceding month; and that the said relocated roadbed, tracks, telegraph lines, stations and other facilities and appurtenances shall be delivered to the Columbia and Port Deposit Railway Company free and clear of any liens, claims or demands whatsoever for materials furnished and provided and work and labor done and performed upon or in connection with the said work.

4

In Witness Whereof the said parties hereto have caused their respective corporate seals to be hereunto affixed, duly attested, the day and year first hereinbefore written.

Signed, sealed and delivered in the presence of us:

AGREEMENT

BETWEEN

COLUMBIA AND PORT DEPOSIT RAILWAY COMPANY,

PHILADELPHIA, BALTIMORE AND WASHINGTON RAILROAD COMPANY,

AND

McCALL FERRY POWER COMPANY.

DATED 2ND JULY, 1906.

REGARDING THE CONSTRUCTION OF DAMS ACROSS THE SUSQUEHANNA RIVER AT McCALL'S FERRY AND CONOWINGO, AND THE RELOCATION AND IMPROVEMENT OF THE COLUMBIA AND PORT DEPOSIT RAILWAY BETWEEN ~~SAFE HARBOR~~, PENNSYLVANIA, AND ROCK RUN, MARYLAND.

THIS AGREEMENT made and entered into this second day of July, 1906, between the **Columbia and Port Deposit Railway Company,** a corporation of the States of Pennsylvania and Maryland, and the **Philadelphia, Baltimore and Washington Railroad Company,** a corporation of the States of Pennsylvania, Delaware and Maryland, operating as Agent the railway of the said Columbia and Port Deposit Railway Company, parties of the first part, hereinafter called "Railway Companies," and the **McCall Ferry Power Company,** a corporation of the State of Pennsylvania, party of the second part, hereinafter called "Power Company."

Whereas the Railway Companies and the Power Company entered into an agreement dated 16th, February, 1906, regarding the construction of dams across the Susquehanna River, at McCall's Ferry and Conowingo, and the relocation and improvement of a portion of the Columbia and Port Deposit Railway.

And Whereas certain changes in the plans of the Power Company now make it desirable that the said agreement be cancelled, and the following agreement executed in lieu thereof.

And Whereas in the opinion of the Columbia and Port Deposit Railway Company the relocation and improvement of portions of its railway is desirable to further and better secure the safety of persons and property and facilitate the transportation of traffic thereon and avoid the interruption thereof by reason of ice and floods in the Susquehanna River, and it is intended to undertake such work from time to time in the future;

And Whereas the Power Company proposes to construct a dam across the Susquehanna River at or near McCall's Ferry, Lancaster County, Pennsylvania, and

2

contemplates the construction of another dam at or near Conowingo, Cecil County, Maryland, either of which would prevent the operation of the Columbia and Port Deposit Railway on its present location, and has requested the Columbia and Port Deposit Railway Company to immediately proceed with the relocation and construction of that portion of its railway and appurtenances as hereinafter set forth, and in consideration of its so doing has agreed to pay the entire cost thereof,

Now, Therefore, This Agreement Witnesseth that in consideration of the premises and of the covenants and undertakings herein expressed to be observed, kept and performed, as well as of the sum of one dollar by each party to the other in hand paid before the sealing and delivery hereof, the receipt whereof is hereby acknowledged, each of the parties hereto for themselves, their successors and assigns, mutually covenant, stipulate and agree as follows:—

First:—The Power Company hereby agrees to promptly proceed with the construction of a dam in the Susquehanna River at or near McCall's Ferry, Lancaster County, Pennsylvania.

Second:—The Columbia and Port Deposit Railway Company, in order to provide for the relocation, widening and improvement of said railway, as hereinafter set forth, has adopted a revised location for that portion thereof between Safe Harbor and Peach Bottom, Lancaster County, Pennsylvania, a distance of fifteen and five-tenths miles, and hereby agrees to also adopt a revised location for that portion between a point about eight hundred and fifty feet south of Fishing Creek Station, Lancaster County, Pennsylvania, and a point at or near Rock Run, Cecil County, Maryland, a distance of about fifteen miles, indicated on the plan hereto attached marked "Exhibit A, July 2nd, 1906," which revised locations will require the construction of a new roadbed and

track at a higher level, and on a wider roadbed, than the present railway, between Safe Harbor and Rock Run; and the Railway Companies hereby agree to take all other corporate action necessary to authorize the construction of such relocated roadbed, tracks and appurtances as herein fully set forth.

Third:—The Columbia and Port Deposit Railway Company hereby agrees to acquire, as hereinafter provided, the right of way for and construct such relocated roadbed, track and appurtenances between Safe Harbor and a point 350 feet south of Peach Bottom Station, Lancaster County, Pennsylvania, and, in case the Power Company shall hereafter determine to build the Conowingo dam, the Columbia and Port Deposit Railway Company agrees to acquire, as hereinafter provided, the right of way and construct such relocated roadbed, track and appurtenances between a point about 850 feet south of Fishing Creek Station, Lancaster County, Pennsylvania, and Rock Run Station, Cecil County, Maryland, the said relocated roadbed, track and appurtenances to be constructed upon such alignment and with such grades and in accordance with such plans and specifications as the Railway Companies may prescribe, and subject to the approval of their Chief Engineer, or his representative, it being hereby understood and agreed that the alignment shall not be less favorable, nor shall it be required to be more favorable, than that of the present roadbed and track of the said railway between the said points, but that there shall be no grades opposed to the eastbound traffic and that the grades opposed to the westbound traffic shall not be more than 0.3% equated for curvature, excepting that until the work of constructing the Conowingo dam is undertaken the grade against the westbound traffic may be 0.5% between a point 850 feet south of Fishing Creek Station and a point 500 feet south of Benton Station. If the building of the said Conowingo dam is not undertaken before January 31st, 1913, all the rights and privileges conferred by this agree-

ment in regard to the Conowingo dam shall then cease and terminate, and the Power Company hereby agrees to then immediately pay the Columbia and Port Deposit Railway Company the amount required by it to reduce the said grade of 0.5% to a grade of 0.3% equated, which will necessitate the construction of the said relocated roadbed and track from a point 850 feet south of Fishing Creek Station to a connection with the present roadbed at a point 350 feet south of Peach Bottom Station, Lancaster County, Pennsylvania.

The Power Company further agrees that if the Columbia and Port Deposit Railway Company shall, before January 31st, 1913, reduce the grades upon the parts of the said railway above Safe Harbor and below a point 350 feet south of Peach Bottom Station to a maximum grade of 0.3% equated for curvature the Power Company will pay the entire expense of maintaining and operating an extra engine and crew to aid in the movement of trains over the said 0.5% grade if, in the opinion of the Railway Companies, such engine shall be necessary, until the said 0.5% grade shall be reduced to 0.3% as hereinbefore provided.

The Power Company further agrees that, upon the request of the Railway Companies, it will furnish and cause to be conveyed free of cost to the said Columbia and Port Deposit Railway Company, the right of way for such relocated roadbed, track and appurtenances between Safe Harbor and Rock Run, so far as it now owns the real estate necessary therefor, as soon as the same shall be required by the Columbia and Port Deposit Railway Company pursuant to the provisions hereof.

The Columbia and Port Deposit Railway Company agrees, as soon as the same shall be required pursuant to the provisions hereof, to obtain by purchase so much of the remainder of such right of way as it shall be able to so obtain on terms and at prices to be approved by the Power Company, and further agrees to cause to be instituted and carried on with due diligence legal pro-

ceedings to obtain the remainder, if any, of such right of way by condemnation; and the Power Company agrees to pay from time to time, as the same shall be incurred, and on demand of the Columbia and Port Deposit Railway Company, the whole cost and expense of so obtaining such remainder of such right of way, either by purchase or condemnation.

Fourth:—The Power Company also hereby agrees to pay the cost of grading said relocated roadbed and constructing the masonry for a double track railway between Safe Harbor and Rock Run, and the cost of laying upon such grading and masonry a single track railway in accordance with plans and specifications to be prescribed by the Railway Companies, and also the cost of erecting telegraph lines, stations and other facilities and appurtenances of the same general character and to take the place of those now used in connection with the present railway line, all of the said work to be performed under authority to be conferred by the Columbia and Port Deposit Railway Company and the said construction payments to be made monthly by the Power Company on demand of the Columbia and Port Deposit Railway Company.

Fifth:—The Railway Companies hereby agree that during the construction of the said relocated roadbed, tracks and appurtenances such work of construction shall not be subjected to unnecessary delay, and the Power Company hereby agrees to pay to the Railway Companies, as part compensation for the loss of revenue and for the cost of moving their traffic by another route, the sum of $300. per day, for each day that the railway may be closed while the line between Safe Harbor and a point 500 feet south of Benton Station is being constructed; and if the Conowingo dam be placed under construction, the Power Company hereby agrees to pay to the Railway Companies the actual cost, resulting from the loss of local traffic and the cost of moving through traffic by another route, during the time that the railway may be

closed to permit the construction of the said relocated roadbed and track between a point 850 feet south of Fishing Creek and Rock Run, such cost to be certified by the Railway Companies.

The Power Company shall not be compelled to make any payment to the Railway Companies for the loss or diversion of traffic in connection with the work of reducing the said 0.5% grade between a point 850 feet south of Fishing Creek Station and a point 500 feet south of Benton Station to a 0.3% grade between a point 850 feet south of Fishing Creek Station and a point 350 feet south of Peach Bottom Station, as provided in Article Third hereof, unless such reduction of grade, in the opinion of the Railway Companies, requires the closing of their railway or the diversion of the traffic therefrom, but in such event the Power Company hereby agrees to pay to the Railway Companies the actual cost resulting from the loss of local traffic and the cost of moving through traffic by another route.

Sixth:—The Railway Companies hereby agree to facilitate the construction of the said relocated roadbed, track and appurtenances between Safe Harbor and Rock Run and will permit the use of the present tracks of the Railway Companies extending along the parts of the line to be relocated, and when the said relocated roadbed, track and appurtenances shall have been constructed and accepted by the Railway Companies, the material in the old line will be disposed of, and the amount received therefrom shall be deducted from the payments to be made by the Power Company, except the amount received from the disposition of the material in that part of the line between Safe Harbor and Shenk's Ferry, which shall be retained by the Railway Companies.

Seventh:—The Railway Companies hereby agree that when they shall make use of the grading of said relocated roadbed, built under the terms of this agreement, for laying a second track thereon, they will pay to the

Power Company for the grading, masonry and right of way for such second track between Safe Harbor and a point 500 feet south of Benton Station the sum of $200,000.; and for that part thereof between a point 850 feet south of Fishing Creek Station and Rock Run the sum of $175,000. and if the latter section is not constructed as hereinbefore provided they will pay to the Power Company for that portion between a point 850 feet south of Fishing Creek Station and a point 350 feet south of Peach Bottom Station, when the grade thereof has been reduced to 0.3%, the sum of $47,144.

Eighth:—The Power Company hereby agrees to pay said Railway Companies all damages which may be sustained by them and to indemnify, protect and save harmless the Railway Companies from all claims, costs, charges, suits, demands or actions arising out of, or in connection with, or resulting from, the construction, existence or operation of the said dams, or from the closing, (if such be necessary,) and reconstruction of the said portions of the line of the Columbia and Port Deposit Railway Company.

The Power Company hereby further agrees that contemporaneously with the execution of this agreement it will execute and deliver unto the Railway Companies a bond in the sum of $250,000. with sureties satisfactory to them, conditioned for the full and faithful performance by the Power Company, and its successors, of each and every its several covenants and agreements herein contained for and during the period of construction of its said dams, and for and during the reconstruction of the said portions of the line of railway and appurtenances of the said Railway Companies and until such portions are satisfactorily completed and placed in operation.

When the said portions of the line and appurtenances of the Railway Companies upon the new location shall have been constructed in conformity with the terms of this agreement and the same have been duly accepted by them and placed in operation, and the Power Com-

pany shall have made the payments required by this agreement, then and thereupon said bond shall become void, it being, however, distinctly understood that the giving and acceptance of the said bond shall not be construed as in any way limiting the measure of the liability and obligation under this agreement of the Power Company, and its successors, but shall be treated and considered as further and additional security, for the protection of the Railway Companies.

If, at any time, the sureties upon the bond shall be deemed insufficient by the Railway Companies, the Power Company hereby agrees to forthwith furnish other sureties satisfactory to the Railway Companies.

Ninth:—The Railway Companies and the Power Company hereby agree that in consideration of the covenants in this agreement contained (and to enable the Railway Companies to co-operate with it in the prompt delivery of materials, and the prompt construction of, the said relocated roadbed, track and appurtenances) they will, in so far as they may legally and properly be able to do so, ship or cause to be shipped, all materials ordered for the said roadbed, track and appurtenances, and the dams hereinbefore mentioned, by the lines in the Pennsylvania Railroad System and over and by the lines of railroad owned, operated or controlled by the Railway Companies.

Tenth:—The Railway Companies hereby agree that if the Power Company does not desire to construct the said Conowingo dam, it may, not later than June 30th, 1912, assign to another corporation, all of its rights, privileges, covenants and obligations in this agreement in so far as they relate to the said dam, but such assignment shall not be made until the form thereof, and the Company to whom the assignment is to be made, are approved by, and declared to be entirely satisfactory to, the Railway Companies, and only when such Assignee Company shall assume and agree to perform all the obligations of the Power Company under this agreement

in respect thereto and agree that the construction of the said dam, if undertaken, shall be subject to the covenants, undertakings, conditions and obligations of this agreement.

Eleventh:—This agreement shall take the place of the said agreement dated February 16th, 1906, between the Railway Companies and the Power Company, which is hereby annulled and cancelled.

In Witness Whereof the said parties hereto have caused their respective corporate seals to be hereunto affixed, duly attested, the day and year first hereinbefore written.

Contract With Kerbaugh for Relocation Work

McCALL FERRY POWER COMPANY

60 WALL STREET

NEW YORK

AGREEMENT

between

McCALL FERRY POWER COMPANY

and

H. S. KERBAUGH, Incorporated

Dated August 27, 1906

Regarding the Proposed Re-located Roadbed, Tracks, Telegraph Lines and Other Facilities and Appurtenances of the Columbia and Port Deposit Railway Company between Safe Harbor and a point 500 feet south of Benton Station, Lancaster County, Pennsylvania

THIS AGREEMENT, made and entered into this 27th day of August, 1906, between the McCall Ferry Power Company, a corporation of the State of Pennsylvania, party of the first part, hereinafter called "Power Company," and H. S. Kerbaugh, Incorporated, a corporation of the State of West Virginia, party of the second part, hereinafter called "Contractor."

Whereas, the Power Company has made an agreement, dated August 13th, 1906, with the Columbia and Port Deposit Railway Company and the Philadelphia, Baltimore and Washington Railroad Company, a copy whereof is hereto annexed;

And Whereas, the Power Company and H. S. Kerbaugh, Incorporated, entered into an agreement, dated 14th April, 1906, regarding the reconstruction of the Columbia and Port Deposit Railway, between Shenk's Ferry and Peach Bottom, Lancaster County, Pennsylvania, and

Whereas, certain changes in the plans of the Power Company now make it desirable that the said agreement be cancelled, and the following agreement executed in lieu thereof;

And Whereas, the Columbia and Port Deposit Railway Company has authorized the Power Company, at the request of the latter, in connection with its undertaking the work of constructing its dam at or near McCall Ferry, Lancaster County, Pennsylvania, to act for and on behalf of, and under authority given by, said Columbia and Port Deposit Railway Company in causing the construction of its relocated roadbed, tracks, telegraph lines, stations and other facilities and appurtenances between Safe Harbor and a point 500 feet south of Benton Station, Lancaster County, Pennsylvania, to be prosecuted and completed without delay in accordance

with plans and specifications and under the supervision and to the satisfaction of the Chief Engineer of the Railway Companies, or his representative, the Power Company, to make all payments therefor in accordance with the terms and conditions of the said agreement of August 13th, 1906, and said Columbia and Port Deposit Railway Company has furnished to said Power Company such plans and specifications;

And Whereas, the latter Company, in pursuance of the authority conferred upon it by the said Columbia and Port Deposit Railway Company, desires to employ the Contractor to construct and complete, at the cost of the Power Company, the said work of the Columbia and Port Deposit Railway Company hereinbefore referred to, in accordance with all the specifications and provisions, and upon all the terms and conditions hereinafter stated;

And Whereas, Contractor desires to so undertake and perform said work;

Now, Therefore, This Agreement Witnesseth: That in consideration of the premises and of the covenants and undertakings, herein expressed to be observed, kept and performed, as well as of the sum of one dollar by each party to the other in hand paid before the sealing and delivery hereof, the receipt whereof is hereby acknowledged, each of the parties hereto for themselves, their successors and assigns, mutually covenant, stipulate and agree as follows:

First.—The Power Company, acting for and on behalf of and under the authority conferred by the Columbia and Port Deposit Railway Company, does hereby authorize the said Contractor to construct and complete without delay the said relocated roadbed, tracks, telegraph lines, stations and other facilities and appurtenances for the said Columbia and Port Deposit Railway Company, the work

to be performed in accordance with plans and specifications approved by, and under the supervision and to the satisfaction of, the Chief Engineer of the Columbia and Port Deposit Railway Company, or his representative, hereinafter called the Chief Engineer of the Railways, said specifications being set forth below under the heading "Specifications" and made a part hereof, and such work to be performed in conformity with all the other provisions hereinafter contained, the Power Company to pay the Contractor therefor the compensation hereinafter provided.

Second.—That for and in consideration of the covenants and payments herein mentioned to be made and performed by the Power Company, the Contractor doth hereby covenant and agree to furnish all materials and labor necessary to complete, in the most substantial and workmanlike manner, to the satisfaction and acceptance of the Chief Engineer of the Railways, the proposed relocated roadbed, tracks, telegraph lines, stations and other facilities and appurtenances of the Columbia and Port Deposit Railway Company between Safe Harbor and a point 500 feet south of Benton Station, Lancaster County, Pennsylvania; and to completely perform and finish all the said work as described in the following specifications, and agreeably to the directions received from the said Chief Engineer, and in conformity with all the further provisions hereof, within eighteen months of the date of this agreement; and the Contractor further covenants and agrees that he will complete that part of the work described in the following specifications which is to be done above the dam now being constructed by the Power Company near McCall Ferry, Lancaster County, Pennsylvania, where the elevation of the existing track of the Columbia and Port Deposit Railway is now 175 feet or less, by April 1st, 1907.

Third.—The construction of such relocated roadbed, track and appurtenances, which Contractor hereby agrees to do, shall include grading such relocated roadbed and

constructing the masonry for a double-track railway between said Safe Harbor and a point 500 feet south of Benton Station, including all culverts, bridge sub-structures for double-track and bridge superstructures for single-track; and laying upon such grading and masonry a single-track railway, ballasted and ready for use between said points, in accordance with the plans and specifications aforesaid, and erecting and constructing telegraph lines, stations, side-tracks, connections and other facilities and appurtenances of the same general character and to take the place of those now used in connection with the present railway line; but it is expressly understood that Contractor is not required to furnish, or pay any expense of procuring any part of the right of way for such relocated roadbed, track and appurtenances.

SPECIFICATIONS.

Fourth.—The work to be done by the Contractor hereunder consists in the furnishing of all material and performing all labor necessary to the rebuilding of that portion of the Columbia and Port Deposit Railway between Safe Harbor and a point 500 feet south of Benton Station, about 13.9 miles, according to detailed plans and specifications to be made from time to time by the Chief Engineer of the Railways, as work progresses; all for a new line of railway between Safe Harbor and a point 500 feet south of Benton Station, as set forth in the contract between the Railway Company and the Power Company of August 13th, 1906, and the Contractor is obligated to furnish all material and perform all the labor required of the Power Company between Safe Harbor and a point 500 feet south of Benton Station in said contract of August 13th, 1906.

Fifth.—Contractor hereby agrees, in order to enable said Railway Company to co-operate with it in the prompt delivery

of materials and the prompt construction of such relocated roadbed, track, stations and appurtenances, that it will, in so far as it may legally and properly be able to do so, ship, or cause to be shipped, all materials ordered for such relocated roadbed, track, stations and appurtenances by the lines of the Pennsylvania Railroad system and over and by the lines of the railroad owned, operated or controlled thereby.

Sixth.—The said Power Company doth promise and agree to pay to the said Contractor for the work to be done under this contract, the total price of one million two hundred and fifty thousand dollars ($1,250,000), payable in installments as follows: On or about the last day of each month, during the progress of this work, an estimate shall be made of the relative value of the work done, to be judged of by the Chief Engineer of the Railways and verified by the Chief Engineer of the Power Company; and ninety per cent. (90%) of the amount of said estimate shall be paid to the Contractor by the Power Company on or about the fifteenth day of the following month, and the Power Company and the Contractor respectively shall, on the twentieth day of such month, report to the Columbia and Port Deposit Railway Company the amount so paid and received. And when all the work embraced in this contract is completed, agreeably to the specifications and in accordance with the directions and to the satisfaction and acceptance of the Chief Engineer of the Railways, there shall be a final estimate made of the quality, character and value of said work, according to the terms of this agreement, when the balance appearing due to the Contractor shall be paid to the said Contractor within thirty days thereafter, upon the Contractor giving a release, under seal, to the Power Company and to the Columbia and Port Deposit Railway Company from all claims or demands whatsoever growing in any manner out of this agreement, and upon the Contractor procuring and delivering to the Power Company and the Columbia and Port Deposit Railway Company full releases, in proper form and duly executed, from mechanics and material men, of all liens, claims and demands for materials furnished and provided,

and work and labor done and performed upon or in connection with the work herein contracted for under this contract.

Seventh.—There shall be no lien or right to file a lien against the structure or other improvements herein contracted for, or any part or parts thereof, or the site thereof, for work or labor done or materials furnished in the performance of the work embraced in this contract, or any part or parts thereof, or extra work thereunder; and no such lien or claim shall be filed, or in any way attempted to be enforced by, or on behalf of, the Contractor hereto, or by or on behalf of any subcontractor, material man or other person concerned in or in connection with the performance of the work embraced in this contract; nor shall there be any claim for such work or materials against the Power Company, or its assignees, other than the claim of the Contractor under this contract.

Eighth.—It is further covenanted and agreed between the said parties, that the Contractor shall not sub-let or transfer this contract, or any part thereof, to any person (excepting for the delivery of materials) without the written consent of the said Engineers, but will at all times give personal attention and superintendence to the work.

Ninth.—It is further agreed and understood that the work embraced in this contract shall be commenced within ten days from this date, and prosecuted with such force as the Chief Engineer of the Power Company shall deem adequate to its completion within the time specified; and if at any time the said party of the second part shall refuse or neglect to prosecute the work with a force sufficient, in the opinion of the said Engineer, for its completion within the time specified in this agreement, then, and in that case, the said Engineer or such other agent as the said Engineer shall designate, may proceed to employ such a number of workmen, laborers and overseers as may, in the opinion of the said Engineer, be necessary to insure the completion of the work within the time hereinbefore limited, at such wages as he may find necessary or

expedient to give; pay all persons so employed, and charge over the amount so paid to the Contractor as for so much money paid to the Contractor on this contract; or for the failure to prosecute the work with an adequate force, for non-compliance with his directions in regard to the manner of constructing it, or for any other omission or neglect of the requirements of this agreement and specifications on the part of the Contractor, the said Engineer may, at his discretion, declare this contract, or any portion or section embraced in it, forfeited; which declaration and forfeiture shall exonerate the Power Company from any and all obligations and liabilities arising under this contract, the same as if this agreement had never been made; and the reserved percentage upon any work done by the Contractor may be retained forever by the said Power Company.

And the said Contractor hereby further covenants and agrees to take, use, provide and make all proper, necessary and sufficient precautions, safeguards and protections against the occurrence or happening of any accidents, injuries, damages or hurt to any person or property during the progress of the construction of the work herein contracted for, and to be responsible for, and to indemnify and save harmless the Power Company and the Columbia and Port Deposit Railway Company and the said Engineers from the payment of all sums of money by reason of all or any such accidents, injuries, damages or hurt that may happen or occur upon or about said work, and from all fines, penalties and loss incurred for or by reason of the violation of any city or borough ordinance or regulation, or law of the State, while the said work is in progress of construction.

Tenth.—Contractor further agrees, in carrying out this construction contract and performing the work and furnishing the materials pursuant thereto,

(*a*) To do so in manner satisfactory to Power Company in all respects in which the interests and convenience of said

Power Company in carrying on its own work and construction may be affected;

(b) To do everything that Power Company is required to pay for between Safe Harbor and a point 500 feet south of Benton Station by the provisions of said contract dated August 13th, 1906, copy whereof is hereto annexed, except furnishing right of way; provided, that the Contractor shall not be required to bear the expense of removing any private, public or township roads or highways or repairing or reobstructing the same; but shall be compensated for any such work that he is directed to perform at the actual cost thereof plus 10%, such actual cost to include only the labor employed and the materials furnished.

H. G. KENSAUGH, INCORPORATED.

Vice Pres.

McCall Ferry Power Co.

By [illegible] Vice President

(c) That railway traffic shall not, through Contractor's operations, at any time be interrupted or interfered with to McCall Ferry and Minqua Station, and that such traffic shall be without interruption and continuous either from the north or from the south;

(d) To so arrange the closing of the present line below McCall Ferry as not to interfere with the operations of Power Company longer than for three months' time as the total aggregate of all such interruptions, and that whether such interruption shall be in one continuous period or separated into different periods, and the time or times when the same shall occur, are to be determined and selected by Power Company, and Contractor agrees to be governed by Power Company's determinations and selections in these respects;

(e) That Power Company shall be allowed to do all that part of the excavation called for by this construction contract for the distance of one-half mile above and one-half mile below said McCall Ferry dam about to be constructed by Power Company at the rate of eighty cents per cubic yard of such excavation.

Eleventh.—Contractor further assumes and agrees to perform all the obligations of Power Company to said Columbia and Port Deposit Railway Company contained in the first paragraph of the portion numbered "Eighth" of said contract dated August 13, 1906, between Power Company and

said Railway Company (copy whereof is hereto annexed) so far as such obligations relate to, or are based upon, the construction of the relocated roadbed, track and appurtenances covered by this construction contract, or the closing (if such be necessary) during such construction of any portion of the present railway between the aforesaid points of Safe Harbor and a point 500 feet south of Benton Station, and also all such obligations contained in the first half of the first paragraph of the portion numbered "Fifth" of said contract, including the obligation to pay three hundred dollars per day as therein stated.

Twelfth.—Power Company further agrees to permit Contractor (under the permission granted Power Company in and by said contract, copy whereof is hereto annexed) to use the present tracks of Railway Company extending along the parts of the line so to be relocated; and Contractor hereby agrees to so use such tracks as not to interfere with a like use thereof by Power Company under the aforesaid permission.

Thirteenth.—It is mutually agreed and distinctly understood that the decision of the Chief Engineer of the Power Company shall be final and conclusive in any dispute which may arise between the parties to this agreement relative to anything contained in Article Ninth or in clauses (*c*), (*d*) or (*e*) of Article Tenth; and that the decision of the Chief Engineer of the Railways shall be final and conclusive in any dispute that may arise between the parties to this agreement relative to any other clauses of this agreement; and each and every of said parties do hereby waive any right of action, suit or suits, or other remedy in law or otherwise, by virtue of said covenants, so that the decision of either of the said Engineers, as before specified, shall, in the nature of an award, be final and conclusive on the rights and claims of said parties.

Fourteenth.—This agreement shall take the place of the said agreement dated April 14th, 1906, between the Power

10

Company and H. S. Kerbaugh, Incorporated, which is hereby annulled and cancelled.

IN WITNESS WHEREOF, the said parties hereto have caused their respective corporate seals to be hereunto affixed, duly attested, the day and year first hereinbefore written.

Contract With Kerbaugh for Cully's Cut

THIS AGREEMENT, made and entered into this fifteenth day of August, 1906, between the McCALL FERRY POWER COMPANY, a corporation of the State of Pennsylvania, party of the first part, hereinafter called "Power Company", and H.S. KERBAUGH, INCORPORATED, a corporation of the State of West Virginia, party of the second part, hereinafter called "Contractor".

WITNESSETH: That in consideration of the premises and of the covenants and undertakings herein expressed to be observed, kept and performed, as well as of the sum of one dollar by each party to the other in hand paid before the sealing and delivery hereof, the receipt whereof is hereby acknowledged, each of the parties hereto for themselves, their successors and assigns, mutually covenant, stipulate and agree as follows;

First.- The Contractor will, at his own expense and risk and in conformity to the following specifications, furnish all material, equipment and labor necessary and suitable for excavating the rock canal shown on attached drawings Nos. A and B, hereby made part of this agreement, and doing all work incidental thereto, to the satisfaction of the Chief Engineer of the Power Company or his authorized representative (hereinafter called the Engineer) and for disposing of the spoil in the manner shown on drawing B attached hereto, except as to such part of the spoil as the Company shall elect to make use of, and this part of the spoil the Contractor will load upon cars of the Company, without extra charge, it being understood that the Company will erect suitable tracks to the head of the canal cut, and that the Contractor will erect and maintain all additional tracks and switches that may be necessary both for the loading of the spoil that the Company elects to take, and for the disposition of the other part of the spoil into the spoil banks as shown on drawing B; and the Contractor will trim the spoil banks as directed.

Second.- The Contractor further agrees that the Engineer shall determine all questions as to the amount and quality of work done, and the rate of progress of the work, and that the rate of progress shall be such as in the opinion of the Engineer will insure completion of the work under ordinary circumstances on or before January first, (1st) 1907, and the decision of the Engineer as to these matters shall be binding on both parties; and the Contractor agrees that he will use every reasonable means to complete the work by January first (1st) 1907.

Third.- The Contractor agrees that he will do all the work to the lines and levels and in accordance with the plans and directions given him by the Engineer, and that the work shall be so done that the sides and bottom of the cut shall be as free as possible from gross irregularities and shall not intrude within the neat lines shown on the plans.

Fourth.- All excavation shall be estimated in place within the neat line established, and the price named by the Contractor shall cover any excess excavation which may be necessary to cut to the neat line.

Fifth.- The Contractor agrees that the price named for this work shall include all necessary bailing and draining, and such coffer-dam work as may be required, and that he will maintain a sufficient pumping plant to drain the canal of rainfall and of leakage that may not be shut off by the Company's coffer-dam, and that he will assume with the Company the general risk of overflowing, and that there shall be no charge for extra pumping nor for any flumes that the Contractor may find necessary to build.

Sixth.- The Contractor agrees that he will have the foundation for the low concrete weir at the head of the canal ready for the Company to build said weir by December first (1st) 1906.

Seventh.- And the Contractor further agrees that he will not sublet or assign the work or any portion thereof without the written consent of the Company, and that he will save the work free from liens either for material or labor that may be attempted.

Eighth.- Payments to the Contractor shall be made as follows: On or about the end of the month the Engineer will make measurements and estimate at the price bid the value of the work done during the preceding month, and the Company will pay to the Contractor ninety (90) per cent of such estimate not later than the fifteenth (15th) of the following month. At the conclusion of the work to the satisfaction of the Engineer he shall make a final estimate of the value of the work according to the terms of this contract, and the balance due the Contractor shall be paid him not more than thirty (30) days later upon his giving a release to the Company from all claims or demands whatsoever growing out of this agreement.

Ninth.- The Company agrees that it will pay the Contractor cost plus 10% for all incidental work that the Engineer may order the Contractor to do.

Tenth.- The Company agrees to pay to the Contractor one dollar, fifty cents ($1.50) per cubic yard of solid rock as full compensation for furnishing all material, equipment and labor, and for all the work specified herein.

IN WITNESS WHEREOF, the said parties hereto have caused their respective corporate seals to be hereto affixed, duly attested, the day and year first hereinbefore written.

COPY.

November 30th, 1906.

H. F. Dimock, Esq.,

President McCall Ferry Power Company,

60 Wall Street, New York.

Dear Sir:-

In accordance with the request contained in Mr. Barnum's letterto you of October 25th, I beg to submit the following statement of the financial condition of this Company as of October 1st. The resources of the Company on that date available to meet expenditures were:

Accounts Receivable.

Susquehanna Contracting Co.	$3 699 175 00	
McCall Ferry Supply Co.	40 000 00	
Knickerbocker Trust Co. (Money in Escrow)	250 000 00	$3 989 175 00
Cash Assets		578 150 83
		$4 567 325 83

The expenditures to October 1st have been as given in the following schedule and opposite each item has been set the amount estimated as necessary to be still spent to complete the Company's work and bring it to the producing stage.

	Already spent	Estimated to be spent.	Total.
Real Estate,	$ 37,014 18	$365 000	$402 014 18
Hydraulic Construction,	1 133 239 38	2 300 000	3 433 239 38
Improvement of Tail-race,		225 000	225 000 00
Electric Construction, 50 000 H.P.	205 65	1 322 000	1 322 205 65
Elevation of C.& A.D. Tracks.....	10 374 48	1 239 625 52	1 250 000 00
Removal of Highways,		50 000	50 000 00
Administration and General Expenses.....	234 868 19	536 000	770 868 19
Net Interest during Construction.....	424 150,00	175 850	600 000 00
	$1 839 851 88	$6 213 475 52	$8 053 327 40

H.F.D.
11/30/06. -2-

Deducting the resources from the estimated amount still to be expended shows that we shall require to raise about $1,646,000.

We have unissued in the treasury 1517 Bonds. Assuming that these are sold at 90%, they will yield $1,365,300. and to complete the work as now contemplated we shall require an additional sum of about $280,000.

I quote as follows from a memorandum of our Chief Engineer showing what parts of our work can be completed with our present resources, both including and excluding the bonds still in the treasury:

> "In the estimate of total cost to complete the works, the cost of transmission lines, with right of way, is $961,000: if this item be omitted, the total estimated cost would become $7,072,000, and the Company would have a surplus over estimated expenditures of $700, 500.
>
> Included in this estimate is the sum of $1,185,000 for electric and hydraulic equipment; included in the resources of the Company as the sum of $1,365,300, the proceeds of bonds now in the treasury. Assuming these bonds not to be sold, the Company has total resources sufficient for the construction of dam, power house, and switch house, complete, with all hydraulic works, but with no equipment, and have a surplus of $460,200.
>
> This is, in brief, the resources of the Company are $200,500. less than the present total estimates; they are $700,500 greater than the present estimates, omitting transmission lines; they are $460,200 greater than the present estimates, without the sale of bonds now held in the treasury, omitting both transmission lines and all equipment".

Very truly yours,

Vice-President.

Court Order Authorizing Construction of Dam

Commonwealth of Pennsylvania,

vs.

McCall Ferry Power Company, et al.

No. 402, Equity Docket.
No. 462, Commonwealth Docket, 1906.

IN EQUITY.

Jan. 14, 1907, the above entitled cause was heard upon bill and answer was argued by counsel and has been fully considered by the court.

The Commonwealth, by her Attorney General, has submitted the form of decree she desires entered and counsel for defendants have been fully heard thereon.

The same upon full consideration and argument, commending itself to the court, is adopted and the decree in the said form is now made and ordered to be entered as follows:

"And now, this 14 day of January, 1907, the above cause having come on to be heard upon bill and answer and having been argued by counsel, it is ordered and decreed that the right of the defendant, the McCall Ferry Power Company, to continue the construction of a dam now in course of erection on the Susquehanna River and to maintain said dam after the same shall have been constructed, shall be subject to its making and maintaining adequate provision for the passage of fish, and further shall be subject to the condition that said defendant corporation, its successors and assigns, whenever the navigation of said Susquehanna River shall hereafter be improved either under State or

Federal requirements in such way and manner as will secure by the additional construction of a proper lock, or locks, a continuous navigation of said River between Columbia and Havre de Grace, such lock or locks necessary to make said navigation continuous shall be erected without delay by the defendant corporation and its assigns, at its and their own expense, and the physical condition of said lock shall be maintained in good order thereafter.

"It is further ordered and decreed that the McCall Ferry Power Company be and is hereby enjoined from the further maintenance of said dam after such time as, said navigation of said River having been made otherwise continuous, said Company shall fail within a reasonable time to erect and construct, at its expense, said lock."

By the Court,

George Kunkel, P. J.,

Thomas H. Capp, A. L. J.

Power Contract With Consolidated Gas Electric Light and Power Company, June 4, 1907

THIS AGREEMENT made this Fourth day of June, in the year nineteen hundred and seven, between the McCALL FERRY POWER COMPANY, hereinafter called "the Power Company", and the CONSOLIDATED GAS ELECTRIC LIGHT AND POWER COMPANY OF BALTIMORE, hereinafter called the "Lighting Company", witnesseth:

I.

The Power Company agrees to maintain and keep at its sub-station near the boundary line of the City of Baltimore and not more than twenty-five thousand (25,000) feet from the Lighting Company's sub-station in McClellan's Alley, at the disposal of the Lighting Company, electric energy generated by water power, of approximately thirteen thousand (13,000) volts at a frequency of approximately twenty-five (25) cycles per second, at the busbars in the sub-station of the Power Company. The Power Company shall provide the necessary sub-station for its apparatus, at the point of delivery, shall furnish all necessary ducts inside the building, and shall also furnish for each cable installed by the Lighting Company, for the transmission of power under this contract, a suitable automatic circuit breaking switch, and such measuring insturments within its sub-station as may be necessary under this contract. For the maintenance of this electric energy at the disposal of the Lighting Company, and for the privilege of demanding its delivery as hereinafter set forth, the Lighting Company agrees to pay annually to the Power Company, as long as the Power Company fulfills this contract according to its terms, the sum of eighty thousand dollars ($80,000.) as service charge, less the sum determined by allowing six hundred dollars ($600.) per thousand feet for the distance from the Power Company's sub-station

to the Pratt Street Power House of the United Railways & Electric Company of Baltimore, by the shortest available line of ducts. This sum shall be paid monthly in twelve equal installments.

II.

The Power Company agrees to deliver at its said sub-station to the Lighting Company as much of said electric energy as the Lighting Company may desire to take, and only when and as desired, not exceeding, however, four thousand (4,000) kilowatts, except as hereinafter provided. The Lighting Company agrees that it will not dispose of said electric energy, or any part thereof, directly or indirectly, to any passenger electric railway now or hereafter operating in competition with the United Railways & Electric Company of Baltimore, or permit it, or any part thereof, to be used by any such Railway Company. The electric energy is to be delivered as desired by the Lighting Company, during the twenty-four hours of each and every day, to the Lighting Company, and it is to be received by it, at the low pressure bars of the said sub-station of the Power Company, the pressure and frequency at which said electric energy shall be delivered shall be practically constant at thirteen thousand (13,000) volts; that is to say, fluctuations of either pressure or frequency shall not be such as to prevent successful operation of electrical apparatus connected with the circuits of the Lighting Company, provided said apparatus is of good design and is connected and operated in accordance with good practice. The Lighting Company shall furnish and install, at its own expense, cables for connection to the switches installed by the Power Company. For the electric energy delivered the

Lighting Company shall pay to the Power Company an energy charge, which shall be determined by multiplying the total number of kilowatt hours delivered to the Lighting Company by two mills. All payments under this contract shall be made monthly, on or before the fifteenth day of each month following that in which electric energy is first regularly supplied, and including the first month after the expiration of this agreement; each such monthly payment to include all amounts due under this contract for operations to the end of the preceding month.

III.

It is the intent of this agreement that the Lighting Company shall have the right to take an average of four thousand (4,000) kilowatts during those hours when the load of the Lighting Company is four thousand (4,000) kilowatts or greater. Inasmuch as it is impossible, by reason of fluctuations in the Lighting Company's load, to hold the energy delivered by the Power Company at exactly four thousand (4,000) kilowatts, the Lighting Company is hereby permitted to take an average of four thousand (4,000) kilowatts during the hours when its load is equal to or in excess of four thousand (4,000) kilowatts, provided that it shall at no time exceed forty-two hundred (4,200) kilowatts. For this excess energy, no charge will be made by the Power Company other than the two mills per kilowatt hour. During the hours when the load of the Lighting Company is less than four thousand (4,000) kilowatts, the Lighting Company shall have the right to take energy under this agreement for momentary peaks up to five thousand (5,000) kilowatts, provided that by so doing the Power Company is not interfered with in the delivery of its energy to other customers. No

charge for this excess energy will be made by the Power Company other than the two mills per kilowatt hour, and the Power Company shall supply, to the extent of the energy contracted for, the Lighting Company's peak load (that is to say four thousand (4,000) kilowatts) even during the low water period.

IV.

The date upon which the supply of the four thousand (4,000) kilowatts hereby contracted for shall begin, shall be the first day of September, 1908; provided, however, that in case either party shall be delayed in the construction of its works, or in the completion of any essential part thereof, by strike, war, act of God, or any other cause beyond its control, including any interruption in the construction, maintenance or operation by the Power Company of its electric plant, or transmission lines caused by any injunction or order of Court granted in any bona fide and adverse legal proceedings, the date shall be extended for a period equal to that during which the interruption will have existed, provided, however, this extension shall not be later than September 1st, 1909. If the delay in delivering the electric energy by the Power Company to the Lighting Company, in accordance with this contract, shall extend later than September 1st, 1909, then the Lighting Company shall have the option of allowing such further extension or extensions, from time to time, after September 1st, 1909, as it may see fit to grant, or rescinding this contract, and declining to take any deliveries thereunder. The Power Company will give to the Lighting Company written notice, naming the exact date at which it will stipulate to be ready to furnish power hereunder, and such notice shall be given sufficiently

in advance of such date to enable the Lighting Company to order, procure and install cables, connections and apparatus, including conduits between the City Limits and the Power Company's sub-station, required and necessary to be furnished and installed by it, the Lighting Company, hereunder. In the interval, if any, between said dates so to be named in said notice, and the time of the actual readiness of the Power Company to furnish power hereunder, the Power Company shall pay to the Lighting Company interest at the rate of six per centum on the capital invested in said cables, conduits, connections and apparatus, together with any conduit rental payable by the Lighting Company to the Mayor and City Council of Baltimore for the use of the City conduits for the service covered hereby. The Power Company warrants, notwithstanding anything in Article One herein contained, that its sub-station will be located near the Eastern boundary line of the City of Baltimore, and in no event more than ten thousand (10,000) feet from the intersection of said boundary line with East Baltimore Street.

V.

The Lighting Company shall adjust the apparatus installed by it and by its customers, and so install and maintain its system of distribution that electric energy delivered by the Power Company shall be at a power factor not lower than ninety per cent (90%). The Lighting Company shall take electric energy in such a manner that the variation in amount supplied by any two phases shall in no case exceed ten (10) per cent, provided the potential supplied by the Power Company at the thirteen thousand (13,000) volt busbars in its sub-station shall be identical as measured upon each of the three phases. In the event of unbalanced load, due to unequal loading of phases by the

Lighting Company, the maximum energy taken by the Lighting Company shall be held to be that which would be taken if the three phases were loaded equally to the same extent as the most heavily loaded phase.

VI.

The Lighting Company agrees to supply upon demand from the Power Company electric energy generated by steam power upon the following conditions:

Upon six hours' notice, specifying the amount required during the twenty-four hour period, the Lighting Company shall supply energy to the Power Company not exceeding one hundred and fifty thousand (150,000) kilowatt hours in any twenty-four hour period, and not exceeding an average of four million (4,000,000) kilowatt hours per annum during the term of this agreement, or any extensions thereof. Provided, however, that the obligation of the Lighting Company to furnish energy for the use of the Power Company in supplying users other than the Lighting Company shall extend only to such power as, at the time of any demand by the Power Company, the Lighting Company may have available in excess of the power required for its own operations. Provided it does supply this one hundred and fifty thousand (150,000) kilowatt hours in any twenty-four hour period, the Lighting Company may supply it at such hours and rates of delivery, i. e. quantum of energy per hour, as it may choose. In this connection, it is hereby agreed, that if the Power Company, at any time, is deficient in the delivery of any electric energy generated by water power, which it, under this contract, is obliged to supply the Lighting Company, the Lighting Company may supply to itself electric energy generated by itself from steam power, in an amount equal to

such deficiency, and charge the Power Company therefor at the rate of four mills per kilowatt hour, (that is to say, to allow the Power Company two mills per kilowatt hour, and to charge them six mills per kilowatt hour making a net charge of four mills as aforesaid.) This amount thus supplied, in substitution of the obligation of the Power Company, shall be deducted from the one hundred and fifty thousand (150,000) kilowatt hours, which, under this contract, the Lighting Company would otherwise be obliged to deliver to the Power Company. For all energy generated by steam power, delivered by the Lighting Company to the Power Company, the Power Company shall pay six mills per kilowatt hour. The Electric energy generated by steam power to be delivered under this article by the Lighting Company to the Power Company shall be delivered at the busbars at the Westport Power House, and to be the same kind of energy as to voltage and frequency as is normally delivered by the Power Company, and the Lighting Company for this delivery shall allow the Power Company the free use of its cables and ducts. In order to be in a condition to perform this obligation, the Lighting Company agrees to maintain its steam plant, so as to have not less than its present output capacity, to wit, thirteen thousand (13,000) kilowatts under a normal load, and for this maintenance of condition to deliver the electric energy generated by steam power, as prescribed by this contract, the Power Company shall pay annually to the Lighting Company the sum of twenty thousand dollars ($20,000.) as a service charge for the right to receive such energy generated by steam in accordance with the terms of this contract. This sum shall be paid in twelve equal monthly installments.

VII.

Meters necessary to determine the quantities supplied under this contract are to be provided as may be mutually agreed upon between the two Companies. Those installed in the sub-station of the Power Company are to be provided and kept in repair by the Power Company, and shall be and remain its property. Those installed in the Power house of the Lighting Company are to be provided and kept in repair by the Lighting Company, and shall be and remain its property. The meters shall be sealed and approved by both parties when installed, and after each test. Either party shall have the right to inspect and test the meters at any reasonable time two days after having given notice, in writing, to the other party, of its desire to do so, and the expense of such test shall be borne by the party requesting it.

VIII.

The Power Company agrees that during the term of this contract it will sell electric energy for use in Baltimore and its vicinity to no individual or corporation, directly or indirectly, other than the Lighting Company, except that it may sell to the United Railways and Electric Company of Baltimore ten thousand (10,000) kilowatts upon terms and conditions not more favorable to said Railways Company than those in this contract, but said electric energy is to be used by the Railways Company only for its railway purposes in connection with its own railroad or lines leased or controlled by it and not for electric lighting or electric power as an independent business; and railway purposes shall include parks owned or operated by the Railways Company. For the purposes of this contract "Baltimore and vicinity" shall include all territory within a radius of twenty-five miles of the Washington Monument in Baltimore City.

IX.

If the Lighting Company desires to purchase more energy generated by water power than the maximum amount of energy, which under this contract, it has agreed to purchase from the Power Company, it agrees to call on the Power Company to name a price at which it will agree to furnish such additional electric energy. If the price at which the Power Company will furnish the said additional electric energy is less than the price at which the Lighting Company can secure such additional electric energy generated by water power, then the Power Company agrees to furnish, and the Lighting Company agrees to purchase said additional energy from the Power Company, but should the Lighting Company secure a price for said additional electric energy generated from water power at less than that at which the Power Company will, in its offer, agree to furnish said energy, then the Lighting Company agrees to purchase said additional energy from the Power Company, if offered, upon terms as favorable as those offered by any bona fide source.

X.

If default shall be made at any time by either party to this agreement, in making payments at the time or times when they shall fall due under the terms of this agreement, and if such default shall continue for sixty days after demand for payment will have been made, then the other party shall have the right, at its option, of terminating this agreement, or, without terminating this agreement, to discontinue delivering electric energy generated by water or by steam, as the case may be, until all money due to it from the other party will have been paid. And this option may be exercised by either party, whenever and as often as any such default shall occur and continue for the said period of

sixty days after demand has been made; omission to exercise such option at any time shall not constitute a waiver of right to exercise such option whenever such default shall occur, nor shall anything herein contained be held to prevent either party from enforcing the payments due to it by legal process.

XI.

If for any reason any difference should arise between the Lighting Company and the Power Company as to the failure of either party to perform the provisions of this contract, or any question should arise as to the construction by either party of the provisions of this contract, the questions arising therefrom shall be submitted to a board of arbitrators, one member of which shall be appointed by the Lighting Company, another by the Power Company, and the two so selected to appoint a third member, and any decision made by this board, or a majority thereof, shall be final and binding upon the parties hereto, and any damage which may be awarded by said board, or majority, to the party injured shall be paid to the party injured by the other party within thirty days from the decision of the board. Should either party fail or refuse to name its arbitrator within ten days after written notice from the other party of the latter's desire for arbitration, (which notice shall define the question or questions to be arbitrated, and shall contain the name of the arbitrator chosen by said other party), then it shall be competent for any member of the Supreme Bench of Baltimore City to name an arbitrator on behalf of the party so failing or refusing, and said arbitrator so named shall have all the powers of an arbitrator named by the party so in default. Should the arbitrators, however named fail to agree upon a third arbitrator within ten days after their

appointment, then it shall be competent for any member of said Supreme Bench of Baltimore City, at the request of either party to name such arbitrator.

XII.

This contract between the Power Company and the Lighting Company shall remain in force for a period of ten years from the date of the first delivery of energy generated by water power under this contract. The Lighting Company shall have the option to extend the contract for a further period of ten years, providing notice to that effect is given not less than one year prior to the expiration of the ten year period.

XIII.

This agreement is an entire contract, each stipulation thereto being a part of the consideration for every other, and the terms, covenants and conditions therof shall inure to the benefit of and bind the successors and assigns of each of the parties hereto, as well as the parties themselves.

XIV.

This entire contract has been drawn upon the expectation that the Lighting Company shall demand from the Power Company an average maximum of four thousand (4,000) kilowatts, as expressed in Article II and Article III of this contract. Inasmuch as the Lighting Company may desire to take, instead of four thousand (4,000) kilowatts, as expressed in Article II and Article III, at least five thousand (5,000) kilowatts, an option is hereby given to the said Lighting Company to demand said five thousand (5,000) kilowatts instead of four thousand (4,000) kilowatts, provided the said

option is exercised by written notice sent to the Power Company not more than one year after the execution of this contract. In the event of the exercise of such option to take five thousand (5,000) kilowatts instead of four thousand (4,000) kilowatts, the amounts expressed in the respective articles of this contract shall be changed as follows:

In Article I instead of eighty thousand dollars ($80,000.) there shall be one hundred thousand dollars ($100,000.).

In Article I instead of six hundred dollars ($600.) ther shall be seven hundred and fifty dollars ($750.)

In Article II instead of four thousand (4,000) kilowatts there shall be five thousand (5,000) kilowatts.

In Article III instead of four thousand (4,000) kilowatts, there shall be five thousand (5,000) kilowatts.

In Article III instead of forty-two hundred (4,200) kilowatts, there shall be fifty-two hundred and fifty (5,250) kilowatts.

In Article III, instead of five thousand (5,000) kilowatts, there shall be six thousand (6,000) kilowatts.

In Article III, last line, instead of four thousand (4,000) kilowatts, there shall be five thousand (5,000) kilowatts.

In Article IV instead of four thousand (4,000) kilowatts, there shall be five thousand (5,000) kilowatts.

In Article VI instead of twenty thousand dollars ($20,000.), there shall be twenty-five thousand dollars ($25,000.).

FINALLY.

Inasmuch as the satisfactory operation of the Lighting Company's system will depend largely on the uninterrupted availability and reliability of the energy furnished

by the Power Company hereunder, - it is further agreed, notwithstanding anything hereinbefore contained:-

1. That if at any time or for any cause the Power Company shall be unable to give to its customers the full amount of energy due them, no discrimination will be made against the Lighting Company to its injury in favor of any other customer of the Power Company. Inasmuch as the damages arising from the breach of this stipulation may be serious and will be impossible of exact ascertainment, it is agreed that five thousand dollars ($5,000.) shall be paid for each breach, as liquidated damages, and not as a penalty.

2. Loss of revenue to the Lighting Company caused by any customer declining to pay for current by reason of interruptions of service and loss of business of the Lighting Company by reason of such interruption shall be considered as elements of damage arising from interruption of service. Inasmuch, however, as there may be interruptions more or less short in duration, where the resort to arbitration may prove to be too cumbersome a method for the determination of losses due to such interruptions, the Lighting Company instead of resorting to arbitration may, (but it is not required to), elect to have the General Managers of the two Companies determine the amount of said loss or losses, calling in a third party as umpire, if necessary, whose decision shall be final as to the matters presented to him. The Lighting Company shall charge the Power Company, in the next succeeding monthly settlement, with the amount of loss or losses so determined.

3. The arbitration provisions of this contract shall not prevent the exercise by the Lighting Company of any legal rights it would otherwise have to terminate this contract,

without resort to arbitration, if the service of the Power Company is not substantially in accordance with Article I and the other provisions hereof.

IN WITNESS WHEREOF, the parties hereto have caused this agreement to be executed by their proper officers thereunto duly authorized, and their respective corporate seals to be hereunto affixed, the day and year first above written.

Power Contract With United Railways and Electric Company, June 28, 1907

THIS AGREEMENT Made this 28th day of June in the year nineteen hundred and seven, between the McCALL FERRY POWER COMPANY, hereinafter called, "Power Company", and THE UNITED RAILWAYS AND ELECTRIC COMPANY OF BALTIMORE, hereinafter called, "Railway Company",—

WITNESSETH:

I.

The Power Company agrees to maintain and keep at its sub-station near the boundary line of the City of Baltimore and not more than twenty-five thousand (25,000) feet from the Pratt Street Power House of the Railway Company at the disposal of the Railway Company, electric energy generated by water power of approximately thirteen thousand (13,000) volts at a frequency of approximately twenty-five (25) cycles per second at the busbars in the sub-station of the Power Company. The Power Company shall provide the necessary sub-station for its apparatus at the point of delivery, shall furnish all necessary ducts inside the building, and shall also furnish for each cable installed by the Railway Company for the transmission of power under this Contract, a suitable automatic circuit-breaking switch, and such measuring instruments within its sub-station as may be necessary under

(2)

this Contract. For the maintenance of this electric energy at the disposal of the Railway Company and for the privilege of demanding its delivery as hereinafter set forth, the Railway Company agrees to pay annually to the Power Company so long as the Power Company fulfills this Contract according to its terms, the sum of two hundred thousand dollars ($200,000) as service charge, less the sum determined by allowing fifteen hundred dollars ($1500) per thousand feet for the distance from the Power Company's sub-station to the Pratt Street Power House of the Railway Company by the shortest available line of ducts. This sum shall be annually paid in four equal quarterly instalments.

II.

The Power Company agrees to deliver at its said sub-station to the Railway Company, as much of said electric energy as the Railway Company may desire to take, and only when and as desired, not exceeding, however, ten thousand (10,000) kilowatts, except as hereinafter provided. The electric energy is to be delivered to the Railway Company as desired by it during the twenty-four hours of each and every day, and it is to be received by the

(3)

Railway Company at the low-pressure busbars of the said sub-station of the Power Company. The pressure and frequency at which said electric energy shall be delivered shall be practically constant at thirteen thousand (13,000) volts; that is to say, fluctuations of either pressure or frequency shall not be such as to prevent successful operation of electrical apparatus connected with the circuits of the Railway Company, provided said apparatus is of good design and is connected and operated in accordance with good practice. The Railway Company shall furnish and install at its own expense cables for connection to the switches installed by the Power Company. For the electric energy delivered, the Railway Company shall pay to the Power Company an energy charge, which shall be determined by multiplying the total number of kilowatt hours delivered to the Railway Company by two mills. All payments under this Contract, except as otherwise especially provided, shall be made monthly, on the fifteenth day of each month following that in which electric energy is first regularly supplied, and including the first month after the expiration of this Agreement.

III.

Inasmuch as it is impossible, by reason of fluctuations in the Railway Company's load, to hold

(4)

the energy delivered by the Power Company at exactly ten thousand (10,000) kilowatts, the Railway Company is hereby permitted to take an average of ten thousand (10,000) kilowatts during the hours when its load is equal to or in excess of ten thousand (10,000) kilowatts, provided that it shall at no time exceed ten thousand five hundred (10,500) kilowatts. For this excess energy, no charge will be made by the Power Company other than the two mills per kilowatt hour. During the hours when the load of the Railway Company is less than ten thousand (10,000) kilowatts, the Railway Company shall have the right to take energy under this Agreement for momentary peaks up to twelve thousand (12,000) kilowatts, provided that by so doing the Power Company is not interfered with in the delivery of its energy to other customers. No charge for this excess energy will be made by the Power Company other than the two mills per kilowatt hour, and the Power Company shall supply to the extent of the energy contracted for, the Railway Company's peak load even during low water period.

IV.

The date upon which the supply of the ten thousand (10,000) kilowatts hereby contracted for shall begin, shall be the first day of September, nineteen hundred and eight; provided, however,

(5)

that in case either party shall be delayed in the construction of its works, or in the completion of any essential part thereof, by strike, war, act of God, or any other cause beyond its control, including any interruption in the construction, maintenance or operation by the Power Company of its electric plant or transmission lines, caused by any injunction or order of court granted in any bona fide and adverse legal proceedings,— the date shall be extended for a period equal to that during which the interruption shall have existed; provided, moreover, this extension shall not be later than the first day of September, nineteen hundred and nine. If the delay in delivering the electric energy by the Power Company to the Railway Company in accordance with this Contract, shall extend later than the first day of September, nineteen hundred and nine, then the Railway Company shall have the option of extending the date to a period later than the first day of September, nineteen hundred and nine, or of rescinding this Contract and declining to take any deliveries thereunder. The Power Company will give to the Railway Company a written notice naming the exact date at which it will stipulate to be ready to furnish power hereunder, and such notice shall be given sufficiently in advance of such date to enable the Railway Company to order, procure and install cables, connec-

tions and apparatus, including conduits between the City limits and the Power Company's sub-station, required and necessary to be furnished and installed by it, the Railway Company, hereunder. In the interval, if any, between said date so to be named in said notice, and the time of the actual readiness of the Power Company to furnish power hereunder, the Power Company shall pay to the Railway Company interest at the rate of six per centum per annum on the capital invested in said cables, connections, apparatus and conduits, together with any conduit rental payable by the Railway Company to the Mayor and City Council of Baltimore for the use of the City conduits for the service covered hereby. The Power Company warrants, notwithstanding anything in Article I hereof contained, that its sub-station will be located near the eastern boundary line of the City of Baltimore, and in no event more than ten thousand (10,000) feet from the intersection of said boundary line with East Baltimore street.

V.

The Railway Company shall adjust the apparatus installed by it, and so install and maintain its system of distribution that electric energy delivered by the Power Company shall be at a power factor not lower than ninety per cent. (90%). The Railway Company shall

(7)

take electric energy in such a manner that the variation in amount supplied by any two phases shall in no case exceed ten per cent. (10%), provided the potential supplied by the Power Company at thirteen thousand (13,000) volt busbars in its sub-station shall be identical as measured upon each of the three phases. In the event of unbalanced load, due to unequal loading of phases by the Railway Company, the maximum energy taken by the Railway Company shall be held to be that which would be taken if the three phases were loaded equally to the same extent as the most heavily loaded phase.

VI.

The Railway Company agrees to supply upon demand from the Power Company electric energy generated by steam power upon the following conditions:

(1) Upon six hours' notice, specifying the amount required during the twenty-four hour period, the Railway Company shall supply energy to the Power Company not exceeding three hundred thousand (300,000) kilowatt hours in any twenty-four hour period, and not exceeding an average annual supply of eight million (8,000,000) kilowatt hours during the term of this Contract or any extension thereof. The Railway Company may supply the three hundred thousand (300,000)

(8)

kilowatt hours in any twenty-four period at such hours and rates of delivery, i.e., quantum of energy per hour as it may choose.

(3) For all energy generated by steam power and delivered by the Railway Company to the Power Company, the Power Company shall pay six mills per kilowatt hour.

(3) If the Power Company at any time is deficient in the delivery of any electric energy generated by water power which it, under this Contract, is obliged to supply the Railway Company, the Railway Company may supply to itself electric energy generated by itself from steam power, in amount equal to such deficiency and charge the Power Company therefor at the rate of four mills per kilowatt hour (that is to say, allow the Power Company two mills per kilowatt hour against the charge of six mills per kilowatt hour, making a net charge of four mills as aforesaid). This amount thus supplied in substitution of the obligation of the Power Company shall be deducted from the three hundred thousand (300,000) kilowatt hours which, under this Contract, the Railway Company would otherwise be obliged to deliver to the Power Company.

(4) The obligation of the Railway Company to furnish to the Power Company energy other than for the use of the Railway Company, shall extend only to such power as, at or during the time of any demand by the Power Company, the Railway Company may have available in excess of the power required for its own operations.

(c)

The electric energy generated by steam power to be delivered under this Article by the Railway Company to the Power Company, shall be delivered at the busbars at the Pratt Street Power House of the Railway Company, and to be the same kind of energy as to the voltage and frequency as is normally delivered by the Power Company, and the Railway Company for this delivery shall allow the Power Company the free use of its cables and ducts. In order to be in a condition to perform this obligation, the Railway Company agrees, subject to the provision aforesaid, to maintain its steam plant so as to have not less than its present output capacity, to wit: twenty-five thousand (25,000) kilowatts under a normal load; and for this maintenance of condition to deliver the electric energy generated by steam power, as prescribed by this Contract, the Power Company shall pay annually to the Railway Company the sum of fifty thousand dollars ($50,000) as a service charge for the right to receive such energy generated by steam in accordance with the terms of this Contract. This sum shall be paid in four equal instalments of twelve thousand five hundred dollars ($12,500) each.

VII.

Meters necessary to determine the quantities supplied under this Contract are to be provided as may be mutually agreed upon between the two Companies.

(10)

Those installed in the sub-station of the Power Company are to be provided and kept in repair by the Power Company, and shall be and remain its property. Those installed in the power house of the Railway Company are to be provided and kept in repair by the Railway Company, and shall be and remain its property. The meters shall be sealed and approved by both parties when installed, and after each test. Either party shall have the right to inspect and test the meters at any reasonable time two days after having given notice, in writing, to the other party of its desire to do so, and the expense of such test shall be borne by the party requesting it.

VIII.

The Power Company agrees that, during the term of this Contract, it will sell electric energy for use in Baltimore and its vicinity to no individual or corporation, directly or indirectly other than the Railway Company, except that it may sell to the Consolidated Gas, Electric Light and Power Company of Baltimore electric power upon terms and conditions not more favorable to said Lighting Company than those in this Contract, but said electric energy is to be furnished to said Lighting Company under restrictions preventing its use, either directly or indirectly, by any passenger electric railway company now or

(11)

hereafter operating in competition with the Railway Company. The Railway Company agrees that it will use the electric energy under this Contract only for its railway purposes in connection with its own railroad or lines leased or controlled by it, and not for electric lighting or electric power as an independent business; and railway purposes shall include parks owned or operated by the Railway Company. For the purpose of this Contract, "Baltimore and vicinity" shall include all territory within a radius of twenty-five miles of the Washington Monument in Baltimore City.

IX.

If the Railway Company desires to purchase more energy generated by water power than the maximum amount of energy which, under this Contract, it has agreed to purchase from the Power Company, it agrees to call on the Power Company to name a price at which it will agree to furnish such additional electric energy. If the price at which the Power Company will so furnish is less than the price at which the Railway Company can elsewhere secure such additional electric energy generated by water power, then the Power Company agrees to furnish and the Railway Company agrees to purchase, said additional energy from the Power Company; and should the Railway Company secure a price for said additional electric energy

generated from water power less than that at which the Power Company will, in its offer, agree to furnish said energy, then the Railway Company agrees to purchase said additional energy from the Power Company, if the latter will meet such price.

X.

If default shall be made at any time by either party to this Agreement in making payments at the time or times when they shall fall due under the terms of this Agreement, and if such default shall continue for sixty days after demand for payment shall have been made, then the other party shall have the right, at its option, of terminating this Agreement, or without terminating this Agreement to discontinue delivering electric energy generated by water or by steam, as the case may be, until all money due to it from the other party shall have been paid. And this option may be exercised by either party whenever, and as often as any such default shall occur and continue for the said period of sixty days after demand has been made; omission to exercise such option at any time shall not constitute a waiver of the right to exercise such option whenever such default shall occur, nor shall anything herein contained be held to prevent either party from enforcing the payments due to it by legal process.

(13)

XI.

If any question should arise between the Railway Company and the Power Company as to the performance by either party of any provisions of this Contract, or if any question should arise over either party's construction of any such provisions, such question shall be submitted to a board of arbitrators, one member of which shall be appointed by the Railway Company, another by the Power Company, and the two so selected to appoint a third member; any decisions made by this board or a majority thereof shall be final and binding upon the parties hereto; and any damages which may be awarded by said board or majority to the party injured shall be paid to the party injured by the other party within thirty days from the decision of the board. Should either party fail or refuse to name its arbitrator within ten days after written notice from the other party of the latter's desire for arbitration (which notice shall define the question or questions to be arbitrated and shall contain the name of the arbitrator chosen by said other party), then it shall be competent for any member of the Supreme Bench of Baltimore City to name an arbitrator on behalf of the party so failing or refusing; and such arbitrator so named shall have all the powers of an arbitrator named by the party so in default. Should the arbitrators, however named, fail to agree upon a third arbitrator within ten (10) days after

their appointment, then it shall be competent for any member of said Supreme Bench, at the request of either party to name such third arbitrator.

XII.

This Contract between the Power Company and the Railway Company shall remain in force for a period of ten (10) years from the date of the first delivery of energy generated by water power under this Contract. The Railway Company shall have the option to extend the Contract for a further period of ten (10) years, provided notice to that effect is given not less than one (1) year prior to the expiration of the ten (10) year period.

XIII.

This Agreement is an entire contract, each stipulation being a part of the consideration for every other, and the terms, covenants and conditions thereof shall ensure to the benefit of and bind the successors and assigns of each of the parties hereto, as well as the parties themselves.

(15)

FINALLY.

Inasmuch as the satisfactory operation of the Railway Company's system will depend largely on the uninterrupted availability and reliability of the energy furnished by the Power Company hereunder,— it is further agreed, notwithstanding anything hereinbefore contained:

(1) That if at any time or for any cause the Power Company shall be unable to give to its customers the full amount of energy due them,— no discrimination will be made against the Railway Company to its injury in favor of any other customer of the Power Company. Inasmuch as the damages arising from the breach of this stipulation may be serious and will be impossible of exact ascertainment, it is agreed that five thousand dollars ($5000) shall be paid for each breach, as liquidated damages, and not as a penalty.

(2) Loss of fares by the Railway Company shall be considered as an element of damages arising from interruptions of service. Inasmuch, however, as there may be interruptions more or less short in duration, where the resort to arbitration may prove to be too cumbersome a method for the determination of losses due to such interruptions, the Railway Company instead of resorting to arbitration may (but it is not required to) elect to have the General Managers of the two Companies determine the amount of

said loss or losses, calling in a third party as umpire if necessary, whose decision shall be final as to the matters presented to him. The Railway Company shall charge the Power Company, in the next succeeding monthly settlement, with the amount of loss or losses so determined.

(3) The arbitration provisions of this Contract shall not prevent the exercise by the Railway Company of any legal right it would otherwise have to terminate this Contract, without resort to arbitration, if the service of the Power Company is not substantially in accordance with Article I and the other provisions hereof.

IN WITNESS WHEREOF The parties hereto have caused this Agreement to be executed by their proper officers thereunto duly authorized, and their respective corporate seals to be hereunto affixed, the day and year first above written.

Hutchinson's Report on Condition of the Work, November 1, 1907

McCALL FERRY POWER COMPANY
OFFICE OF THE CHIEF ENGINEER
ROOM 2407, SIXTY WALL STREET
NEW YORK CITY

CARY T. HUTCHINSON
CHIEF ENGINEER
WM. BARCLAY PARSONS
CONSULTING ENGINEER

November 26th, 1907.

H. F. Dimock, Esq., President,
McCall Ferry Power Company,
#60 Wall Street, N. Y. City.

CONDITION OF THE WORK AT McCALL FERRY ON NOVEMBER 1st, 1907.

Dear Sir,-

In accordance with the direction of the Executive Committee the works of this Company at McCall Ferry have been suspended, only such men being retained as are necessary to guard the work already done against danger during winter.

It happens that the condition of the work was particularly favorable to a partial suspension, owing to the fact that we have finished all the work on the dam on both sides of the river that would have been done this Fall. It was intended that work on the dam should cease on November 1st, as it did; we expected to proceed with the work of the tail-race cut and complete the walls and other parts of the power house; this work has been stopped.

The back wall of the power house, however, is up to its finished height at all points and so guards the power house against dangers from floods or ice. The cessation of work therefore means delay, but does not mean danger to the work already done. The force on the ground is sufficient to meet any emergencies; it is employed in putting the construction plant in winter quarters and in minor work in the power house.

In the meantime, as authorized, the work of securing rights-of-way for the transmission line to Baltimore will be continued, and that part already secured will be held, and the detail work on the engineering designs will be continued.

To Mr. Dimock,

The makers of water wheels and of the electrical machinery have been directed to cease work on their contracts.

The attached sheets give,-

(A) Work done and to be done, excluding equipment, in quantities.

(B) Work done and to be done, excluding equipment, in percentage.

(C) Money spent and to be spent, including equipment.

Making allowances for the ten months spent in preparatory work, and the money spent on this work, I estimate that the work as a whole, excluding equipment is at least 80% complete. The work done will not be endangered by suspension of active work.

Very truly yours,

Carl J. Hutchinson

Chief Engineer.

Letter Agreement for Issuance of Additional McCall Ferry Power Company Bonds to Susquehanna Contracting Company for Additional Property, Cash, etc.

SUSQUEHANNA CONTRACTING COMPANY.
62 Cedar Street.

New York, October 20th, 1908.

McCall Ferry Power Company,
60 Wall Street, New York.

Gentlemen:

The Susquehanna Contracting Company hereby offers to discharge and cancel all indebtedness due from McCall Ferry Power Company to the Susquehanna Contracting Company, including the indebtedness arising from recent advances for the purpose of providing for construction work now under way and lately undertaken, with a view to provision being made therefor through the issuance of bonds of the McCall Company, and will assign and release to the McCall Company all collateral held for any of said indebtedness, and will further pay to the McCall Company $62,000 in cash from time to time as needed by the McCall Company for or in connection with its construction work, and will convey or cause to be conveyed to the McCall Company all the lands, and interests in lands, in the State of Pennsylvania, now owned, directly or indirectly, by the Contracting Company, in consideration that the McCall Company will pay and deliver to the Contracting Company $544,000 in par value of the first mortgage

bonds of McCall Company.

SUSQUEHANNA CONTRACTING COMPANY,

By A. J. Bartlett

President

SUSQUEHANNA CONTRACTING COMPANY.

62 Cedar Street.

New York, October 20, 1908.

McCall Ferry Power Company,

60 Wall Street, New York.

Gentlemen:

In case your Company shall accept the proposition this day submitted to you by us for the issuance to us of $544,000 in par value of the first mortgage bonds of the McCall Company, we beg to say that we have made arrangements whereby we can borrow $400,000 in cash, to be repaid in one year, with interest at 6%, on the pledge of 702 of said bonds of the McCall Company, which will then be in our possession, and the first mortgage on the property of the Conowingo Land Company, on which there is now due, principal and interest, over $30,000, provided the lenders be protected by the pledge as additional collateral of the equity of the McCall Ferry Power Company in the deposit of $250,000 and interest held by the Knickerbocker Trust Company to secure the performance of a certain contract with two Railroad Companies. Accordingly if your Company will pledge your equity in said deposit as aforesaid, this Company hereby offers to procure for you, and secure to you, the option to purchase said 702 bonds and said Conowingo Land Company mortgage, by paying the amount of said $400,000 loan, and interest, at any

time on or before the maturity of said loan, it being understood that if said option should not be exercised by you, and your equity in said deposit, or any part thereof, should be used in the payment of said loan (such option being not exercised) then this Company will be responsible to you therefor.

SUSQUEHANNA CONTRACTING COMPANY,

Notes for $400,000 Loan

$100,000. New York, October 28th, 1908.

On or before one year after date, the SUSQUEHANNA CONTRACTING COMPANY promises to pay to HARVEY FISK & SONS, or order, at their office in the City of New York, one hundred thousand dollars ($100,000), with interest at six per cent. per annum, for value received, having assigned, or procured to be assigned, to said HARVEY FISK & SONS as collateral security one hundred and seventy-five (175) One thousand dollar ($1000) first mortgage bonds of the McCall Ferry Power Company, Nos. 1945 to 1983 and 8484 to 8619, inclusive, and also a one-fourth interest in the equity of the McCall Ferry Power Company in the deposit of two hundred and fifty thousand dollars ($250,000) and interest held by the Knickerbocker Trust Company. In case of any exchange of or addition to the collaterals above named, the provisions of this note shall extend to and embrace such new or additional collaterals. In case of the non-payment of this note at maturity, the Susquehanna Contracting Company hereby authorizes said Harvey Fisk & Sons to sell, without notice, at the Board of Brokers in the City of New York, or at public or private sale, at the option of said Harvey Fisk & Sons, all or any of the above mentioned collaterals, applying the net proceeds to the payment of this note, including interest, and accounting to said Susquehanna Contracting Company for the surplus, if any. In case of deficiency, the Susquehanna Contracting Company promises to pay to said Harvey Fisk & Sons the amount of such deficiency forthwith after such sale, with legal interest. Upon any sale of any such collaterals, said Harvey Fisk & Sons may become the purchasers thereof, and may hold the same thereafter in their

own right absolutely free from any claim by the Susquehanna Contracting Company. Upon the transfer of this note said Harvey Fisk & Sons may deliver the collaterals, or any part thereof, to the transferee, who shall thereupon become vested with all the powers and rights above given to the said Harvey Fisk & Sons with respect thereto, and said Harvey Fisk & Sons shall thereafter be forever relieved and fully discharged from any liability or responsibility in the matter. As further security for the payment of this note the Susquehanna Contracting Company has assigned to Thomas Thacher and Philip G. Bartlett, of New York City, as Trustees, an undivided one-fourth interest in two of the first mortgage bonds of the McCall Ferry Power Company Nos. 2101 and 2102, and also an undivided one-fourth interest in and to the first mortgage on the real property of the Conowingo Land Company, in Conowingo, Cecil County, Maryland, executed on the 1st day of April, 1902, by Charles C. Caldwell and wife to the Executors of James C. Bell, together with the bond secured thereby, in the principal sum of twenty-five thousand dollars ($25,000), and all interest accrued or to accrue thereon, to be held, used and applied for the benefit of said Harvey Fisk & Sons, their executors, administrators and assigns.

SUSQUEHANNA CONTRACTING COMPANY,

By P. G. Bartlett

President

Kelsch's Engineering Report, April 26, 1909

REPORT

PREPARED BY

R. S. KELSCH
CONSULTING ENGINEER
MONTREAL
CANADA

(COPY)

APRIL 26th,1909.

H. B. ALLEN, ESQ.,

MONTREAL, CANADA.

Dear Sir,-

In compliance with your instructions I visited the Pennsylvania Power Company's Hydro-Electric development, located near McCall's ferry, on the Susquehanna River, Lancaster County, Pa., and found that there is a water power of very large capacity. The head under normal conditions is 53 feet, increasing at high water seasons to 64 ft. This large Hydro-Electric Plant, which has been under construction since the Fall of 1905, is about 85% finished. I estimate the cost of work done, including construction plant, to have cost approximately $7,000,000. The ultimate normal capacity of the plant, as constructed, is for 100,000 H.P., and for a two-hour peak overload capacity of 135,000 H.P.

I have examined the plans for this development, and have made calculations on cost of completing the work for developing 37,500 H.P., and transmitting the power 40 miles to Baltimore, Md. I found the plans of development to be as shown in Bulletin #3, dated June 1907. This Bulletin gives full details of the Plant and shows the arrangement for the generation of 100,000 H.P., normal, and 135,000 H.P. for a two-hour peak.

#2

A copy of this bulletin is enclosed herewith, and in order that the exact condition of the work may be understood, without going into a long description of the same, I have scored out the unfinished part of power house shown in section in the bulletin, from which you will see that all of the expensive, slow and hazardous work has been finished, and that the unfinished work consists of light walls, roofs and some arches below the transformer building and the generators. The above applies to the Power House.

Outside of the Power House, the expensive, slow and hazardous work is finished, as shown on plan view in bulletin. The figures indicate the percentage of work completed on each part of the plant and are as follows, - Power House 80%; main dam 82%, tail race fender 56%, tail race 100%, forebay 98%, ice protection dam 95%, ice fender - entrance to forebay 95%.

I made a very thorough examination of the finished work which has successfully withstood two flood seasons, without damage of any kind. The concrete work is first-class, and as hard as solid rock. Before the work was discontinued all steel and other perishable material was painted or housed in to protect it from the weather. The construction plant has also been housed. The property is now in charge of the former Paymaster and four watchman.

With respect to your instructions to make an estimate on the cost, to finish the work for the generation of 37,500 H.P. requiring three main units, two exciters, raising and lowering

transformers, switch-boards, transmission line, water wheels, substation at Baltimore,etc-, I have received from Wm.M. Barnum, Esq. copies of contracts for the hydraulic and electrical apparatus. As all of this machinery is in the hands of the manufacturers, and as they will be unable to dispose of it on account of the special design of the apparatus, it will, no doubt, be possible to purchase it at less than the prices mentioned in the original contracts, especially as prices of all materials are now much lower than when contracts were signed. However, in making the estimates, I have used the prices in the original contracts. Therefore my estimates are on the safe side, and will no doubt be found high, rather than too low. My estimates are based on finishing the work as follows,-

Close up 14 gaps in main dam, each 40 ft. long, or 560 ft, of the total 2500 ft, of the main dam. (the lower portion of footings in gaps are in place) Finish curtain wall and supports for racks in front of Power House, booms at entrance to forebay; tail race fender, ice chutes, and the railroad tunnel entrance to Power House, screen and gate room, and transformer house. This would permit the installation of five main units and two exciters; switchboards, etc., without any additional extension to building, to give a generating capacity of 50,000 H.P.,normal, and 67,000 H.P. for the two-hour daily peak loads under normal water conditions. All of which I estimate, would cost $800,000. plus $100,000 for engineering and contingencies. The Pennsylvania Railroad tracks will have to be changed when the compressor plant is removed.

J.F.ALLNUTT,ESQ. -4-

In addition to the foregoing there will be the three main and two exciter water-wheel units, water-wheel governors, piping, etc., three generators, two exciters, raising and lowering transformers, switchboards, wires and cables, transmission line and substation at Baltimore, engineering and contingencies, all of which, I estimate, will cost $1,375,000. Making a total expenditure of $2,275,000. This does not allow for any commissions, or cost of financing. This expenditure would complete the Plant for delivering 30,000 H.P., from the busbars in substation in the City of Baltimore, Md.

At McCall's Ferry, and on the Company's property, there are twelve residences finished and ready for occupation by the Power House operating staff. These buildings are complete with electric lights, heating, water and sewerage systems. They belong to the Company and cost on an average of $4,000. each There is a fine machine and carpenter shop, fully equipped, owned by, and on the property of the Company.

The development is located on the main line of the Pennsylvania R.R.Co., between Perryville and Lancaster; has good telegraph, long-distance telephone, and transportation facilities, and in fact has advantages rarely found in connection with the average Hydro-Electric Plant.

While it is almost unnecessary to say that the contemplated plan to reorganize the Company on basis of finishing the plant along economical lines for delivering 30,000 H.P. in Baltimore is bound to bear satisfactory results, I strongly recommend that the plans for finishing the development include

J.K.ALDRED,ESQ. #5

generating 100,000 H.P. in the very near future, for in my opinion it will not be long before the ultimate capacity of the plant, as originally contemplated, will be in demand, as there is a market for several times the maximum capacity of the plant as originally designed.

The development is in a section of the country, free from any severe weather conditions, and, in fact, the general situation is favorable to successful operation and assuring power purchasers a continuity of service equal to that furnished by any Hydro-Electric development on this continent.

Attached hereto is a map showing the location of the McCall's Ferry and the distance to cities where several hundred thousand horse-power is used to operate the numerous industrial plants.

Attached hereto is a map showing the location of the McCall's Ferry and the distance to cities where several hundred thousand horse-power is used to operate the numerous industrial plants.

Trusting that I have fully covered the matter, I am,

Yours respectfully,

R B Keech

McCALL FERRY POWER COMPANY.

RECD

Mr. J. R. Aldred,
Receiver,
The McCall Ferry Power Company,
No. 24, Exchange Place
New York City, N.Y.

Dear Sir:-

Referring to your favor of August 10th., asking as to the present condition of the apparatus under contract between the General Electric Company and the McCall Ferry Power Company,

Beg to advise that there are six (6) of these generators. One is and has been for many months completed. The second one is in excess of 60% completed. The remaining four are in various stages of completion, it being difficult to give the actual percent, because while some parts are entirely completed, other parts are simply in the rough. The general condition of the remaining four, however, might be considered, counting the actual work done, and not including material, as in excess of 20% completed.

The transformers are between 50% and 60% completed.

Other apparatus, such as compressors, small motors, air tanks, etc., are 100% completed.

The switchboard is about 80% completed.

With respect to all the above apparatus, the material therefor has all been in stock for many months.

It is difficult, in a line of complicated apparatus,

No. 2. GENERAL ELECTRIC COMPANY

scattered over many shops, to give a more detailed report than the above, which I hope will be satisfactory.

Several thousands of dollars worth of smaller apparatus, in addition to the above, was shipped and is in the possession of the McCall Ferry Power Company.

Very truly yours,

JRM/S. Chairman Sales Committee.

Request for Deposit of Bonds

To the Holders of First Mortgage Bonds
and Preferred Stock of
McCALL FERRY POWER COMPANY:

The undersigned have been engaged for some time in efforts to secure the completion of the McCall Ferry Power Company's enterprise in a manner which should be satisfactory to its bondholders, and these efforts, and negotiations in connection therewith, are being actively pushed at present.

The Company will not have in hand on December 15th, 1908, sufficient funds to pay the coupons maturing that day.

With the approval of holders of a large proportion of the bonds outstanding, Messrs. William M. Barnum, A. G. Bedford, S. Reading Bertron, Charles A. Coffin, and Gardiner M. Lane, have been asked and have consented to act as a Committee in the interests of holders of bonds and preferred stock of said Company, to continue the efforts and negotiations to perfect a plan for financing the completion of said enterprise, and this Committee considers that its hands will be greatly strengthened in these negotiations, and the interests of all conserved, if the bonds and preferred stock are deposited at once under a preliminary agreement looking to the perfection and submission of such plan as soon as practicable, and providing that depositors may withdraw their deposits without expense if not satisfied with the plan when submitted, that the Committee have certain discretionary powers in the meantime, and that the members shall serve without compensation.

Accordingly, holders of such bonds and stock are invited to deposit the same with the Knickerbocker Trust

Company, No. 66 Broadway, New York, or the City Trust Company, No. 50 State Street, Boston, under the Preliminary Agreement, a copy of which is enclosed herewith. Negotiable certificates of deposit will be issued by the depositaries respectively.

The Knickerbocker Trust Company authorizes us to state that (subject to the consents of its "participators," some of which have been given and the rest of which are expected) it will, upon being directed so to do by the owners thereof, deposit under said Preliminary Agreement bonds and stock of said Company held by it as collateral to secure loans, receiving and holding the certificates of deposit as security in lieu of the collateral so deposited. Accordingly, holders of such bonds and stock so pledged should sign the enclosed order addressed to said Trust Company, and return it in the enclosed envelope.

Dated New York, December 7, 1908.

HARVEY FISK & SONS,
LEE, HIGGINSON & COMPANY,
BERTRON, STORRS & GRISCOM,
H. F. DIMOCK,
C. A. COFFIN.

Preliminary Agreement for Deposit of Bonds

McCALL FERRY POWER COMPANY,

FIRST MORTGAGE BONDS AND PREFERRED STOCK,

PRELIMINARY AGREEMENT.

Agreement, made this 7th day of December, 1908, between WILLIAM M. BARNUM, A. C. BEDFORD, S. READING BERTRON, CHARLES A. COFFIN, and GARDINER M. LANE (hereinafter called the Committee), and the holders of first mortgage bonds and preferred stock of McCall Ferry Power Company becoming parties hereto (hereinafter called Depositors).

WHEREAS, said McCall Ferry Power Company is at present without sufficient resources to finish its hydro-electric enterprise in the State of Pennsylvania, but efforts and negotiations are in progress with the object of perfecting a plan for financing the completion of said enterprise, and the Committee has consented to continue the same and endeavor to perfect such plan;

NOW, THEREFORE, Depositors, each for himself and not for any other, agree with each other and with the Committee as follows:

FIRST.—The Committee is requested to continue the efforts and negotiations above mentioned on behalf of Depositors, and to perfect and issue, as early as may be feasible, a plan for financing the completion of the McCall Ferry Power Company's enterprise. Printed copies of such plan embodied in an appropriate agreement shall be lodged with the Depositaries receiving deposits hereunder, and notice thereof, with a copy of such plan and

agreement, shall be mailed to each Depositor at the address furnished by him in writing to the Depositary receiving his bonds and stock. Depositors who do not assent to such plan and agreement may, without expense to them, at any time before a date to be specified in such notice—which date shall be at least thirty days after the mailing thereof—withdraw their deposits upon surrender of their Certificates of Deposit. All Depositors not so withdrawing their deposits within such time shall be bound by such plan and agreement, with like effect as if they had executed the same, and their deposits shall be deemed to have been deposited, and to be held, under such plan and agreement. Unless such notice of such plan and agreement shall be mailed on or before June 30, 1909, Depositors may, without expense to them, withdraw their deposits upon surrender of their Certificates of Deposit.

SECOND.—Until Depositors shall have become bound by such plan and agreement or shall have withdrawn their deposits, in accordance with the foregoing provisions hereof, Depositors respectively appoint the Committee their agents and attorneys in fact with respect to the deposited bonds and stock, with full power to act for the Depositors in all matters arising in said interval deemed by the Committee to require action in the interest of Depositors, including power, in the discretion of the Committee, to present, or withhold the presentment, for payment, of coupons, and power to request or instruct the trustee under the mortgage securing said bonds with respect to the action of such trustee thereunder, and including power to receive any moneys collected for cou-

pons, such moneys to be paid over to Depositors upon presentation of their Certificates of Deposit to be appropriately stamped.

THIRD.—By appointment in writing signed by a majority of the Committee, additional members thereof may be appointed, and vacancies therein, occurring by death, resignation or otherwise, may be filled. The Committee may act by a majority thereof either at a meeting or in writing without a meeting. Any member may vote or act by proxy appointed in writing, who may be another member of the Committee or any other person approved by a majority of the Committee. No member of the Committee shall be liable for the act or omission of another member, nor shall the Committee or any member thereof, or either of the Depositaries hereinafter named, be liable for the act or omission of any agent or employe selected in good faith, or in any case except for its or his own willful misconduct. The Committee shall be under no obligation whatever to any holder of bonds or stock of said McCall Ferry Power Company not a party to this agreement.

All members of the Committee will serve without compensation.

FOURTH.—Holders of bonds or of preferred stock of said McCall Ferry Power Company may become parties hereto — within such time as the Committee may determine — by depositing, or causing the deposit of, their bonds or stock, subject hereto, with Knickerbocker Trust Company, No. 66 Broadway, New York, or with City Trust Company, No. 50 State Street, Boston (herein called the Depositaries). Such

bonds and stock shall be held by the Depositary receiving the same subject to the order of a majority of the Committee in accordance with the provisions hereof. Negotiable Certificates of Deposit, in form approved by the Committee, will be issued by the Depositaries respectively for all bonds or stock so deposited. Such deposits of bonds and stock shall have the same effect as if the Depositors respectively had signed and sealed this agreement; and the Depositors severally assign to the Committee, as joint tenants, the bonds and stock so deposited, to hold the same as trustees for the purposes of this agreement. Upon transfer of any Certificate of Deposit, the transferee shall succeed to all the rights of the prior holder and be subject to all the provisions hereof with the same effect as if the transferee had been the original Depositor.

FIFTH.—The word "Committee" herein means the Committee as constituted or existing in accordance with the provisions hereof—and notwithstanding any vacancy therein—at the time in question.

The word "Depositors" herein means the holders of record of the Certificates of Deposit issued hereunder outstanding at the time in question. The Committee and the Depositaries may treat the holder of record of each Certificate of Deposit as the absolute owner thereof.

IN WITNESS WHEREOF the Committee has caused this agreement to be signed by at least a majority of its members the day and year first above written, and holders of bonds or stock of McCall Ferry Power Company become parties hereto by depositing the same hereunder.

Memorandum of an Understanding With Aldred

MEMORANDUM OF an understanding between J. E. Aldred, of Montreal, and the undersigned members of the Committee representing First Mortgage Bonds of the McCall Ferry Power Company, under a Preliminary Agreement dated December 7, 1908, a copy of which is attached hereto

The following is a Plan of Reorganization, as respects capitalization, approved by the parties hereto, to wit:

A new company to be formed, to be called "Pennsylvania Power Company", or some other appropriate name, or the old company to be continued if deemed advisable by the parties hereto; the new company to be capitalized, or the old company to be recapitalized, as the case may be, as follows:

Capital stock, par value	$8,500,000.
First Mortgage 30-year 5% coupon Gold Bonds, dated July 1, 1909	
Authorized - - - - - - - - -	$12,500,000.
To be immediately available,---------	7,500,000.

The new bonds and stock to be used as follows:

Bondholders of the McCall Ferry Power Company, being holders of bonds outstanding of the par value of $8,325,000. shall receive 40% of old bonds in new bonds, and 60% of old bonds in new stock.

Total amount of new bonds and stock to be so used:

Bonds	$3,330,000.
Stock,	4,995,000.

To be used for construction and other corporate purposes of the new company or the old company, as the case may be:

Bonds.	$4 000,000
Stock,	3,500,000.

(2)

$170,000. par value, of bonds, being the balance of new bonds above designated as immediately available and not appropriated for use, shall be included in the bonds to be sold as hereinafter provided, and the proceeds (that is, $153,000) shall be used, as far as may be necessary in the discretion of the Committee, in meeting reorganization expenses and in making settlement with the floating debt of the Company hereinafter mentioned other than the secured indebtedness of $400,000 hereinafter described. Any balance not so used shall be paid over to the new Company, or to the old Company, as the case may be.

Said secured indebtedness is represented by an obligation of the Susquehanna Contracting Company, amounting at its face value to $400,000. which is secured by a claim upon a deposit in the Knickerbocker Trust Company amounting to $250,000 (but the application of which to the payment of such secured debt has not yet been settled); and by $702,000. par value, of First Mortgage Bonds of the McCall Ferry Power Company, and by a mortgage on real estate near McCall Ferry for the principal sum of about $25,000. Provision shall be made for the payment of such secured indebtedness, and upon its payment the security therefor shall be assigned to the new company or to the old company, as the case may be, with the exception of the bonds, which shall be cancelled.

Said floating debt, provision for the settlement of which is to be made as above provided, does not, it is understood, exceed $250,000.

(3)

The Committee will use its best efforts to have the above plan approved by the bondholders of the McCall Ferry Power Company in an amount sufficient to insure the carrying out of the Plan.

Mr. Aldred will use his best efforts to sell $4,170,000 of new bonds at 90% of their par value, being the bonds above designated for construction and other corporate purposes, and for the Committee's uses as above understood, and the said $3,500,000. of stock shall go to him for use in connection with the sale of such bonds, or otherwise, as he may determine.

The Bondholders of the McCall Ferry Power Company shall have the privilege of subscribing to $1,000,000. (or to any part thereof) of the new bonds so to be sold by Mr. Aldred, at 90% of their par value, with a common stock bonus equal to 50% of the par value of the bonds so subscribed for.

It is understood that all stock shall be placed in a voting trust for three years from November 1st, 1909 (that is, until November 1st, 1912) and voting trust certificates issued therefor, to be used as above in place of the stock. Two of the trustees in such voting trust shall be nominated by Mr. Aldred and one by the Committee.

It is understood that all parties to this memorandum shall proceed with diligence, and that this understanding shall remain in force for thirty days from date, and thereafter, until cancelled by either party upon ten days' notice to the other.

Dated, April 24, 1909.

Committee

Gardiner M. Lane

Aldred's Affidavit

ALDRED STATEMENT

During the past two and a half years I have been consulted from time to time on various phases of the study being made by the Pennsylvania Water & Power Company to determine its original cost. During this time I have examined many of the documents and much of the correspondence covering the period from my first contact with the development at McCall's Ferry (now Holtwood) in late 1908 until the end of 1912 when the voting trust was dissolved and the stockholders assumed the ultimate responsibility for the management of the company.

The following statement is a composite of facts from existing data supplemented by my own recollections from personal knowledge of affairs during that period and deals largely with those portions which are not self-evident from the data.

For more than a year prior to my first personal contact with the McCall Ferry Power Company, various plans had been studied by those interested in that company, whereby the plant could be finished and the enterprise put on a paying basis. The increase in the capacity of the development made the original financing inadequate and the panic of 1907 had interfered with the proposal to sell additional bonds. It became evident, in the fall of 1908, that the company would probably have to undergo some sort of reorganization in order to secure the necessary additional capital to insure success for the project.

I had been active in the financing, development

and management of the Shawinigan Water and Power Company which was then in successful operation, and probably for that reason was one of those approached to assist the McCall Ferry Power Company. Late in October, 1908, Mr. C. A. Coffin, then President of the General Electric Company, arranged for me to meet with some of the people who were attempting to work out a plan to salvage the McCall Ferry enterprise. These men were working on a number of plans for rehabilitating the company. I declined to take part in any plan unless a reorganization was effected which would materially reduce the company's existing capitalization and fixed charges.

It then became apparent that no arrangements could be made in time to avoid default on the bond interest due December 15, 1908. By the latter part of November, it was agreed that a reorganization was essential and that a Bondholders' Protective Committee should be formed to secure the deposit of bonds pending further negotiations. A call for the deposit of bonds was made on December 7, 1908 by a committee composed of Wm. M. Barnum, A. C. Bedford, S. R. Bertron, C. A. Coffin and G. M. Lane, all of whom had been active in the enterprise and were familiar with its affairs.

During the next four and a half months the Bondholders' Committee was negotiating with various interests, including myself, who were presenting different plans for reorganizing and refinancing the enterprise, each with the hope that their plan would be acceptable to the Committee.

I devised several programs during my examination of the company's affairs to determine the one which would be acceptable to the old bondholders and yet be liberal enough to insure success of the sale of securities for the necessary new money. I considered it essential to reduce fixed charges to a proper point so that there might be no danger of again throwing the company into receivership.

On April 6, 1909, I submitted a plan to the Reorganization Committee, proposing a reorganization of McCall Company and abrogation of the existing power contracts. Under this plan, the reorganized company would authorize a total issue of

$8,500,000. First Mortgage 5% 30 Year Bonds
$8,500,000. Common Stock

The old bondholders were to exchange their bonds on a par basis, receiving one-third in new bonds and two-thirds in new stock. Additional money was to be raised by the sale of $4,000,000. par of bonds at 90 with a 50% bonus in stock, there being sufficient authorized shares in the above capitalization to permit compensation to the underwriters in the form of common stock. The plan finally adopted provided for an exchange of old bonds for 40% in new bonds and 60% in new stock.

The Committee desired to secure my services until the plant was in successful operation. The various plans submitted for consideration had caused a difference of opinion and considerable opposition from some of the bondholders

and particularly from the common stockholders. It was, therefore, deemed expedient by the Committee to temporarily concentrate control in a voting trust and so far as practicable to bring in new personnel familiar with this type of project.

In addition to the common stock for bonus for the new money bonds and that necessary for the bankers' compensation, as provided in the above capitalization, the Committee stipulated as a part of my plan that I, in consideration of 5,000 shares of stock, would become the active manager of the Company during construction and until the expiration of the proposed voting trust, by which time it was expected that the first group of units would be in service and satisfactory power contracts obtained for their output. I delivered a relatively small amount of the 5,000 shares to engineers whom I had consulted on the feasibility of completing the development and making it a profitable enterprise. Inasmuch as my compensation was to be in common stock and my reputation was staked on the outcome of the project, it was agreed that I should have the right to select two of the three members of the voting trust. It was gratifying to me that after the expiration of the voting trust, the stockholders (a majority of whom were the old bondholders) saw fit to retain me as head of their company.

Before entering into a definite agreement with the Bondholders' Committee which was executed on April 24, 1909, I had had a careful examination made of the McCall Company

assets. We had the benefit of the various engineering reports prepared prior to my contact with the enterprise. In addition to this, both Mr. H. S. Holt and I made a personal examination of the plant and I had Mr. R. S. Kelsch make an examination and report. Mr. Julian C. Smith, General Superintendent of the Shawinigan Company, also submitted a report. Mr. Kelsch was a Consulting Engineer in Montreal and I had a great deal of respect for both his judgment and that of Mr. Holt.

After carefully considering the situation with Messrs. Wood and Holt, we became convinced that it would be difficult to underwrite all of the new money bonds promptly in America and that it would be necessary to dispose of a large part of them abroad. We had expected the old bondholders to take approximately a million par of the new money bonds but were able to interest them in only half that amount. I, therefore, communicated with Kitcat & Aitken of London, who had assisted in financing the Shawinigan project, and I subsequently went to London to discuss the matter. It was agreed that they would secure underwriting for half of the bonds not taken by the old bondholders and that Messrs. Wood, Holt and myself would dispose of the other half in United States and Canada.

Based on the various engineering reports and the experience of others familiar with hydroelectric projects, the Reorganization Committee as well as the Board of Directors of the reorganized company determined the value of

the plant, property, water rights and power development to be in excess of $12,000,000. For all the assets of the McCall Company, $3,753,000. in cash or equivalent and my obligations to manage the enterprise until November 1, 1912, the Pennsylvania Water & Power Company subsequently issued $7,500,000. par value of its bonds and $8,495,000. par value of its common stock. This was set forth in a plan submitted to the bondholders under date of May 28, 1909 which was ultimately accepted by all except the owners of 66 bonds.

In addition to the 5,000 shares which I received, 30,000 shares were available to go with the new money bonds and for the bankers' compensation for underwriting them. Kitcat & Aitken of London received 4,575 as the commission agreed upon with me for disposing of $1,835,000. of bonds. Mr. E. R. Wood received 1,525 shares, Mr. H. S. Holt, 1,500 shares, and I received 1,550 as our proportional shares for disposing of another $1,835,000. of bonds. The old bondholders took $500,000. of bonds in addition to those exchanged. No bankers' commission was paid on this block.

Arrangements were made with those furnishing the new money so that cash would be available to resume construction prior to the formation of the reorganized company, thus reducing the period in which the funds of the old bondholders and the company itself would be tied up without return. In addition to the construction, this cash enabled me to settle on favorable terms various claims outstanding

against the company, aggregating approximately half a million dollars, and to purchase the 66 bonds not deposited. Both of these materially reduced the hazards of extensive litigation and protracted hearings which would have delayed conveyance of the property to the new company, as well as creating additional expense.

On July 17, 1909 I had been made Receiver of the old company. The activities of a Receiver of a non-operating company are necessarily limited and the scope of the Bondholders' Committee did not warrant the assumption of obligations and responsibility beyond the safeguarding of the interests of the Bondholders. To expedite the work at the plant and to induce the manufacturers of the equipment to resume their work, it became incumbent on me to enter into a number of contracts personally. Among these were contracts for cement, sand and stone for construction, as well as a contract with the Empire Engineering Corporation to carry on the construction work. In addition, I made personal contracts with I. P. Morris Company for completion of the turbines; with General Electric Company for work on the generators, switchboard and transformers, and with the York Bridge Company for gates. These contracts were subsequently turned over to the Pennsylvania Water & Power Company without profit to me as I deemed them part of the managerial services rendered by me in putting the company on a sound operating basis before expiration of the voting trust. Technical difficulties and delays in the manufac-

ture and delivery of the equipment required much of my personal attention to secure the equipment when necessary.

I secured capable and efficient engineering personnel, which materially reduced the cost of engineering as compared to that of the old company. I also began negotiations for new power contracts and was successful in securing two satisfactory contracts in Baltimore and one in Lancaster before termination of the voting trust. All of them required a large amount of attention and effort on my part.

The difficulties which were encountered in securing proper delivery of equipment and in having it installed in time to meet the obligations of the power contracts were greater than I had anticipated. Once installed, some of the equipment failed to operate properly, transformers burned out, generator bearings failed, and a great many other difficulties of this character were encountered. These entailed negotiating complicated adjustments with the manufacturers. The terms of the power contracts had to be worked out to assure mutual understanding and satisfaction. There is nothing in our present day power developments comparable to the technical difficulties encountered in the early days at Holtwood because the industry has undergone vast development and technical progress. In those days, much less was known about power plant equipment and transmission than we know today.

It appears to me that what I have set forth

supplements existing data sufficiently to give a clear understanding of the reorganization period and that further explanation would merely be a repetition of available data which are self-evident.

Kitcat & Aitken Underwriting Agreement

An Agreement made the 27th day of May 1909

Between MESSRS. KITCAT & AITKEN of 120 Bishopsgate Street Within in the City of London (hereinafter called "the Managers") of the one part and THE SEVERAL PERSONS who shall sign this Agreement or counterparts thereof as participants in the Syndicate intended to be hereby formed and shall be accepted by the Managers as participants (hereinafter called "the Subscribers") of the other part.

WHEREAS the McCall Ferry Power Company (hereinafter called "the McCall Company") was incorporated in the United States of America in the year 1905 to develop a water power situate at McCall's Ferry on the Susquehanna River and supply power to the surrounding cities.

AND WHEREAS the McCall Company fell into financial difficulties in the year 1907 and the works were shut down and have not been completed.

AND WHEREAS the outstanding obligations of the McCall Company consist of (1) $8,325,000 of bonds (part of a total authorised issue of $10,000,000) (2) an indebtedness of $400,000 secured by a claim against a deposit of $250,000 in the Knickerbocker Trust Company and collaterally secured by the deposit of a further $702,000 of the said bonds of the McCall Company beyond the $8,325,000 of such bonds above mentioned and (3) certain floating indebtedness.

AND WHEREAS J. E. Aldred of Montreal has undertaken to use his best endeavours to reorganize the McCall Company on a basis of which the following is a general outline, viz.:—A Company (hereinafter called "the Company") is to be formed under the laws of Pennsylvania U.S.A. to take over the undertaking of the McCall Company and complete the development work with a capital of $8,500,000 of common stock and an authorised bond issue of $12,500,000 of which $7,500,000 are to be immediately issued leaving $5,000,000 in the treasury of the Company. The $8,325,000 of outstanding bonds of the McCall Company are to be satisfied as to 40 per cent. in bonds of the Company and 60 per cent. in common stock of the Company absorbing ~~$3,300,000~~ $3,330,000 of bonds and $4,995,000 of common stock and leaving $4,170,000 of bonds of the Company available for issue for raising the funds required for settling with the said floating indebtedness and the said secured indebtedness of $400,000 and for meeting the expenses of reorganization and the completion of the development work and the working capital required by the

Company. The said J. E. Aldred is to procure these $4,170,000 of bonds (less $500,000 part thereof which are to be subscribed by the existing bondholders of the McCall Company) to be subscribed at 90 per cent. of their face value and is to receive for his services and for use by him in getting the said bonds subscribed a block of fully-paid common stock of the Company. The necessary foreclosure proceedings required for carrying through the above reorganization scheme are to be taken forthwith and the said J. E. Aldred is to be appointed in such proceedings Receiver of the McCall Company and to forthwith proceed with the development work raising the money required therefor by the issue of Receiver's certificates which will rank as a charge on the undertaking of the McCall Company in priority to the existing bonds and all other charges thereon and will on the scheme being carried through be exchanged for bonds of the Company at the rate of $100 of bonds for each $90 of Receiver's certificates.

AND WHEREAS the Managers have agreed with the said J. E. Aldred to form a Syndicate which will subscribe for $1,835,000 of the said bonds of the New Company when formed at 90 per cent. of their face value and in the meantime will make advances to him as Receiver of the McCall Company on Receiver's certificates for carrying on the development work and in consideration thereof they are to receive from the said J. E. Aldred part of the said block of common stock of the Company receivable by him for undertaking the reorganization as hereinbefore mentioned.

AND WHEREAS it is part of the said scheme of reorganization that the whole of the common stock of the Company shall (in order to ensure continuity of development and management of the undertaking) be placed for three years from the 1st November 1909 in a voting trust with three trustees (of whom two are to be nominated by the said J. E. Aldred) and be held in the names of such trustees who will issue in respect thereof voting trust certificates which will represent such common stock and be used in place thereof.

Now in consideration of the premises and of the mutual promises herein contained the Managers hereby agree with the subscribers and each of them and each of the subscribers for himself severally (but not jointly) hereby agrees with the Managers and each of the other subscribers as follows namely:—

1. The Syndicate hereby formed shall consist of the subscribers each of whom shall be interested therein to the amount of his participation set opposite to his name in the schedule to this Agreement. The total available participation in

the Syndicate shall be $1,835,000. The Managers may themselves be subscribers for a participation of any amount. Participation in the Syndicate shall rest in the sole discretion of the Managers.

2. The Managers shall be the Managers of the Syndicate and shall on behalf of the Syndicate subscribe for the said $1,835,000 of bonds of the New Company when formed and in the meantime make advances to the Receiver against such Receiver's certificates as hereinbefore mentioned. For the purpose of enabling them to do so payments shall be made by each subscriber through the agency of the Bank of Scotland 19 Bishopsgate Street Within London E.C. by the following instalments :—

£20 11 0	per $1,000 of bonds	on 1st June 1909	= 10	per cent.
£41 1 11	„ „ „ „	on the 1st July 1909	= 20	„ „
£41 1 11	„ „ „ „	on the 1st September 1909 ...	= 20	„ „
£41 1 11	„ „ „ „	as and when called by the Managers on 30 days' notice expiring not earlier than 1st January 1910	= 20	„ „
£41 1 11	„ „ „ „	as and when called by the Managers on 30 days' notice expiring not earlier than 1st March 1910	= 20	„ „
£184 18 8	per $1,000 of bonds (par value £205 9*s.* 8*d.*)		90	per cent.

All the instalments aforesaid shall carry interest at 5 per cent. per annum from the 1st July 1909 such interest to be paid by the Managers to the subscribers when the Managers receive payment of such interest from the Company.

3. The total sum payable by each subscriber is limited to 90 per cent. of the nominal amount of his participation and each subscriber shall be liable only to the extent of that sum and to the Managers their successors and assigns only and nothing herein contained shall constitute the subscribers partners with one another or with the Managers or except as provided in Clauses 7 and 8 hereof render any subscriber liable to pay or contribute in any event more than such sum as aforesaid.

4. Interest at 6 per cent. per annum will be payable to the Managers on all instalments in arrear and the failure of any subscriber to punctually pay any sum or instalment payable by him as aforesaid on the due date for payment thereof or to perform any other of his obligations hereunder shall (in addition to rendering him liable to the Managers for any loss or damage thereby occasioned to them or

to the Syndicate) entitle the Managers to forfeit on behalf of the Syndicate his participation in the Syndicate and all instalments previously paid by him and to exclude him from all further interest or participation in the Syndicate and to allot his participation to any other person or otherwise dispose thereof on behalf of the Syndicate as they think fit. Such failure of any subscriber shall not however affect or release any other subscriber

5. All monies paid by the subscribers as aforesaid or advanced on their behalf as hereafter mentioned shall be forwarded by the Managers to America and paid over by them in America to the Company against delivery to them in America of bonds of the Company (or temporary bonds if the engraved bonds are not then ready for delivery) at the rate of $100 of bonds (or temporary bonds) for each $90 paid over: Provided that until the said scheme of reorganization of the McCall Company has been carried through the Managers may advance the whole or any part of the monies aforesaid to the Receiver of the McCall Company against Receiver's certificates to be issued by him to the Managers and others making similar advances and carrying interest at such rate as may be arranged provided only that the Managers shall be advised that such Receiver's certificates will rank as a first charge on the property and assets of the McCall Company in priority to the existing bonds of that Company. Any Receiver's certificates so issued to the Managers shall be held by them until the said scheme of reorganization is carried through when the same shall be exchanged for bonds or temporary bonds of the Company at the rate of $100 of bonds for each $90 of Receiver's certificates.

6. During the continuance of the Syndicate all bonds of the Company delivered to and received by the Managers as aforesaid will be retained by them and deposited to their order with the Bank of Scotland or their agents. At any time during the continuance of the Syndicate the Managers shall be entitled (subject as hereinafter mentioned as regards bonds withdrawn from sale by subscribers) without any consent and notwithstanding any dissent by the subscribers or any of them to sell on behalf of the Syndicate either by private treaty or by public issue and at such price and on such terms as they shall think fit and either in England America or elsewhere all or any part of the said bonds and to pay brokerage underwriting overriding and other commissions in connection with any such sale or issue and generally to adopt such methods as they think fit for effecting such sale: Provided always that no bonds shall be sold except upon such terms and at such prices that the net

5

proceeds of sale of the bonds sold remaining after payment of all expenses of and incident to such sale shall be at least 90 per cent. of the face value of the bonds sold plus any interest accrued thereon up to the date of sale.

7. The Managers shall not be entitled to sell by private treaty the bonds of any subscriber who on application for his participation notified the Managers that he desired to withdraw his bonds from sale but they shall be entitled notwithstanding such notice to include such bonds in any public issue of bonds made by them: Provided that if they shall do so they shall give to each subscriber who has so withdrawn (hereinafter called "a non-selling subscriber") whose bonds are to be included in such public issue seven days' notice at least of their intention specifying the amount of his bonds intended to be included in such issue the price of issue and the rate of any commissions (whether overriding or underwriting) being paid on such issue and stating that in the event of his applying firm for the whole of his bonds and paying up such sum as will with the instalments already paid by him make up the price at which the public issue is made before some date to be named in the notice he will be entitled to an allotment of such bonds upon the terms of the public issue and also to be paid the same (if any) underwriting and/or overriding commissions in respect of his bonds as are being paid to other underwriters in connection with such issue.

8. The bonds allotted to each such non-selling subscriber shall go in special relief of his subscription and shall not be deemed to be subscriptions by the public as between such subscriber and any other underwriters. Any non-selling subscriber who shall so subscribe and pay for and be allotted his said bonds shall have credited to him by the Managers in or towards payment of the price payable by him therefor on the said public issue any instalments or sums previously paid by him in respect of his participation and shall be relieved from liability to pay the remaining instalments (if any) due in respect of the participation in the Syndicate but on the termination of the Syndicate the non-selling subscribers shall only be entitled to participate in the assets of the Syndicate available for distribution after the other subscribers have had returned to them the instalments paid up on their respective participations with the accrued interest thereon the intention being that in order that the bonds of a non-selling subscriber may be included in any quotation for the bonds that may be obtained on the Stock Exchange he shall be bound to allow his bonds to be included in any public issue that may be made by the Managers and bear his proper proportion of any expenses thereof.

9. On the termination of the Syndicate the assets thereof after paying all the liabilities and all costs charges and expenses properly payable hereunder shall be applied by the Managers :—

(*a*) In repaying to each subscriber the amount paid up by him on his participation with accrued interest (if any) less the amount (if any) for which he may already have received credit under the last preceding clause hereof.

(*b*) The balance of such assets (representing the profit of the Syndicate) shall be distributed amongst the subscribers *pro rata* according to their respective participations.

Provided always that on a distribution of the assets any unsold bonds shall be treated as being worth 90 per cent. of the face value thereof plus accrued interest (if any) and as far as possible be applied at that value in repaying to the non-selling subscribers the amounts paid up on their participations and the balance of the unsold bonds shall only be applied in repayment of the amounts paid up on the participations of the other subscribers so far as the cash assets of the Syndicate are not sufficient to repay the same.

And provided also that for the purpose of the division referred to in Sub-clause (*b*) of this Clause the nominal amount of the participation in the Syndicate of any subscriber to whom bonds have been allocated under this Clause shall be reduced by the nominal amount of such bonds.

10. If the proposed scheme for the reorganization of the McCall Company shall not for any reason be successfully carried through then on the termination of the Syndicate any certificates issued by the Receiver of the McCall Company and held by the Managers and any cash paid up by the subscribers and not already advanced by the Managers to the Receiver of the McCall Company shall be distributed by the Managers *pro rata* amongst the subscribers in proportion to their participations and the subscribers shall have no further claim whatsoever against the Managers in respect of their participations in the Syndicate or otherwise howsoever.

11. The Managers shall be entitled at any time after they shall have received delivery of all the said $1,835,000 of bonds or after they shall be satisfied that the proposed scheme for reorganization of the McCall Company will not be successfully carried through to terminate the Syndicate by notice in writing to the subscribers. In default of earlier notice of termination being given as

aforesaid the Syndicate shall terminate on the 1st July 1910 unless the Managers shall previously to that date by notice in writing to the subscribers postpone the termination of the Syndicate for a further period not exceeding six calendar months in which case the Syndicate shall continue until the expiration of such further period unless previously determined by the Managers by notice to the subscribers.

12. The Managers will issue to each subscriber upon payment by him of the instalment payable in respect of his participation on the 1st July 1909 a certificate under their hands certifying that he will be entitled to delivery of bonds to the amount of his participation on the termination of the Syndicate on payment of the remaining instalments payable by him in respect of his participation subject nevertheless to the terms of this Agreement: Provided that in any case where such a certificate is issued to a subscriber the Managers may refuse to make any payment or to deliver any bonds or other securities to the subscriber or to permit him to exercise any rights as a subscriber hereunder unless he shall if and whenever required by the Managers so to do produce such certificate to them and permit them to endorse thereon such notice as they think fit of such payment or delivery having been made or such right having been exercised as aforesaid.

13. In consideration of the subscribers joining the Syndicate the Managers shall out of the common stock of the Company receivable by them from the said J. E. Aldred as hereinbefore recited pay to each subscriber the following bonus namely—To each subscriber who avails himself of the arrangements made by the Managers as hereinafter mentioned for the financing of subscribers by certain banks a bonus equal to 30 per cent. of his participation in the Syndicate. And to each subscriber who does not avail himself of such arrangement a bonus equal to 40 per cent. of his participation. Such bonuses shall be payable in voting trust certificates representing common stock of the Company issued by the Trustees of the voting trust to be created as hereinbefore mentioned and shall be payable to each subscriber upon payment by him of the instalment payable in respect of his participation on the 1st September 1909 or on such later date as the said voting trust certificates shall be ready for delivery.

14. The Managers have arranged with certain banks to advance to any subscriber (if individually acceptable to the bank) the amount of the instalments payable by him hereunder in respect of his participation in the Syndicate other than the instalments payable on allotment upon the security of his personal

obligation as well as of his participation in the Syndicate and of all bonds securities or moneys to become payable to him in respect thereof (but exclusive of the bonus of common stock of the Company to which such subscriber will become entitled hereunder and which he will remain entitled to receive notwithstanding his availing himself of the arrangement so made). All sums so advanced by the banks will be advanced by paying the said instalments on behalf of the subscribers to the account of the Managers at the Bank of Scotland and such sums will be repayable by the subscriber on the 1st July 1910 or on the earlier termination of the Syndicate with interest at 5 per cent. per annum. Any subscriber desiring to avail himself of such arrangement must give notice of the fact when he signs this Agreement and will have to execute such personal obligation as aforesaid and to pay all stamp duties payable in respect of his advance including the cost of stamping any bonds or other securities delivered by the Managers to the Bank in respect of the participation of such subscriber in the Syndicate.

15. As regards any subscriber availing himself of the aforesaid arrangement the Managers shall (notwithstanding any notice to the contrary from such subscriber) be entitled to treat the bank making advances on his behalf as absolutely entitled to the participation and all the rights of such subscriber under this Agreement and to receive on his behalf and give a valid receipt for such certificate as mentioned in Clause 12 hereof and all bonds securities and moneys (but not the said bonus in common stock of the Company) receivable in respect of the participation of such subscriber in the Syndicate until they shall receive notice from such bank that the subscriber has repaid such advances to the bank with interest.

16. The Managers shall have the sole direction and management and conduct of the operations of the Syndicate and may on behalf of the Syndicate consent to or approve any modification of the said proposed scheme of reorganization of the McCall Company which may be found necessary or be desirable for enabling the said scheme to be carried through and the Company to be formed and acquire the properties and issue bonds charged thereon or to concur in the substitution for such scheme or any other similar scheme and may on behalf of the Syndicate take or concur in taking any steps or proceedings necessary or desirable for the purposes of carrying through the said scheme or any such substituted scheme and may settle or approve on behalf of the Syndicate the form and nature of the bonds of the Company and of the trust deed securing the same and of the said voting trust to be created of the common

stock of the Company and the documents constituting the same and the voting trust certificates and generally may on behalf of the Syndicate do or concur in doing any act or thing in connection with the matter which they would or might have done on their own behalf if they had been the sole subscribers to the Syndicate. The Managers may also on behalf of the Syndicate borrow money on such terms as they may deem expedient for the purpose of carrying out the said Agreement with the said J. E. Aldred or for performing any obligation of the Syndicate and may pledge or charge as security for any such loan any bonds or securities of the Syndicate and also the obligations of the subscribers or any of them under this Agreement (provided only that the Managers shall not be entitled to borrow any such moneys in the names of the subscribers or impose any personal liability upon the subscribers or any of them for the repayment of any moneys so borrowed or any interest thereon) and may pay off any moneys so borrowed out of any moneys of the Syndicate.

17. Each of the subscribers hereby irrevocably appoints the Managers until the termination of the Syndicate his attorney and agent either in his own name or in the name of the Syndicate or of the Managers to give all such consents and approvals and do or take any such things or steps as mentioned in the last preceding clause and to receive from the Bank of Scotland all moneys paid thereto by the subscribers or the advancing banks under this Agreement and to subscribe for his participation hereunder of the said bonds of the Company and to accept an allotment thereof and to make all payments in respect thereof and to receive delivery and give a valid discharge for such bonds and the voting trust certificates representing the bonus of common stock payable to such subscriber hereunder and to exercise all rights conferred by any bonds or common stock or voting trust certificates so delivered or otherwise acquired hereunder and to enter into execute and do all arrangements agreements and things deemed expedient or necessary to carry out the subscription or purchase of the said bonds or generally to accomplish the purposes of this Agreement including any sale or pledge of the said bonds in accordance with the provisions herein contained.

18. Subject to the provisions hereinbefore contained as regards those subscribers who avail themselves of the arrangements made by the Managers with the financing banks the respective participations of the subscribers shall not nor shall their respective rights and interests or obligations hereunder be assignable either absolutely or by way of mortgage charge or pledge or otherwise except with the previous sanction in writing of the Managers which they may give upon such terms and conditions (if any) or withhold altogether as

they think fit. And the Managers may (if they think fit so to do) absolutely disregard any notice given to them of any such assignment mortgage charge or pledge as aforesaid which they shall not have sanctioned in writing and may continue notwithstanding any such notice to treat the several subscribers as the only persons entitled to any interest in the Syndicate or to give valid receipts and discharges for any certificates bonds securities or moneys issuable to or distributable amongst the subscribers hereunder: Provided that any subscriber may after payment in full of all the instalments payable in respect of his participation charge or pledge his participation or interest hereunder and any certificate issued by the Managers in respect thereof as security for loans made to him thereon and the Managers shall have regard to any such charge or pledge of which they shall receive notice in writing.

19. The Managers shall be chargeable with good faith in the management and conduct of the affairs of the Syndicate but except in the event of their being guilty of want of good faith they shall not be liable for anything done or omitted by them in the performance or intended performance of their duties as Managers of the Syndicate or for any loss damage or injury occasioned to the subscribers thereby or by the exercise or non-exercise by them of any power or discretion hereby vested in them.

20. The Managers will receive further common stock of the Company beyond that required by them for providing the bonuses payable hereunder to the subscribers and they will retain such additional common stock or such part thereof as is not used by them for obtaining subscribers to the Syndicate as their profit and they shall not be accountable therefor to the subscribers. The Managers shall accordingly not be entitled to any remuneration from or to make any charge against the subscribers for forming the Syndicate and acting as Syndicate Managers but all out of pocket expenses of the Managers including legal expenses and all other disbursements made by them in good faith in connection with this Agreement and for carrying out the purposes of the Syndicate (other than any expense incurred in connection with any sale of bonds which expense shall be payable out of the proceeds of sale of the bonds sold as hereinbefore provided) and the rateable proportion of such expenses payable by each subscriber may be deducted by the Managers from any moneys payable by them to such subscriber under any of the provisions hereof.

21. Any notice hereunder may be served on the parties hereto by sending the same through the post in a letter addressed to the Managers at their address

above stated and to the several subscribers at their addresses stated in the schedule hereto and any notice so served shall be deemed to be served upon the day on which it is posted in London.

22. An original of this Agreement shall be signed by the Managers and lodged with the Bank of Scotland on behalf of the subscribers and counterparts thereof may be signed by any one or more of the subscribers and the said original and all such counterparts shall be read together and shall form and be one original instrument.

IN WITNESS whereof the Managers have subscribed an original hereof and the subscribers have subscribed the said original or counterparts thereof as of the day and year first above written.

Montreal Trust Company Underwriting Agreement

AGREEMENT FOR THE PURCHASE OF NEW SECURITIES

TO BE ISSUED PURSUANT TO

"McCALL FERRY POWER COMPANY - PLAN AND AGREEMENT"

AGREEMENT dated July 27th, 1909, between the Subscribers severally, of the one part, and the MONTREAL TRUST COMPANY, a corporation of the Dominion of Canada, hereinafter called Vendor of the other part.

Reference being made to the "Plan and Agreement" dated May 28, 1909, a copy whereof is hereto attached, issued by the Committee named therein, each Subscriber hereby agrees with Vendor to purchase, at the price and upon the terms hereinafter stated, the aggregate principal amount written after his signature hereto of the Thirty Year First Mortgage Five Per Cent Gold Bonds of the "New Company' described in said "Plan and Agreement," together with 50% of the said amount in the voting trust certificates for stock of said "New Company," also described in said "Plan and Agreement."

The price is to be $900 and accrued interest, if any, for each one thousand dollar bond together with such voting trust certificates for $500 par value of stock, and is payable to Vendor at its office in Montreal, Canada, or elsewhere as directed by it, as follows: 10% of such $900 on August 1, 1909; 15% thereof on October 1, 1909, and the balance in instalments each of which shall not exceed 25% of such $900 and shall be so payable within thirty days after notice by Vendor calling for payment of such instalment shall have been mailed to the Subscriber at the address written after his signature hereto.

This purchase agreement, however, is made upon the condition that each Subscriber, at or before the delivery to him of the bonds and voting trust certificates agreed to be purchased, shall be paid or credited with interest at 5% upon each instalment of purchase price paid by him from the date of payment thereof to the date of payment or credit of such interest.

Appropriate receipts of Vendor, negotiable as therein provided, will be issued for all payments by Subscribers. No assignment, transfer or other disposition of any such receipt shall discharge or diminish any obligation of any Subscriber hereunder.

The Subscribers severally authorise Vendor, at any time prior to the issue of such bonds of the "New Company", to loan or advance to the Committee under said "Plan and Agreement" all or any of the moneys received from Subscribers in payment of instalments hereunder, and any interest moneys received by Vendor, taking for such loans or advances the obligations of said Committee, as such, as authorised by said "Plan and Agreement", such obligations to bear interest at 5%, to mature not later than January 1, 1910, and to be secured either by pledge of Receivers' certificates, of amount equal to the amount of such loans or advances, and such certificates to be under court order making them a lien on the property covered by the present mortgage of the said McCall Ferry Power Company prior to at least eighty-five per cent of the outstanding bonds secured by said mortgage,

or by pledge of said present bonds of the said McCall Ferry Power Company, provided that not less than $100 in aggregate principal of such bonds shall be so pledged to secure each $20 so advanced, and that not less than 85% of all of said bonds outstanding shall be so pledged to secure such obligations of said Committee to Vendor and its similar obligations, if any, to others.

Vendor may accept as conclusive the written statement of a majority of said Committee as to any matter involved in the foregoing paragraph hereof.

The Subscribers intend their agreements herein stated to be relied upon by said Committee in carrying out the said "Plan and Agreement", and understand that arrangements have been or will be made by said Committee with Vendor to furnish to Vendor for the net purchase price thereof hereunder the bonds and voting trust certificates hereby agreed to be purchased, upon or before the complete carrying out of said plan; but in case said "Plan and Agreement" should not be carrid out so as to provide said Committee with such bonds and voting trust certificates, the subscribers will accept in full discharge the delivery to them proportionately of all obligations and security received by Vendor for loans or advances made as hereinbefore authorized, and the return to them proportionately of all moneys received by Vendor hereunder and not so loaned or advanced by Vendor.

The words "said Committee" as used herein mean the Committee under said "Plan and Agreement" as at any time constituted. No partnership or joint relation of any kind results from this agreement, nor does Vendor assume any fiduciary relation or any obligation to cause the said "Plan and Agreement" to be carried out. Signatures to this agreement, though made upon different papers, shall be deemed signatures of one agreement, and Vendor may be a Subscriber.

NAME	AMOUNT	ADDRESS

Final Plan and Agreement for Deposit of Bonds

62 CEDAR STREET,
NEW YORK, May 28th, 1909.

To the Holders of
First Mortgage Bonds and Preferred Stock of
McCALL FERRY POWER COMPANY:

The undersigned Committee, appointed by the "Preliminary Agreement" dated December 7, 1908, submit the enclosed "Plan and Agreement," having made arrangements whereby, if such plan is promptly adopted with substantial unanimity, the "new money" called for thereby will be supplied by others without requiring any contribution from the bondholders. The plan has been approved by holders of a large amount of the bonds. The following is an outline of the

PLAN

Either the present Company readjusted or a new company—such company, new or old, to be named SOUTHERN PENNSYLVANIA POWER COMPANY, or other appropriate name—to be capitalized and to issue bonds and stock as follows:

Bonds:	First Mortgage Thirty-Year Five Per Cent. Gold Bonds, authorized		$12,500,000
	For use in obtaining the "new money" by sale at 90, with stock as shown below, not to exceed	$4,250,000	
	To go to present bondholders as hereinafter stated, 40% of par of the present bonds	3,330,000	7,580,000
	Leaving in Treasury, at least		$ 4,920,000
Stock:	Authorized stock, all of one class		$ 8,500,000
	To go with the new bonds sold at 90	$3,500,000	
	To go to the present bondholders, 60% of par of the present bonds	4,995,000	8,495,000
	Leaving in treasury		$5,000

Holders of McCall Ferry Power Company First Mortgage Bonds to receive 40% of the principal of such bonds in the new bonds and 60% thereof in voting trust certificates for the new stock; all such new stock to be deposited under a

voting trust terminating November 1, 1912, when the certificates will be exchangeable for the stock- the voting trust to provide for three voting trustees, two to be nominated by those furnishing the "new money" and one by the Committee, successors, if any, to be nominated by the same interests respectively.

The principles of this Plan may be stated summarily as follows: A first lien bond issue to be created sufficient to provide the "new money" required by the Plan, to give the present bondholders 40% of their present bonds in such new bonds and to leave in the treasury, to be issued hereafter only under proper safeguards and restrictions, a further amount deemed sufficient for what are likely to become in the future desirable capital expenditures for the Company; parties not interested in the enterprise at present to agree to take $4,170,000 of the new bonds at 90 ($80,000 more to be for like use at the discretion of the Committee), and with this amount are to receive $3,500,000 of stock; present bondholders to receive 40% of their bonds in new bonds and 60% of their bonds in new stock—the total stock so to be received amounting to nearly three-fifths of the whole issue thereof; the present preferred and common stock of McCall Ferry Power Company to have no share in the new issues.

The amount of "new money" to be raised under the Plan has been fixed through conference with those who are to furnish it at a figure deemed by them sufficient—after providing for all expenditures of the Committee under the powers of said Plan and Agreement—to so far complete the enterprise that its operation so completed will, as they estimate, make earnings sufficient to pay all bond interest and leave a substantial surplus. They also estimate that the further construction for which the treasury bonds are reserved will result in large additional earnings. They have had experience in the successful management of similar enterprises, and the Committee have confidence in the efficiency of their management of this one.

Accordingly, as provided by said Preliminary Agreement, Depositors thereunder are hereby notified that printed copies of said Plan, embodied in an appropriate agreement, have been lodged with the Knickerbocker Trust Company, No. 66 Broadway, New York, and the City Trust Company, No. 50 State Street, Boston, the Depositaries under said Preliminary Agreement, and a copy of said Plan and Agreement is enclosed herewith; and such Depositors are further notified, in accordance with the provisions of said Preliminary Agreement, that, unless they withdraw their deposits, or cause them to be withdrawn, on or before July 1st, 1909, they will be bound by the enclosed Plan and Agreement with like effect as if they had executed the same.

The successful carrying through of the Plan depends, however, to a large extent, and the early resumption of the work depends entirely, upon the *prompt* acceptance of the Plan by a large proportion of the bondholders. Accordingly, the Committee urges all bondholders who approve the Plan to become parties to said Plan and Agreement immediately by depositing, or causing the deposit of, their bonds and preferred stock *at once* with one of said Depositaries. Those holding Certificates of Deposit under said Preliminary Agreement should surrender them in exchange for Certificates of Deposit under said Plan and Agreement; and those whose bonds and stock are pledged should arrange with the pledgees for the deposit thereof.

WILLIAM M. BARNUM,
A. C. BEDFORD,
S. READING BERTRON,
CHARLES A. COFFIN,
GARDINER M. LANE,
Committee.

McCALL FERRY POWER COMPANY,

PLAN AND AGREEMENT.

Agreement, made this 28th day of May, 1909, between WILLIAM M. BARNUM, A. C. BEDFORD, S. READING BERTRON, CHARLES A. COFFIN, and GARDINER M. LANE (hereinafter called the Committee), and the holders of first mortgage bonds and preferred stock of McCall Ferry Power Company becoming parties hereto (hereinafter called Depositors).

WHEREAS, additional funds are required to complete for operation the plant now of the McCall Ferry Power Company, and the Committee has prepared the following:

PLAN.

1. A new company—the term "New Company" being used herein to mean either the present company or any other that may be used—is to be vested with the properties of the present company and with cash as hereinafter stated, and will have authorized bonds and stock as follows: Thirty-Year First Mortgage Five Per Cent. Gold Bonds, $12,500,000; Stock, all of one class, $8,500,000; of which bonds at least $4,920,000 are to be in the treasury of the New Company after the Plan is carried out.

2. The holders of the bonds of the present company who become parties to this Plan and Agreement and perform the obligations thereof will receive in exchange for their present bonds 40% of the principal thereof in such bonds and 60% of such principal in negotiable voting trust certificates for such stock of the New Company, all such new stock to be deposited under a voting trust terminating November 1, 1912, when the voting trust certifi-

cates will be exchangeable for the stock—the voting trust to provide for three voting trustees, two to be nominated by those furnishing the new money, and one by the Committee, and their successors to be nominated in the same interests respectively.

3. From $4,170,000 to $4,250,000 of such bonds, and $3,500,000 of such stock of the New Company are to be for sale at a price to realize 90 per cent. of the principal of the bonds.

4. The disposition of the securities of the New Company, in accordance with the foregoing, is indicated in the following table:

Parties.	*Bonds.*	*Stock.*
To those furnishing the new money ($3,753,000, at least)	$4,170,000	$3,500,000
To holders of the present bonds ($8,325,000)* 40% in new bonds and 60% in new stock	3,330,000	4,995,000
	$7,500,000	$8,495,000

* Certain additional bonds outstanding in pledge are not included, as they will be discharged from pledge and cancelled in carrying out said Plan and Agreement.

5. The Committee may cause fractional scrip to be issued to those entitled to fractional amounts of bonds or stock.

NOW, THEREFORE, THIS INDENTURE WITNESSETH:

FIRST.—William M. Barnum, A. C. Bedford, S. Reading Bertron, Charles A. Coffin and Gardiner M Lane agree to act as the Committee.

SECOND.—All holders of bonds or of bonds and preferred stock of the McCall Ferry Power Company, becoming parties hereto, hereby assent to said Plan and agree to forthwith deposit, or cause the deposit of, their bonds and

preferred stock with the Knickerbocker Trust Company, No. 66 Broadway, New York, or with the City Trust Company, No. 50 State Street, Boston (hereinafter called the "Depositaries"), it being understood that the receiving Depositary shall, upon such deposit, issue Certificate or Certificates of Deposit evidencing the same, which Certificates shall be transferable, and shall entitle the holder to receive new securities in accordance with said Plan, or to receive back the bonds and stock deposited, as hereinafter provided. All certificates for stock shall be properly endorsed in blank for transfer. The mere deposit of any bonds or bonds and stock with one of the Depositaries shall operate to make the depositor a party to this agreement, and shall, operate as a transfer of the bonds and stock so deposited to the Committee or its successors, and shall empower the Committee to exercise all the powers herein given.

THIRD.—The holders of said bonds or bonds and stock, parties hereto, hereby severally vest in said Committee, under the terms of this agreement, as trustee of an express trust, the legal title to all bonds and stock deposited or caused or agreed to be deposited by them respectively and give the Committee full power to do all things in the Committee's judgment necessary or proper to carry out said Plan, including power:

(*a*) at their discretion to acquire, or not to acquire, at public or private sale or otherwise the whole or any part of the properties of the McCall Ferry Power Company, including any on which it holds options, and to use deposited bonds, or any thereof, or any other resources, in such purchase or acquisition;

(*b*) to act for the Depositors in presenting coupons for payment, in requesting or instructing or otherwise moving the trustee under the mortgage securing said bonds with respect to action thereunder, and also to act for them in or in re-

spect to any action which may be brought for the foreclosure of said mortgage or in any other action which may be brought which in any way affects or may affect the rights and interests of the Depositors; to receive and receipt for any money to which said bonds or stock shall be at any time entitled; to execute and deliver any requests, consents, waivers or other writings—including consents to issuing Receivers' Certificates prior, or not, in lien—which it may seem to the Committee necessary or desirable to file in any Court or office or with the Trustee under said mortgage or elsewhere;

(*c*) to employ such agents, attorneys and counsel as the Committee deem best, to represent and act for, or authorize representation of and action for, the Depositors, or any of them, in any Court or elsewhere, with respect to all rights and interests in any way affecting said bonds or stock;

(*d*) so far as deemed expedient by the Committee, to contract, or otherwise provide, for the purchase, compromise, adjustment or payment, in full or in part, of any indebtedness of the McCall Ferry Power Company, or of any Receiver's certificates that may be liens on any of the mortgaged property, or for the extension of any such indebtedness as the obligation of the New Company, or for the redemption from pledge of any property or securities directly or indirectly belonging to said McCall Ferry Power Company;

(*e*) to sell, contract for the sale of, or otherwise dispose of, any new bonds and stock not required for the Depositors or reserved for the treasury under said Plan, and to contract for underwriting with respect thereto, and, in con-

nection with any such contract for underwriting, to pay a reasonable commission therefor; any member or members of the Committee, or any persons or corporations who may be associated with or represented by them, to have the right to join in any such sale or contract.

(*f*) to borrow money in order to raise any cash required to pay the expenses of the Committee or to make any cash payment required upon any foreclosure or other sale, or to carry on any construction or other work, or purchase any property deemed necessary, or to enable the Committee to do any of the other things which they may be authorized to do, or generally for any purpose which the Committee may deem necessary or expedient in order to carry out said Plan; the Committee being hereby expressly authorized to pledge for the repayment of any or all sums so borrowed, any or all of the deposited bonds or stock, and any or all assets acquired by them, and any or all of the bonds or stock of the New Company received by them under said Plan and not specifically appropriated by the Plan or taken by the parties entitled thereto; but no Depositor shall be liable personally for or upon any debt of the Committee;

(*g*) to cause the new Company to be organized in such manner and with such powers as the committee may deem proper, or to adapt and use an existing company as such "New Company" and to fix the terms of its bonds and the mortgage securing the same, subject to the provisions of said Plan; to determine all questions pertaining to the management, operation or disposition of any property acquired by them until the New Company shall be organized and in possession and control of said property; to make such construction, im-

provements or repairs as they shall deem expedient, and to make such contracts in regard thereto as the New Company might make if already organized and in operation; and to cause the provisions of said Plan in respect to a voting trust and voting trust certificates to be carried out;

and generally to exercise all the powers of owners and holders of said bonds and stock, including power to vote at any meeting of bondholders, creditors or stockholders, and to use the same as the Committee may deem expedient in carrying out said Plan; the statement of particular powers herein not to limit the Committee from or in the exercise of any power which, in their judgment, may be desirable in accomplishing the purposes of said Plan and Agreement; nor shall the Committee be restricted in or in respect to dealing, under any of its powers, with or in respect to any property, security or indebtedness, by reason of any interest in any thereof of any member of the Committee or of any firm or corporation in which a member is interested; it being expressly agreed by all Depositors that the methods to be adopted for carrying out said Plan and Agreement are to be determined from time to time by the Committee in their sole discretion, and that the Committee shall have the right at any time to change any such determination should their judgment be changed by subsequent developments.

FOURTH.—Whatever shall be acquired in any way by the Committee under this agreement shall be acquired by them as joint tenants, and not as tenants in common, so as to remain the property of the said Committee, however the members thereof may be changed. The members of the Committee shall have reasonable compensation for their services from this time in carrying out said Plan, the amount of such compensation, however, to be subject to the approval of the Board of Directors of the New Company. Any member of the Committee may be

come a party hereto as a Depositor. Any member of the Committee may resign by writing addressed to the Committee. By appointment in writing signed by a majority of the Committee, additional members thereof may be appointed, and vacancies therein, occurring by death, resignation or otherwise, may be filled. The Committee may act by a majority thereof either at a meeting or in writing without a meeting. Any member may vote or act by proxy appointed in writing, who may be another member of the Committee or any other person approved by a majority of the Committee. No member of the Committee shall be liable for the act or omission of another member, nor shall the Committee or any member thereof, or either of the Depositaries be liable for the act or omission of any agent or employe selected in good faith, or in any case except for its or his own willful misconduct.

FIFTH.—The Committee may construe this agreement, including said Plan, and their construction thereof, or action thereunder, in good faith, shall be final and conclusive; they shall have power to determine, and to act according to their judgment in, all matters not specifically provided for herein but within the general purpose set out in said Plan, and shall also have power to modify said Plan in any matter of detail not affecting the substantial rights of the other parties hereto.

SIXTH.—Holders of bonds or bonds and preferred stock of the McCall Power Company may become parties hereto at any time on or before July 1st, 1909, or such later date or dates as the Committee may fix, by signing this agreement, which it is understood may be signed in any number of parts, or by depositing, or causing the deposit of, their bonds or bonds and stock without such signing as above provided.

SEVENTH.—The Committee shall not be required to take any action in the interest of any of the stock de-

posited hereunder, nor shall it be under any obligation whatever to any holder of bonds or stock not a party to this agreement.

EIGHTH.—In case the Committee should at any time decide that it is not, for any reason, to the interest of the Depositors to carry out the said Plan, they may either

(1) declare this agreement terminated, in which case all bonds and stock deposited hereunder shall be delivered and transferred to the several holders of Certificates of Deposit upon surrender of said Certificates, and upon payment of their due proportion of the obligations already incurred, to be determined by the Committee; or

(2) file a new agreement with the Depositaries, mail a copy of the same in a postpaid wrapper to each Depositor to the address, if any, filed with either of the Depositaries, or, if no such address has been so filed, then to the address last known to the Committee, whereupon the Depositors shall have the right, within twenty days after the copies of such new agreement shall have been so mailed, to withdraw their bonds and stock upon payment of their due proportion of the obligations already incurred, to be determined by the Committee, and in the event of failure to so withdraw within such twenty days, every Depositor so failing shall be deemed to have assented to and ratified such new agreement, and such assent and ratification shall be deemed final and irrevocable.

NINTH.—In case the Committee shall deem it desirable or proper to give any notice to the Depositors or any of them, such notice shall be deemed to have been given if mailed in writing to such Depositors at the addresses, if any, filed in writing with a Depositary for the

purpose; or when no such address has been so filed, then to the address last known to the Committee.

TENTH.—Acceptance of new bonds and stock by any Depositor shall estop such Depositor from questioning the conformity thereof, as to character or otherwise, to any provision of this Plan and Agreement.

ELEVENTH.—After the reorganization shall have been completed, and all debts and liabilities incurred in connection therewith shall have been paid or discharged, all moneys, securities and other property not used or required for any of the purposes herein authorized and remaining in the hands of the Committee, are to be transferred to, or held for the benefit of, the New Company, under appropriate agreements for the protection and indemnity of the Committee.

TWELFTH.—Originals of this agreement are to be lodged with said Knickerbocker Trust Company of the City of New York, and with said City Trust Company of Boston, where they may be inspected by Depositors. This instrument may be signed in several parts with the same effect as if all signatures were hereon.

Upon transfer of any Certificate of Deposit the transferee shall succeed to all the rights of the prior holder and be subject to all the provisions hereof. The word "Depositors" herein includes the holders of record of the Certificates of Deposit issued hereunder outstanding at the time in question. The Committee and the Depositaries may treat the holder of record of each Certificate of Deposit as the absolute owner thereof.

The Depositaries shall severally hold and dispose of, subject to the order of a majority of the Committee, the bonds and certificates of stock deposited with it, and, in acting as Depositaries hereunder, act respectively as agents for, and are answerable to, the Committee alone.

10

A writing signed by a majority of the Committee shall be sufficient evidence to the Depositaries of any action of the Committee stated therein.

IN WITNESS WHEREOF, the parties of the first part (members of said Committee) have hereunto signed their names, and the various depositors, parties of the second part, have hereunto signed their names and written opposite thereto the amount of bonds and stock deposited by them, respectively, or have deposited, or caused the deposit of, their bonds and stock, the day and year first above written.

CABLE ADDRESS SANDP

SANDERSON & PORTER
ENGINEERS AND CONTRACTORS
52 WILLIAM STREET, NEW YORK
UNION TRUST BUILDING, SAN FRANCISCO

June 25th, 1909.

To the Holders of the First Mortgage Bonds and Preferred Stock of the McCall Ferry Power Company,

Gentlemen.—Referring to the Circular and Plan of Agreement dated May 28th, 1909, sent by the Committee to the holders of the First Mortgage Bonds and Preferred Stock of the McCall Ferry Power Company, we desire to advise you that, after a careful consideration of the entire subject, including an analysis of the financial plan therein submitted, we are of the opinion that the adoption of the Plan proposed is not to the best interest of the holders of such securities.

The Plan presented under date of May 28th will bind all depositors under the Preliminary Agreement of December 7th, 1908, unless they withdraw their securities before July 1st, 1909.

Under the plan proposed, the present bondholders will become the majority stockholders but control of the Company will be in the hands of those furnishing the new money until at least November 1st, 1912, since the Plan calls for a Voting Trust of three members, two of whom are to be nominated by those furnishing the new money.

The Committee's Plan presents a financial scheme which is inequitable as shown below and may prove disastrous to the interests of the present security holders. Such Plan gives no information as to essential questions of construction, future financing and financial management.

While the Committee states that those furnishing the new money have had experience in the successful management of similar enterprises, no information as to the personality of these parties is given in the Circular nor is any assurance offered that the financial management entailed by this Plan is experienced or that ample capital will be available if the funds now to be provided prove inadequate to properly complete the plant and deliver the power to market, in which case a further re-organization may be necessary in the near future which might practically wipe out the original bondholders.

The present bondholders have furnished $7,492,000 in cash for which, under the proposed plan of re-organization, they will receive $3,330,000 par value in bonds and $4,995,000 par value in stock, thus paying therefore 90 per cent. of their combined par value, whereas those furnishing the new money will secure bonds at 90 per cent. with about 90 per cent. bonus in stock, thus paying therefor less than 50 per cent. of their combined par value.

As a result the new securities must sell at a price which will show a profit of $3,500,000 to those who have advanced $3,800,000 of new capital before the present bondholders can realize enough from the sale of their securities to equal their original investment.

Under the Plan no opportunity is given to the present bondholders to participate on any basis in the furnishing of the new capital which would seem to clearly indicate that those proposing to furnish such capital believe that they have negotiated a very profitable bargain.

We have been informed that a tentative plan was suggested to and rejected by some members of the Committee by parties who were willing to purcha.. sufficient first mortgage bonds to complete the property to a capacity of 60,000 H. P., which plan contemplated an issue of cumulative preferred stock to be offered to the present bondholders in exchange for their bonds, par for par.

We believe that it is still possible to form a syndicate which would purchase sufficient first mortgage bonds of a new issue to insure completion of the property in the best manner, provided the present first mortgage bondholders would agree to convert their bonds into 5 per cent. cumulative preferred stock par for par, with a participation in the new common stock, such syndicate to offer to the present bondholders the privilege of subscription. It is believed that if a reasonable time be given such a plan can be perfected and an offering on substantially the above lines can be made to the present security holders.

Construction work on the development of the McCall Ferry Power Company, other than some excavation in the tail race has been suspended since the fall of 1907, and while we have taken as yet no active part in the construction work, we have been retained as engineers since its inception, and are familiar with the conditions and we are convinced that the season is now so far advanced that the work of construction can not be completed during the present low water season even if funds were immediately available, and that another year must in any event elapse before completion. We feel, therefore that the interests of the present bondholders and of the Company will not be jeopardized by taking the time required to formulate a plan on the lines indicated above.

We have withdrawn our bonds, believing that this course is in the best interests of the security holders, and we urge that you do likewise.

Yours very truly,

SANDERSON & PORTER.

Bondholders Committee's Reply to Protest of Sanderson & Porter

62 CEDAR STREET,
NEW YORK, June 28th, 1909.

To the Holders of
Bonds and Preferred Stock of
McCALL FERRY POWER COMPANY:

The undersigned Committee comments as follows upon the letter to you of Messrs. Sanderson & Porter, dated June 25, 1909.

Messrs. Sanderson & Porter urge you to reject this Committee's plan with the expectation that, later on, some one may present a plan similar to a tentative one which, they say, they "have been informed was suggested to and rejected by some members of the Committee." They were misinformed. Suggestions of a plan were made to the Committee by those to whom Messrs. Sanderson & Porter must allude, but after considerable negotiation were entirely withdrawn.

The Committee has believed that a majority of the bondholders prefer a plan not calling upon them to furnish the further money necessary. Those who have agreed to provide this money stated at the outset that their purpose would be not to organize a mere underwriting syndicate, but, if taking it up at all, to obtain subscriptions for investment in the enterprise and to undertake its management during at least the period of the voting trust, and that they did not care to solicit subscriptions which would be conditional upon the prior exercise of the right to subscribe by others. This has not seemed unreasonable to the Committee.

When the Committee's circular was issued there were reasons, which do not now apply, deemed sufficient for not naming the persons who agreed to furnish the new money and undertake the responsibility of management. The leader of the party is Mr. J. E. Aldred, of Montreal, who is the President of the Shawinigan Water and Power Company, which has been, in the opinion of competent judges, ably and successfully managed; and Mr. Aldred has largely associated with him in the McCall Ferry matter his English and Canadian associates in the Shawinigan enterprise.

As to the sufficiency of the provision for additional funds under the Committee's plan, the Committee has nothing to add to what it said in its circular except —what was to be inferred therefrom—that it believes that this substantial amount of money would not be offered for investment in this enterprise unless those offering it were very confident of its sufficiency to complete a plant capable of making satis-

factory earnings; and it believes further that the experience and standing of those making the offer justify the confidence of others in their convictions in this respect. Their prospect of profit from the enterprise lies in the stock, and of this the present bondholders are to receive the greater part. Moreover, the "tentative plan" to which Messrs. Sanderson & Porter allude, was substantially the same as the Committee's plan in its provision of further funds.

The Committee, without motive or inducement other than to act in the interests, and according to what they suppose to be the wishes, of the bondholders, a very large majority of whom have appointed them to do so, after extended negotiations in various directions and mature consideration, with entire unanimity, made the arrangement for carrying on the enterprise set forth in the Circular and Plan and Agreement, and the Committee believes it to be to the interest of the bondholders to adopt the plan at once. If they do not do so in sufficient numbers the agreement to furnish the additional money will be discharged.

The Committee does not request or urge the bondholders to adopt the arrangements made for them. It does, however, urge them to consider the matter very carefully before withdrawing their deposits under the Preliminary Agreement and so forfeiting the opportunity offered by the Committee's plan for the prompt carrying on of the enterprise.

Letter Re: Opposition to Final Plan

June 29, 1909.

Mr. W. F. Beyer,
33 N. Duke Street,
Lancaster, Pa.

My dear Beyer:-

I have your letter of June 28th. Hutchinson tells me tha Mr. Colgate, who is an underwriter to the extent of $250,000, as are also Sanderson and Porter, are backed by substantial financial interests, but of course I cannot tell whether they are strong enough to prevent the plan advocated by Barnum from being carried out. I will let you know anything that I hear upon the subject, and I would be obliged to you if you would telegraph me immediately upon the filing of any bill in Pennsylvania for your receivership of the McCall Ferry Power Co. I would like to have prompt information upon this subject and will rely upon you to give it to me.

Very sincerely yours,

LS-T

Notice to Knickerbocker Trust Company of Default on Bond Interest

To KNICKERBOCKER TRUST COMPANY,

of the County and State of New York:

The undersigned hereby notify you that William M. Barnum, A. C. Bedford, S. Reading Bertron, Charles A. Coffin and Gardiner M. Lane, as Trustees under the "Plan and Agreement" dated May 26th, 1909, a copy whereof is hereto attached, hold $7,400,000 in aggregate principal amount of first mortgage 5% gold bonds of the McCall Ferry Power Company, outstanding under a mortgage or deed of trust from the McCall Ferry Power Company to Knickerbocker Trust Company, dated June 15, 1905, and that under the terms of said Plan and Agreement whereby the legal title to said bonds is vested in said Trustees, it is provided that said Trustees may act by a majority thereof either at a meeting or in writing without a meeting.

The undersigned, a majority of said Trustees, hereby notify you that the McCall Ferry Power Company defaulted in the payment of the interest due on December 15, 1908, on the bonds issued and outstanding under the said mortgage, and that such default has continued for more than six months; and we further notify you that said Trustees, the holders as aforesaid of more than a majority in interest of the bonds secured under said mortgage now outstanding, have elected and do elect that the entire principal sum secured

by said mortgage and the interest due thereon shall become and be immediately due and payable, and we request that you notify the McCall Ferry Power Company of this election.

In behalf of said Trustees we further request you to take forthwith appropriate legal proceedings for the foreclosure of the lien of said mortgage, and to enforce your rights as trustee, and the rights of the bondholders under said mortgage, and hereby agree to indemnify you against any expense or liability incurred by you in taking or causing such proceedings to be taken.

IN WITNESS WHEREOF the undersigned, a majority of said Trustees, have executed these presents this sixth day of July, 1909.

Certificate filed in New York County

Order Appointing Aldred Receiver

CIRCUIT COURT OF THE UNITED STATES
FOR THE EASTERN DISTRICT OF PENNSYLVANIA.

KNICKERBOCKER TRUST COMPANY, :
Complainant, :
vs. : IN EQUITY.
McCALL FERRY POWER COMPANY, :
Defendant. :

This cause coming on to be heard on the bill of complaint and the answer of the defendant admitting all the allegations of the bill, and consenting to the appointment of a Receiver, and the Court having heard the counsel for the respective parties, and duly considered the matters involved, it is now, on motion of Frank P. Prichard, Esq., of counsel for the complainant; Franklin H. Mills, Esq., of counsel for the defendant appearing and assenting,

ORDERED, ADJUDGED AND DECREED, that J. Edward Aldred, Esq., be, and he is hereby, appointed Receiver of all and singular the property, real and personal, equitable interests, contracts, things in action, effects, moneys, receipts, earnings, rights, privileges, franchises, and immunities, of every kind and description, of the defendant McCall Ferry Power Company, wheresoever situated, to hold the same as the officer of and subject to the order of this Court, with all the powers, rights and duties of receivers in like cases, and with the powers, rights and duties herein set forth.

Said Receiver shall forthwith enter upon and take possession of all and singular the said property, real and personal, equitable interests, contracts, things in action, effects, moneys, receipts, earnings, rights, privileges, franchises and immunities, and have, hold, use preserve, manage, exercise and enjoy the same, acting in all things subject to the supervision of the Court.

The defendant McCall Ferry Power Company and its officers, directors, agents and employees, and all persons and corporations are hereby required and commanded forthwith to turn over and deliver to the said Receiver, or his duly constituted representative, all of the property of the defendant, including all books of account, vouchers, papers, deeds, contracts, bills, notes, accounts, money or other property of said Company in its or their hands, or under its or their hands, or under its or their control, wheresoever situated, and they and each of them, and all persons or corporations whatsoever are hereby enjoined and restrained from interfering with any of the property of the defendant, or from transferring, selling or disposing of the same except to said Receiver, or from taking possession of and levying upon , or attempting to sell, either by judicial process or otherwise, any of said property, or from interfering or intermeddling with said Receiver in any manner in the possession, control, management and use of said property.

Said Receiver is further directed to pay the wages and salaries, if any, due to the clerks, agents and employees of the defendant, accruing since the 1st. day of July, 1909, and is hereby invested with full power at his discretion to employ and discharge and fix and pay the compensation of all such counsel, managers, agents and employees as may be required for the proper discharge of the duties of his trust, and to pay allcurrent expense incident to the creation, and administration of this trust and to the preservation of the property and business hereby entrusted to him.

Said Receiver is hereby authorized to collect by suit or otherwise, and receive all income from the said property, and all debts due the defendant of every kind, and to institute and prosecute all such suits as he may deem necessary to recover and protect the property and trust hereby invested in him, and to defend all actions instituted against him as such Receiver, and also to appear in and conduct the prosecution or the defense of any suits wherein the defendant may be a party.

Said Receiver shall cause to be kept just, full and true accounts of his receipts and disbursements, and shall report his doings to this Court with such account from time to time, and said Receiver may apply to this Court for instructions, and for such further order or orders in respect to his actions as said Receiver may from time to time deem necessary or advisable.

Said Receiver shall within ten days from the date hereof, or within such further time as may be allowed by the Court for this purpose, make and file with the Clerk of this Court, a proper bond, with sufficient surety, or sureties, to be approved by a Judge of this Court, in the penal sum of $50,000-, conditioned for the faithful performance of his duties as such Receiver, and that he will in all respects obey the order of this Court as such Receiver.

Said Receiver, and any party to this cause, may at any time apply to the Court for further decree in the cause.

Dated, July 17, 1909.

Geo. Gray

Circuit Judge.

Contract With Empire Engineering Corporation for Additional Construction

THIS MEMORANDUM OF AGREEMENT, made this 16 day of August, 1909, between J. M. ALDRED, as Receiver in the suit below named, (hereinafter called the Receiver), and THE EMPIRE ENGINEERING CORPORATION, a corporation organized under the laws of the State of New York, and having an office at 60 Wall Street, New York City, (hereinafter called the Corporation),

WITNESSETH, That WHEREAS said J. M. Aldred was appointed Receiver of all the property of the McCall Ferry Power Company by an order entered in the Circuit Court of the United States for the Eastern District of Pennsylvania, on the 17th day of July, 1909, in a suit entitled Knickerbocker Trust Company vs. McCall Ferry Power Company, and

WHEREAS it is the intention of the Receiver to continue the work of construction on the hydro-electric development of the McCall Ferry Power Company, near McCall Ferry, Pennsylvania, doing the work in the most economical manner possible, and completing the main dam, ice spillway, fishway, deflecting dam, power-house substructure, power-house superstructure, and such other work as may be necessary to put the plant in shape for the installation of hydraulic and electric equipment of a capacity of fifty thousand horse power, but leaving unfinished the other portions of the development; and

WHEREAS the Receiver desires to obtain the services of the Corporation in connection with the work of construction;

NOW, THEREFORE, in consideration of the payments and agreements herein described, IT IS MUTUALLY AGREED:

-3-

(1) The Receiver agrees to employ, and hereby does employ, the Corporation as engineers and supervisors of construction of the work on said hydro-electric development, and the Corporation agrees to accept such employment and duly and faithfully perform the duties appertaining thereto.

(2) The Corporation is to carry out such part of the necessary work as may be ordered by the Receiver, in accordance with plans and specifications to be approved by the Corporation. For the purpose of doing this work, the Corporation is to give the Receiver the benefit of the services of the general officers of the Corporation, and is to permit to work thereon, at the expense of the Receiver, as many of the original force of the McCall Ferry Power Company, now employed by the Corporation, as may be deemed necessary by the Receiver. It is further understood and agreed that in view of the fact that Mr. Beverly R. Value, now acting as Executive Engineer of the Corporation, was formerly connected with the work of the McCall Ferry Power Company on said development, and is familiar with the plans therefor, said Value is to give to the work covered by this agreement his constant attention and such personal attendance at McCall Ferry as may be necessary to insure the completion of the work in a substantial and workmanlike manner.

(3) Subject to the approval of the Receiver as to the men and the compensation to be paid them, the Corporation is to employ all the force to carry on the work, except such men as may be required in the accounting and paymaster's department, who are to be employed by the Receiver. The Receiver is to pay for all labor and services, except for the services of the President, Vice-

President, Executive Engineer and Secretary and Treasurer of the Corporation. The Receiver is to furnish and pay for all material and supplies.

(4) For all services to be performed under this agreement in connection with work to the amount of $600,000, the Receiver is to pay to the Corporation the sum of $ 0,000, payable on or before the 15th day of each month in installments equal to ten per cent. of the cost of the work done during the preceding calendar month, except as hereinafter stated. If the Receiver shall request the Corporation to perform like services in connection with work involving a greater cost than $600,000, the Corporation is to receive a commission of eight per cent. on the cost of the additional work. The cost of the work, for the purpose of ascertaining the compensation of the Corporation, is to be considered as including the cost of the material and labor as above described, and is not to include the salary of any officer of the Corporation. The Receiver is to furnish all the plant and money required to carry out the undertaking. The Receiver agrees that if less than $600,000 worth of work is performed, the compensation of the Corporation is to be $60,000, unless this agreement is terminated as in the sixth paragraph provided.

(5) It is further agreed that the Corporation is to be responsible for the completion in a substantial and workmanlike manner of all work to be supervised or done by it.

(6) Upon any neglect or failure on the part of the Corporation diligently and promptly to carry out the terms of this agreement according to the true intent and

meaning thereof, the Receiver is to have the right to terminate the agreement on thirty days' notice, and both parties shall thereupon, at the expiration of such thirty days, be relieved from further obligations hereunder, except that moneys theretofore earned by the Corporation but not paid shall thereupon be paid to it forthwith.

(7) It is understood that it is the intention that the property of the McCall Ferry Power Company is upon foreclosure to be vested in a new corporation, and it is intended that the obligations of this agreement on the part of the Receiver shall be taken over by such new corporation, and it is agreed that the Corporation will accept such new corporation in the place and stead of the Receiver and discharge the Receiver from liability hereunder; subject, however, to the understanding that the new corporation shall be of adequate financial ability to carry out the provisions hereof.

(8) It is further understood and agreed that the Receiver is about to apply for leave of court to enter upon the work of construction herein described, and for authority to make this agreement, and that until such leave be obtained this contract shall not be binding upon either party, but shall thereupon become binding and in full force and effect.

IN WITNESS WHEREOF this instrument has been execu-

ted by the parties hereto the day and year first above written.

Receiver as aforesaid.

THE EMPIRE ENGINEERING CORPORATION

By

President

Attest:

Secretary.

MEMORANDUM OF AGREEMENT made this 22nd day of July, 1910, by and between PENNSYLVANIA WATER & POWER COMPANY party of the first part, hereinafter called the Power Company, and the EMPIRE ENGINEERING CORPORATION, party of the second part, hereinafter called the Corporation.

WITNESSETH that WHEREAS a contract dated August 16, 1909, between J. E. Aldred, Receiver of the McCalls Ferry Power Company and the Empire Engineering Corporation, is in existence; and

WHEREAS it is therein provided as follows:

"It is understood that it is the intention that the property of the McCall Ferry Power Company is upon foreclosure to be vested in a new corporation, and it is intended that the obligations of this agreement on the part of the Receiver shall be taken over by such new corporation, and it is agreed that the Corporation will accept such new corporation in the place and stead of the Receiver and discharge the Receiver from liability hereunder; subject, however, to the understanding that the new corporation shall be of adequate financial ability to carry out the provisions hereof;and

WHEREAS a new Company by the name of Pennsylvania Water & Power Company has been formed under the laws of the State of Pennsylvania and has taken over all the property of the McCall Ferry Power Company and has assumed the carrying out of the provisions of the said contract.

Now for divers good and valuable considerations moving from each party hereto to the other party hereto, it is agreed first, that the Power Company assumes all the covenants contained in said contract, to be performed on the part of the said J. E. Aldred, Receiver, and agrees to make

all payments required by the said contract, to be made by the said J. E. Aldred, Receiver; second, that the Corporation assents to the assignment of the said contract by the said J. E. Aldred, Receiver to the Power Company, and agrees as between it and the Power Company to perform the said contract in every particular and abide by each and every of the provisions thereof binding upon it.

IN WITNESS WHEREOF the parties hereto have executed this agreement the day and year first above written.

Agreement for Deposit of Bonds With Trustee to Secure Loans to Bondholders Committee

AGREEMENT, made the 8th day of September, nineteen hundred and nine, between WILLIAM M. BARNUM, A. C. BEDFORD, S. READING BERTRON, CHARLES A. COFFIN and GARDINER M. LANE, as the Committee named in the "McCall Ferry Power Company Plan and Agreement" dated May 28th, 1909, (hereinafter called the Committee,) and KNICKERBOCKER TRUST COMPANY, a corporation of New York, hereinafter called the Trustee.

WHEREAS, the Committee, in order to borrow money for purposes authorized in and by said Plan and Agreement, has determined to execute and issue a series of notes, limited in amount as hereinafter provided, and to secure the same as provided herein; and

WHEREAS, said notes are to be payable either to bearer or to the registered holder, and the notes payable to bearer are to be in substantially the following form:

[FORM OF BEARER'S NOTE.]

No..... $.....

FOR VALUE RECEIVED, William M. Barnum, A. C. Bedford, S. Reading Bertron, Charles A. Coffin and Gardiner M. Lane, as the Committee named in the "McCall Ferry Power Company Plan and Agreement" dated May 28, 1909, but not individually, promise to pay to bearer dollars ($) with interest at five per cent. (5%) per annum from date until paid, at the office of the Knickerbocker Trust Company, in the City of New York, on the first day of

January, 1910, subject to the provisions as to extension of time of payment in the Trust Agreement hereinafter mentioned.

This note is one of a series of notes issued under a certain Trust Agreement between said Committee and the Knickerbocker Trust Company, dated the 8th day of September, 1909, and is subject to all the terms and provisions thereof.

This note shall not be binding until the certificate hereunder shall be signed by said Trustee.

Witness the signatures of a majority of said Committee, the day of , 1909.

and the notes payable to the registered holder are to be in substantially the same form except that they are to be payable to the registered holder instead of to bearer, the name of the registered holder and any transfers to be noted on the back thereof;

and each of said notes is to bear thereon a certificate signed by the Trustee in form as follows:

[FORM OF TRUSTEE'S CERTIFICATE.]

This is one of the notes described in the Trust Agreement above mentioned.

KNICKERBOCKER TRUST COMPANY,
Trustee,

By

and the amount of principal of each note is to be five hundred dollars ($500) or a multiple thereof.

NOW, THEREFORE, THIS AGREEMENT WITNESSETH: That in order to secure the payment of said notes and the in-

terest thereon and to declare the terms and conditions on which said notes are to be issued, received and held, the parties hereto, in consideration of the premises and of One Dollar to each paid, receipt whereof is acknowledged, hereby agree and provide as follows:

ARTICLE I.

The Committee hereby assign and transfer to the Trustee the bonds of the McCall Ferry Power Company, secured by mortgage to Knickerbocker Trust Company, dated June 15, 1905, which are delivered to the Trustee herewith, being bonds for the principal sum in the aggregate of Eight million five hundred thousand dollars ($8,500,000), and also any further such bonds or other securities which the Committee may hereafter deliver to the Trustee to be received hereunder (said bonds and other securities being hereafter referred to as "the collateral"); the same to be held by the Trustee, its successors and assigns, in trust for the benefit of the holders of said notes and to secure the payment thereof without preference of any of said notes over any other, upon and subject to the following terms and conditions:

ARTICLE II.

Said notes, at any time or times, shall be certified and delivered by the Trustee upon and according to the written order of a majority of the Committee; provided that the aggregate amount of the principal of such notes at any time outstanding shall not exceed twenty per cent. of the principal of the bonds of the McCall Ferry Power Company, described as aforesaid, delivered to and held by the Trustee hereunder.

Upon receipt by the Committee and the Trustee of

evidence satisfactory to them of the loss or destruction of any outstanding note secured hereby, and of indemnity satisfactory to them, the Committee may execute and the Trustee shall certify and deliver a new note of like tenor.

If the holder of any note shall demand of the Committee that there be substituted therefor several notes for the same aggregate principal, the principal of each to be $500 or some multiple thereof, such substitution shall be made by the execution, certification and delivery of such new notes and cancellation of such old note.

ARTICLE III.

If the Committee shall use any money received for or upon any notes issued hereunder to make advances for purposes of construction to the Receiver who now holds the property of the McCal' Ferry Power Company, and shall receive from said Receiver certificates or evidences of indebtedness for such advances, such certificates or evidences of indebtedness shall forthwith be transferred and delivered to the Trustee hereunder and be deemed part of the collateral. If further bonds of the McCall Ferry Power Company shall be deposited under said Plan and Agreement and shall in such way or in any other way come within the control of the Committee so that they may do so, the Committee shall forthwith transfer and deliver the same to the Trustee to be held as part of the collateral.

ARTICLE IV.

The Committee reserves and may continue to exercise the right and power to speak for and as the owners of bonds and of any receiver's certificates or evidences of indebtedness which are or may hereafter be delivered and held hereunder in suits pending or which may be brought

upon, or under or in respect to the mortgage securing said bonds, and the right and power to use the same in making payments on account of the purchase price in case the Committee or its representative or representatives shall purchase the property of the McCall Ferry Power Company or any part or parts thereof at any sale made under said mortgage, or under judgment or decree based thereon, and generally all rights and powers given them in and by said Plan and Agreement (except only the power to further pledge said bonds while any notes secured hereby shall remain unpaid), so far as may be necessary to carry out the purposes of said Plan and Agreement, and the Trustee shall deliver said bonds, and receiver's certificates or evidences of indebtedness or any of them, to or according to the written order of a majority of the Committee, whenever a majority of the Committee shall deliver to the Trustee a certificate in writing, signed by them, that such delivery is necessary in order to carry out such purposes; it being understood that so long as any notes secured hereunder shall be unpaid, the Committee shall hold whatever it may acquire by any use of such bonds or receiver's certificates or evidences of indebtedness in trust charged primarily, in the stead thereof, to secure such notes, and shall as soon as reasonably may be transfer to the Trustee to become part of the collateral hereunder whatever it may so acquire.

ARTICLE V.

If default shall be made in the payment of principal or interest of any of said notes, the Trustee, if requested in writing by the holders of any of them so to do, shall, by such officer or officers, agent or agents as it may appoint, sell the collateral or such part or parts

thereof as it shall deem necessary or proper to discharge said notes and interest thereon and all charges hereunder, without demand of payment or notice, except as hereinafter provided. The collateral may be so sold at one or more times and in one or more lots, and any such sale shall be made at public auction after advertisement for not less than twenty days in two daily papers published in the City of New York.

Notice of its intention to make any such sale, stating the time and place, shall be mailed by the Trustee at least ten (10) days before the date of sale, in the City of New York, in a post-paid wrapper, addressed to William M. Barnum, Chairman, at 62 Cedar Street, New York City, or at such other address as the Committee may have given to the Trustee for the purpose. The Trustee shall not, however, be obliged to make any sale pursuant to such notice. The Trustee may adjourn any sale in whole or in part and proceed according to such adjournment without further notice; or the Trustee may discontinue or abandon any sale in whole or in part, giving notice as aforesaid of further intended sales. At any such sale the Trustee or the holder or holders of any of the notes hereby secured may purchase any or all of the collateral then sold and may hold the same thereafter absolutely and free from any claims of the Committee. After deducting all expenses of or incidental to the sale and other charges of the Trustee, the Trustee shall apply the proceeds, with any cash held by it hereunder, to the payment of said notes, principal and interest, without preference as between them; and shall account for and pay over and deliver to the Committee, its successors or assigns, the surplus, if any, and any of the collateral, remaining after said notes shall have been paid in full.

ARTICLE VI.

It is agreed, and to this every holder of notes issued hereunder assents, by accepting said notes respectively, that the time for the payment of all said notes shall, if neither of the events hereinafter in this Article stated shall have occurred before January 1, 1910, be extended so that said notes shall not be deemed to be due or payable until either (1) the New Company provided for in said Plan and Agreement shall have been formed and vested with the properties of the McCall Ferry Power Company as proposed in said Plan and Agreement, or (2) sale of such properties under judgment or decree based upon the mortgage securing said bonds, to a purchaser or purchasers other than the Committee or its representatives, shall have been duly confirmed and consummated by payment of the purchase price therefor.

It is agreed also, and to this every holder of notes issued hereunder in like manner assents, that the members of the Committee individually shall not be liable upon or with respect to said notes, but that said notes and this agreement shall bind the Committee only as such Committee with respect to their powers and duties under said Plan and Agreement.

ARTICLE VII.

The Trustee need not take notice of any default hereunder, unless specifically notified thereof in writing by one or more holders of notes hereby secured. It shall not be liable or responsible with respect to its acts or omissions hereunder except for its own gross negligence or wilful default, nor be liable or responsible for any acts or omissions of the Committee hereunder or of any agent, attorney or employee by the Trustee employed

hereunder, if selected with reasonable care. It shall be under no obligation to take any proceedings to enforce this agreement or protect the interests of the noteholders hereunder, unless it shall have been indemnified to its satisfaction in respect thereof. It makes no representations as to the validity of this agreement or of the notes secured hereby nor as to the validity or value of the collateral, and is not responsible for any recital herein or in said notes. The Committee shall pay to the Trustee reasonable compensation and shall pay all expenses incurred by the Trustee hereunder, including all legal expenses; and for such compensation and expenses the Trustee shall have a first lien upon the collateral.

The Trustee may rely upon the certificate of a majority of the Committee as to the existence of any fact which the Trustee may desire to determine hereunder, or as to the necessity of any action under the Plan and Agreement; the Trustee shall be under no responsibility to see to the use or application of said notes, or any of them, or of the proceeds thereof. The Trustee may resign by delivering to the Committee notice of such resignation and by publishing such notice twice a week, for three successive weeks, in *The New York Times*. In case of any vacancy in the office of Trustee, the Committee may appoint a new Trustee, a trust company in the City of New York, and upon such appointment shall publish notice thereof, twice a week, for three successive weeks, in *The New York Times*.

9

IN WITNESS WHEREOF, the said Committee has caused these presents to be executed in its behalf by a majority of its members, and the Trustee has caused these presents to be signed by its Vice President and its corporate seal to be hereunto affixed and attested by its Secretary, the day and year first above written.

Minutes of Pennsylvania Water & Power Company, March 3, 1910

A WALLM. PRESIDENT,
L RINTOUL, VICE PRESIDENT
A ALLNER, VICE PRESIDENT

J E O'CONNOR, TREASURER
F J ALLEN, SECRETARY

Pennsylvania Water & Power Company
Lexington Building
Baltimore, Md.

40 Wall Street
New York, N. Y.
July 8, 1940

I, F. J. Allen, Secretary of the Pennsylvania Water & Power Company, do hereby certify that the attached is a copy of extracts from the Minutes of a meeting of the Board of Directors of this Company, duly called and held on March 3, 1910, at which a quorum was present and voted throughout.

F. J. Allen
Secretary

Henry L. Perry
Witness

A meeting of the directors of the Pennsylvania Water & Power Company was held at the office of the Company No. 24 Exchange Place, New York City on March 3rd, 1910, at 2 o'clock P.M.

There were present: Messrs Aldred, Canby Dow Kelly and Spence and also the secretary and treasurer of the company.

A call and waiver of notice of the meeting signed by all of the directors, was produced, and on motion, duly seconded, was ordered spread upon the minutes of the meeting. The following is a copy thereof:

Pennsylvania Water & Power Company.
Call and Waiver of Meeting of Directors.

A meeting of the directors of the Pennsylvania Water & Power Company a corporation of Pennsylvania is hereby called to be held at No. 24 Exchange Place, in the City of New York on the 3rd day of March, 1910, at two o'clock in the afternoon, and the undersigned hereby waive notice of such meeting.

Dated, Feb. 24th, 1910.

J. Marriott Canby
Frank C. McCune, Jr.
Fayette B. Dow
John H. Kelly
Kenneth M. Spence
J.E. Aldred

The president reported that a certificate of the actual increase of the indebtedness of the corporation to $7,580,000 had been filed in the office of the Secretary of the Commonwealth of Pennsylvania on February 4, 1910.

The president further reported that the stockholders, by a resolution adopted at a special meeting held on February 3, 1910, had changed the par value of the shares into which the capital stock of the company is divided, from the par value of fifty dollars per share to the par value of one hundred dollars per shares and that a certificate of such change has been filed in the office of the Secretary of the Commonwealth on February 4, 1910.

The president further reported that pursuant to

the action of the stockholders in respect to the par value of the stock, all the outstanding stock certificates of the company, to-wit, certificates for 169,900 shares of the par value of fifty dollars each, had been called in and cancelled, and that in exchange therefor certificates for 84,950 shares of the par value of one hundred dollars each had been duly issued.

The president further reported that the corporation had been duly registered in the office of the Auditor General of the Commonwealth of Pennsylvania.

There was submitted to the Board a letter, dated March 3, 1910, from the Committee under the McCall Ferry Power Company Plan and Agreement, with an account attached thereto. Said letter was ordered spread upon the minutes of this meeting. The following is a copy thereof:

March 3, 1910.

Pennsylvania Water & Power Company,
24 Exchange Place,
City.

Gentlemen:

Referring to the transactions, including the written contract, between yourselves and this Committee on January 13th, 1910, this Committee now submits its account, hereto attached, showing the disposition of all moneys received by it to date and showing a balance in hand of $85,719.39. Of this balance a check to your order for $62,658.30 is enclosed, being a further payment on account and part performance of said contract of January 13th, 1910. Said account shows that this Committee advanced to J. E. Aldred, while he was in possession, as Receiver, of the property conveyed to you on January 13th, 1910, $600,000, to be expended by him. Mr. Aldred submits an account, dated March 3, 1910, and enclosed herewith, to yourselves and this Committee, of his expenditures of said advances, together with a letter of this date throwing light in the matter and setting forth certain other transactions. This Committee approves said account and the transactions shown thereby, and has requested Mr. Aldred to pay directly to you the balance shown by said account as a further payment on account and part performance of said contract of January 13th, 1910.

Of the bonds and stock received by this Committee from you - the stock now being represented by voting trust certificates therefor - this Committee has placed with the depositaries for delivery to the depositors under the Plan and Agreement of McCall Ferry Power Company, $3,330,000.00 in aggregate principal of the bonds and $4,995,000.00 in aggregate par value of such Voting Trust Certificates. Arrangements have been made by Mr. Aldred calling for the purchase of an aggregate of $4,170,000.00 of said bonds and $3,300,000.00 of said voting trust certificates, at the price of ninety and accrued interest of the bonds. Several instalments of purchase price have been paid, and have been the source from which this Committee obtained its funds, and partial deliveries of bonds and voting trust certificates have been made against these payments. As further instalments are paid, this Committee will be in receipt of further moneys to be paid over as provided in said contract of January 13th, 1910.

Eighty of said bonds and the balance of $23,961.09 now remaining in the hands of this Committee will be retained by the Committee for future accounting.

The Plan and Agreement provides that the amount of this Committee's compensation shall be subject to the approval of the board of directors of the New Company. The amount of this compensation appears in said account submitted herewith, and approval thereof is asked accordingly.

The Susquehanna Contracting Company notes mentioned in said account were secured by seven hundred and two (702) McCall Ferry Power Company bonds mentioned in the Plan and Agreement as being outstanding in pledge and to be discharged from pledge and cancelled. These bonds will be so cancelled and turned over to you, this Committee having taken said bonds and the Conowingo Land Company mortgage hereinafter mentioned in payment of said notes.

Said notes were also secured by a mortgage on the property of the Conowingo Land Company for $25,000 principal and by pledge of the equity in a certain deposit of $250,000 with the Knickerbocker Trust Company, with which you are

familiar. The said deposit has been discharged from the lien of said notes and a declaration of trust is delivered to you herewith, showing that said Conowingo Land Company mortgage is held for you.

Very truly yours,
Reorganization Committee, McCall Ferry Power Company
By Wm. M. Barnum,
Chairman.

McCall Ferry Power Company Reorganization Committee.
Summary Cash Statement.

Receipts		Expenditures	
Proceeds of Committee's Notes	$1,100,000.00.	Payment of Committee's Notes, principal and interest	$1,103,763.88.

	$3,107,405.50.		$3,107,405.50.

Dated, March 1st, 1910.

(There was also enclosed with this letter a copy of the same account of J. E. Aldred with the Bondholders' Committee, dated Dec. 31, 1909, which was enclosed with Mr. Aldred's letter to the Company, and which is copied below.)

On motion, ~~duly~~ seconded, it was

Resolved, that the account attached to said letter and the transactions shown thereby (and by said letter, including the compensation paid to said Committee, be and the same are hereby approved, and that receipt of the sum of $62,658.30, and of the declaration of trust showing the holding of the Enowings mortgage for this Company be and the same are hereby acknowledged, and that the secretary of this Company be directed to furnish to said Committee a certified copy of this resolution.

There were submitted to the Board a letter dated March 3, 1910, from J. E. Aldred to this Company, and the account of expenditures made by him of the moneys advanced to him by the said Committee, which account is mentioned in said letter and in the letter to this Company from the Committee heretofore ordered spread upon the minutes of this meeting.

Said letter was ordered spread upon the minutes of this meeting. The following is a copy thereof:

March 3rd, 1910.

Pennsylvania Water & Power Company,

Gentlemen:

While the foreclosure suits which resulted in the formation of your Company were pending and while I, through arrangements with the Reorganization Committee, was carrying forward the construction at considerable practical risk (inasmuch as no lien superior to that of the mortgage bonds could be had for the money expended) matters and situations were met with which could not strictly be dealt with appropriately by the Committee, or by me as Receiver, or as part of the construction work carried on as just mentioned. These were of two classes: (1) Settlements and right-of-way purchases for the Columbia and Port Deposit Railway Company necessary to carry out the contract for change of track location and to release for the benefit of your company the large equity in the

fund of $250,000 deposited to secure the performance of that contract; (2) acquisition of bonds of McCall Ferry Power Company.

It was obvious that the settlements and right-of-way purchases could be made much more advantageously while the outcome of the reorganization was not generally known to be assured than if postponed until after the actual existence of your company. In order to avail of these advantages and also to avoid the serious and costly delay in the foreclosure that would have resulted if one at least of these settlements had not been made, I proceeded, with the approval of the Committee as to the wisdom of each transaction, to make these settlements and purchases, taking whatever risk there may be of your company not adopting them and assuming the outlays and liabilities along with the acquisitions and advantages thereof. These right of way purchases and settlements were, in detail, as follows:

John H. Kiemeng for land deeded to Columbia and Port Deposit Railway Company was paid $12,000.

The arrangement made with Paul Heine was as follows: For land deeded to Columbia and Port Deposit Railway Company by him and others he received $20,000 in cash, and it was agreed that he should receive $15,000 in bonds and $10,000 in stock of the new company the bonds to carry interest from September 1, 1909. On October 13, 1909, I advanced him $12,000, and on December 31st, $3,000, constituting a loan on the security of said bonds and stock, he having the right to purchase the bonds and stock at any time within two years from October 13, 1909, upon payment of $15,000 with interest at 5% from October 13, 1909. There was a further expense of $75.00 in this matter.

In connection with the foregoing right-of-way acquisitions it was necessary to give, and I did give as Receiver, the following deeds:

Oct. 6, 1909, deed to York Furnace, Airville & Red Lion Railroad Company of right-of-way over property formerly of the Company in Lower Chanceford to bridge of York Furnace Bridge Company.

Oct. 6, 1909, deed to York Furnace Bridge Company of right to erect bridge.

H. S. Kerbaugh, Inc. had a judgment against the McCall Ferry Power Company for $66,587.64, and had suit pending against the Company for a further amount of $363,495 and interest. There was no dispute that the amount of the judgment was due to said Kerbaugh Company. The judgment had become a lien on the McCall Ferry Power Company's property and the claims was made on behalf of the Kerbaugh Company that the deposit of $250,000 with the Knickerbocker Trust Company, mentioned above, could be held for the protection of this claim. I settled the claims of said Kerbaugh Company in full by paying to it the sum of $35,051.17 and agreeing to deliver, or cause to be delivered, to said Company $28,000 of bonds and $14,200 of stock of the new company upon payment by said Kerbaugh Company, at any time within a year from January 1, 1916, of $35,000, with interest at 5% from October 6, 1909.

Thus my total expenditures in the foregoing settlements and right-of-way purchases have been $82,126.17.

Before the final decree of foreclosure opportunities arose to acquire all of the sixty six bonds of the McCall Ferry Power Company which had not been deposited under the Plans. I was advised that the deposit of all these bonds would surely simplify and shorten materially the remaining legal proceedings and might obviate serious delays therein which could result from litigious opposition, and would also obviate organized cooperation of the holders of these bonds in forcing the Committee to pay a high price at the sale - such a cooperation finding instigation in the fact that large sums had been expended in carrying on construction pending the foreclosure without the protection of any lien - which I was advised could not be obtained. Finally I considered the aggregate price paid for these bonds to be probably below rather than above what might be expected to be the fair value of the equivalent new securities at, or soon after, their issue.

Accordingly, I purchased said sixty-six bonds at an aggregate cost of $49,044.60. In connection with one of the purchases it became important

to retain Mr. M. H. Houseman, an attorney for two years for a retainer of $2,500.00. This I did, and hand you herewith the letter containing the terms of this retainer. I also made with Mr. Houseman the arrangement with respect to a possible further small payment for a certain lot of six bonds, set forth in the enclosed letter from me to him, dated December 4th, 1909.

An approximate estimate of interest at five per cent. in connection with the foregoing payments is $1,222.60.

All the foregoing I did with the intention of offering to turn over and make available all thereof to this Company as soon as it should be in a position to act thereon, without any profit or advantage to myself, the Company to assume and make good my outlays and obligations as above set forth. This offer I now make, it being understood that the offer is not divisible—all must be taken and assumed or none.

There is also submitted to you herewith an account showing my disbursements for and in connection with construction of the total of $600,000 advanced to me by the Committee, and the Committee, as I understand, writes stating its approval of this account and that it has requested me to pay over to you the balance shown thereby. I also submit all the contracts (shown on schedule to said account) which I have made for or in connection with construction, and I ask your approval of said account and your adoption and assumption of said contracts, whereupon I shall pay over to you the balance of $134,888.77 shown by said account.

Very truly yours,

J. E. Aldred

Mr. J. E. Aldred,
54 Exchange Place, City.

Dear Sir.

This is to acknowledge receipt of $2500.00 paid me as a retainer for legal services to be hereafter rendered in and about matters within the states of Maryland and Pennsylvania; it being understood that you are to have a call in my service during a term of two years from date, on the condition that for such time as I may give in connection with work which may be allotted to me by you, I shall be paid a further consideration of $25 per day during the time of such service. In this connection I beg to say, inasmuch as you might call upon me at times when I might be engaged in other works it is understood that the services to be rendered to you will require to fit in with my other engagements.

Yours very truly,
M. H. Houseman.

December 4, 1909.

M. H. Houseman, Esq.
11 Pine St. City.

Dear Sir.

In reference to the $6,000.00 of first mortgage bonds of the McCall Ferry Power Company now in the hands of Frank Gosnell, Esq. Trustee, Baltimore, Maryland, which bonds you heretofore deposited with the said Gosnell, Trustee, to secure an obligation on your part of $6,000.00:

It is hereby understood that these bonds are to be sold to satisfy said obligation and it is agreed in case I should purchase these bonds at either Public or Private Sale, for less than

their par value, and in which case the said Gosnell may hold you liable for your obligation up to the full amount of $6,000.00, in that event I agree upon such purchase by me of said bonds to reimburse you to the extent of your obligation to said Gosnell. But in the event that you satisfy your said obligation for a less amount than the $6,000.00, I will divide with you the amount of the difference between $6,000.00 and the total amount necessary to satisfy the said obligation.

Yours very truly,
J. E. Aldred.

On motion, duly seconded and unanimously adopted, except that Mr. Aldred did not vote, it was

Resolved, that the offer of Mr. Aldred to this Company stated in said letter be and the same is hereby accepted, and that this Company take over and adopt and avail of the settlements, purchases and transactions set forth in said letter as made by Mr. Aldred in the expectation of making his said offer in respect thereto, and that this Company forthwith pay to Mr. Aldred the sum of $134,888.77 expended by him as shown in said letter, and assume and fully perform and carry out all of the obligations of Mr. Aldred as shown by said letter; and

Further Resolved, that the said account of expenditures made by Mr. Aldred of moneys advanced to him by said Committee and the transactions shown thereby be and the same are hereby approved, and receipt is hereby acknowledged from Mr. Aldred of the balance shown by said account, and

Further Resolved, that the contracts made in connection with construction shown on the schedule attached to said account and all thereof be and the same are hereby adopted and assumed by this Company, and that the secretary of this Company be and he is hereby directed to furnish to Mr. Aldred a certified copy of these resolutions.

Report of Foreclosure Sale

UNITED STATES CIRCUIT COURT

FOR THE EASTERN DISTRICT OF PENNSYLVANIA.

KNICKERBOCKER TRUST COMPANY, Complainant,	)	On Bill to Foreclose. IN EQUITY.
vs.	)	
MC. CALL FERRY POWER COMPANY, Defendant.	)	Apl. Sess. 1909. No. 329.

In pursuance of a decree made by the said Court in the above stated cause and bearing date the Twelfth day of October 1909, by which it was, among other things, ordered, adjudged and decreed that all the property, both real and personal, owned by the McCall Ferry Power Company wheresoever situated and every part and parcel thereof, including all the property particularly described in said decree as subject to the lien of the mortgage or deed of trust, in said decree recited, should be sold together as an entirety by or under the direction of the undersig ned, who was appointed Special Master, for that purpose, at public auction at the front door of the County Court House in the City of Lancaster, in the County of Lancaster, in the Eastern District of Pennsylvania, and that the Special Master should give notice of the time and place of said sale by publication of a notice of such sale, containing a brief general description of the property to be sold, to be published once in each week for at least six successive weeks prior to such sale in one newspaper in each of the cities of New York, Boston, Phil adelphia, Baltimore and Lancaster; and that after such sale shall have been made, the Master should report the same to the Court for confirmation.

I, Henry P. Brown, Master as aforesaid, do hereby report to the said Circuit Court that I advertised the public sale of all and singular the said mortgaged property and the premises specifically described in said decree, at the front door of the County Court House in the City of Lancaster, in the County of Lancaster, in the Eastern District of Pennsylvania, on Tuesday, the 7th, day of December, 1909, at 12 o'clock, M., as follows; by causing a notice thereof containing a brief description of the property to be sold, to be published once in each week for six successive weeks prior to the said sale, on the foll owing dates, to-wit; on October 26th, 1909, November 2nd, 1909, November 9th, 1909, November 16th, 1909, November 23rd, 1909, November 30th, 1909 and December 7th, 1909, (with the exception that the last insertion of the said notice was published in the Boston Transcript, on the 6th, day of December 1909, instead of on the 7th, day of December, 1909), in each of the following papers, to-wit:

The Public Ledger, a daily newspaper printed, published, regularly issued and having a general circulation in the City of Philadelphia, State of Pennsylvania.

The Sun, a daily newspaper printed, published, regularly issued and having a general circulation in the City of Baltimore, State of Maryland.

The Examiner, a daily newspaper printed, published, regularly issued and having a general circulation in the City of Lancaster, State of Pennsylvania.

The Transcript, a daily newspaper printed, published, regularly issued and having a general circulation in the City of Boston, State of Massachusetts.

The Times, a daily newspaper printed, published,

regularly issued and having a general circulation in the City of New York, State of New York.

(A copy of the said notice and of the proof of publication thereof are attached hereto, marked Exhibits "A" and "B" respectively).

And I further return, certify and report that on the Seventh day of December, 1909, the day on which the said premises were so advertised to be sold as aforesaid, I, as said Master, attended at the time and place fixed for said sale and exposed said properties and premises for sale, at public sale, to the highest bidder, upon the terms and conditions in said decree and in said notice stated, and William M. Barnum then and there bidding the sum of Two Million Dollars, ($2,000,000.), and no one bidding so much or more for the same, the said property and premises were struck off and sold to the said William M. Barnum at the price aforesaid.

I do further report that in accordance with the conditions of sale the said purchaser has paid to me as Special Master, the sum of Ten thousand Dollars ($10,000.), and has deposited with me as Special Master, the sum of Two hundred thousand Dollars ($200,000.), in principal amount of bonds of the McCall Ferry Power Company, secured by the mortgage described in said decree, with all coupons from December 15th, 1908, inclusive, attached thereto.

I do further report that the said purchaser has signed an acknowledgment of his purchase.

Respectfully submitted this seventeenth day of December 1909.

Order of Court Confirming Foreclosure Sale

(McC J.P.Co.-v3)

CIRCUIT COURT OF THE UNITED STATES

FOR THE EASTERN DISTRICT OF PENNSYLVANIA.

IN EQUITY.

KNICKERBOCKER TRUST COMPANY,
Complainant.

vs.

McCALL FERRY POWER COMPANY,
Defendant.

This cause coming on to be further heard on the report of sale filed this day by Henry P. Brown, Esq., Special Master, and upon the motion of the Complainant to confirm the sale described in said report, and it appearing to the Court that the defendant did not within ten days after the entry of the decree of foreclosure and sale in this cause, or at any time thereafter, pay, or cause to be paid, into the Registry of this Court the sums required by said decree of foreclosure and sale to be paid by the defendant, or any part thereof, and it appearing from said report that such sale was conducted and held, and notice thereof was given, in all respects in accordance with said decree of foreclosure and sale, and that the amount bid at said sale and reported by the Special Master, to wit, the

sum of Two million dollars, bid by William M. Barnum, was the highest and best bid for the property, rights and franchises ordered to be sold by the Special Master, and it appearing from said report that the purchaser duly paid to the Special Master, as provided in said decree of foreclosure and sale, the sum of Ten thousand Dollars ($10,000), and further deposited with the Special Master Two hundred thousand Dollars ($200,000) in principal amount of bonds of the McCall Ferry Power Company, secured by the mortgage described in said decree of foreclosure and sale, with all coupons due on and after December 15, 1908, and the defendant having waived the right to file exceptions to the said report of the Special Master, and no cause being shown against said report, or against the granting of the motion of the Complainant to confirm the sale, and the Court having heard John G. Johnson, Esq., of counsel for the Complainant, and Loring C. Christie, Esq., of Winthrop & Stimson, of counsel for the Defendant, and Thomas M. Day, Esq., of counsel for the Purchaser,

Now, on motion of the counsel for the Complainant, it is

ORDERED, ADJUDGED AND DECREED that the said sale be, and the same hereby is, ratified, confirmed and approved, and all the proceedings of the Special Master, as shown by said report, are approved and confirmed; and it is further

ORDERED, ADJUDGED AND DECREED that the Special Master, out of the sum of cash paid or

to be paid to him by the Purchaser, pay the costs of this cause, as taxed by the Clerk of this Court, and also the costs of the causes between the same Complainant and the same Defendant, in the Circuit Courts of the United States for the Southern District of New York, and the District of Maryland, as taxed by the Clerks of said Courts, respectively, and also the expenses of sale, as reported by the Special Master, to wit, five hundred and fourteen 71/100 dollars ($514.71), and compensation to the Special Master for his services herein, which is hereby fixed at five thousand dollars ($5,000), and also to the Complainant the amount of its disbursements made and obligations incurred as Trustee, including payments and obligations for the service of its solicitors and counsel herein and in said causes in the said Circuit Courts for the Southern District of New York and District of Maryland, as compensation to the Complainant, all of these items together amounting to the sum of eight thousand five hundred and eight 10/100 dollars ($8,509.10), to which aforesaid allowances no objection is made by the Defendant or by the Purchaser; and it appearing to the Court that the sum of Ten thousand dollars ($10,000), heretofore paid by the Purchaser is not sufficient for the payment of the amounts above provided, it is further

ORDERED, ADJUDGED AND DECREED that the Purchaser pay to the Special Master the further sum of five thousand dollars ($5,000) in cash or by a certified check upon some responsible bank, and the counsel for the Purchaser making it known to the court that the Purchaser is the holder of all of the bonds of the Defendant

secured by the mortgage described in the decree of foreclosure and sale, to wit, 9,027 bonds of the principal amount of One thousand dollars each, and all the coupons appurtenant thereto, which matured or are to mature, on and after December 15, 1908 (including the two hundred bonds and the coupons annexed thereto, heretofore deposited with the Special Master, as shown by his report), and offering in behalf of the Purchaser all of the said bonds and coupons as further payment of the purchase money, that is to say, offering as such payment the amounts which may hereafter be found herein to be distributable upon said bonds and coupons, such amounts to be deemed as paid thereon and said bonds and coupons to be stamped to show such payments and then to be returned to the Purchaser, it is further

ORDERED, ADJUDGED AND DECREED that the said bonds not so deposited, to wit, eight thousand eight hundred and twenty seven (8,827) bonds, for the aggregate principal amount of eight million eight hundred and twenty-seven thousand dollars ($8,827,000), together with all the coupons appurtenant thereto which matured or are to mature on and after December 15, 1908, be delivered by the Purchaser to the Special Master, and that said bonds and coupons together with the bonds and coupons already deposited with the Special Master as aforesaid, be accepted in further payment or the purchase money not already paid in cash, or hereinbefore required to be paid in cash at the sum of the amounts which may be found herein to be distributable upon said bonds and coupons, and in full payment of such purchase money, ex-

cept as the court may require further payment after settlement of the accounts of the Receiver, and the Special Master is hereby directed to retain possession of said bonds and coupons, until by further order the court shall instruct him as to the stamping thereof as aforesaid; and it appearing to the court that the portion of the purchase money necessary to be paid in cash, in addition to the sum of Ten thousand dollars already paid, and the sum hereinbefore required to be paid by the Purchaser, cannot be precisely ascertained and determined until the Receiver herein appointed shall have made report of his receipts and disbursements, and his accounts shall have been passed upon, it is further

ORDERED, ADJUDGED AND DECREED that after the payment by the Purchaser to the Special Master of the said sum of five thousand dollars ($5,000) in cash, and the delivery by the Purchaser to the Special Master of the said eight thousand eight hundred and twenty-seven (8,827) bonds, together with the said coupons appurtenant thereto, upon demand of the Purchaser or his assigns, the Special Master shall make, execute, acknowledge and deliver to the Purchaser or his assigns, a deed or deeds duly conveying, assigning and transferring to him or them in fee simple all and singu lar the property, rights and franchises sold as aforesaid, and all the right, title and interest at law or in equity of the parties to this suit, of, in or to the same, or any part thereof, but said deed or deeds shall be made subject to the provisions of the decree of the Court of Common Pleas of Dauphin County, Pennsylvania, entered on the 14th day of January, 1907, in a certain

provements or repairs as they shall deem expedient, and to make such contracts in regard thereto as the New Company might make if already organized and in operation; and to cause the provisions of said Plan in respect to a voting trust and voting trust certificates to be carried out;

and generally to exercise all the powers of owners and holders of said bonds and stock, including power to vote at any meeting of bondholders, creditors or stockholders, and to use the same as the Committee may deem expedient in carrying out said Plan; the statement of particular powers herein not to limit the Committee from or in the exercise of any power which, in their judgment, may be desirable in accomplishing the purposes of said Plan and Agreement; nor shall the Committee be restricted in or in respect to dealing, under any of its powers, with or in respect to any property, security or indebtedness, by reason of any interest in any thereof of any member of the Committee or of any firm or corporation in which a member is interested; it being expressly agreed by all Depositors that the methods to be adopted for carrying out said Plan and Agreement are to be determined from time to time by the Committee in their sole discretion, and that the Committee shall have the right at any time to change any such determination should their judgment be changed by subsequent developments.

FOURTH.—Whatever shall be acquired in any way by the Committee under this agreement shall be acquired by them as joint tenants, and not as tenants in common, so as to remain the property of the said Committee, however the members thereof may be changed. The members of the Committee shall have reasonable compensation for their services from this time in carrying out said Plan, the amount of such compensation, however, to be subject to the approval of the Board of Directors of the New Company. Any member of the Committee may become a party hereto as a Depositor. Any member of the Committee may resign by writing addressed to the Committee. By appointment in writing signed by a majority of the Committee, additional members thereof may be appointed, and vacancies therein, occurring by death, resignation or otherwise, may be filled. The Committee may act by a majority thereof either at a meeting or in writing without a meeting. Any member may vote or act by proxy appointed in writing, who may be another member of the Committee or any other person approved by a majority of the Committee. No member of the Committee shall be liable for the act or omission of another member, nor shall the Committee or any member thereof, or either of the Depositaries be liable for the act or omission of any agent or employe selected in good faith, or in any case except for its or his own willful misconduct.

FIFTH.—The Committee may construe this agreement, including said Plan, and their construction thereof, or action thereunder, in good faith, shall be final and conclusive; they shall have power to determine, and to act according to their judgment in, all matters not specifically provided for herein but within the general purpose set out in said Plan, and shall also have power to modify said Plan in any matter of detail not affecting the substantial rights of the other parties hereto.

SIXTH.—Holders of bonds or bonds and preferred stock of the McCall Power Company may become parties hereto at any time on or before July 1st, 1909, or such later date or dates as the Committee may fix, by signing this agreement, which it is understood may be signed in any number of parts, or by depositing, or causing the deposit of, their bonds or bonds and stock without such signing as above provided.

SEVENTH.—The Committee shall not be required to take any action in the interest of any of the stock de-

suit in equity between the Commonwealth of Pennsylvania, Complainant, and the McCall Ferry Power Company and others, Defendants, and this Court reserves jurisdiction over and a lien upon said property to compel and secure the payment of such further sum as it may hereafter direct to be paid by the purchaser to complete payment of the purchase price, with the right to resell the same, or any part thereof, if such payment shall not be made within twenty days after order of this Court directing such payment, and it is further

ORDERED, ADJUDGED AND DECREED that after the delivery of said deed or deeds, the parties to this cause, and the Receiver appointed herein, are hereby required and directed to surrender and deliver possession of all and singular the property, rights and franchises so sold as aforesaid to the said Purchaser, or his assigns, upon the presentation of the said deed or deeds and demand made for such possession, provided, however, that said Receiver shall retain any money in his hands until, after his report shall have been made and passed upon, the court shall make further order with respect thereto, and it is further

ORDERED, ADJUDGED AND DECREED that the Complainant and the Defendant shall make, execute, acknowledge and deliver to the Purchaser or his assigns, a deed or deeds of conveyance, assignment and transfer, executed by them respectively, by way of confirmation and further assurance of title, to the Purchaser or his assigns, conveying and transferring to him or

them all the estate, right, title and interest of each of said companies, of in or to the property, rights and franchises sold as aforesaid, including all debts, claims and demands owing to the McCall Ferry Power Company, now or hereafter to become due; all choses in possession and in action, absolute or upon condition, vested or contingent, and all other property, real and personal, owned by the McCall Ferry Power Company; and that they and each of them shall execute such other instruments and do such acts as may be necessary or proper on their parts respectively to enable the Purchaser or his assigns to get possession of all property sold as aforesaid and to enforce any of the debts, claims, demands and choses in action so sold and hereinbefore mentioned; and it is further

ORDERED, ADJUDGED AND DECREED that said deed of the complainant operate as a full and complete execution of the power of sale contained in said mortgage or deed of trust, and that no covenant be implied therein as against the complainant; and it is further

ORDERED, ADJUDGED AND DECREED that the Receiver herein, after surrendering possesion to the Purchaser or his assigns, as hereinbefore required, shall with all convenient speed make and file with the Clerk of this Court his final report of his doings as Receiver in this cause; and such report shall stand as approved as of course in case each of the parties to this cause by their solicitors shall file with the Clerk of this Court either a written approval or a waiver of the

right to except or object to said report or in case no written exception or objection to said report shall have been filed with said Clerk within ten days after the filing of said report; but if within such time any exceptions or objections shall have been so filed, then it is hereby referred to Henry P. Brown, Esq., who is hereby appointed Special Master for that purpose, to examine the report of said Receiver, and all accounts filed therewith, and take such testimony as may be offered in respect thereof and to report to the Court his conclusions with respect to the question raised by such exception or objection.

IT IS FURTHER ORDERED, ADJUDGED AND DECREED that all questions as to further payments to be made by the Purchaser, and as to the proceeds of sale and the distribution thereof, and the acts and accounts of said Receiver and the compensation to be allowed for his services and the services of his counsel, and as to the disposition of any money remaining in his hands not heretofore or hereby disposed of, are reserved, and that any party to this action, or the Special Master, or the Receiver, or the Purchaser or his assigns, may apply to the Court for such other or further directions as may be necessary, at the foot of this decree.

Dated the 18th day of December, 1909.

JAMES B. HOLLAND,
Judge.

Minutes of Organization of Pennsylvania Water & Power Company, January 13, 1910

J. E. O'CONNOR, TREASURER
F. J. ALLEN, SECRETARY

Pennsylvania Water & Power Company

Lexington Building

Baltimore, Md.

40 Wall Street,
New York, N. Y.
July 8, 1940

I, F. J. Allen, Secretary of the Pennsylvania Water & Power Company, do hereby certify that the attached are full and complete copies of the Minutes of (1) the organization meeting, (2) a meeting of the Board of Directors, and (3) a meeting of the stockholders of this Company, all duly called and held on January 13, 1910, at which quorums were present and voted throughout.

F. J. Allen
Secretary

Witness

Pennsylvania Water & Power Company.

Record of Organization Meeting.

At a meeting held at Room No. 228 in the Land Title Building, corner of Broad Street and Chestnut Street, Philadelphia, Pa., on January 13, 1910, at 3.30 o'clock P. M., after due publication of notice thereof according to law, there were present, Messrs. William M. Barnum, A. C. Bedford, S. Reading Bertron, Charles A. Coffin and Gardiner M. Lane, being all the persons for or on whose account the material, rolling stock, property and franchises of the McCall Ferry Power Company were purchased at the sale thereof made December 7th, 1909, in the City of Lancaster, Pennsylvania.

Mr. Barnum was chosen Chairman and Mr. J. H. Kelly Secretary of the meeting.

The Chairman reported that the material, rolling stock, property and franchises of said McCall Ferry Power Company were sold at the City of Lancaster, Pennsylvania, on the 7th day of December, 1909, under and by virtue of the decree of the Circuit Court of the United States for the Eastern District of Pennsylvania, made October 12, 1909, in a suit entitled Knickerbocker Trust Company vs. McCall Ferry Power Company, and under and by virtue of the decree of the Circuit Court of the United States for the Southern District of New York made on the 15th day of October, 1909, in a suit between the same parties, and under and by virtue of a decree of the Circuit Court of the United States for the District of Maryland made on the 20th day of October, 1909, in a suit between the same parties. The Chairman further reported that, pursuant to the authority given to him by William M. Barnum, A. C. Bedford, S. Reading Bertron, Charles A. Coffin and Gardiner M. Lane, as Committee under the McCall Ferry Power Company Plan and Agreement dated May 28th, 1909, he had purchased the material, rolling stock, property and franchises of McCall Ferry Power Company so sold for and on account of the said Committee, and that a deed of said property and franchises to him by Henry P. Brown, Special Master, dated January 13, 1910, had been delivered to him on said

date and prior to this meeting, and that prior to this meeting he had executed and delivered a deed conveying said property and franchises to said Committee.

A copy of said Plan and Agreement was ordered spread on the minutes of this meeting. The following is a copy thereof:

McCALL FERRY POWER COMPANY,

PLAN AND AGREEMENT.

Agreement, made this 28th day of May, 1909, between WILLIAM M. BARNUM, A. C. BEDFORD, S. READING BERTRON, CHARLES A. COFFIN, and GARDINER M. LANE (hereinafter called the Committee), and the holders of first mortgage bonds and preferred stock of McCall Ferry Power Company becoming parties hereto (hereinafter called Depositors).

WHEREAS, additional funds are required to complete for operation the plant now of the McCall Ferry Power Company, and the Committee has prepared the following:

PLAN.

1. A new company—the term "New Company" being used herein to mean either the present company or any other that may be used—is to be vested with the properties of the present company and with cash as hereinafter stated, and will have authorized bonds and stock as follows: Thirty-Year First Mortgage Five Per Cent. Gold Bonds, $12,500,000; Stock, all of one class, $8,500,000; of which bonds at least $4,920,000 are to be in the treasury of the New Company after the Plan is carried out.

2. The holders of the bonds of the present company who become parties to this Plan and Agreement and perform the obligations thereof will receive in exchange for their present bonds 40% of the principal thereof in such bonds and 60% of such principal in negotiable voting trust certificates for such stock of the New Company, all such new stock to be deposited under a voting trust terminating November 1, 1912, when the voting trust certifi-

cates will be exchangeable for the stock—the voting trust to provide for three voting trustees, two to be nominated by those furnishing the new money, and one by the Committee, and their successors to be nominated in the same interests respectively.

3. From $4,170,000 to $4,250,000 of such bonds, and $3,500,000 of such stock of the New Company are to be for sale at a price to realize 90 per cent. of the principal of the bonds.

4. The disposition of the securities of the New Company, in accordance with the foregoing, is indicated in the following table:

Parties.	*Bonds.*	*Stock.*
To those furnishing the new money ($3,753,000. at least)	$4,170,000	$3,500,000
To holders of the present bonds ($3,325,000)* 40% in new bonds and 60% in new stock	3,330,000	4,996,000
	$7,500,000	$8,496,000

* Certain additional bonds outstanding in pledge are not included, as they will be discharged from pledge and cancelled in carrying out said Plan and Agreement.

5. The Committee may cause fractional scrip to be issued to those entitled to fractional amounts of bonds or stock.

NOW, THEREFORE, THIS INDENTURE WITNESSETH:

FIRST.—William M. Barnum, A. C. Bedford, S. Reading Bertron, Charles A. Coffin and Gardiner M. Lane agree to act as the Committee.

SECOND.—All holders of bonds or of bonds and preferred stock of the McCall Ferry Power Company, becoming parties hereto, hereby assent to said Plan and agree to forthwith deposit, or cause the deposit of, their bonds and preferred stock with the Knickerbocker Trust Company, No. 66 Broadway, New York, or with the City Trust Company, No. 50 State Street, Boston (hereinafter called the "Depositaries"), it being understood that the receiving Depositary shall, upon such deposit, issue Certificate or Certificates of Deposit evidencing the same, which Certificates shall be transferable, and shall entitle the holder to receive new securities in accordance with said Plan, or to receive back the bonds and stock deposited, as hereinafter provided. All certificates for stock shall be properly endorsed in blank for transfer. The mere deposit of any bonds or bonds and stock with one of the Depositaries shall operate to make the depositor a party to this agreement, and shall, operate as a transfer of the bonds and stock so deposited to the Committee or its successors, and shall empower the Committee to exercise all the powers herein given.—

THIRD.—The holders of said bonds or bonds and stock, parties hereto, hereby severally vest in said Committee, under the terms of this agreement, as trustee of an express trust, the legal title to all bonds and stock deposited or caused or agreed to be deposited by them respectively and give the Committee full power to do all things in the Committee's judgment necessary or proper to carry out said Plan, including power:

(*a*) at their discretion to acquire, or not to acquire, at public or private sale or otherwise the whole or any part of the properties of the McCall Ferry Power Company, including any on which it holds options, and to use deposited bonds, or any thereof, or any other resources, in such purchase or acquisition;

(*b*) to act for the Depositors in presenting coupons for payment, in requesting or instructing or otherwise moving the trustee under the mortgage securing said bonds with respect to action thereunder, and also to act for them in or in re-

spect to any action which may be brought for the foreclosure of said mortgage or in any other action which may be brought which in any way affects or may affect the rights and interests of the Depositors; to receive and receipt for any money to which said bonds or stock shall be at any time entitled; to execute and deliver any requests, consents, waivers or other writings—including consents to issuing Receivers' Certificates prior, or not, in lien—which it may seem to the Committee necessary or desirable to file in any Court or office or with the Trustee under said mortgage or elsewhere;

(c) to employ such agents, attorneys and counsel as the Committee deem best, to represent and act for, or authorize representation of and action for, the Depositors, or any of them, in any Court or elsewhere, with respect to all rights and interests in any way affecting said bonds or stock;

(d) so far as deemed expedient by the Committee, to contract, or otherwise provide, for the purchase, compromise, adjustment or payment, in full or in part, of any indebtedness of the McCall Ferry Power Company, or of any Receiver's certificates that may be liens on any of the mortgaged property, or for the extension of any such indebtedness as the obligation of the New Company, or for the redemption from pledge of any property or securities directly or indirectly belonging to said McCall Ferry Power Company;

(e) to sell, contract for the sale of, or otherwise dispose of, any new bonds and stock not required for the Depositors or reserved for the treasury under said Plan, and to contract for underwriting with respect thereto, and, in connection with any such contract for underwriting, to pay a reasonable commission therefor; any member or members of the Committee, or any persons or corporations who may be associated with or represented by them, to have the right to join in any such sale or contract;

(f) to borrow money in order to raise any cash required to pay the expenses of the Committee or to make any cash payment required upon any foreclosure or other sale, or to carry on any construction or other work, or purchase any property deemed necessary, or to enable the Committee to do any of the other things which they may be authorized to do, or generally for any purpose which the Committee may deem necessary or expedient in order to carry out said Plan; the Committee being hereby expressly authorized to pledge for the repayment of any or all sums so borrowed, any or all of the deposited bonds or stock, and any or all assets acquired by them, and any or all of the bonds or stock of the New Company received by them under said Plan and not specifically appropriated by the Plan or taken by the parties entitled thereto; but no Depositor shall be liable personally for or upon any debt of the Committee;

(g) to cause the new Company to be organized in such manner and with such powers as the committee may deem proper, or to adapt and use an existing company as such "New Company" and to fix the terms of its bonds and the mortgage securing the same, subject to the provisions of said Plan; to determine all questions pertaining to the management, operation or disposition of any property acquired by them until the New Company shall be organized and in possession and control of said property; to make such construction, im-

posited hereunder, nor shall it be under any obligation whatever to any holder of bonds or stock not a party to this agreement.

EIGHTH.—In case the Committee should at any time decide that it is not, for any reason, to the interest of the Depositors to carry out the said Plan, they may either

(1) declare this agreement terminated, in which case all bonds and stock deposited hereunder shall be delivered and transferred to the several holders of Certificates of Deposit upon surrender of said Certificates, and upon payment of their due proportion of the obligations already incurred, to be determined by the Committee; or

(2) file a new agreement with the Depositaries, mail a copy of the same in a postpaid wrapper to each Depositor to the address, if any, filed with either of the Depositaries, or, if no such address has been so filed, then to the address last known to the Committee, whereupon the Depositors shall have the right, within twenty days after the copies of such new agreement shall have been so mailed, to withdraw their bonds and stock upon payment of their due proportion of the obligations already incurred, to be determined by the Committee, and in the event of failure to so withdraw within such twenty days, every Depositor so failing shall be deemed to have assented to and ratified such new agreement, and such assent and ratification shall be deemed final and irrevocable.

NINTH.—In case the Committee shall deem it desirable or proper to give any notice to the Depositors or any of them, such notice shall be deemed to have been given if mailed in writing to such Depositors at the addresses, if any, filed in writing with a Depositary for the purpose; or when no such address has been so filed, then to the address last known to the Committee.

TENTH.—Acceptance of new bonds and stock by any Depositor shall estop such Depositor from questioning the conformity thereof, as to character or otherwise, to any provision of this Plan and Agreement.

ELEVENTH.—After the reorganization shall have been completed, and all debts and liabilities incurred in connection therewith shall have been paid or discharged, all moneys, securities and other property not used or required for any of the purposes herein authorized and remaining in the hands of the Committee, are to be transferred to, or held for the benefit of, the New Company, under appropriate agreements for the protection and indemnity of the Committee.

TWELFTH.—Originals of this agreement are to be lodged with said Knickerbocker Trust Company of the City of New York, and with said City Trust Company of Boston, where they may be inspected by Depositors. This instrument may be signed in several parts with the same effect as if all signatures were hereon.

Upon transfer of any Certificate of Deposit the transferee shall succeed to all the rights of the prior holder and be subject to all the provisions hereof. The word "Depositors" herein includes the holders of record of the Certificates of Deposit issued hereunder outstanding at the time in question. The Committee and the Depositaries may treat the holder of record of each Certificate of Deposit as the absolute owner thereof.

The Depositaries shall severally hold and dispose of, subject to the order of a majority of the Committee, the bonds and certificates of stock deposited with it, and, in acting as Depositaries hereunder, act respectively as agents for, and are answerable to, the Committee alone.

A writing signed by a majority of the Committe shall be sufficient evidence to the Depositaries of an action of the Committee stated therein.

IN WITNESS WHEREOF, the parties of the first par (members of said Committee) have hereunto signed their names, and the various depositors, parties of the second part, have hereunto signed their names and written opposite thereto the amount of bonds and stock deposited by them, respectively, or have deposited, or caused the deposit of, their bonds and stock, the day and year first above written.

WILLIAM M. BARNUM,
A. C. BEDFORD,
S. READING BERTRON,
CHARLES A. COFFIN,
GARDINER M. LANE.

(7)

Said deeds were produced, and, on motion, duly seconded, it was ordered that the same be marked for identification and filed.

The Chairman further reported that this meeting had been called and notice thereof published as aforesaid, pursuant to the statutes of Pennsylvania applicable to such sale and purchase and constituting a corporation of the persons for or on whose account such property and franchises were purchased, for the purpose, as stated in the public notice thereof, of organizing the new corporation by electing a president and board of six directors, adopting a corporate name and common seal, and determining the amount of the capital stock of the corporation, and also to determine as to making and issuing certificates therefor, and as to issuing bonds, and also to transact any other business which may properly and lawfully be acted upon by the meeting.

The meeting proceeded to the election of a president. Mr. J. E. Aldred was nominated for president. A ballot was taken and Mr. J. E. Aldred was unanimously elected president of the corporation constituted as aforesaid, to continue in office until the first Monday in May, 1910.

The meeting proceeded to elect a board of six directors to continue in office until the first Monday in May, 1910. A ballot was taken and the following were unanimously elected directors of the corporation so constituted, to serve until the first Monday in May, 1910: J. Edward Aldred, of New York, W. Marriott

Canby, of Philadelphia, Fayette B. Dow, of New York, John H. Kelly, of New York, Frank C. McCown Jr., of Philadelphia, and Kenneth M. Spence, of New York.

On motion, duly seconded and unanimously carried, it was

Resolved that the name Pennsylvania Water & Power Company be and the same hereby is adopted as the corporate name of said corporation.

On motion, duly seconded it was

Resolved that a common seal containing the following words: Pennsylvania Water & Power Company, Seal be adopted as the corporate common seal of said corporation. Such a seal was produced and here follows an impression thereof:

The following resolution was thereupon adopted:

Resolved that this corporation accepts the provisions of the Constitution of Pennsylvania, adopted December 16, 1873, including Article 16 of said Constitution, and the President and Secretary are hereby authorized and directed to make, under the seal of the corporation, and to file in the office of the Secretary of the Commonwealth, the certificate required by law for the purpose aforesaid.

On motion, duly seconded and unanimously carried, it was

Resolved that the amount of the capital stock of said corporation be and the same hereby is determined to be $8,500,000, to consist of 170,000 shares of $50. each.

On motions, duly seconded and unanimously carried it was

Resolved that there shall be duly executed, made, issued and delivered by said corporation to the said purchasers, namely, to the said persons present at this meeting and constituting the Committee aforesaid, $7,580,000 in aggregate principal amount of bonds of said corporation, to be dated January 13th, 1910, payable on the first day of January, 1911, and to bear interest

from January 1st, 1910, at the rate of 5% per annum, and certificate or certificates for 169,900 shares of $50 each of the capital stock of said corporation, such issues and deliveries to be made in consideration of the conveyance and transfer to said corporation of all the property and franchises so purchased and to represent the interest of said purchasers therein, and also in consideration of the agreement of said Committee with said corporation to carry out, in favor of said corporation, the provisions of the paragraph numbered Eleventh of the aforesaid Plan and Agreement, dated May 28, 1909, reading as follows:

> "Eleventh: After the reorganization shall have been completed, and all debts and liabilities incurred in connection therewith shall have been paid or discharged, all moneys, securities and other property not used or required for any of the purposes herein authorized and remaining in the hands of the Committee, are to be transferred to, or held for the benefit of, the New Company, under appropriate agreements for the protection and indemnity of the Committee."

such agreement to be conditioned upon said Company's lawfully making a mortgage to secure an authorized bond issue of $12,500,000 of Thirty Year First Mortgage Five Per Cent. Gold Bonds in accordance with the terms and provisions of said Plan and Agreement and exchanging bonds secured thereby, par for par, with the bonds so hereby directed to be issued and delivered, and such agreement to further provide that, in case it shall be desirable to fully carry out said agreement when some instalments of purchase price for bonds which have been contracted to be sold shall not yet be due, such agreement may be so performed in respect to such unmatured instalments by turning over or making available to said corporation all such contracts for the sale of bonds, together with the bonds and voting trust certificates necessary for delivery thereunder, so that said corporation shall be entitled to all such further instalments of purchase price as they fall due, and such agreement to provide further that, upon the same being so fully carried out, said corporation shall assume and agree to carry out all agreements made by said Committee acting under said Plan and Agreement and not then fully performed or provided for.

A form of such stock certificate was submitted, of which the following is a copy:

On motion, duly seconded, it was

Resolved that the stock certificates of such corporation be substantially in the form so submitted until the form thereof shall be lawfully changed.

A form for the bond or bonds so to be issued and delivered was submitted, of which the following is

NO. $

UNITED STATES OF AMERICA

Pennsylvania Water & Power Company

FIVE PER CENT. ONE YEAR GOLD BOND

For Value Received, PENNSYLVANIA WATER & POWER COMPANY promises to pay to bearer, or, in case this bond be registered, to the registered owner hereof, ... dollars in gold coin of the United States of America of the present standard, at its office or agency in the City of New York on the first day of January, in the year one thousand nine hundred and eleven, and to pay interest thereon in like coin from the first day of January, 1910, at the rate of five per centum per annum on the first days of July and January in each year until such principal shall be paid. Bonds not registered must be presented at said office for appropriate endorsement in order to obtain payment of interest thereon.

This bond is one of a series of bonds of like import and amount, the aggregate principal whereof shall not exceed $7,580,000.

This bond may be registered on the books of said Company at its said office or agency and the registration noted hereon, after which no valid transfer can be made except on said books until after registered transfer to bearer.

In Witness Whereof, said PENNSYLVANIA WATER & POWER COMPANY has caused its corporate seal to be affixed hereto, attested by its Secretary, and these presents to be signed by its President this day of January, one thousand nine hundred and ten.

.....
President.

Attest: .....
Secretary.

On motion, duly seconded, it was

Resolved that the bonds so to be issued and delivered be substantially in said form.

On motion, duly seconded and unanimously carried, it was

Resolved that such bonds and certificates of stock be so delivered forthwith upon delivery of the deed by the purchasers aforesaid conveying to said Pennsylvania Water & Power Company the properties and franchises so purchased and the execution and delivery of the agreement between said corporation and said Committee described in the foregoing resolution.

A code of By-Laws was submitted and on motion, duly seconded and unanimously carried, said By-Laws were adopted as the By-Laws of said Pennsylvania Water & Power Company, and it was ordered that a copy thereof be spread upon the minutes. The following is a copy thereof.

By-Laws

of

Pennsylvania Water & Power Company

A Corporation of Pennsylvania.

The annual meeting of the stockholders for the election of directors shall be held at the principal office of the company in Pennsylvania, on the first Monday in May in each year after the year 1909 at three o'clock in the afternoon, or at such other hour as the Board of Directors may fix prior to notice of the meeting.

Special meetings of the stockholders shall be called by the president or secretary, upon direction of the Board of Directors, or upon direction in writing of the holders of one-fourth of the outstanding stock of the company.

2. The principal office of the company shall be in the City of Lancaster in the County of Lancaster in the Commonwealth of Pennsylvania, until lawfully changed by amendment of this by-law or otherwise, and branch office or offices of the company may be maintained in such other place or places within or without the Commonwealth of Pennsylvania as the Board of Directors may fix.

3. The secretary, or officer performing his

By-Laws adopted by Resolution of the Board of Directors at their meeting on May 4, 1910

duties shall give notice of all stockholders meetings to each stockholder of record at least ten days before the date of such meeting, but meetings may be held at any time without notice if all the stockholders are present or if notice is waived by all those not present.

4. Meetings of stockholders shall be presided over by the president, or, in his absence by a vice-president or in the absence of president and all vice-presidents by a chairman to be elected by the persons actually present at the meeting who are stockholders or proxies of stockholders, each such person to have one vote in such election. The secretary of the company shall act as secretary of such meetings, if present.

Stockholders may vote at any meeting in person or by written proxy. Holders of a majority of the issued stock of the company present either in person or by proxy, shall constitute a quorum for a stockholders' meeting, but a less number may adjourn to a later date fixed by them or without date.

As soon as may be after their election in each year the Board of Directors shall appoint two inspectors of stockholders' votes and elections, to serve until the final adjournment of the next annual stockholders' meeting. If they fail to make such appointment or if their appointees, or either of them, fail to appear at any meeting of stockholders the chairman of the meeting may appoint inspectors or an inspector to serve with the one appearing, for that meeting.

5. The directors shall have the charge and management of the property and affairs of the company. The number of directors shall be six but this number may be changed from time to time by amendment of these by-laws, without action of the stockholders. An increase of the number of directors shall be deemed to create vacancies in the board to the extent of such increase, to be filled in the manner hereinafter provided. A majority of the directors in office at the time shall be a quorum.

13

6. Vacancies in the Board of Directors may be filled until the next annual stockholders' election only by majority vote of a quorum of the Board.

7. Meetings of the Board of Directors shall be held upon the order of the Board, the Executive Committee, the president, a vice president or three directors, and may be held either within or without the State of Pennsylvania; and the secretary or officer performing his duties shall give reasonable notice of all meetings to each director, but a meeting may be held without notice immediately after the annual election, at the same place.

8. The Board of Directors may appoint an Executive Committee, to consist of the president and two directors, which committee shall have the powers of the Board of Directors when that Board is not in session. The term of office of the Executive Committee shall be the same as the term of office of the Board of Directors under which it acts. Such committee shall report to the Board and be subject to its directions, and the Board may fill vacancies therein.

9. The Board of Directors shall elect a president, one or more vice presidents, a secretary, a treasurer, and such other officers as may be required by law, or as may be deemed useful. The same person may be elected secretary and treasurer. Agents and employees may be appointed by or under the authority of the Board of Directors or Executive Committee. The term of office of all officers shall be the same as that of the Board of Directors electing them, and until their respective successors in office are elected. Vacancies of any of the offices above named may be filled by vote of a majority of a quorum of the Board. The compensation of all officers shall be fixed by the Board of Directors or the Executive Committee.

10. In addition to powers and duties conferred by law, the officers shall have such duties as usually pertain to their respective offices, and such duties and powers as may

By-Law 9 amended by Resolution of the Board of Directors adopted at their meeting of April 28, 1910

be assigned them by the Board of Directors or Executive Committee.

11. Stock of the company shall be transferable only on its books by the holder, in person or by attorney, upon surrender of the certificates therefor.

12. These by-laws may be amended or added to at any meeting of the Board of Directors, if notice of the proposed change has been sent to all the directors three days before the meeting, or if all the directors are present, or if all not present assent in writing to such change.

13. Any notice required by these by-laws shall be sufficiently given if addressed to the person to be notified and mailed or delivered to his residence, place of business or last known address at or within the time prescribed; and waiver of any such notice by the person to be notified shall be deemed equivalent to due and timely notice to him.

By-Laws 1 to 13 amended & re-enacted Stockholders Meeting Feb 10 1910

The meeting thereupon adjourned to meet again at 4.15 p m of the same day at the same place.

J. H. Kelly
Secy of meeting

A meeting of the directors of the Pennsylvania Water & Power Company was held at room 228 in the Land Title Building, corner of Chestnut Street and Broad Street in the City of Philadelphia, on the 13th day of January 1910, at 3.50 o'clock in the afternoon.

There were present: J. E. Aldred, W. Marriott Canby, John H. Kelly and Frank C. McCown, Jr.

The President, Mr. J. E. Aldred, presided.

A call of this meeting and waiver of notice signed by all the directors was read and ordered spread upon the minutes. The following is a copy thereof:

Pennsylvania Water & Power Company.

Call and Waiver of First Meeting of Directors.

A meeting of the directors of the Pennsylvania Water & Power Company, a corporation of Pennsylvania,

14

15

is hereby called to be held at Room 228 in the Land Title Building, in the City of Philadelphia, on the 13th day of January, 1910, at 2.50 o'clock P. M., and the undersigned hereby waive notice of such meeting.

Dated, Philadelphia, January 13, 1910.

Fayette B. Dow
Kenneth M. Spencer,
H. Marriott Canby,
Frank C. McCown, Jr.,
J. E. Aldred,
John H. Kelly.

The proceedings of a meeting of William M. Barnum, A. C. Bedford, S. R. Bertron, Charles A. Coffin and Gardiner M. Lane, held at 3.30 p.m. of the same day and at the same place as the present meeting, were read.

The President stated that the election of a Secretary and a Treasurer would be in order. A ballot was taken and the following were elected, each to the office written after his name as follows: C. C. J. Clarke, Treasurer; Sherman L. Lewis, Secretary.

On motion, duly seconded and unanimously carried, it was

Resolved that there shall be duly executed, made, issued and delivered by this Company to William M. Barnum, A. C. Bedford, S. R. Bertron, Charles A. Coffin and Gardiner M. Lane, constituting the Committee under McCall Ferry Power Company Plan and Agreement dated May 28, 1909, seven million five hundred and eighty thousand dollars ($7,580,000) in aggregate principal amount of bonds of this Company, dated this day, payable on the first day of January, 1911, and to bear interest from January 1st, 1910, at the rate of five per cent. per annum, and certificates for 169,900 shares of $50 each of the capital stock of this Company, such bonds and stock to be delivered in consideration of and upon the delivery of a deed by said Committee conveying to this Company the properties and franchises formerly of the McCall Ferry Power Company sold at the foreclosure sale thereof in the City of Lancaster on the 7th day of December, 1909, and also in consideration of and upon the making and delivery between said Committee and this Company of an agreement substantially in the following form:

Agreement made the 13th day of January, 1910, between William M. Barnum, A. C. Bedford, S. Reading Berton, Charles A. Coffin and Gardner M. Dana, as a Committee as hereinafter set forth, party of the first part, and Pennsylvania Water & Power Company, a corporation of Pennsylvania, party of the second part

The said Committee, party of the first part constituted such by the McCall Ferry Power Company — Plan and Agreement, dated May 25th, 1909, a copy whereof is hereunto annexed, having caused the said Pennsylvania Water & Power Company to be reorganized and formed under the law of Pennsylvania commonly known as the Reorganization Statute to be the "New Company" mentioned in the said Plan and Agreement, and it being proposed that said Company issue bonds and stock to said Committee, in consideration for the conveyance and transfer to it of all the property and franchises formerly of the McCall Ferry Power Company sold at foreclosure sale December 7th, 1909, and purchased for or on account of said Committee, and to represent the interest of said purchasers therein, and also in consideration of the making by said Committee of this agreement with said Company

Now therefore in consideration of the premises and of the issue and delivery of such stock and bonds, and each in further consideration of the agreements of the other herein stated, said parties hereto mutually agree as follows:

Said Committee agrees to fully carry out in favor of said Company the provisions of the paragraph numbered Eleventh of said Plan and Agreement, reading as follows:

> Eleventh: After the reorganization shall have been completed, and all debts and liabilities incurred in connection therewith shall have been paid or discharged, all moneys, securities and other property not used or required for any of the purposes herein authorized and remaining in the hands of the Committee, are to be transferred to or held for the benefit of the New Company, under appropriate agreements for the protection and indemnity of the Committee

2. The foregoing agreement of said Committee, however, is made only upon the condition that said Company shall hereafter, through appropriate action of its stockholders and directors, lawfully make an issue of $13,500,000 in aggregate principal of thirty-year first mortgage five per cent. gold bonds, and make a mortgage securing the same, all in accordance with the terms and provisions of said Plan and Agreement, and shall deliver to said Committee in exchange for all the unsecured bonds so as aforesaid issued by said Company to said Committee bonds so made and secured by such mortgage, such exchange to be on the basis of one dollar of principal of such mortgage bonds for each one dollar of principal of said unsecured bonds, adjustment to be made of difference if any of accrued interest; and said Committee shall not be bound by this agreement unless the condition hereinbefore in this paragraph stated shall be fully performed within a reasonable time.

3. Said Company agrees that in case of the affirmative action of its stockholders pursuant to the requirements of law of the State of Pennsylvania, it will in all respects comply with and carry out the condition stated in the foregoing paragraph hereof.

4. Contracts having been made for the sale of mortgage bonds to be made and secured by the New Company in accordance with the provisions of said Plan and Agreement, together with Voting Trust Certificates for stock of said Company, upon which contracts instalments of purchase price have been paid in advance of the existence of such New Company or such bonds or certificates, and the remaining instalments are to fall due hereafter, it is mutually agreed by the parties hereto that in case said Committee shall desire to fully carry out and perform this agreement on its part while some instalments of purchase price under said contracts for the sale of bonds and certificates, or any thereof, shall not yet be due, this agreement may and shall be deemed to be fully performed on the part of said Committee

in respect of unpaid instalments of such purchase price, as fully as if said Committee, having received such instalments of purchase price, had turned them over to said Company, if said Committee shall turn over or make available to said Company all such contracts for the sale of bonds and certificates, together with the bonds and certificates necessary for delivery thereunder, so that said Company shall be entitled to all further instalments of purchase price as they fall due.

5. Said Company further agrees that upon this agreement being carried out by said Committee, said Company will assume and agree to carry out and fully perform all agreements made by said Committee (other than its agreements herein contained) acting under said Plan and Agreement and not then fully performed or provided for.

This agreement, conditionally as hereinbefore provided, is binding on the members of said Committee, party of the first part, only in their capacity as members of such Committee, and not on them or any of them personally.

In Witness Whereof said parties have duly executed this agreement in duplicate the day and year first above written.

Pennsylvania Water & Power Company

(Seal) By J. E. Aldred,
President.

Attest:
Sherman L. Lewis,
Secretary.

On motion, duly seconded, it was

Resolved that the officers of this Company be and they are hereby severally authorized and directed to make and deliver an agreement with said Committee in substantially the form foregoing coincidently with the delivery to this Company of the deed by said Committee described in the last foregoing resolution.

Forms of bonds and stock certificate were submitted, and on motion, duly seconded, said forms were ordered to be marked for identification by the Secretary and filed.

On motion, duly seconded, it was

Resolved that the bonds and stock certificates

to be issued and delivered as provided in the foregoing resolutions shall be substantially in the forms so submitted, and the President Secretary and Treasurer of this Company be and each of them is hereby authorized to execute such bonds and stock certificates and deliver the same on behalf of this Company

On motion, duly seconded, it was

Resolved that this corporation accepts the provisions of the Constitution of Pennsylvania adopted December 6, 1873 including Article 16 of said Constitution; and the President and Secretary are hereby authorized and directed to make, under the seal of the corporation and to file in the office of the Secretary of the Commonwealth, the certificate required by law for the purpose aforesaid.

On motion, duly seconded, it was

Resolved that the Treasurer of this Company be and he is hereby authorized to pay forthwith to the State Treasurer of the Commonwealth of Pennsylvania the sum of $28,393.33, being the bonus tax required to be paid in respect to the authorized capital stock of this Company and that said officer be and he is hereby authorized to borrow the money necessary for this purpose from the Committee under McCall Ferry Power Company Plan and Agreement dated May 28th, 1909 and give this Company's note or other obligation therefor.

On motion, duly seconded, it was

Resolved that this corporation within one calendar month make a certificate of its organization under its common seal, attested by the signature of its President and Secretary, and duly acknowledged as the act of the corporation, specifying the date of such organization, the name adopted, the amount of capital stock and the names of its President and directors, and that the same be filed in the office of the Secretary of State of the Commonwealth of Pennsylvania.

Adjourned.

Herman Reuel
Secretary

At 4.15 p.m. of the same day the said meeting reconvened as a meeting of all the stockholders of said corporation, said William M. Barnum, A. C. Bedford, S. Reading Bertron, Charles A. Coffin and Gardiner M. Lane being present

The Chairman reported that since the former session of this meeting the directors of the Pennsylvania Water & Power Company had met and by appropriate resolutions had also authorized and directed the issue and delivery of bonds and certificates of stock of said Company as provided by this meeting at its said former session and had authorized and directed the making of the agreement by said Company with the Committee described in the resolution in that regard adopted at said former session, and that the deed from said Committee to said Company conveying the properties and franchises sold and purchased as set forth in the minutes of said former session had been delivered to said Company, and such agreement with said Committee had been mutually executed and delivered, and that bonds and stock certificates of said Company had thereupon been delivered as provided in the said resolutions adopted at said former session of this meeting.

The following resolution was thereupon adopted:

Resolved that this corporation accepts the provisions of the Constitution of Pennsylvania adopted December 16, 1873, including Article 16 of said Constitution, and the President and Secretary are hereby authorized and directed to make under the seal of the corporation, and to file in the office of the Secretary of the Commonwealth, the certificate required by law for the purpose aforesaid.

Adjourned.

Secretary

Voting Trust Agreement, Pennsylvania Water & Power Company

PENNSYLVANIA WATER & POWER COMPANY.

VOTING TRUST AGREEMENT.

AGREEMENT, made this 7th day of February, 1910, between the holders of stock of PENNSYLVANIA WATER & POWER COMPANY, a corporation of the State of Pennsylvania, who shall become parties to this agreement by signing the same (hereinafter called the "Subscribers"), parties of the first part, and J. E. ALDRED, W. M. BARNUM and C. E. F. CLARKE (hereinafter called the "Voting Trustees"), parties of the second part.

WHEREAS, each of the Subscribers represents that he is the owner of the shares of stock set opposite his signature hereto in said Pennsylvania Water & Power Company (which is hereinafter called the "Company"), and

WHEREAS, the Subscribers deem it to be to the interest of said Company and of all the stockholders therein that this agreement should be made,

NOW, THEREFORE, in consideration of the agreements herein and of the terms and provisions hereof, and of One Dollar to each of them paid, receipt whereof is acknowledged, the parties hereto provide and agree as follows:

1. Each of the Subscribers agrees that he will forthwith deposit with the Voting Trustees or with their

authorized agent, the certificate or certificates for his said shares, together with a proper and sufficient instrument duly executed for the transfer thereof to the Voting Trustees.

2. Upon deposit as aforesaid by any Subscriber of a certificate or certificates of stock hereunder, accompanied by transfer as aforesaid, the Voting Trustees will deliver or procure to be delivered to such Subscriber or upon his order their Voting Trust Certificate or Certificates for the same number of shares of stock of the Company as is represented by the certificate or certificates so deposited, which Voting Trust Certificates shall be substantially in the following form:

No. .... Shares.

PENNSYLVANIA WATER & POWER COMPANY.

VOTING STOCK CERTIFICATE.

This certifies, that on November 1, 1912,..... ..... will be entitled to receive a certificate or certificates, expressed to be fully paid, for ..... shares of $100 each of the Stock of Pennsylvania Water & Power Company, a corporation of the State of Pennsylvania, and, in the meantime, to receive payments equal to the dividends, if any, collected by the Voting Trustees hereinafter mentioned upon a like number of said shares; and until after the actual delivery of such certificates the Voting Trustees shall, in respect to any and all such stock, possess and

be entitled to exercise, except as otherwise expressly provided in the agreement hereinafter mentioned, all stockholders' rights of every kind, including the right to vote and to take part in or consent to any corporate or stockholders' action, it being expressly stipulated that no right to vote or to take part in or consent to any corporate or stockholders' action passes by or under this certificate or by or under any agreement, express or implied.

This certificate is issued under and pursuant to, and the rights of the holder are subject to and limited by, the terms and conditions of a certain agreement dated the 7th day of February, 1910, between holders of Stock of said Company and the Voting Trustees thereunder at said date, copies whereof are filed with said Company and with The New York Trust Company.

No stock certificate shall be due or deliverable hereunder before November 1, 1912, but the Voting Trustees, in their discretion, may make earlier delivery as provided in said agreement.

This certificate is transferable only on the books of the Voting Trustees by the registered holder hereof in person or by attorney according to rules established for that purpose by the Voting Trustees and on surrender hereof. Until so transferred, the Voting Trustees may treat the registered holder as owner hereof for all purposes whatsoever.

This certificate is not valid unless duly signed on behalf of the Voting Trustees by The New York Trust Company, their agent.

4

IN WITNESS WHEREOF, the Voting Trustees have caused this certificate to be signed by their duly authorized agent hereunder, this ..... day of ....., 1910.

J. E. ALDRED,
W. M. BARNUM,
C. E. F. CLARKE,
Voting Trustees.

THE NEW YORK TRUST COMPANY,
Agent,

By

.....
Assistant Secretary.

THE NEW YORK TRUST COMPANY is hereby authorized by the Voting Trustees to sign and deliver Voting Trust Certificates as aforesaid as agent of the Voting Trustees.

Said Voting Trust Certificates shall be transferable as therein provided, and not otherwise, and transfer so made of any such certificate shall vest in the transferee all rights and interests of the transferor in and under such certificate, and upon such transfer the Voting Trustees will deliver or cause to be delivered a Voting Trust Certificate or Certificates to the transferee for the same number of shares as is represented by the Voting Trust Certificate so transferred. Until such transfer the Voting Trustees may treat the registered holder of a Voting Trust Certificate as owner thereof for all purposes whatsoever.

3. The shares of stock of the Company, certificates for which shall be deposited hereunder with the Voting

Trustees, shall be vested in the Voting Trustees, and shall be transferred to the name of the Voting Trustees on the books of the Company, and until after the actual delivery of certificates for said stock to the holders of the Voting Trust Certificates, in accordance with the provisions of this agreement, the Voting Trustees shall, in respect to all stock so held by them, possess and be entitled to exercise all stockholders' rights of every kind, including the right to vote and to take part in or consent to any corporate or stockholders' action and to receive dividends on said stock, and it is expressly understood and agreed that the holders of Voting Trust Certificates shall not have any right, with respect to any such stock held by the Voting Trustees, to vote or take part in or consent to any corporate or stockholders' action of the Company.

4. The holder of each Voting Trust Certificate shall be entitled, until distribution of stock in the Company as hereinafter provided for, to receive from time to time payments equal to the dividends, if any, collected by the Voting Trustees upon the like number of shares of stock of the Company as is specified in such Voting Trust Certificate.

5. On November 1, 1912, or at such earlier date as the Voting Trustees shall in their discretion determine, the Voting Trustees shall distribute the stock of the Company held by them to the holders of the Voting Trust Certificates as follows, that is to say, they shall, upon presentation and surrender on or after such date of Voting Trust Certificates accompanied by properly executed transfers thereof to the Voting Trustees, deliver certifi-

cates of stock of the Company for the shares specified in the Voting Trust Certificates so surrendered.

6. All questions arising among the Voting Trustees shall be determined by the decision of a majority of them. The Voting Trustees may in all matters act either at a meeting or by writing with or without meeting, and the decision or act of a majority of the Voting Trustees shall in all matters, including the exercise of the voting power, be deemed the decision or act of all the Voting Trustees. In voting the stock held by them, and in any other action, meeting or proceeding, any or all of the Voting Trustees may act by proxy.

7. Any Voting Trustee may at any time resign by delivering to the other Voting Trustees his resignation in writing, and in every case of death, resignation or vacancy otherwise arising the vacancy so occurring shall be filled as follows: If such vacancy shall be in the voting trusteeship originally occupied by said J. E. Aldred, it shall be filled by appointment in writing by said C. E. F. Clarke, or his successor as voting trustee hereunder; if such vacancy shall be in the trusteeship originally occupied by said C. E. F. Clarke, it shall be filled by appointment in writing by said J. E. Aldred, or his successor as voting trustee hereunder; if such vacancy shall be in the trusteeship originally occupied by said W. M. Barnum, it shall be filled by appointment in writing by the firm of Lee, Higginson & Company, of Boston, or the successor thereof, as constituted at the time of such vacancy. Every successor so appointed shall from the time of such appointment be deemed a Voting Trustee hereunder, and have

all the estate, title, rights and powers of a Voting Trustee hereunder, and all acts and instruments shall be done and executed which shall be necessary or reasonably requested for the purpose of effecting such succession and of making the Voting Trustees as they shall exist upon such appointment the owners of record of the stock deposited as aforesaid with the Voting Trustees.

The agent of the Voting Trustees may at any time resign its duties hereunder by giving ten days' notice thereof to the Voting Trustees, and such agent may at any time be removed therefrom by a written instrument signed by at least a majority of the then Voting Trustees and delivered to the agent. In case of a vacancy in the position of agent the majority of the Voting Trustees may by writing signed by them and delivered to such successor elect a successor to the agent, which successor shall thereupon be entitled to all the rights, authority and powers hereby conferred upon the above named agent, and the agent so resigning or so removed shall thereupon deliver to such successor the stock certificates held by it hereunder, together with all books, registers and other papers pertaining or relating to said stock certificates or the Voting Trust Certificates which may from time to time be issued hereunder.

8. In voting upon said shares of stock or doing any act with respect to the control or management of the Company or its affairs, as holders of the stock deposited hereunder, the Voting Trustees shall exercise their best judgment in the interest of the Company to the end that its affairs shall be properly managed.

The Voting Trustees may vote on said stock in person or by such person or persons as they shall select as their proxy.

9. Any holder of any stock of the Company may at any time become a Subscriber hereto with respect to any such stock by subscribing this agreement and depositing the certificates of his said stock as aforesaid, accompanied by duly executed transfer thereof as above provided, and shall thereupon and thereafter be deemed and be a subscriber hereunder.

10. Any notice to be given to the holders of Voting Trust Certificates hereunder shall be sufficiently given if mailed to the registered holders of Voting Trust Certificates at the addresses furnished by such holders to the Voting Trustees or their agent.

11. No Voting Trustee shall be liable for any error of judgment or mistake of law or other mistake, or for anything save only his own wilful misconduct or gross negligence.

12. This agreement may be executed in several parts of like form, each of which, when executed, shall be deemed to be an original, and such parts shall together constitute one and the same instrument.

IN WITNESS WHEREOF, the several parties hereto have respectively signed this agreement, the day and year first above mentioned.

Voting Trustees.

Eighty-four thousand nine hundred and sixty (84,960) shares

Report of Receiver to Court

(J.E.A. Rec. 4)

Fol. 1. CIRCUIT COURT OF THE UNITED STATES
FOR THE EASTERN DISTRICT OF PENNSYLVANIA.

KNICKERBOCKER TRUST COMPANY,
Complainant,

vs. IN EQUITY.

McCALL FERRY POWER COMPANY,
Defendant.

TO THE HONORABLE JUDGES OF SAID COURT:

I, J. E. ALDRED, who was appointed Receiver of
2 the property of the defendant by an order of this Court made on the 17th day of July, 1909, respectfully report that I forthwith took possession of such property, as directed in said order, and that within ten days from the date of said order I made and filed with the Clerk of this Court a proper bond, with sufficient surety, which was approved by a Judge of this Court, in the penal sum of fifty thousand dollars, as required in said order.

I further report that Henry P. Brown, Esq., Special
3 Master, having executed and delivered a deed to William M. Barnum, the purchaser, I turned over and delivered said property (except the moneys in my hands as Receiver) to said purchaser, pursuant to the provisions of the decree of this Court, made the 18th day of December, 1909,

I further report that the moneys received and paid out by me as the Receiver of the property of the defendant appointed in this cause, and also in like causes in the

Circuit Court of the United States for the District of Maryland, and the Circuit Court of the United States for the Southern District of New York, are set forth in the statement hereto annexed and made a part hereof.

I respectfully pray the instruction of the Court as to the disposition of the moneys in my hands as Receiver, and further pray that when I shall have paid out the same as directed by the Court, I may be discharged as Receiver and my bond may be cancelled and the surety thereon released.

J. E. ALDRED
Receiver

Dated, February 18th, 1910.

STATE OF NEW YORK,)
: ss:
COUNTY OF NEW YORK,)

J. E. ALDRED, being duly sworn, says that he is the Receiver described in the foregoing report; that he has read said report and knows the contents thereof and that said report is true to the best of his knowledge, information and belief.

J. E. ALDRED

Sworn to and subscribed before me
this 18th day of February, 1910.

Louis F. Mentz
Notary Public, Kings County,
Certificate filed in New York County.

Power Contract With Consolidated Gas Electric Light and Power Company, August 29, 1910

THIS AGREEMENT made this 29th day of August 1910, by and between THE PENNSYLVANIA WATER & POWER COMPANY, a corporation organized and existing under the laws of the State of Pennsylvania, hereinafter called the "Power Company", party of the first part, and the CONSOLIDATED GAS ELECTRIC LIGHT & POWER COMPANY OF BALTIMORE, a corporation organized and existing under the laws of the State of Maryland, hereinafter called the "Electric Company", party of the second part; WITNESSETH:

WHEREAS the Power Company is engaged in the business of generating and transmitting electric power, and whereas the Electric Company is in the business of distributing and selling electric energy and desires to purchase electric energy for the said distribution and sale,

NOW, THEREFORE, the parties hereto, in consideration of the premises, and of one dollar ($1.00) and other valuable considerations, each to the other in hand paid, receipt of which is hereby mutually acknowledged, and the covenants hereinafter set forth, mutually agree as follows:-

ARTICLE 1.

Character of Service and Term.

For and during the term of ten (10) years, commencing on the first day of October, 1910, and during any extended life of this contract, effected under the provisions hereinafter set forth, the Power Company agrees to sell and supply electric energy to the Electric Company and the Electric Company agrees to purchase and pay for the same in such quantities as herein provided, and under the terms and conditions hereafter set forth. Such electric energy will be in the form of three phase, alternating current, at a frequency of twenty-five cycles per second, and at a pressure of thirteen thousand, two hundred (13,200) volts, as hereinafter provided, and hereinafter referred to

as "energy".

Provided the Power Company is ready to make delivery of the said energy on the first day of October, 1910, the Electric Company shall take and pay for the said energy from that date. It is agreed, however, that should the Power Company and the Electric Company be ready to deliver and take the energy before the above mentioned date, the energy will be delivered and take and paid for under the terms and conditions provided for herein in Article XVI.

ARTICLE II.

Amount of Energy to be Supplied.

The Electric Company agrees to take each year beginning and after twelve o'clock noon October first, 1910, and the Power Company agrees to supply, an amount of electric power equal to two-thirds (2/3) of the Electric Company's maximum peak load of the next preceding year. The Electric Company may generate the balance by steam. It is agreed that the Electric Company's peak load as of last year shall be taken as twenty thousand (20,000) kilowatts. The Electric Company for the year beginning October first, 1910, ~~will~~, therefore, take from the Power Company a maximum of thirteen thousand, three hundred and thirty-three (13,333) kilowatts. It is agreed that the amount of energy the Electric Company shall pay for and the Power Company shall supply, during the first year of this contract shall not be less than seventy million (70,000,000) kilowatt hours, subject to the conditions stated in Article V. and Article XVI. and in each year thereafter this amount shall be increased in proportion to the increase in the aforesaid peak load. This minimum amount of energy to be paid for shall be proportionately reduced, however, in case of any reduction, failure or interruption in the supply of energy.

The expression "electric power" used herein refers to the amount of electric power load used at any one time and measured in kilowatts, as distinguished

from the amount of "electric energy" used within a given period and measured in kilowatt hours.

ARTICLE III.

Rate to be Paid.

The Electric Company agrees to pay for all energy supplied under this contract at the rate of four (4) mills per kilowatt hour under the conditions provided for herein, subject to the exception stated in Article XVI.

ARTICLE IV.

Additional Energy.

The Electric Company shall have the right to take and the Power Company agrees to supply, additional amounts of power and energy under the terms and conditions herein provided, but the Power Company shall in no event be required to supply more than fifty per cent (50%) in excess of the amount of power and energy specified for the first year in Article II, that is to say, not more than twenty thousand (20,000) kilowatts and one hundred and five million (105,000,000) kilowatt hours per year.

In case the installation of additional apparatus is required to meet the demand for additional power and energy, the Power Company shall have a reasonable time in which to procure the necessary additional apparatus.

ARTICLE V.

Minimum Supply.

At times of low water the Power Company shall have the right to reduce the supply of energy to the Electric Company to a minimum in any one day of not less than fifty per cent (50%) of the pro rated daily equivalent in kilowatt hours of the amount of energy in kilowatt hours per year which the Electric Company agrees to pay for as set forth in Articles II. and IV, in which case the minimum amount of energy which the Electric Company shall be required to pay for shall be reduced accordingly.

The Power Company shall not, however, have the right to reduce the supply of energy at any time when the amount of water flow is sufficient to operate the Power Company's generating plant to its full rated capacity for twenty (20) hours per day. In case of any reduction or cessation of supply, except under the conditions hereiff stated in this Article V, or for causes beyond the control of the Power Company, the Power Company shall pay the excess cost or amount, if any, over the cost of four (4) mills per kilowatt hour for electric energy as herein provided, which the Electric Company may be put to in generating or securing a supply of energy to make up the deficiency caused by the said reduction in supply.

ARTICLE VI.

Right of Power Company to Call for Steam Power.

The Power Company shall have the right to call upon the Electric Company for energy at such times and in such amounts as the Electric Company can supply with its then existing generating and cable capacity, over and above its own distribution requirements delivered to the Power Company's hereinafter mentioned sub-station, or at the Pratt Street Station of the United Railways and Electric Company, from the Electric Company's Westport station, during the twelve (12) hours per day of regular operation of said station, and the Power Company shall pay to the Electric Company for such energy at the rate of four and one-half (4½) mills per kilowatt hour, measured at the bus-bars of the Westport station. Such energy supply may be extended to twenty-four (24) hours per day at a price to be agreed upon, which shall take into consideration the cost to the Electric Company of an extra shift of labor at the said station.

ARTICLE VII.

Transmission Lines and Point of Delivery.

The energy to be furnished by the Power Company under this contract shall be transmitted from the point or points of generation on the Susquehanna River or

elsewhere by two separate transmission circuits, (which may be carried upon the same tower line) to the Power Company's terminal sub-station at Philadelphia Road and Seventh Street, in Highlandtown adjacent to the Eastern limits of the City of Baltimore, and there transformed and delivered to the Electric Company.

It is understood that the transmission lines and said terminal sub-station, or either, herein referred to, may be owned and operated, or both, by a company or companies other than the Power Company, but controlled by the Power Company. Ownership or operation by such company or companies shall be deemed to be ownership or operation by the Power Company, and the Power Company shall be in every way responsible for the acts of such controlled company for the purposes of this agreement.

ARTICLE VIII.

Terminal Station Equipment.

The Power Company's terminal sub-station with all necessary transformers, switches, switchboard and controlling apparatus shall be erected at the sole expense of the Power Company and the Power Company shall provide a suitable automatic circuit breaking switch and such measuring and indicating instruments as may be necessary for each of the Electric Company's cables or distribution lines leaving the said sub-station, together with all necessary ducts for such cables inside the sub-station building and within the property lines of the Power Company. The Power Company shall also provide within the said sub-station sufficient space for such additional feeder switches, regulators, and transformers to be furnished by the Electric Company, as the Electric Company may require to control its feeders and transmission lines leaving the said sub-station, for which space the Electric Company shall pay to the Power Company a rental of eight (8) per cent per annum on the cost of such space, and the Power Company will also, if required, operate the Electric Company's apparatus, for which service the

Power Company shall receive reasonable compensation. The Power Company, however, will not be responsible in any manner whatsoever, for any damage or loss that may occur to the Electric Company in any manner whatsoever, because of said operation by the Power Company or by reason of the opening or closing of any switches by the Power Company at the Electric Company's request.

ARTICLE IX

Interruptions for Repairs.

In order to make necessary repairs or changes on its system, the Power Company shall have the right to temporarily discontinue the service at such time or times as may be least inconvenient to the Electric Company, and except in case of extreme emergency, at least twelve (12) hours' notice shall be given by the Power Company to the Electric Company that such discontinuance of the service is to take place.

ARTICLE X.

Measurement of Energy.

All electric energy to be supplied hereunder shall be measured by watt hour meters to be installed by the Power Company at its expense, at its said terminal sub-station. The Power Company may also install graphic meters to check the peak load measurements. Such watt hour meters or other meters shall be of an approved type and shall be placed in the thirteen thousand, two hundred (13,200) volt circuit. The Electric Company shall have the right to install its own check meters in addition to the meters installed by the Power Company, and space and structure for the said check meters shall be provided by the Power Company in its said terminal sub-station.

Said meters installed by the Power Company shall be read at noon on the first day of each calander month, for the purpose of ascertaining the kilowatt hours drawn and used during the previous month. The meters shall be tested and calibrated at suitable intervals or upon written request of either party in the presence of duly appointed representatives of both parties, and if, as the result

of such tests, any meter shall be found incorrect or inaccurate, it shall be restored to an accurate condition, or a new meter shall be substituted.

The readings of any meter tested and found to be not more than two per cent (2%) from accuracy, shall be considered correct and accurate. If, as a result of any such tests, any meter shall be found to register in excess of two per cent (2%) either above or below accuracy, then the consumption recorded by such meter since the last monthly reading previous to the request for test, shall be corrected accordingly, by one-half (½) of the percentage of inaccuracy so found, provided that this percentage is less than ten per cent (10%), but no correction shall extend back beyond thirty (30) days previous to the day on which such tests are requested, and if during such previous thirty (30) days, one or more prior tests shall have been made under the provisions hereof, then no correction shall extend back beyond the date of such prior tests. Should the error in the meter exceed ten per cent (10%) the probable consumption shall be estimated and paid for as agreed upon between the parties hereto.

ARTICLE XI.

Circuit Breakers.

The automatic circuit breakers on the Power Company's switchboards shall be set for at least fifty per cent (50%) in excess of the normal maximum load to which the Electric Company is at the time entitled.

ARTICLE XII.

Maintenance of the Electric Company's Equipment.

The Electric Company agrees to install and maintain all of its apparatus and distribution lines in first-class condition, and in case any of its apparatus which in any way affects the taking of energy from the Power Company breaks down or becomes defective, it will immediately use due diligence to repair said apparatus and operate the same. The Power Company shall assume no liability nor shall it be held responsible for any damages which may occur to the whole or any part of

the apparatus or lines of the Electric Company, or damages to life or property caused by the lines or apparatus of the Electric Company, except for such damages as may be due to the negligence of the Power Company or its employees.

ARTICLE XIII.

Insurance against Interruptions.

The Power Company agrees to exercise due care to give continuous and satisfactory service, and in the event of its generating station apparatus, or transmission lines, other than such apparatus as may be owned by the Electric Company, being destroyed or crippled by any cause whatsoever, it will immediately use due diligence to repair or replace the same so as not to interfere with the supply of energy to the Electric Company for a longer period than is absolutely necessary. To ensure against long continued interruptions in the event of accident or breakdown to the Power Company's apparatus, the Power Company shall keep in reserve in both its main Power House and in its terminal sub-station, sufficient spare capacity to take care of the breakdown of any single piece of apparatus.

ARTICLE XIV.

Unavoidable Suspension of Service.

If at any time during the continuance of the contract, the operation of the works or equipment of either party is suspended owing to war, rebellion, civil disturbances, strikes, serious epidemics, fires, lightning, or any other causes of a like nature beyond the control of either party, the party whose operations are so suspended shall not be liable to the other for damages or penalties for the time during such suspension, and the party whose operation is so interfered with shall use all reasonable diligence to resume operation.

ARTICLE XV.

Regulation of Pressure and Frequency.

M.M.M.

The Power Company agrees to maintain at the point of delivery to the Electric Company the voltage and frequency of the supply at approximately thirteen thousand, two hundred (13,200) volts and approximately twenty-five (25) cycles respectively, at all times during which the energy taken by the Electric Company does not exceed the maximum load to which the Electric Company is at that time entitled.

The Power Company agrees that the fluctuation of frequency and voltage shall not be such as to prevent the proper and effective operation of the transforming, converting and controlling apparatus owned by, and connected with the circuits of, the Electric Company. To insure such operation the Power Company shall install, operate and maintain the best and most up-to-date system of automatic regulators for its generators and if necessary, for its circuits.

For the purpose of utilizing the electric energy furnished by the Power Company, the Electric Company shall install its apparatus in accordance with good engineering practice. The said apparatus of the Electric Company shall be of such character and so operated as to maintain a practically balanced load between phases, and to draw current from the Power Company's lines at as nearly as possible to unity power factor. At no time shall the Power Factor be less than ninety per cent (90%) unless necessary for regulation purposes.

The Electric Company shall use all energy contracted for herein in a manner that will not cause undue disturbance to the Power Company's system or abnormal fluctuations in the demand for energy.

In order to insure the Electric Company against possible overloading of the aforesaid two transmission circuits and the consequent impairment of the pressure regulation, the Electric Company shall have the right to control and limit, at all times, the amount of power to be transmitted over the said transmission circuits. The Power Company shall, however, have the right to transmit over the said transmission circuits power to the extent of twenty thousand (20,000)

kilowatts for street railway operation, and shall have the right to take from the said transmission circuits, for other purposes, an amount of power not to exceed five thousand (5000) kilowatts within a distance not greater than fifteen (15) miles from the point of generation on the Susquehanna River.

ARTICLE XVI.

Special Provisions for First Three Months.

During the first three months of operation, under this contract, that is to say, until January 1st, 1911, or during such time as it is necessary to operate the Electric Company's Westport Station under experimental conditions to determine the best methods of joint operation and to insure uninterrupted supply during said period, the Electric Company shall pay for all energy furnished by the Power Company at the rate of three (3) mills per kilowatt hour, with no limitations as to the minimum amount of energy to be taken and paid for.

ARTICLE XVII.

Time of Payment for Service.

The Electric Company agrees to pay on or before the fifteenth day of each month for all energy taken from the Power Company during the prededing month. All payments shall be made without deduction for any disputed claim or counterclaim, which the Electric Company may have or claim to have against the Power Company under this contract or otherwise. All claims or counterclaims which the Electric Company may have or claim to have against the Power Company arising out of this contract, shall be presented to the Power Company in writing during the first fifteen (15) days of the following month.

ARTICLE XVIII.

Arbitration.

In the event of a difference of opinion on any question as to quantity, quality, kind, conformity with technical standards, value or cost of any service, property, matter or thing furnished, used, performed or done, or omitted to be furnished, used, performed or done in connection with this contract, the

respective parties mutually agree that any and all such questions be submitted to a Board of Arbitration consisting of three members, one to be appointed by the Power Company, one by the Electric Company, and the third to be chosen by these two. In the event of either party failing to appoint an arbitrator within (30) days after request from the other party, or in the event of a failure of the said two arbitrators to appoint a third, the said arbitrator shall be appointed by the person then occupying the position of Chief Judge of the Supreme Bench of Baltimore City. The expense of the Board of Arbitration shall be shared equally by the parties hereto.

The decision of any two of the arbitrators shall be final and binding upon the parties hereto. Such submission to and decision by said Board of any and all questions as to any of the matters aforesaid is hereby declared to be a condition precedent to the bringing of any legal action or proceedings by either party hereto on account of any matter or thing involving any such question.

ARTICLE XIX.

Renewal of Contract.

This contract shall automatically renew itself for periods each of ten (10) years duration, unless terminated by either party by written notice to the other party given at least one (1) year prior to the expiration of the period then in effect.

The provisions herein contained shall extend to and bind the parties hereto and their successors and assigns, respectively.

IN WITNESS WHEREOF the parties hereto have caused this Agreement to be executed by their proper officers thereunto duly authorized, and their

respective corporate seals to be hereunto affixed the day and year first above written.

THE PENNSYLVANIA WATER AND POWER COMPANY,

J.E. ALDRED, PRESIDENT CHARLES E.F.CLARKE, TREASURER SHERMAN L. LEWIS, SECRETARY

Pennsylvania Water & Power Company
Twenty-Four Exchange Place
New York

August 29th, 1910.

Consolidated Gas Electric Light and Power Company of Baltimore,
Continental Building,
Baltimore, Md.

Gentlemen:-

Referring to the contract entered into on the 29th day of August 1910, by and between you and this Company, we hereby give you permission to increase by ten per cent (10%) the maximum amount of electric power to be taken during the first year's period of the said contract, without increasing the minumum amount of electric energy to be taken and paid for as set forth in Article 11 of said contract. This will entitle you to fourteen thousand six hundred and sixty-six (14,666) kilowatts of electric power.

Yours very truly,

PENNSYLVANIA WATER AND POWER COMPANY.

By J. E. Aldred
President

Power Contract With United Railways and Electric Company, February 8, 1911

CONTRACT FOR ELECTRIC POWER

PENNSYLVANIA WATER & POWER COMPANY

AND

THE UNITED RAILWAYS & ELECTRIC COMPANY

OF BALTIMORE

Agreement, made this 8th day of February, in the year nineteen hundred and eleven, by and between THE PENNSYLVANIA WATER & POWER COMPANY, a corporation of Pennsylvania (hereinafter called the Power Company), and THE UNITED RAILWAYS & ELECTRIC COMPANY OF BALTIMORE, a corporation of Maryland (hereinafter called the Railways Company).

WHEREAS the Power Company is engaged in the business of generating, transmitting and transforming hydro-electric power; and the Railways Company is operating an electric railway system in the City of Baltimore and adjacent territory,

NOW THIS AGREEMENT WITNESSETH, that in consideration of one hundred dollars ($100) by each to the other paid, the receipt whereof is acknowledged, and in consideration of the mutual undertakings and promises hereinafter set forth, the Power Company agrees to sell and supply electric energy to the Railways Company, and the Railways Company agrees to use and pay for the same, under the provisions, terms and conditions following:

ARTICLE I.

DURATION OF CONTRACT. This Agreement shall terminate at the expiration of fifteen (15) years from the 8th day of February, 1911, provided, always, that the Railways Company shall have the right and option to terminate the same prior to that time, at the end of either five (5) or of ten (10) years from said date, upon giving to the Power Company written notice of its intention so to terminate at least six (6) months next before the expiration of such five (5) or ten (10) year period.

ARTICLE II

POINT OF DELIVERY. All energy hereby contracted for shall be supplied by the Power Company to the Railways Company at the latter's Pratt Street Power Station; and the prices hereinafter named are based upon deliveries at said point.

ARTICLE III.

CHARACTERISTICS OF ENERGY SUPPLIED. The said energy shall be supplied in the form of three (3) phase alternating current at a frequency of approximately twenty-five (25) cycles per second and at a pressure of approximately thirteen thousand (13,000) volts.

ARTICLE IV.

QUANTITIES. For convenience of description and reference, the electric power to be supplied by the Power Company under this Agreement is classified and specified as follows:

(a) FLAT POWER. That is to say, power to a definite amount which the Railways Company agrees to accept and the Power Company undertakes to supply (subject to reduction as hereinafter specified under Article VIII) at all times during each and every twenty-four (24) hour day, said amount of power being twelve thousand (12,000) kilowatts, subject to the right of increase in Article X provided. And the Railways Company shall have the right to take as flat power, electrical energy to an amount not exceeding during any day of twenty-four (24) hours, two hundred and thirty thousand and four hundred (230,400) kilowatt hours, this amount being based on a load factor of eighty per cent. (80%).

(b) SURPLUS POWER (which the Railways Company agrees to accept and the Power Company agrees to supply). That is to say, such power in excess of the flat power as, together therewith, will be sufficient during the running of this Agreement to operate the Railways Company's entire system between the hours extending from 10 P. M. of each and

every day to 1 P. M. of the next day, and including all of the hours of Sundays throughout the year.

The Power Company may also supply as surplus power between the hours extending from 1 P. M. to 10 P. M. of week days, energy to make up deficits, as hereinafter provided under Article VIII.

At all hours except between 1 P. M. and 10 P. M. of week days the Power Company shall supply all energy which may be necessary to provide for the Railways Company's requirements, subject to reduction, as hereinafter specified under Article VIII.

ARTICLE V.

PRICES. For energy supplied as "flat power" the price shall be at the rate of $24.00 per kilowatt per annum supplied and used.

For energy supplied as surplus power the price shall be 3 mills per kilowatt hour supplied and used.

ARTICLE VI.

MEASUREMENTS. All electric energy supplied hereunder shall be measured by watt hour meters, to be installed and maintained by the Railways Company at its expense at the Pratt Street Power Station. The Railways Company may also install graphic or other meters to check the necessary measurements. Such watt hour meters or other meters shall be of an approved type, and shall be so connected as to measure the energy delivered to the thirteen thousand (13,000) volt busbars. Deficiencies which may occur in the amount of electric energy to be supplied by the Power Company shall be calculated from measurements of the output of the Pratt Street Power Station of the Railways Company, and of the energy supplied by the Power Company during the period or periods in which such deficiency occurs. The Power Company shall have the right to inspect all the meters used by the Railways Company to measure power or energy under this contract, and to install its own check meters in addition to the meters installed by the Railways Company, and space and structure for the said check meters shall be provided by the Railways Company in the said Pratt Street Power Station. Said meters installed by the Railways Company shall be read and recorded hourly, for the purpose of ascertaining the kilowatt hours used. The meters shall be tested and calibrated at suitable intervals upon written request of either party, in the presence of duly appointed representatives of both parties, and if, as the result of such test, any meter shall be found incorrect or inaccurate, it shall be restored to an accurate condition or a new meter substituted. The reading of any meter tested and found to be not more than Two per Cent. (2%) from normal accuracy at all ranges within the limits between which it is in use, shall be considered correct and accurate. If, as a result of any such test, any meter shall be found to register in excess of two per cent. (2%) either above or below normal accuracy, then the consumption recorded by such meter since the last monthly reading previous to the request for test, shall be corrected accordingly by one-half of the percentage of inaccuracy so found, provided that this percentage is less than ten per cent. (10%); but no correction, whatever the inaccuracy, shall extend back beyond thirty (30) days previous to the day on which tests are requested, and if during such previous thirty (30) days one or more prior tests shall have been made under the provisions hereof, then no correction shall extend back beyond the date of such prior tests. Should the error in the meter exceed ten per cent. (10%), the probable consumption for the preceding thirty (30) days—or since the last test if within thirty (30) days—shall be estimated and paid for as may be agreed between the parties hereto; and, in default of agreement, the dispute shall be settled by arbitration, as provided for in Article XI hereof.

ARTICLE VII.

REGULATION AND USE OF APPARATUS AND CURRENT. Variations in frequency or pressure, or both, of the power supplied, shall not be such as to prevent successful operation of the steam-driven electric generating apparatus of the Railways Company when connected in parallel with the Power Company's circuits, provided said steam-driven apparatus is maintained and operated in accordance with good practice, and to this end the Power Company shall adjust the potential upon the circuits through which power is supplied to the Railways Company in such manner as shall practically prevent the variations of potential as delivered at Pratt Street Power Station which otherwise would result from variations of load on the transmitting circuits.

The Railways Company shall maintain and operate its apparatus in such manner as will maintain a practically balanced load between phases, and shall utilize energy from the Power Company's circuits at a power factor not less than ninety per cent. (90%).

Inasmuch as it is impracticable, by reason of fluctuations in the Railways Company's load, to maintain the quantity of energy to be supplied by the Power Company between the hours of 1 P.M. and 10 P. M. on week days at exactly twelve thousand (12,000) kilowatts, or such other amount of "flat power" as the Power Company may be obligated to supply under this contract, it is the intent of this contract that between said hours on week days (except as provided in Article VIII) the Power Company shall supply and the Railways Company shall have the right to use an average of twelve thousand (12,000) kilowatts or other such obligated amount during the hours when the Railways Company's requirements equal or exceed the amount so demandable. Provided, however, that taking into consideration the fluctuating character of the load in accomplishing this result, the Railways Company shall maintain the demand for power on the Power Company as nearly as may be practicable at the twelve thousand (12,000) kilowatts or other amount to which it may be entitled under this contract.

ARTICLE VIII.

INTERRUPTIONS AND DEFICIENCIES. A. If at any time during the continuance of this contract the Power Company shall be prevented from supplying, or the Railways Company shall be prevented from using all or any part of the energy hereby contracted for, by reason of war, rebellion, civil disturbances, strikes, serious epidemics, fires, or other causes of like nature beyond the control of either party, the obligation of the Power Company to supply, and the obligation of the Railways Company to use and pay for energy contracted for hereunder, shall cease until the time when the party so incapacitated shall, by the exercise of all reasonable diligence, be able to resume such supply or use. But deficiencies in the supply or in the use of power caused by conditions of low water at the Power Company's dam; temporary interruptions caused by lightning or by defects or break-downs in the machinery, apparatus or transmission and distribution lines of either party, shall not be considered as causes excusing supply or use hereunder; and deficiencies in supply arising from such last-named causes shall be governed by Subdivision "D" of this Article.

B. The Power Company will maintain its plant and system in first-class condition, and use the utmost care and diligence consistent with the state of the art in the operation of its system, so as to furnish, as nearly as practicable, a continuous and satisfactory supply of power; will keep in reserve, both in its main power-house and in the terminal sub-station, sufficient spare equipment to provide for the breakdown of any single piece of apparatus, and will provide transmission circuits and cables to such extent as may be necessary to enable it to make repairs upon any transmission circuit or cable without necessitating a reduction in the quantity of power supplied to the Railways Company.

The Railways Company agrees to install and maintain all of its receiving apparatus and distribution lines in first-class condition, and in case any of its apparatus which in any way affects the taking of energy from the Power Company breaks down or becomes defective, it will immediately use due diligence to repair said apparatus and operate the same.

C. At times of low water the Power Company shall have the right to reduce the supply of power to a minimum, in any one day, equal to twenty-five per cent. (25%) of the "flat power" energy which the Railways Company may at such times have the right to use—the Railways Company having the right to take such energy at any rate in the morning and evening peaks which it may desire, not exceeding the maximum value of the morning peak power which it may then be entitled to take under this Agreement. Provided, however: First—That the Railways Company shall have and receive forty-eight (48) hours' notice of each and every reduction before the same goes into effect; and provided, Second—(and the Power Company guarantees, nor will it make any contracts with its other customers to prevent)—that the supply of the Railways Company shall not, during any twenty-four (24) hour period, be reduced hereunder below one-half of the Power Company's total available energy. It is the purpose of the Power Company to provide hereby that the supply of the Railways Company shall not at any time be less than twenty-five (25%) per cent. of the quantity demandable under this Agreement; and that, notwithstanding said limit of twenty-five (25%) per cent., the Railways Company shall, in times of reduced supply, be a preferred customer of the Power Company to the extent of one-half of the latter's total energy during such period's of reduction.

D. If, on account of low water, repairs, or for any cause (except as excused by Paragraph "A" of this Article), the Power Company shall be unable to supply the full amount of electric energy to which the Railways Company may be entitled under Article IV of this Agreement (so that the Railways Company shall be compelled to supply such deficiencies by use of its steam plant, or otherwise), then the Power Company will pay an amount (which the Railways Company may deduct from the monthly settlements hereinafter provided for) equal to 4 mills per kilowatt hour for all such deficiencies, calculated (in the case of each and every reduction) for a minimum duration of thirty (30) days), and for the actual duration, if in excess of thirty (30) days. The purpose of this provision is to indemnify the Railways Company for the agreed excess cost to it of producing, by its steam plant, the supply cut off; and it is recognized that the Railways Company, when compelled to supply by its steam plant power in lieu of that so cut off, cannot operate economically for less than periods of thirty (30) days.

Provided, however, that (subject to the limitations hereinafter mentioned) the accumulated deficiency in kilowatt hours of any one month may be made up by the Power Company during the next succeeding month or months, when it has surplus energy available and when the Railways Company may be able to utilize such surplus energy as an addition to the supply to which it may be then entitled. Deficiencies in flat power so made up shall be paid for at the rate of .3425 cents per kilowatt hour, and deficiencies in surplus power so made up shall be paid for at the rate of 3 mills per kilowatt hour. The right of the Power Company to make up the deficiency of any month shall cease three (3) years from the end of such month in which said deficiency shall occur, and at the termination of this Agreement, if the same shall terminate before the expiration of any three year period.

ARTICLE IX.

PAYMENTS AND SETTLEMENTS. The Railways Company shall make monthly cash settlements on the fifteenth day of each month for the indebtedness of the preceding calendar

month; and in case of any disagreement between the parties as to the amount of any monthly settlement, the disputed portion shall be arbitrated as provided in Article XI hereof.

ARTICLE X.

ADDITIONAL POWER. A. At any time and from time to time during the running of this Agreement, the Railways Company shall, at its option, be entitled to take, and the Power Company shall be obligated to supply, such additional flat power as, together with that provided by Article IV hereof, will be sufficient to enable the Railways Company to dispense with more of its steam-generated electric power; provided, however (1), That the additional flat power demandable by the Railways Company hereunder shall not exceed six thousand (6,000) kilowatts; and provided (2), that if and as such additional flat power is demanded, the amount thereof shall not thereafter be subject to reduction during the running of this Agreement; and provided (3), that such additional flat power shall be paid for at the rate of .3425 Cents per kilowatt hour; and provided (4), that the supply and use of such additional power shall be subject to the provisions of Article VIII of this Agreement; and provided (5), that if any additional apparatus or facilities shall be required to enable the Power Company to supply such additional power, said Company shall have a reasonable time, not exceeding nine (9) months from demand, within which to install or prepare the same.

B. At any time during the running of this Agreement the Railways Company shall, at its option, be entitled to take, and the Power Company shall be obligated to supply, such power, in addition to that to which the Railways Company may then be entitled, as will be sufficient to render unnecessary any use for its railway purposes, of the Railways Company's power plant, provided, however (1), That if any additional apparatus or facilities shall be required to enable the Power Company so to furnish all of the power requirements of the Railways Company, the Power Company shall have a reasonable time, not exceeding twelve (12) months from demand, within which to install or prepare the same; and provided (2) that the prices and quantities hereinbefore fixed and agreed upon shall be superseded by a uniform price of 4.8 mills per kilowatt hour for the entire power requirements of the Railways Company so to be furnished and used; and provided (3) that all the remaining provisions of this Agreement, not inconsistent with such changes in the quantities and prices of power, shall continue and remain in force, except that the Power Company will guarantee to the Railways Company a continuous supply of power adequate at all times for its entire requirements.

C. It is understood and agreed that the undertakings and promises of the Power Company in this Article contained, are inducements to the execution of this Agreement by the Railways Company; and the Power Company, for the money and other considerations hereinbefore set forth in this Agreement, covenants that said undertakings and promises shall be and remain irrevocable during the running of this Agreement.

ARTICLE XI.

ARBITRATION. If and whenever any dispute shall arise over the construction of this contract, or over the rights and duties of either party thereunder, then upon the demand of either party and within ten (10) days from the time of such demand, each party shall name an arbitrator, and the two so named shall promptly thereafter choose a third. If either party shall fail to name an arbitrator within ten (10) days from said demand, or if any two arbitrators named shall fail within ten (10) days from their nomination to agree upon and appoint the third, then such second or third arbitrator, as the case may be, shall be appointed by any Judge of the Supreme Bench of Baltimore City. The decision of any two of the

arbitrators shall be final and binding upon the parties, and such submission to a decision by arbitrators is hereby declared to be a condition precedent to the bringing of any action or suit by either party hereto against the other on account of any matter within the terms of this Article. But the parties hereto may, by mutual consent, refer any matter in dispute to their respective General Managers, who shall be empowered to call in, if necessary, a third party to be agreed upon between them, as umpire, and the decision of the umpire shall be final.

ARTICLE XII.

CANCELLATION. If the Power Company shall fail to commence deliveries on or before the first day of September, 1911, or if the Power Company shall fail to keep and perform its obligations contained in Subdivision "B" of Article VIII, or in Article X hereof, the Railways Company may, at its option and upon thirty (30) days' written notice, cancel this contract without prejudice to any right of action thereunder. If the Railways Company shall fail to keep and perform its obligations as contained in Subdivision "B" of Article VIII; or if it shall for a period of thirty (30) days be in default on any payment due hereunder (not being a sum in dispute or arbitration), then the Power Company shall have the right, at its option and upon thirty (30) days' written notice, to cancel this contract without prejudice to any right of action thereunder. Provided, however, that the liability of the Power Company for inability (without fault on its part) to supply the full amount of power contracted for under this Agreement, shall be limited to the deficiency charges provided by Article VIII hereof.

ARTICLE XIII.

The rights and obligations created by this contract shall inure to and bind the successors and assigns of the respective parties.

Until such time as the Power Company shall regularly qualify to do business in Maryland, the Superintendent or Manager in charge of the Highlandtown sub-station of the Susquehanna Transmission Company of Maryland shall be and continue to be the Agent of the Power Company in Maryland for the purpose of service of process in any litigation growing out of this Agreement.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be executed in duplicate by their proper officers, thereunto duly authorized, and their respective corporate seals to be hereunto affixed the day and year first above written.

Johnson's Legal Opinions Re: Eminent Domain

October 31, 1905.

John G. Johnson, Esq.,
Land Title Building,
Philadelphia, Pa.

Dear Sir,

We desire to submit the following matter for your consideration:

The McCall Ferry Power Company, as you will doubtless recall, is a Pennsylvania corporation, formed by the consolidation of two corporations formed under the provisions of the Act of April 29th, 1874, and supplements thereto, for the storage and transportation of water and water power for commercial and manufacturing purposes in the Townships of Lower Chanceford, in York County, and Martic, in Lancaster County.

The Company now desires to obtain a large piece of land near McCall's Ferry in the Township of Martic, this piece of land being one that will be flooded by the dam when finally constructed, but at present is needed for terminal and storage purposes. The Company informs us that this piece of land is absolutely necessary for its enterprise, and that it does not constitute five per cent. of the total property re-

quired for the development, the remaining ninety-five per cent. being owned by the Company. Upon this state of facts, we desire to know whether you are of the opinion that McCall Ferry Power Company has a right to condemn this property.

You will note that the particular property which the Company desires to acquire in this instance is situated in the Township of Martic, one of the townships where the Company has power to furnish water and water power. If you are of opinion that the Company may condemn this property, we desire also to know if you believe that the Company may condemn lands necessary for its purposes outside of the Townships of Martic and Lower Chanceford.

Assuming that the Company has powers of condemnation, and that proceedings are brought to condemn the piece of land to which we have referred, is the Company the sole judge of the necessity of the particular land needed, or may the property owner attempt to show in Court that some other piece of land is just as good for the purposes of the Company?

The most important case with which we are familiar on these points is Keller v. Riverton Water Company, 161 Pa. 422.

The two enclosed opinions which were prepared by Wm. C. Farnsworth, Esq., of Harrisburgh, and submitted to Houseman and his associates in connection with their proposed development of the Susquehanna River, may be of some assistance to you in your investigation. In the opinion numbered "1", the right

of condemnation is considered by Mr. Farnsworth at pages 17 and following. As to the points considered by Mr. Farnsworth in opinion numbered "2", if the only risk that our clients might incur in starting condemnation proceedings would be that a Federal Court might hold that the Act giving the Company powers of condemnation was unconstitutional, we believe that our clients would take the risk. On account of this fact, you need make no detailed investigation of these points, but we shall be very glad, nevertheless, to have your views on the subject.

The McCall Ferry Power Company tells us that it believes that the Pennsylvania Railroad Company controls companies organized under the act under which our companies were organized, and that the condemnation powers have been successfully used.

If we can give you any further information that will assist you in rendering your opinion, kindly advise us.

Yours very truly,

C.B. Eddy

LAND TITLE BUILDING
CHESTNUT-SANSOM
AND BROAD STREETS
PHILADELPHIA

3rd November, 1905.

Messrs. Simpson, Thatcher & Bartlett,

Dear Sirs:-

I beg to acknowledge the receipt of yours of 31st October, making certain inquiries as to the power of the McCall Ferry Power Co., a corporation created under the Act of 29th April, 1874 and supplements, for the storage and transportation of water and water power for commercial and manufacturing purposes in the Townships of Lower Chanceford, in ~~York~~ York County, and Martic, in Lancaster County.

I understand that it is the desire of the Company to appropriate, under an exercise of the right of eminent domain, a large piece of land near McCall's Ferry, in the Township of Martic, which is required for terminal and storage purposes; that this land, in the judgment of the Company, is absolutely necessary for the successful conduct of its business in the securing and distributing water and water power.

The Supreme Court may say of its action in Keller vs. Riverton Water Co., 161 Pa. 422, that it did not mean to decide that water power companies were vested with the right of eminent domain, and if the Court shall be of the opinion that there is no such vesting of power, they will not hesitate, by reason of anything done in the Riverton case, to so decide.

Water supply and water power companies possess, in my judgment,

S. T. & B., No. 2.

AND TITLE BUILDING
CHESTNUT—SANSOM
AND BROAD STREETS
PHILADELPHIA

in Pennsylvania, precisely the same powers, in the matter of the right to exercise eminent domain.

The power conferred by the Act of 1874 is amended by the Act of 16th May, 1889, which, in my judgment, embodies the whole grant which is to be considered.

The Act is not very happily worded; but, in my judgment, it contains, beyond question, a grant sufficiently broad to include the exercise of the right of eminent domain for the purpose desired.

The phraseology itself, read with reasonable intelligence, is broad enough, and the intention of the Legislature to confer the power, is disclosed by the title itself,"authorizing companies incorporated for the supply of power to the public, or for the supply of water and water power for commercial and manufacturing purposes, to condemn property and rights for the purpose of obtaining and supplying water or water power."

The property in the present case is desired to be appropriated in the performance of the duty of "obtaining and supplying water power."

Not only does the Act confer upon such companies the power to "provide, erect and maintain all works and machinery necessary or proper for raising and introducing, etc. a sufficient supply of etc. water and water power as aforesaid"; but also,to accomplish the purpose, permits them to " provide, erect and maintain all proper buildings, cisterns, reservoirs, pipes and conduits for the reception and conveyance of water power." Such companies are given power

S. T. & B. N°. 3.

LAND TITLE BUILDING
CHESTNUT—SANSOM
AND BROAD STREETS
PHILADELPHIA

to appropriate so much of the water from the rivers, etc., as may be necessary for the purposes, and they are empowered "to enter upon such lands, etc. as may be necessary to occupy * * * * for the construction of their works.

It is true that there is specific power to appropriate the water, followed specifically by a provision for compensation in accordance with the 41st Section of the Act. I do not regard this as important, inasmuch as all the powers to enter upon lands, etc., given to such companies, are followed by a requirement "if any injury be done to private property", they "shall make compensation therefor in a manner provided for in the 41st Section of this Act." If it should be held that companies so necessary to the public as those created for the supply of water, do not possess the right invitum to occupy lands necessary for their purposes, the whole provision in Pennsylvania for such supply of water may be rendered worthless.

I am very decidedly of the opinion that lands may be appropriated by water companies, adversely, upon the terms of compensation in the manner provided for in the 41st Section of the Act of 1874.

Whilst water supply and water power companies may be held limited to supplying with water and water power, the territorial districts specified in their respective charters, I do not think there is any limitation upon them, either to obtain the supply of water, or to acquire land for the requisite buildings and works within such districts.

S. T. & B. N°. 4.

LAND TITLE BUIL' IG
CHESTNUT-SAND.M
AND BROAD STREETS
PHILADELPHIA

The question as to whether the water power company is "the sole judge of the necessity of the particular land needed," to the exclusion of any right on the part of the owner to prove "that some other piece of land is just as good for the purpose of the company," is more difficult.

In no State has it been more thoroughly ~~proven~~ than in Pennsylvania, that the right of a Railroad Company, authorized to construct a railroad between two points, is one which can be exercised by it without any right to show that another location could be made. The discretion of location in such cases in this State is unreviewable.

The power, however, in the case of railroad companies, is one to "locate, fix, mark and determine such route for railroad as it may deem expedient."

I know of no decisions upon the subject of possible right of review, in cases where the power is given by phraseology similar to that by which, in the Act of 1889, it is conferred.

The power vested in the water companies is "to provide, erect and maintain all works and machinery necessary or proper for raising and introducing, etc."

The right of entry upon lands is to such extent "as may be necessary to occupy, etc. for the construction of said works, etc."

The power is not in words conferred upon the companies to provide works and machinery, etc., which, by the Company, shall be deemed necessary. The condition of the entry is that it shall be

J. T. & B. No. 5.

LAND TITLE BUILDING
CHESTNUT-SANSOM
AND BROAD STREETS
PHILADELPHIA

necessary.

It is therefore within the power of the Supreme Court to determine that the discretion of the water companies in the appropriation of private lands, is reviewable, and that the taker requires, as a condition prerequisite, not the determination of necessity by the company, but the actual necessity.

I do not think, however, that our Supreme Court will put upon the power such a narrow restriction. I think the company will be granted the right to determine the necessity, subject to revision only in cases almost amounting to a fraudulent exercise of discretion.

I can conceive the possibility of such outrageous appropriation as would induce the Court to interfere.

Whilst I am not able to state with certainty that the Courts will not review the discretion of the water power companies in the appropriation, I am decidedly of the opinion that there will be no interference with the discretion if the circumstances are such that the Court must conclude that the discretion was exercised in a matter as to which there was a discretion, or as to which there could be an honest different opinion.

Some restraint will undoubtedly be exercised; but as I have suggested, it will be under circumstances almost amounting to fraud. I cannot conceive that our judicial tribunals will take upon themselves the determination of whether or not tract A or tract B is best for the purposes of the water company.

S. T. & B. N°. 6.

TITLE BUILDING
CHESTNUT—SANSOM
AND BROAD STREETS
PHILADELPHIA

I express no opinion upon the point discussed by Mr Farnsworth as to the fear that the Federal Courts may hold the Act of 1889 unconstitutional, in view of what you say.

I do not think, however, I would bother much in reaching a conclusion if the only danger would lie in the probability of any such determination by the Federal Court.

I return the papers you sent me, and am

Very truly yours,

John C. Swan

LAND TITLE BUILDI
CHESTNUT-SANSOM
AND BROAD STREETS
PHILADELPHIA

15th December, 1905.

Messrs. Simpson, Thatcher & Bartlett,

Dear Sirs:-

I have just had a conference with Mr. Beyer with reference to the proposed taking of the Robert E. Fry tract by the McCall Ferry Power Company, and several matters have arisen as a result of this conference which makes it necessary for me to communicate with you.

Incidentally, I have learned from Mr. Beyer that the dam which is intended to be constructed will raise the river higher than was originally expected, and will flood some lands that we do not now own. As you know, I have always insisted upon the right to erect a dam being exercised to such extent as to flood no lands other than those owned by us. I am very certain that if the Court should reach a conclusion that we were exercising any power which we may possess in the way of eminent domain, to acquire lands which we intend to flood, we would be held guilty of an abuse of power.

This is merely in passing. I find that the McCall Company was merged or consolidated on the 14th day of April, 1905, the Governor having held the merger papers for many months. I had supposed that the merger took place at an earlier date.

The Act of 13th April, 1905, (P.L. 152), which is entitled: "An Act providing that the right of eminent domain, as respects the appropriation of streams, rivers or waters, or the land covered thereby, shall not be exercised by water companies incorporated

S. T. & B. N°. 2.

LAND TITLE BUILDIN
CHESTNUT-SANSOM
AND BROAD STREETS
PHILADELPHIA

under law," thus enacts:-

"That no water company hereafter incorporated under any law, shall have power or exercise the right of eminent domain as respects the appropriat of the streams, rivers or waters of this Commonwealth or any of them, nor the land covered thereby."

Whilst this Act does not say no land shall be taken "for terminal storage purposes," yet it is exceedingly doubtful whether the Court will hold that the right of eminent domain exists for an incidental purpose where it has been expressly taken away for the main purpose, viz, the appropriation of the streams, rivers and waters.

I very much fear our Supreme Court will hold that no right of eminent domain longer exists in water companies incorporated after the 13th of April, 1905.

Whether or not a consolidated or merged company is a company newly "incorporated", is an exceedingly nice question.

Under our Merger Acts, the consolidated company possesses all the franchises of the old company. It may therefore be contended that the Act does not apply, and was not intended to apply, to a company resulting from such consolidation or merger.

In this State the status of a consolidated company is not very accurately defined. Whether or not it is a new incorporation, is a matter of some doubt.

Under the Federal decisions, the status of a consolidated company would appear to be that of a new company. I am rather inclined

S. T. & B. N°. 3.

LAND TITLE BUILDIN
CHESTNUT-SANSOM
AND BROAD STREETS
PHILADELPHIA

N.Y.

to think that such is the status of a merged company in your State, although as to that you know far better than I do.

It is very doubtful, therefore, whether the Court will not hold that the McCall Company was incorporated after the Act of 13th April, 1905.

A point of still greater difficulty presents itself, growing out of the proviso to the Act of 16th May, 1889, in these words:- "Provided, That this Act shall not apply to private springs or private water supplies." There can be no doubt that even if the Act of 13th April, 1905 does not exclude the taking of land for terminal purposes, it does forbid the appropriation of "streams." If we are subject to the Act, therefore, the land with this stream running thereon, cannot be taken.

I understand from Mr. Beyer that the tract we are taking is a long and narrow one, through which meanders for a very considerable distance, the spring which has its origin on land immediately above, running through the property proposed to be taken, and then through property of ours to the river. He also tells me it is impossible to take a portion of the land intended in such way as not to appropriate this stream.

The Act of 1889 does not authorize the taking of "Streams"; but simply "rivers and creeks." The stream in question cannot be called a creek. Its appropriation is therefore hardly within the right of appropriation of anything other than land for terminal purposes; but

S. T. & B. . . 4.

LAND TITLE BUILDIN
CHESTNUT-SANSOM
AND BROAD STREETS
PHILADELPHIA

the proviso is one which not merely applies to the taking of rivers and creeks; but also applies to the taking ~~of land~~ for any purposes. The prohibition is in the broadest possible words, excluding from the right of eminent domain "private springs or private water supplies."

I do not see how we can escape this proviso. Undoubtedly, the stream in question is a private water supply.

My advice is to obtain leave to take testimony under the answer; to spin along the taking of this testimony for some time; and then to negotiate for private purchase.

I await your instructions, and am

Very truly yours,

Letter Re: Bertron, Storrs & Griscom Control of Susquehanna Electric Power Company

Susquehanna Electric Power Co.-1 200

46

FEPCo 3010-1

BERTRON, STORRS & GRISCOM
BANKERS
60 WALL STREET, NEW YORK — LAND TITLE BUILDING, PHILADELPHIA

New York, May 22, 1907.

Henry F. Dimock, Esq., President,
60 Wall St., New York.

Dear Mr. Dimock:-

As you know, we were for some time negotiating with DeVictor in regard to the possibility of clearing up the Susquehanna River situation through them. These negotiations came to naught.

We have now taken an option on the Miller-Surratt properties, otherwise known as the SUSQUEHANNA ELECTRIC POWER COMPANY, which we think will accomplish what we had in view much more economically and effectively. We have asked Mr. Homer to represent us in these negotiations and I wanted to advise you. What this Company does will in no sense be antagonistic to the McCall Ferry interests, as you know but I wanted you to be apprised of the fact and ask you to notify the McCall Ferry attorneys, impressing upon them the great importance of keeping this matter exceedingly quiet. If we acquire these

interests we will want to go ahead and take options at least on certain lands, before the matter becomes public.

We have instructed Mr. Homer to look after the clearing up of the SUSQUEHANNA ELECTRIC POWER situation and to see that nothing is done antagonistic to the McCall Ferry Company. but the actual litigation to which that Company will have to resort will be conducted by Messrs. Bastjer & Surratt, in the course of which it will be necessary to bring suit, we are advised, against the Construction Company, apparently, but not actually hostile to the McCall Ferry interests. After Mr. Homer is thoroughly posted in the matter, he will take up the legal aspect of it and keep in touch with Mr. Bartlett in regard to it.

Very sincerely yours,

S. B. Elkins

Consolidation Agreements of 1908

THIS AGREEMENT Made on this, the 20 day of February in the year nineteen hundred and eight, by and among JOEL H. DeVICTOR, acting on behalf of himself and all other shareholders of the SUSQUEHANNA POWER COMPANY, as party of the first part; JOHN HENRY MILLER and WILLIAM H. SUBRATT, acting on behalf of themselves and their associates controlling the SUSQUEHANNA ELECTRIC POWER COMPANY interests, as parties of the second part; and BERTRON, STORRS & GRISCOM, acting on behalf of themselves and shareholders representing a Majority in interest and controlling the McCall Ferry Power Company, as parties of the third part.

WHEREAS the parties hereto have been heretofore interested in attempts to make separate developments upon the Susquehanna River between tide water in the State of Maryland and the foot of Cully's Falls, in the State of Pennsylvania, at the elevation of one hundred and three feet above mean low tide at Havre de Grace, as defined by bench marks placed by the Columbia and Port Deposit Railroad; and, as a result, have come into conflict the one with the others and serious litigation has resulted; and

WHEREAS it is desirable in the interest of all the parties hereto to avoid further litigation and expense and to consolidate all interests on said River between tide water and the elevation of one hundred and three feet aforesaid, to the end that the power of said River may be developed to the best advantage between these said points;

NOW, THEREFORE, THIS AGREEMENT W I T N E S S E T H In consideration of the premises and the sum of one dollar by each of the parties hereto unto the others in hand paid, the

receipt whereof is hereby acknowledged, said parties hereby agree as follows:

FIRST: (a) The party of the first part shall be regarded as controlling 30/91 of the interests on said River to be consolidated as aforesaid; (b) the parties of the second part shall be regarded as controlling 23/91 of the interests on said River to be consolidated as aforesaid; and (c) the parties of the third part shall be regarded as controlling 38/91 of the interests on said River to be consolidated as aforesaid and the shares of stock and bonds of the Susquehanna Power Company to be issued and paid for said properties shall each be divided in like proportions among the parties hereto.

Second: All interests controlled by the party of the first part if not now held by the Susquehanna Power Company shall be by appropriate conveyance or legal proceedings conveyed to it, an approximate schedule whereof is hereto attached marked Exhibit A.

Third: All interests controlled by said parties of the second part shall be transferred by appropriate conveyances of legal proceedings to the Susquehanna Power Company, an approximate schedule whereof is hereto attached marked Exhibit B.

Fourth: All interests of the McCall Ferry Power Company in or along the Susquehanna River lying in Maryland shall be by appropriate conveyances or legal proceedings transferred to the Susquehanna Power Company and all interests of the said McCall Ferry Power Company in or along

the Susquehanna River in the State of Pennsylvania lying below the foot of Cully's Falls shall be by appropriate conveyances or legal proceedings transferred to a corporation now existing or to be hereafter organized under the laws of the State of Pennsylvania, all of whose capital stock shall be transferred to and held by the Susquehanna Power Company, - approximate schedules whereof are hereto attached marked (as to Maryland properties) Exhibit C, and (as to Pennsylvania properties) Exhibit D.

By the expression "all interests" of any of the parties hereto, there is intended to be included all lands now owned directly or indirectly by such parties or their associates which were acquired for purposes of development of the power on the Susquehanna River or to facilitate such development; also all corporations in which they are interested to the extent of such interest and also any lands for which contracts of purchase have been made or options acquired; also all canals, other franchises and rights of whatsoever character and description so long as the same lie between tide water on the Susquehanna River in the State of Maryland and the foot of Cully's Falls in the State of Pennsylvania, which would be necessary, convenient or proper to a development of the power on that River between said two elevations or which might be over-flowed, damaged or affected in any manner by reason of the development of such power between said two points or any part thereof; including, also its interest in the Conowingo Land Company and any and all property and rights owned by the Proprietors of the Susquehanna Canal; as also the shares of said Company and any and all property and rights now or formerly owned by

the Tide Water Canal Company in Maryland, together with a release, acquittance and discharge in full from the Susquehanna Canal and Power Company in Pennsylvania from and against all damages, injuries or losses incident to the overflow of any of its lands, properties, rights or franchises below the foot of Cully's Falls, - but the parties of the second part shall not thereby be bound to transfer or secure the transfer of the Hugh A. Jones tract above Conowingo Bridge of the land now standing in the name or held by the Continental Trust Company purchased by said Trust Company through E. M. Allen, Junior, about 1902, 1903 or 1904 --- any equity in said properties held by the interests represented by the parties of the second part to be, nevertheless, included in the transfer to be made as aforesaid.

Fifth: The four thousand shares of the capital stock of the Susquehanna Power Company now outstanding shall be surrendered to the Trustees hereinafter mentioned, properly endorsed, for the purpose of cancellation and reissue in the proportions of 30/91, 23/91 and 38/91 to the parties hereto respectively of the first, second and third parts or their respective nominees; and, in addition thereto, there shall be issued (a) to the said party of the first part, of the issue of ten million dollars of five per cent. first mortgage gold bonds secured by Mortgage of the Susquehanna Power Company to the Girard Trust Company of Philadelphia, such additional amount of bonds as will, together with those already issued equal six hundred thousand dollars par value, upon condition precedent that the said party of the first part and his associates shall have released

and discharged the property now or heretofore owned by the Susquehanna Power Company of and from all liens or liability other than said Mortgage to the Girard Trust Company and shall have made payment and settlement of all debts and obligations of the Susquehanna Power Company; (b) The said parties of the Second part, shall receive of the said five per cent. first mortgage gold bonds four hundred and sixty thousand dollars at the par value thereof when and as soon as the said parties of the second part shall have discharged all liens, claims and balances of purchase money or option contracts, upon the interests which they are to convey under the terms hereof to the Susquehanna Power Company; and (c) the said parties of the third part shall upon delivery of all of the interests as aforesaid controlled and owned by the McCall Ferry Power Company in the State of Maryland and in the State of Pennsylvania and lying in and along the Susquehanna River south of the foot of Cully's Falls free of liens and encumbrances thereon, receive of said five per cent. first mortgage gold bonds seven hundred and sixty thousand dollars at the par value thereof.

It is the intent and purpose of the foregoing paragraph of this Agreement that said bonds shall not be delivered to the respective parties hereunder, until all mortgages, liens, debts, encumbrances, obligations, balance of purchase money's and other option contracts, hereinbefore specified as to be discharged, have been discharged, satisfied and paid by the respective parties hereto.

Sixth: It is furthermore agreed that all of the stock of the Susquehanna Power Company, whether aggregating four thousand shares as hereinbefore mentioned or as may

happen only two thousand shares, but in any event to include all of the issued and outstanding shares of said Company, shall, less necessary qualification shares be transferred with due and proper endorsements in blank to a Holding Company to be organized having a nominal capital, with full power in said Holding Company vested to have such shares transferred and restored in its name or not at its election or in the name of its nominee or nominees as to it may seem wise and expedient - the shares of such Holding Company to be held by the parties hereto in the same proportions and ratio as they shall under the terms hereof be entitled to hold and receive shares of the capital stock of the Susquehanna Power Company; and it is further agreed that all of the stock of such Holding Company shall until the completion and operation of a development of the power of the Susquehanna River within the limits aforesaid contemplated by this agreement; not to exceed however, a period of ten years, accounting from the day of the date hereof be deposited with Samuel R. Bertron and Joel H. DeVictor as Trustees unless such Trusteeship be sooner terminated by the concurrence of said Trustees or by the vote of a majority of the stock so deposited with them.

Seventh: The Trustees through the control of said Holding Company shall in their discretion either sell from time to time additional first mortgage bonds of the Susquehanna Power Company or borrow on the security thereof to provide additional money to pay for such further lands, properties, developments, improvements, franchises and rights as may from time to time in their judgment be required in order to advance, facilitate and make feasible the pro-

posed development on the Susquehanna River; as also to pay all engineering, legal and other expenses of the said Susquehanna Power Company or of the Holding Company or of the Trustees hereunder, which may be hereafter incurred with the approval of such Trustees or of the parties hereto or a majority in interest of the parties hereto and to provide moneys to pay the fixed charges, taxes, insurance and other expenses upon said property when and as same shall from time to time accrue, including interest on the bonds from time to time outstanding, in cash or bonds.

Eighth: In addition to the sums hereinbefore provided to be paid in bonds and stocks of the Susquehanna Power Company to the parties of the first, second and third parts respectively there shall be allotted and delivered to the party of the first part $25,000. par value of the said five per cent. First General Mortgage Gold Bonds of the Susquehanna Power Company in full settlement of all expenses, costs and liabilities incurred by them in reference to the preliminary development of a temporary power plant at the old Paper Millsite in Harford County, Maryland, and the Trustees shall have full power and authority, in their discretion to provide in the same manner, as is provided in Paragraph Seven hereof, the necessary moneys to complete said development and to build and construct transmission lines for the marketing of the power so produced, if in the judgment of the Trustees hereunder it shall appear wise and for the benefit and advantage of the parties hereto.

Said Trustees shall have, furthermore, full power

to vote the shares of stock of the said Holding Company deposited with them to carry out any and all of the foregoing purposes; as also to any and all other matters and things which in their judgment may become necessary, proper, expedient or convenient in order to facilitate and advance the development of the power of the Susquehanna River within the limits aforesaid, being given hereby the broadest and fullest discretion without limitation or restriction of any kind or character whatsoever; provided, however, that no construction contract shall be entered into in such manner as will cause any one share of deposited stock to obtain any advantage or benefit over any of the other deposited shares and provided further that they shall if requested secure the election of as Directors of the Susquehanna Power Company upon the demand of the party of the first part three of his nominees, of the parties of the second part, one nominee and of the parties of the third part three of their nominees.

In the event of the death of resignation of Joel H. De Victor as a Trustee hereunder, Stevenson A. Williams of Bel Air shall be and become substituted as his successor in the trusts and in like manner in the event of the death of Samuel R. Bertron, a member of his firm shall be and become substituted as his successor in the trust hereunder.

The use of the term "Susquehanna Power Company" is for convenience and shall be taken to include any other corporation which the Trustees hereunder may use for the accomplishment of the purposes by this Agreement sought to be obtained.

Obligations of the parties of the third part hereto

are conditioned upon obtaining releases and other actions by the Trustee of the McCall Ferry Company first mortgage bonds.

AS WITNESS the hands and seals of the parties hereto the day and year first written. The words "in cash or bonds" at the end of paragraph "Seventh" having been interlined prior to the execution hereof.

THIS AGREEMENT made on this, the 30th day of June in the year nineteen hundred and eight, by and among JOEL H. DeVICTOR, acting on behalf of himself and all other shareholders of the SUSQUEHANNA POWER COMPANY, as party of the first part; JOHN HENRY MILLER and WILLIAM H. SURRATT, acting on behalf of themselves and their associates controlling the SUSQUEHANNA ELECTRIC POWER COMPANY interests, as parties of the second part; and BERTRON, STORRS & GRISCOM, acting on behalf of themselves and shareholders representing a majority in interest and controlling the McCALL FERRY POWER COMPANY, as parties of the third part.

WHEREAS the parties hereto have heretofore made an Agreement, under date of February 20th, 1908, a copy of which is hereby made a part of this Agreement; and

WHEREAS it has since become apparent that in making said Agreement the parties thereto failed to make proper provision to enable them to meet the preliminary charges and expenses necessary to make the hydro-electric development contemplated by said Agreement; and

WHEREAS the party of the first part thereto has requested that clauses Fifth and Sixth of said Agreement be modified as hereinafter mentioned; and also that the requirement as a condition precedent to the carrying out of said Agreement, that said party of the first part take up and retire the first and second mortgage bonds of the Susquehanna Power Company, amounting in the aggregate to one hundred and fifty thousand dollars, be waived;

NOW, THEREFORE, in consideration of the premises and the desire of the parties hereto to make provision as hereinbefore referred to, to meet the expenses of said development and to grant the request of the said party

of the first part and the sum of ten dollars, the said parties hereto agree as follows:

FIRST: The first and second mortgages on the Susquehanna Power Company property not to exceed in the aggregate one hundred and fifty thousand dollars shall not be required to be released, as a condition precedent to the carrying of said Agreement into effect, but in lieu thereof there shall be held by the Girard Trust Company, Trustee, one hundred and fifty thousand dollars of the bonds provided to be paid to the said Joel H. DeVictor and his associates.

SECOND: There shall be issued to the said Joel H. DeVictor in addition to the bonds by said Agreement provided, one hundred and ninety-five thousand dollars of the general mortgage bonds of the Susquehanna Power Company and to Miller and Surratt parties of the second part an additional one hundred and sixty-two thousand dollars of said bonds and to Bertron, Storrs & Griscom an additional two hundred and sixty-eight thousand dollars of said bonds, which bonds excepting twelve thousand five hundred dollars to be retained by Miller and Surratt and twenty-one thousand dollars to be retained by Bertron, Storrs & Griscom as their respective absolute property, shall as soon as received by the said parties respectively be transferred and delivered to Joel H. DeVictor and S. Reading Bertron, Trustees under said Agreement, for the purpose of using said bonds to meet said preliminary charges and expenses and also to further the interests of the parties to said Agreement of February 20th, 1908, and their associates in the Susquehanna Power Company in such manner as to the said Trustees may seem right, proper and expedient without any

responsibility on the part of the said Trustees to account for the use or application of said bonds to any person or persons whomsoever, except by the request of a majority in interest of the parties to said afore-mentioned Agreement of February 20th, 1908.

THIRD: Paragraph "SIXTH" of said Agreement shall be modified by striking out from the end of said paragraph the words: "or by a vote of a majority of the stock so deposited with them" and substituting in lieu thereof "or by a vote of five-sevenths (5/7) of the directors of the Susquehanna Power Company", and the latter part of Paragraph EIGHTH of said Agreement, Page 6, referring to the successors of said Trustees in the event of their death or resignation, shall be modified to read as follows: "In the event of the death or resignation of Joel H. DeVictor as Trustee hereunder, the shareholders represented by the said Joel H. DeVictor shall name his successor in the trust, and in like manner in the event of the death or resignation of S. R. Bertron as Trustee hereunder, the shareholders represented by the said S. R. Bertron shall name his successor in the trust."

FOURTH: It is furthermore agreed that there shall be elected as Directors of the "Holding Company" one representative of each of the three parties to said Agreement of February 20th, 1908, and should the Directors of said Holding Company be more than three in number then such number shall be increased in such manner as to always maintain in said Board an odd number, and the representation of the parties of the first part and the parties of the third part on the Board of Directors of said Holding Company shall always be equal.

FIFTH: Except as herein expressly modified, all

of the terms and provisions of the Agreement of February 20th, 1908, are expressly ratified and confirmed.

AS WITNESS the hands and seals of the parties hereto the day and year first above written.

Baltimore, July 1st/08.

Mr. Joel H. DeVictor,

Dear Sir,

We having, by a Supplementary Agreement waived the requirement of the payment of the first and second mortgages of the Susquehanna Power Company as a condition precedent to the carrying out of the terms of our arrangement and Contract of February 20, 1908, with you; and being now advised, that there are sundry debts due and owing by the Susquehanna Power Company and the Maryland Construction Company, aggregating sixty thousand nine hundred and eighty-six dollars and sixty-six cents ($60,986.66) a schedule whereof, duly initialed by you, has been handed to Francis T. Homer, we beg to state that if you will turn over or cause to be turned over to Mr. Homer sixty-one (61) of the General Mortgage Thirty Year Five Per Cent. Gold Bonds of the Susquehanna Power Company of the par value of one thousand dollars ($1,000.00) each to be applied by him in an effort to compromise and settle said claims, that we are agreeable to the Contract of February 20, 1908 and the Supplement thereto of June 30, 1908 being carried out upon the understanding that we waive any personal obligation or liability on your part to secure a settlement and adjustment of the aforementioned indebtedness of $60,986.66 - it being understood, however, that neither we nor Mr. Homer are to assume any personal liability to see said debts paid, except to the extent that and so far as the same can be liquidated through the medium of said sixty-one bonds or the proceeds thereof.

Very truly yours,
Bertron, Storrs & Griscom

Agreement for Sale of Susquehanna Power Company Bonds etc

THIS AGREEMENT, made this 5th day of March 1912, by and between PENNSYLVANIA WATER & POWER COMPANY, as party of the first part, hereinafter called "The Pennsylvania Company", and BERTRON, GRISCOM & JENKS, of New York City, the SUSQUEHANNA POWER COMPANY, a corporation of Maryland, and the SOWEGO WATER & POWER COMPANY, a corporation of Pennsylvania, as parties of the second part, hereinafter called the "Purchasers".

W I T N E S S E T H :

That for and in consideration of the sum of One Dollar, by each of the parties hereto to the other in hand paid, the receipt whereof is hereby acknowledged, and of the mutual covenants hereinafter contained, and for divers other valuable considerations as follows:

FIRST: The Pennsylvania Company covenants and agrees:

(a) To sell at any time within sixty days from the date hereof to the Purchasers 70% of the General Mortgage Five Per Cent. Thirty Year Gold Bonds of the Susquehanna Power Company, of the principal value of $1,000 each, with the coupon maturing November 1st, 1968, and all subsequent coupons attached, and also 1,500 shares of the Susquehanna Properties Company capital stock, of the par value of $1.00 per share, at and for the price or sum of $200,000. in cash, of which said sum $10,000. has been paid at the time of the signing hereof and the receipt whereof is hereby acknowledged.

(b) To accept and retain as liquidated damages for a breach of this contract of sale the said $10,000. paid contemporaneously herewith should the Purchasers fail to pay the balance of $190,000 within the time aforesaid.

(c) The Purchasers shall not be entitled to carry out the terms of the purchase hereunder except upon condition that they will at the same time take over from the Pennsylvania Company the Conowingo Land Company mortgage at the principal value thereof, with all interest in arrears, and the reasonable cost to the Pennsylvania Company thus far incurred in its foreclosure suit under the said mortgage now pending in the Circuit Court of Cecil County, Maryland, including attorney's fees and all other expenses.

(d) The Columbia & Port Deposit Railway Company and the Philadelphia, Baltimore & Washington Railroad Company entered into with the McCall Ferry Power Company, an agreement, dated July 2nd, 1906, and a supplemental agreement, dated August 13th, 1906, providing for the relocation and improvement of a part of the road-bed, tracks, and appurtenances of said railway company, in pursuance whereof said relocated and improved road-bed, track and appurtenances have been completed between Safe Harbor in Lancaster County, Pa., and a point 850 feet south of Fishing Creek Station in said County and State.

By agreement dated March 24th, 1908, between said railway and railroad companies respectively, and the Susquehanna Power Company, a corporation of Maryland, an assignment of the benefits of said contract, with certain modifications, was assented to by said railway and railroad companies, and said Susquehanna Power Company accepted by said companies as obligor in lieu and place of said McCall Ferry Power Company.

The purchasers shall not be entitled to a delivery of the 703 5% general mortgage gold bonds of the Susquehanna Power Company of the principal value of $1000.

each with coupons attached as hereinbefore mentioned, or of the 1500 shares of the capital stock of the Susquehanna Properties Company, although the balance of purchase price, $190,000. shall have been paid in full, until they shall have secured either a release to be executed to the Pennsylvania Company by said railway and railroad companies respectively, releasing and discharging the said Pennsylvania Company from any and all liability whatsoever upon or by reason of the aforementioned agreement and supplemental agreement, dated July 2nd, 1906, and August 13th, 1906, respectively, in so far as the same apply to the relocation and improvement of the right of way, road-bed, track and appurtenances of the said railway company south of a point 850 feet south of Fishing Creek Station as in said agreement and supplemental agreement mentioned; or, alternately, give to the Pennsylvania Company a bond with either the Susquehanna Power Company, its successors or assigns, or the Sewego Water & Power Company, its successor or assigns, as principal, and an existing surety company, as surety, in the penalty of $100,000. conditioned to indemnify and save harmless the said Pennsylvania Company, its successors and assigns, in the same manner as if the foregoing release had been executed and delivered by said railway and railroad company, which said bond shall remain in full force and virtue in law until the Susquehanna Power Company, its successors or assigns, shall have relocated and improved said roadbed, track and appurtenances from a point 850 feet south of Fishing Creek Station, in accordance with the obligations, if any, resting upon the Pennsylvania Company as assignee of the purchaser of the property, franchises and privileges of the McCall Ferry Power Company at the sale had in pursuance of the foreclosure of the first mortgage bonds of the said McCall Ferry Power Company, or until said bonds shall be

discharged by the furnishing of a release or releases as hereinbefore provided.

SECOND: The Purchasers covenant and agree that they will within sixty days from the date hereof:

(a) Pay the balance of $190,000. for the said 703 of the General Mortgage Five Per Cent. Thirty Year Gold Bonds of the Susquehanna Power Company, of the principal value of $1,000. each, with the aforementioned coupons attached, and the said 1,500 shares of Susquehanna Properties Company stock.

(b) Will purchase the Conowingo Land Company mortgage aforesaid at the principal value thereof, with the accrued unpaid interest thereon, and will reimburse the said Pennsylvania Company for its reasonable cost incurred in the aforementioned foreclosure suit, including attorney's fees and all other expenses, and that upon the failure of their performance of either (a) or (b) or both of them they will forfeit as liquidated damages to the Pennsylvania Company the $10,000. this day by them hereunder paid.

(c) The purchasers covenant and agree not to demand a delivery of the aforementioned bonds and shares of stock until they shall have complied with the provisions of Paragraph 1, Sub-Paragraph d., hereof, but assent to the holding of said bonds and stock by the Pennsylvania Company as security for the performance of one or the other alternatives set forth in said Paragraph 1, Sub-Paragraph d., as a condition to the right of said purchasers to demand delivery of said bonds and stock.

THIRD: The Pennsylvania Company covenants and agrees to permit the purchasers to defend any suit or suits brought against the Pennsylvania Company under said Agreement of July 2nd, 1906 and supplement thereto of August 13, 1906, at their, the said purchasers own expense and to furnish said purchasers and their attorneys with all documents, agreements, correspondence and evidence in the possession of the said Pennsylvania Company and to facilitate and assist the said purchasers and their attorneys, without further compensation in defending any such suit or suits.

IN WITNESS WHEREOF, the parties hereto have duly executed this agreement in duplicate originals under their respective seals.

(a) Income as reported to stockholders is adjusted for the effect of non-recurring items, in order to state prospective income on the basis of the operating, demand and cost conditions existing during each past year, by reference to information supplied in the annual reports for that and prior years. The nature of each adjustment and certain other information available to stockholders with respect to prospective income are indicated in the attached notes.

(b) See attached "notes on reported earnings per share".

(c) Adjusted earnings per share, 1914-1930; reported earnings per share, 1931-1945.

(d) Moody's Public Utilities, Supplement, p. 1516. February 20, 1946.

Notes on Schedule 2

[22153] (page 1)

Pennsylvania Water & Power Company

Gross Income, its Disposition and Income per Share of Common Stock
1911-1945

1911

The plant was not considered in operation until 1911. 84,950 shares of $100 par value common stock had been issued in 1910.

$30,000 "transferred to contingent fund" by credit to surplus is excluded from gross income. The purpose of the transfer to "contingent fund" is not explained in the report for 1911. The income statement includes no provision for depreciation. At the end of 1911 $7,680,000 principal amount of 5% bonds, with interest requirements of $384,000, were outstanding, but no adjustment is made for this difference.

The 1910 report stated that expected income from signed contracts would reach $700,000, with capacity available for additional contracts. Not expected to be reached in the first year of operation. The income of last half of 1911 was double that of the first half. Results for the year obviously do not indicate normal operation. Development of additional storage and an additional unit of 16,000 hp. to be installed during 1912 was being planned by the engineers.

A pro-forma statement on the basis of the $700,000 is as follows:

Normal power sales	$700,000
Operating expense and taxes (a)	100,000
Contingency appropriation (against revenue variation, etc.)	30,000
Balance for investors	$570,000
Bond requirements (including bonds to be sold in 1912)	396,500
Balance for common stock	$173,500
Per share on 84,950 shares	$ 2.042

(a) Allowing for increased maintenance for plant operating on normal basis

1912

$50,000 "transferred to contingent account" is excluded from gross income. No provision was made for depreciation by charges to operating expenses or otherwise.

The additional unit of 16,000 hp. was placed in operation on November 1. A contract was entered into for supply to the Edison Electric Company at Lancaster, Pa., to be effective May 1, 1913, and it was announced that an additional unit of 16,000 hp. capacity (seventh) would be installed in 1913.

1913

The annual report states that "net revenues" of $302,662 (after interest on first mortgage bonds) was "disposed of as follows:

1. Transferred to depreciation fund	$150,000
2. Transferred to sinking fund	100,000
3. Transferred to contingent fund	50,000
Surplus carried to profit and loss	2,662."

[22154] (page 2)

This disposition includes the first provision for depreciation and an advance contribution to the sinking fund. The provision of $250,000 ($150,000 plus $100,000 out of a $200,000 payment by the Pennsylvania Railroad) as the equivalent of depreciation expense for the period of three years may suggest an annual allowance of from $80,000 to $90,000. It was reported that transmission improvements were expected to be "paid for" out of savings of energy currently being lost on account of overloading of existing circuits. Deduction is not made for both depreciation and contingent reserve appropriations.

Therefore, reported income available is adjusted as follows:

Reported gross income	$709,767
Less provision for depreciation	79,767
Adjusted gross income	$630,000
Bond requirement (including $185,000 of treasury bonds)	434,500
Balance for common stock	$195,500
Per share on 84,950 shares	$ 2.301

It was announced that the seventh unit was placed in operation on November 1, that the eighth unit (16,000 hp.) would be installed during 1914 and that the stock of the company would be "placed on a dividend basis in the near future."

1914

Reported net income in the amount of $411,978, together with a balance in earned surplus of $18,532 at the beginning of the year, was disposed of by the declaration of

common dividends in the amount of $339,800 and a transfer of $90,000 "to contingent fund," leaving a balance of $710 in earned surplus.

The annual report included an explanation of the contingent fund as a reserve to equalize variations in water flow. The year 1914 was one of low water; $107,340 was charged to "contingent fund" and credited, apparently, to operating revenue. The eighth unit (16,000 hp.) was placed in operation on December 16, making a total of 112,000 hp. It is stated that no further construction expenditures were contemplated before 1917.

Reported gross income of $855,552 is adjusted by deduction of the contingent fund provision of $90,000. No provision was made for depreciation.

If the reported income deductions were adjusted to a year end basis, the balance for common stock would be $306,800 and the earnings per share would be $3.61 instead of $3.79.

1915

The annual report states that additional construction must be considered during 1916 to increase the capacity of the plant.

$73,164.57 was reported as "transferred to contingency fund". Since no provision is made for depreciation, reported gross income is adjusted by deducting approximately $90,000 instead of $73,164.57. If the reported income deductions of $514,278 were adjusted to a year end basis ($521,350), the balance for common stock would be $396,950 and the earnings per share would be $3.97.

[22155] (page 3)

1916

Reported net income in the amount of $619,850, together with a balance in earned surplus of $21,798 at the beginning of the year, was disposed of by the declaration of common dividends in the amount of $382,275, a transfer

of $100,000 to "construction account," and a transfer of $150,000 to "depreciation fund," leaving a balance of $9,373 in earned surplus.

No construction was reported other than deepening of tailrace, which was being paid for out of available cash. Reported gross income of $1,141,000 is adjusted by deduction of $150,000, the amount credited to depreciation.

If the reported income deductions of $521,150 were adjusted to a year end basis ($518,550), the balance for common stock would be $472,450 and the earnings per share would be $5.56.

The quarterly dividend rate was increased to 1¼% beginning with the third quarter of 1916.

1917

Reported net income in the amount of $697,717, together with balance in earned surplus of $9,373 at the beginning of the year, was disposed of by the declaration of common dividends in the amount of $424,750, a transfer of $150,000 to "contingent account," a transfer of $75,000 to "reserve for sinking fund," and a charge of $50,500 representing "Red Cross subscription," leaving a balance of $6,840 in earned surplus.

Gross income is adjusted by excluding the $150,000 credited to the "contingent fund".

If the reported income deductions of $518,550 were adjusted to a year end basis ($515,600), the balance for common stock would be $550,600 and the earnings per share would be $6.48.

1918

Reported net income in the amount of $737,496, together with a balance in earned surplus of $6,840 at the beginning of the year, was disposed of by the declaration of common dividends in the amount of $467,225, a transfer of $150,000 to "contingent account," a transfer of $75,000 to "reserve for sinking fund," and a charge of $45,500 repre-

senting "Red Cross subscription," leaving a balance of $6,611 in earned surplus. Reported gross income is adjusted by excluding the $150,000 credited to the "contingent fund".

It was reported that sales to utility customers provide an increasing load factor because of decreasing proportion of total load carried by hydro plant.

If the reported income deductions of $518,340 were adjusted to a year end basis ($532,850), the balance for common stock would be $572,950 and the earnings per share would be $6.75.

The quarterly dividend rate was increased to 1½% beginning with the third quarter of 1918.

[22156] (page 4)

1919

Reported "net revenue" of $766,406, together with a balance in earned surplus of $6,611 at the beginning of the year, was disposed of by the declaration of common dividends in the amount of $509,700, a transfer of $150,000 to "contingent account," a transfer of $75,000 to "reserve for sinking fund," and a charge of $35,000 representing a donation to United War Work, Inc., leaving a balance of $3,317 in earned surplus.

Gross income is adjusted by excluding the $150,000 credited to "contingent fund."

1920

Reported "net revenue" of $815,410, together with a balance in earned surplus of $3,317 at the beginning of the year, was disposed of by the declaration of common dividends in the amount of $552,175, a transfer of $170,000 to "depreciation reserve," and a transfer of $95,000 to "contingent account," leaving a balance of $1,552 in earned surplus.

The annual report indicates adoption of depreciation accounting. The withdrawals from "contingent fund"

have been insignificant and it is reasonable to consider further credits to the "contingent account" as segregations of surplus. Reported gross income is adjusted by excluding the $170,000 credited to the depreciation reserve but not the $95,000 transferred to the "contingent account".

If the reported income deductions of $528,550 were adjusted to the year end basis ($523,950), the balance for common stock would be $650,050 and the earnings per share would be $7.65.

A new contract with the Baltimore Company provided higher charges for power. The need for keeping rates favorable to the customers, as a means of assuring permanence of the market, was recognized. Attention was called to the settling of "river coal" in the reservoir and the possibility of its recovery on an attractive basis.

The quarterly dividend rate was increased to 1¾% beginning with the third quarter of 1920.

1921

Reported "net revenue" of $841,477, together with a balance in earned surplus of $1,552 at the beginning of the year, was disposed of by the declaration of common dividends in the amount of $594,650, a transfer of $170,125 to "depreciation reserve" and a transfer of $75,000 to "sinking fund reserve," leaving a balance of $3,254 in earned surplus.

Reported gross income is adjusted by excluding the $170,125 credited to the depreciation reserve.

If the reported income deductions of $524,938 were adjusted to the year end basis ($536,200), the balance for common stock would be $660,100 and the earnings per share would be $7.70.

The contingent fund was charged on account of the subnormal river flow during 1921. The recovery of river coal was started and a three-way contract involving the traction load in Baltimore was entered into.

[22157] (page 5)

1922

The reported "balance brought down" (revenue less expenses, taxes and maintenance) of $1,456,400 is adjusted by deducting $173,210 transferred to depreciation reserve and $80,000 transferred to "contingent fund" by charges to earned surplus. Because of low water conditions $362,900 was withdrawn from the contingent fund. Therefore, the inclusion of the transfer to "contingent fund" is reconsidered for this year.

If the adjustment of gross income were limited to the charge for depreciation and if the reported income deductions of $535,144 were adjusted to the year end basis ($551,950), the balance for common stock would be $731,250 and the earnings per share would be $8.61.

It was reported that construction of a steam plant to burn river coal and completion of the hydroelectric development were being considered.

1923

Frequency converter equipment of 13,000 hp. was reported installed. Two additional generating units of 20,000 hp. each (66 instead of 25 cycle), were under construction, and were expected to be completed by April 1, 1924. Agreements to be effective April 1, 1924 were made with the Edison Light and Power Company of York, Pa. and with the Chester Valley Electric Company of Coatesville, Pa., for wholesale delivery of power, and related transmission lines were under construction.

The reported "balance brought down" (revenue less expenses, taxes and maintenance) was $1,530,024; $175,410 was transferred to depreciation reserve and $93,000 to "contingent fund" by charges to earned surplus. The balance in the "contingent fund" is $730,500 and income is not adjusted for the additional transfer.

Dividends were paid on 12,743 additional $100 par value shares, outstanding during the third and fourth quarters, making a total of 97,693 shares.

Reported income is adjusted as follows:

Gross revenue		$2,124,400
Expenses	$594,400	
Depreciation	175,400	769,800
Balance for investors		$1,354,600
Bond requirements		593,900
Balance for common stock		$760,700
Per share on 97,693 shares		$ 7.787

1924

It was reported that the last two hydroelectric units had gone into operation and that the decision to build a steam plant with 30,000 hp. initial capacity to use river coal had been taken. A new subsidiary was formed to build and operate the plant (Holtwood Power Company).

The reported "balance brought down" (revenue less expenses, taxes and maintenance) was $1,912,107; $210,010 was transferred to depreciation reserve and $130,000 to "contingent fund" by charges to earned surplus.

Dividends were paid on 9,769 additional $100 par value shares, outstanding during the third and fourth quarters, making a total of 107,462 [22158] (page 6) shares (a premium of $122,113 was realized from the sale of the additional 9,769 shares).

Reported income is adjusted as follows:

Gross revenue		$2,686,500
Expenses	$774,400	
Depreciation	210,000	984,400
Balance for investors		$1,702,100
Bond requirements		755,050
Balance for common stock		$ 947,050
Per share on 107,462 shares		$ 8.81

1925

The reported "balance brought down" (revenue less expenses, taxes and maintenance) was $2,077,113; $220,850 was transferred to depreciation reserve and $140,000 to "contingent fund" by charges to earned surplus.

The steam plant was in operation and the year was one of low river flow. Reported income is adjusted as follows:

Gross revenue		$2,960,400
Expenses	$883,300	
Depreciation	220,800	1,104,100
Balance for investors		$1,856,300
Bond requirements		750,000
Balance for common stock		$1,106,300
Per share on 107,462 shares		$ 10.29

1926

The reported "balance brought down" (revenue less expenses, taxes and maintenance) was $2,146,953; $230,053 was transferred to depreciation reserve and $200,000 to "contingent fund" by charges to earned surplus.

The year was one of supernormal river flow; agreement as to tail-water level was reached with Susquehanna Power Company. Reported income is adjusted as follows:

Gross revenue		$3,103,709
Expenses	$956,700	
Depreciation	230,100	1,186,800
Balance for investors		$1,916,900
Bond requirements		745,100
Balance for common stock		$1,171,800
Per share on 107,462 shares		$ 10.90

1927

The reported "balance brought down" (revenue less expenses, taxes and maintenance) was $2,252,526; $243,144 was transferred to "reserve for renewals and replacements" and $200,000 to "contingent fund" by charges to earned surplus.

The year was one of above normal river flow. The reported income increased somewhat because of the merger of Holtwood Power Company and Pennsylvania Water & Power Company late in 1927 and the inclusion of the [22159] (page 7) income of Holtwood instead of the dividends received by Pennsylvania. Refunding of the Holtwood Company bonds at a saving was prospective.

Preliminary work and surveys under way on the Safe Harbor project; the land and riparian rights were owned. A new forty-three year contract was entered into with Consolidated Gas Electric Light and Power Company of Baltimore, which included provision for adjustment for charges in "factors entering into determination of the value of power supplied."

Effective May 31, 1927 the outstanding 107,462 $100 par value common shares were changed to stock without

par value on the basis of four shares of new stock for each share of old stock. (Prices of the new shares reported for July) Common dividends were paid at the rates of 2% for the first two quarters, and 62½ cents for the second two quarters of the year.

Reported income is adjusted as follows:

Gross revenue		$3,525,300
Expenses	$1,272,800	
Depreciation	243,100	1,515,900
Balance for investors		$2,009,400
Bond requirements		740,300
Balance for common stock		$1,269,100
Per share on 429,848 no par shares		$ 2.952

1928

The reported "balance brought down" (revenue less expenses, taxes and maintenance) was $2,853,060, $345,574 was transferred to "reserve for renewals and replacements" and $150,000 to "miscellaneous reserves" by charges to earned surplus.

The "contingent fund" was renamed the "equalization reserve" and $300,000 transferred to that account was not shown in the income statement.

The year was one of above normal river flow. The 6% bonds of Holtwood were refunded early in the year by 4½% Series B bonds.

A part of the increased amount shown as gross income was the result of including in the parent company accounts for the full twelve months of 1928 items which previously had been shown in a separate statement of Holtwood Power Company.

Engineering, design, surveys and property acquisitions continued for the Safe Harbor project.

Reported income is adjusted as follows:		
Gross revenue		$4,388,100
Expenses	$1,535,000	
Depreciation	345,600	1,880,600
Balance for investors		$2,507,500
Bond requirements		845,000
Balance for common stock		$1,662,500
Per share on 429,848 shares		$ 3.868

[22160] (page 8)

1929

The reported "balance brought down" (revenue less expenses, taxes and maintenance) was $3,069,683; $352,102 was transferred to "reserve for renewals and replacements" and $120,000 to "miscellaneous reserves" by charges to earned surplus. The Safe Harbor Water Power Corporation was organized and construction was under way.

The amount of $352,102 is deducted from $3,069,683 to obtain the statement of gross income.

The quarterly dividend rate was increased from $0.625 to $0.75 for the last quarter of 1929.

1930

The reported "balance brought down" (revenue less expenses, taxes and maintenance) was $3,210,219; $355,147 was transferred to "reserve for renewals and replacements," $400,000 to "equalization reserve," and $120,000 to "miscellaneous reserves" by charges to earned surplus.

An unprecedented drought in 1930 resulted in the lowest "stream flows ever recorded in the eastern central states." Substantial withdrawals were made from the stabilizing reserve but more was credited than was taken

out. Attention was called to the fact that $161,193 more was paid out in common dividends than during 1929.

Reported income is adjusted as follows:

Gross revenue		$4,835,600
Expenses	$1,625,300	
Depreciation	335,200	1,980,500
Balance for investors		$2,855,100
Bond requirements		914,100
Balance for common stock		$1,941,000
Per share on 429,848 shares		$ 4.416

1931

Reported "net revenues" of $3,096,304 do not require adjustment, but bond interest in the amount of $1,066,800 is substituted for the actual requirements of $1,040,163.

Under a new power agreement dated June 1, 1931 the annual payments of Consolidated to Pennsylvania and of Pennsylvania to Safe Harbor took "the form of annual sums independent of the amount of output. Hence it will no longer be necessary for your company to equalize its earnings to eliminate the effect of variations in river flow as heretofore. . . . The new contractual arrangement with the Consolidated Company covers a period of forty-eight years and constitutes virtually a guarantee of earnings on your Company's capital stock, since all the payments which the Consolidated Company is obligated to make to your Company are an operating expense of that company and thus come ahead of the dividends on its own preferred and common stock." (Annual Report).

Following the power agreements of 1931 the equalization reserve was reduced and the excess carried to "miscellaneous reserves," where it was available for write-down of unamortized debt discount and expense. A con-

tingent liability to Consolidated Gas Electric Light and Power Company of Baltimore until 1937 was reserved for and a twenty year agreement for Electrification of the Pennsylvania Railroad was announced on October 7.

[22161] (page 9)

The first two units of the initial installation of six units at Safe Harbor began to deliver power to Baltimore in December.

1932

No adjustment of reported income is required. It is stated that the issuance of $5 preferred stock has been authorized and that a transmission line to Washington is under construction. The Safe Harbor Company went on a normal operating basis as of July 1.

1933

3,829 shares of $5 preferred stock, with total dividend requirements of $19,145 were sold to the common stockholders through subscription rights (offered in February, 1933).

No adjustment is made to reported income. If bond and preferred stock requirements were adjusted to the year end basis the result would be as follows:

Gross income		$3,169,600
Requirements of senior securities		
Bonds	$1,055,400	
Preferred	19,100	1,074,500
Balance for common stock		$2,095,100
Per share on 429,848 shares		$ 4.87

1934

No adjustment of reported income is required. Plans for selling additional preferred stock were announced.

1935

An additional 17,664 shares of preferred stock were sold privately during April, 1935, making a total of 21,493 shares outstanding on which the annual dividend requirements were $107,465.

Reported income is adjusted by substituting $107,465 for the actual preferred dividend requirements of $85,385. For the last quarter of 1935 the annual dividend rate was increased from $3.00 to $4.00.

1936

No adjustment of reported income is required. Earnings were affected by the worst ice and flood conditions (March) in the Company's experience. A retirement plan is placed in effect and provision made for past service liability.

1937

No adjustment of reported income is required. The second 220 kilowatt line from Safe Harbor to Baltimore was completed. For the first quarter of 1937 the dividend rate was increased to $4.50 per year. Revised system of accounts prescribed by the Federal Power Commission and the Pennsylvania Public Utility Commission effective January 1.

1938

No adjustment of reported income is required.

On September 2 the Federal Power Commission adopted an order directing Pennsylvania Water & Power Company to show cause why a proceeding should [22162] (page 10) not be instituted against the Company for operat-

ing the hydroelectric facilities without a license granted pursuant to the Federal Power Act.

On November 1 the Federal Power Commission instituted an investigation with respect to navigability of the Susquehanna River and the authority under which the Pennsylvania Water & Power Company's facilities were maintained.

Towards the end of 1938 the "reserve for renewals and replacements" reached 15% and under the operation of the contract with Consolidated the operating income of Pennsylvania Water & Power Company decreased by $22,990 during the period.

1939

The Federal Power Commission issued an order against Safe Harbor Water Power Corporation, dated July 25, instituting a proceeding to determine if the charges under the contract for electric service were unreasonable.

At the instance of the Maryland Commission a supplemental agreement was entered into on September 29 with Consolidated in lieu of a provision in the 1931 contract which reduced the charges for power by approximately $750,000 a year and "net earnings (after income taxes) available for dividends by approximately $600,000 a year".

On November 3 the Federal Power Commission issued an order directing the Company to file with the Commission an application for a license to operate and maintain the Holtwood project. The Annual Report for 1939 states "If it is ultimately established that your Company must accept such a license, then the value of the Company's Holtwood plant may be materially adversely affected both because its 'net investment' may actually be materially less than either the present fair value or present book value of the property in question and also because the Commission may not accept as satisfactory proof the only now available evidence of actual expenditures made many years ago."

The reported gross income of $3,289,192 is subject to the following adjustment on account of the reductions in the charges to Baltimore for power:

Reported Gross Income		$3,289,192
Effect of agreement effective December 1, 1939	$600,000	
Less effect of supplemental agreement effective throughout 1939	355,147	
Difference	$244,853	
Less effect of further reduction for month of December	20,404	220,449
Difference		$3,068,743
Less adjustment of income taxes for reduction of interest (at 20%)		67,590
Adjusted gross income		$3,001,153

3¼% refunding mortgage (due 1964) bonds in the amount of $10,900,000 were sold December 22, 1939 to provide funds for the retirement of the previously outstanding 5% bonds; 3¼% mortgage bonds (due 1970) in the amount of $10,962,000 were sold in March, 1940, to provide funds for the redemption of [22163] (page 11) a like amount of first mortgage 4½% bonds. The pro-forma interest requirements of these refunding bonds was $710,500.

1940

On February 8 the Company filed in the Court of Appeals a petition for review of the Federal Power Commission order requiring Pennsylvania Water & Power Company to file an application for a license.

On June 11 the Federal Power Commission issued an order reducing the rates charged by Safe Harbor to Consolidated and Pennsylvania in an amount of approximately $350,000 per year.

On September 10 Safe Harbor filed in the Circuit Court of Appeals a petition for review of the rate order of the Federal Power Commission.

Net income as reported was after an income deduction of $145,367 for amortization over a sixty-one month period beginning March 1, 1940, of debt discount, premium and expense applicable to the Series B bonds redeemed as of March 1, 1940. Income deductions (after consideration of the refunding) are adjusted by $90,258, determined by discounting $145,367 at 10% for five years.

The balance available for common stock was approximately $2,221,000 and the earnings per share were about $5.17 on the basis of income as reported to the Federal Power Commission.

1941

On October 28 the Circuit Court of Appeals affirmed the order of the Federal Power Commission directing Pennsylvania Water & Power Company to apply for a license. The Company appealed to the United States Supreme Court.

On December 2 the order of the Federal Power Commission directing Safe Harbor to reduce its rates was set aside by the Circuit Court of Appeals as beyond the jurisdiction of the Commission.

Income deductions are adjusted by $119,145, determined by discounting at 10% for four years the charge of $174,440 for amortization of debt discount, premium and expense related to the Series B bonds redeemed March 1, 1940.

The balance available for common stock was approximately $2,177,000 and the earnings per share were about

$5.06 on the basis of income as reported to the Federal Power Commission.

1942

On February 16 the Supreme Court refused to review the decision of the Circuit Court of Appeals affirming the order of the Federal Power Commission requiring Pennsylvania Water & Power Company to apply for a license.

On April 6 the Supreme Court refused to review the decision of the Circuit Court of Appeals which set aside a rate order of the Federal Power Commission with respect to Safe Harbor, and as a consequence, Safe Harbor collected the full contract rates.

Reported gross income of $3,100,844 is adjusted by deducting $80,000 of other income, consisting of a dividend of $0.80 per share received from Safe Harbor Water Power Corporation in adjustment "for the lesser dividends received in 1941 from that Corporation." (Annual Report) p. 5.

[22164] (page 12)

Income deductions are adjusted by $131,059, determined by discounting at 10% for three years the charge of $174,440 for amortization of debt discount, premium and expense related to the Series B bonds redeemed March 1, 1940.

The balance available for common stock was approximately $2,292,000 and the earnings per share were about $5.33 on the basis of income as reported to the Federal Power Commission.

1943

On December 3 the Federal Power Commission ordered issuance of a major license for the period terminating June 30, 1970, subject to conditions.

Income deductions are adjusted by $144,165, determined by discounting at 10% for two years the charge of

$174,440 for amortization and debt discount, premium and expense related to the Series B bonds redeemed March 1, 1940.

1944

On September 1 the Federal Power Commission ordered separate investigations to determine whether the rates of Pennsylvania Water & Power Company and Safe Harbor are just and reasonable.

On December 5 the Pennsylvania Public Utility Commission instituted an investigation on its own motion into the reasonableness of the rates charged by Pennsylvania Water & Power Company.

Income deductions are adjusted by $158,582, determined by discounting at 10% for one year the charge of $174,440 for amortization of debt discount, premium and expense related to the Series B bonds redeemed March 1, 1940.

1945

No adjustment.

[22165] (page 13)

Notes on reported earnings per share

1931 was the first year in which the income statement contained in the Annal Report to Stockholders included an item labeled "net income". Therefore, the "available per share as reported" is limited to the period 1931 to date.

Moody's, 1932, 347, states earnings per share for prior years as follows:

1931—$4.78	1928—$3.84
1930— 4.55	1927— 2.92
1929— 4.37	

Moody's, 1927, 64, states earnings per share for prior years as follows:

1926—$10.90	1923—$8.26
1925— 10.41	1922— 8.81
1924— 9.81	1921— 7.90

The above statements by Moody's for the years 1921-1926 show "available for common dividends" after depreciation expense but before credits to contingent account and sinking fund reserve.

Moody's, 1924, 346, states earnings per share for prior years as follows:

1923—$6.54	1920—$6.48
1922— 7.86	1919— 7.26
1921— 7.90	1918— 6.92

The above statements by Moody's for the years 1918-1923 show "available for dividends" after credits to depreciation and contingency reserves.

Schedule 3

Electric and Electric - Combination Utility Earnings - Price Ratios
Mean of Medial Four of Six*
January, 1907 to December, 1945

Year	January	February	March	April	May	June	July	August	September	October	November	December

Schedule 4

Pennsylvania Water & Power Company
Experienced Cost of Debt Capital, Computed on a Sinking Fund Basis
(Amounts computed to nearest $100)

Issues Prior to 1923:
(Any uncompensated costs which may have been associated with these issues have been neglected in the following computation).

Issues Refunded in March, 1928, by First and Refunding Series B 4½%, due March 1, 1968:

Offered In:	First and Refunding Series A 5½% due Oct. 1, 1953 Nov., 1923	First and Refunding Series A 5½% due Oct. 1, 1953 July, 1924	Holtwood Series A 6% due Sept. 1, 1954 Oct?, 1924	Total Three Issues
1. Principal amount offered	$ 2,000,000	$ 1,000,000	$ 2,750,000	$ 5,750,000
2. Discount and Expense at Offering	196,300	40,000	162,800	399,100
3. Net Proceeds at Offering	$ 1,803,700	$ 960,000	$ 2,587,200	$ 5,350,900
4. Ditto, in percent of Principal Amount	90.18	96.00	94.08	
5. Periods of Amortization (a)	30 years	29 years	30 years	
6. Cost Rate to Maturity (b)	6.225%	5.785%	6.450%	
7. Percent of Principal Amount, After Accumulation of Amortization to Date of Refunding	90.79	96.22	94.32	
8. Proceeds accumulated to Date of Refunding	$ 1,815,800	$ 962,200	$ 2,593,800	$ 5,371,800
9. Annual Requirement at Date of Refunding	113,000	55,700	167,400	336,100
10. Effective Average Cost Rate of Group of Issues (b)				6.256%
11. Unamortized Discount and Expense at Date of Refunding (Item 1 minus Item 8)				$ 378,200
12. Call Premium	$ 195,000		$ 192,500	387,500
13. Duplicate Interest	none		none	none
14. Tax Savings Due to Refunding Costs (Cr.)	(47,800)		(40,400)	(88,200)
15. Total Amortizable Burden on this Group of Issues at Date of Refunding (Sum of Items 11, 12, 13 & 14)				$ 677,500
16. Cash Requirement of Refunding (Sum of Items 15 and 8).				$ 6,049,300
17. Net Proceeds of Refunding Issue (Item 23)				5,703,500
18. Proportion of Old Bonds Refunded from Proceeds of New Issue (Item 17 ÷ Item 16)				94.284%
19. Amortizable Burden Transferred to New Issue (Item 15 x Item 18)				$ 638,800
20. Balance of Cash Requirement of Refunding, Met from Equity Funds (Item 16 less Item 17)				$ 345,800

First and Refunding Series B 4½%, due March 1, 1968, Refunded in March, 1940, by Refunding and Collateral Trust 3¼%, due January 15, 1970.

	Offered in:	March, 1928	March, 1930	March, 1931	Total, Three Issues
21.	Principal amount offered	$ 6,000,000	$ 1,750,000	$ 3,500,000	$ 11,250,000
22.	Discount and Expense at Offering	296,500	210,300	272,000	778,800
23.	Net Proceeds of Offering	$ 5,703,500	$ 1,539,700	$ 3,228,000	$ 10,471,200
24.	Unamortized Costs of Refunded Issues Transferred (Item 19)	638,800	-	-	638,800
25.	Net Proceeds After Transferred Capital Costs	$ 5,064,700	$ 1,539,700	$ 3,228,000	$ 9,832,400
26.	Ditto, in Percent of Principal Amount	84.41	87.98	92.23	
27.	Period of Amortization (a)	40 years	38 years	37 years	
28.	Cost Rate to Maturity (b)	5.465%	5.230%	4.960%	
29.	Percent of Principal Amount After Accumulation of Amortization to Date of Refunding	86.25	89.33	93.08	
30.	Proceeds Accumulated to Date of Refunding	$ 5,175,000	$ 1,563,300	$ 3,257,800	$ 9,996,100
31.	Annual Requirement at Date of Refunding	283,700	81,800	161,600	526,400
32.	Effective Average Cost Rate of Entire Series (b)				5.266%
33.	Unamortized Discount and Expense at Date of Refunding (Item 21 less Item 30)				$ 1,253,900
34.	Bonds called for Sinking Fund				$ 268,000
35.	Principal Amount of Bonds Refunded				10,962,000
36.	Accumulated Proceeds with Respect to Item 35 (Item 30 x Item 35 ÷ Item 21)				9,740,200
37.	Unamortized Discount and Expense on Refunded Bonds				$ 1,221,800
38.	Call Premium				328,900
39.	Expense and Duplicate Interest				37,700
40.	Tax Credit				(212,800)
41.	Total Amortizable Burden Applicable to Refunded Bonds				$ 1,375,600
42.	Cash Requirements of Refunding (Sum of Items 36 and 41)				11,115,800
43.	Net Proceeds of Refunding Issue (Item 48)				11,205,900
44.	Percent of Old Issues Refunded From Proceeds of New				100.0

Issues Outstanding at December 31, 1945:

		Refunding and Collateral Trust 3¼%		
		Series Due Dec. 15, 1964 (c)	Series Due Jan. 15, 1970	Total
	Date Offered	Dec. 22, 1939	Jan. 27, 1940	
45.	Principal Amount Offered	$ 10,900,000	$ 10,962,000	$ 21,862,000
46.	Premium on Issue	218,000	328,900	546,900
47.	Expenses of Issue	(138,500)	(85,000)	(223,500)
48.	Net Proceeds at Issue	$ 10,979,500	$ 11,205,900	$ 22,185,400
49.	Unamortized Costs Transferred From Refunded Issue (Item 41)	-	1,375,600	1,375,600
50.	Net Proceeds After Transferred Capital Costs	$ 10,979,500(c)	$ 9,830,300	$ 20,809,800
51.	Ditto, in Percent of Principal Amount	100.73	89.68	
52.	Amortization Period (a)	25 years	30 years	
53.	Cost Rate to Maturity (b)	3.210%	3.830%	
54.	Remaining Term to Maturity at Dec. 31, 1945 (a)	19 years	24 years	
55.	Percent of Principal Amount After Accumulation of Amortization to Dec. 31, 1945	100.57	90.95	
56.	Proceeds Accumulated to Said Date	$ 10,962,100	$ 9,969,900	$ 20,932,000
57.	Annual Requirements as at Said Dates	351,900	381,800	733,700
58.	Effective Average Cost Rate to Maturity on Present Debt Capital (b)			3.505%

NOTES:

(a) Computed to nearest half-year.
(b) Computed to nearest .005 percent.
(c) The 3¼ series of 1964 was issued to provide for redemption at maturity of the original 5's of 1940. However, the proceeds of the 1964 series were more than sufficient to provide for the principal amount of the old issue plus the small amount of duplicate interest involved. For this reason, no costs related to the 5's of 1940 remain uncompensated at December 31, 1945.

Schedule 5

Pennsylvania Water & Power Company
Experienced Cost of Preferred Stock Capital

	3,829 Shares Issued March, 1933	17,664 Shares Issued April, 1935	Total
Gross proceeds	$ 373,328	$ 1,757,568	$ 2,130,896
Expenses	15,790	53,344	69,134
Net proceeds	$ 357,538	$ 1,704,224	$ 2,061,762
Annual requirements	$ 19,145	$ 88,320	$ 107,465
Effective cost rate	5.35	5.18	5.21

Schedule 6

Pennsylvania Water & Power Company
Overall Experienced Cost Of Capital as at December 31, 1945

			Percent of Total Capital
I. Division of Capitalization Among Security Issues: (b)			
A. Debt capital:			
1. Net proceeds, with amortization on sinking fund basis to Dec. 31, 1945, related to original principal amount of bonds now outstanding. (Schedule 4)		$ 20,932,000	
2. Less: Proportion applicable to bonds redeemed for the sinking fund.			
Original issue	$ 21,862,000		
Remaining bonds at 12/31/45	20,833,000		
Amount redeemed	$ 1,029,000		
Proportion of original issue redeemed	4.7068%	985,200	
Net proceeds of presently outstanding debt capital		$ 19,946,800	52.0
B. Preferred stock capital:			
Net proceeds (Schedule 5)		2,061,800	5.4
C. Equity capital:			
1. Balance of capitalization, per books, as at Dec. 31, 1945, after deduction of net proceeds of fixed income securities shown above. (Item D, less Items A and B)		16,349,900	42.6
Total capitalization (Item D, below)		$ 38,358,500	100.0
D. Statement of total capital at December 31, 1945 (b)			
1. Bonds outstanding		$ 20,833,000	
2. Preferred stock outstanding		2,130,900	
3 Common Stock, stated value		10,868,300	
4. Consolidated surplus:			
Reported amount	$ 6,298,300		
Less: Amount classified in Accounts 107 as at 1/1/37(a)	1,772,000	4,526,300	
Total capitalization		$ 38,358,500	

Schedule 6 (cont.)

Pennsylvania Water & Power Company
Overall Experienced Cost of Capital as at December 31, 1945

II. Computation of Overall Experienced Cost of Capital

	Reference	Proportion of Capital Supplied (Sec.I)	Applicable Cost Rates	Product Aggregate
Debt capital	Schedule 4	52.0%	3.50%	1.82%
Preferred stock capital	Schedule 5	5.4	5.21	0.28
Equity capital		42.6	9.25	3.94
Total		100.0%		
Overall cost rate				6.04%

Notes:

(a) From Statements H of Company's reports on Determination of Original Cost of Electric Plant Pursuant to Electric Plant Instruction 2-D of the Uniform System of Accounts...of the Federal Power Commission:

Items Proposed for Transfer to Earned Surplus -	
Pennsylvania Water & Power Company	$ (135,222.81)
Susquehanna Transmission Company of Pennsylvania	(423.32)
Pennsylvania Transmission Company	3,754.10
Total	(131,892.03)
Item Proposed to remain in Account 107	1,903,897.74
Total	$ 1,772,005.71

(b) On consolidated basis, per Company's annual report.

EXHIBIT No. 31

[22178]

Cost of Constructing
the Entire Physical Properties of the
Pennsylvania Water & Power Co.
and the
Susquehanna Transmission Company of Maryland
as of December 31, 1945

March 26, 1946

A study has been made of the cost of constructing and reproducing the entire physical properties of the Pennsylvania Water & Power Company and of the Susquehanna Transmission Company of Maryland as of December 31, 1945. This study was undertaken to determine what would be the cost of reproducing these properties as of December 31, 1945 by the use of modern construction methods.

The prices and costs as of December 31, 1945 will be hereinafter referred to as present day costs, although there have been increases in labor rates and the prices of materials in January and February 1946 and other increases have been authorized or are contemplated. For example, the union scale of wages in Baltimore for common labor went up from 80¢ per hour to 95¢ per hour on January 2, 1946. Truck drivers on December 31, 1945 were getting 75¢ per hour. A wage increase to $1.00 per hour may go into effect shortly. Likewise, the union wage scale for carpenters which was $1.67½ per hour on December 31, 1945 may soon go to $1.77½ per hour. Cement finishers will soon be increased from $1.50 to $1.72½ per hour. An increase in the price of steel by $5.00 per ton was authorized by the Federal Government on February 18, 1946. The present period, characterized by strikes and shortages of many materials is one of rapidly rising prices and costs.

Ceiling prices still prevail on many construction materials. Quotations being made on materials and equipment are usually subject to the price prevailing at the time of delivery. Deliveries for the most part are lengthy or indefinite. Contractors in general are unable to bid lump sum prices without large elements of contingencies to take care of the inflationary trend. Government contracts are being placed with escalator clauses. In view of all of these circumstances and the present unsettled period, we have in our study considered the prices and wage rates frozen as of December 31, 1945.

Methods Used in Determination of Present Costs of Construction

The cost of constructing or reproducing the physical properties of the Companies as of December 31, 1945 is based upon trending the original cost of the properties year by year to the present time. Retirements were deducted according to the year of installation so that the dollars that remain in each account represent the actual original cost of the surviving property, in other words, the actual original cost of the present property according to the year in which the money was spent. An exception to this has been made in the Holtwood Hydro Plant and the early transmission lines and substations, all of the original investment prior to the year 1912 being considered as made in 1912.

[22179] (page 2)

The history of the Companies was studied and a chronological statement has been prepared which shows that 57.4 per cent of the hydro property surviving was installed initially and that for the most part, the subsequent additions have been major ones. From the standpoint of reproduction, therefore, the method used lends itself to the single impulse theory of reproducing the entire property at one time. Deductions have been made or taken into ac-

count to allow for any factor for so-called "piecemeal" construction. Even if the entire property were reproduced under the single impulse theory certain elements would be placed in operation when completed and the construction of the remainder would be carried on while maintaining operation.

The dollars of the surviving original investment have been further segregated year by year in each account into labor, materials, and overheads. The materials have been further broken down into 26 classifications as follows:

1. Rails—Steel for R. R. track
2. Lumber—Timbers for cofferdam and heavy construction
   - Forms for concrete work
   - General lumber for houses and building purposes
3. Concrete—Concrete for the Dam and appurtenances
   - Concrete for Hydro and Steam Plant Substructures and Superstructure
   - Concrete for Cable Tunnels
   - Concrete for Substation Buildings
   - Concrete for Transmission Tower Footings
   - Concrete for Bus Compartments and floors
4. Structural Steel—Fabricated Structural Steel
   - Transmission Line Towers and Structures
   - Substation Structures and Supports
5. Wire and Cable—Copper Power and Control Cable
6. Metal and Metal Products—Manufactured Products such as:
   - Elevators, Lifts and Hoists
   - Switchgear including Auxiliary Oil Circuit Breakers
   - Lighting and Control Cabinets
   - Meters, Instruments and Gage Panels

7. Pipe—All kinds of Metal Pipe, such as Steam and Oil Piping for Steam Plant, Hydraulic Piping and Oil Piping for Hydro Plant
   Cast Iron Water Mains
   Air Piping and Ash Sluices
8. Other Building Materials—All building materials except those which have separate indices. This includes doors, windows, roofing, etc.
9. Plumbing and Heating—Covers heating systems and plumbing fixtures.
   [22180] (page 3)
10. Reinforcing Bars—Steel reinforcing bars for reinforced concrete
11. Steel Plates and Tanks—Covers fabricated steel plate and tanks
12. Iron and Steel—Covers semi-manufactured products such as lighting beams, stairways, gates, trash screens, cranes, rolling stock, steam boilers, and superheaters, ash sluices, coal conveyors, cyclone separators, etc.
13. Copper—For use as copper bus, copper tubing and connecting straps
    Copper for transmission line, conductors, ground wires, and counterpoises
14. Aluminum—Covers aluminum conductors, and aluminum cable steel reinforced
15. Furniture—Office furniture and fixtures
16. Motor vehicles—Passenger cars and trucks
17. House furnishings—For office use
18. Other Mechanical Equipment—Large manufactured products such as Hydraulic Turbines and Generators Steam Turbine Generators, and Air Coolers, Feed Water Heaters and Pumps

Water Supply System and Sand Disposal System
Condensers and Hot Well
Condensate Pumps and Steam Jet Air Pumps
Raw Water Pumps
Auxiliary Electrical Equipment including Feeder Voltage Regulators, Storage Batteries, and Charging Equipment
Main Exciter Units
Compressed Air Pumps
Main Oil Circuit Breakers
Lighting System for Operators Village, etc.

19. Conduit—Metal conduit for station covering lighting and control cables

20. Brick—All common brick and brick for boiler settings

21. Railroad Track—In power plants and spur tracks—also used for railroad relocation work—includes grading, culverts and drains, ties, rails, fastenings, special work, track laying, ballast, road crossings

[22181] (page 4)

22. Railroad Raising—Railroad relocation

23. Temporary Construction—Any temporary buildings afterward remaining for permanent use—none

24. Patrol Stations—For transmission lines

25. Village Houses—For Operators Village

26. General Overall—Largely labor items from which the labor dollars have been removed. A small amount of materials, blasting powder, dynamite

and caps, small tools, riprap where used, etc., in the following:

Clearing, grading sites
Excavations for dam, forebay and tail-race
Power House substructures, cable tunnels, frequency converter foundations and for substation structures, and substructures for transmission towers and special structures
Backfills and foundation preparations

The overheads have been further broken down year by year as the expenditures occurred into engineering, temporary construction facilities and payroll overheads, and taxes and interest.

In our determination of the present day costs of reproduction a study was made of the actual wage rates paid by the company and its predecessor for both skilled and common labor, and also of the union scale of wages in Baltimore, Philadelphia, and York, Pennsylvania for the various trades and for common labor. Since Holtwood is located about equidistant from Baltimore and Philadelphia, the largest labor markets in the area, and about 23 miles from York, Pennsylvania, it was assumed that in reconstructing the property about 40% of the labor would be drawn from Baltimore, 40% from Philadelphia and 20% from York. Composite rates were, therefore, developed for each skilled trade and for common labor on this basis with certain exceptions such as for hoisting engineers, crane and tractor operators, etc., for which there is no scale for York, these being normally drawn from Philadelphia.

In reproducing a property of this magnitude today, union labor would have to be used exclusively throughout on all of the construction work, although the Company does not now employ any union labor. However, no other

kind of labor is available for construction work of any kind except possibly some small residence. The wage and hour law prevails and the prevailing scale of wages in each locality is the union wage scale. We have, therefore, used as of December 31, 1945 the union wage scales prevailing in Baltimore, Philadelphia, and York for the purpose of reproducing the property, but since the original dollars were put in by Company wage scales, we have trended the original dollars for labor to the December 31, 1945 union wage scale to obtain as closely as ascertainable the present cost of reproducing the property.

[22182] (page 5)

To take into effect the large force that would be required for constructing the property under the single impulse theory and also to establish the proper proportion of skilled and unskilled labor, we have used the construction of the Safe Harbor plant, where very accurate construction cost records were kept, as a guide. From analyses of several Safe Harbor payrolls during 1930 and 1931, we have established a ratio of skilled and semi-skilled dollars and wage rates to common labor dollars and wage rates. This ratio was then applied to the ratio of the Company's skilled labor wage rates to its common labor wage rates each year, and a divisor thereby obtained so that the dollars of common labor and those of skilled labor were determined for each year, and each trended separately to December 31, 1945, and then recombined to obtain the present day value of the labor.

In the development of trend factors for materials, the indexes and average prices published by the United States Bureau of Labor Statistics were largely used as a guide with checks made from quotations and actual purchases made and from a study of the original contracts. In so far as obtainable today, identical equipment was used. When not obtainable, the modern substitute was used as a basis

for determining present day prices, except in those instances when to do so would require a complete redesign of the plant.

The dollars for the different classes of materials were then added to obtain the total dollars of materials by years and these were then combined with the total dollars of labor.

Overheads, Indirect Costs and Direct Construction Costs

To the basic pay of labor and the direct costs of materials, certain other charges are always incurred, and must be added to arrive at what is commonly called the "Direct Construction Cost." Practice varies in regard to the additions of these charges and as to what is included in the "Direct Construction Cost."

Starting with labor, there must be added a factor to cover additional compensation for overtime for all hours worked in excess of the basic 40-hour week. Most contractors in their estimates on building construction figure 10% additional for a 48-hour work week, although actually on the basis of time and one-half for all hours in excess of 40, this figure is 8 1/3%. We have approached this problem on the basis of a composite labor force with 70% of the force working a 45-hour week (five 9-hour days), 20% working a 48-hour week (six 8-hour days), and 10% working a 54-hour week (six 9-hour days). This gives percentages for overtime pay of 5.56%, 8.33%, and 12.97% respectively, but when allowance is made for rainy days every other week, the composite figure for overtime pay is reduced to 3.428%. This we have used, throughout the work for the various accounts for both inside and outside work and should be considered a minimum for overtime pay.

To the labor dollars must also be added a factor for employees liability insurance (Workmens' Compensation), State and Federal Unemployment insurance, and Federal

Old Age Benefits. A study was made of the number of workers that would be employed in a composite labor force, classified as to occupations and the results of this study were as follows:

[22183] (page 6)

	Total Insurance %	Labor Multiplier Incl. Overtime & Insurance
Pennsylvania		
Hydro Plant	5.66	1.09282
Steam Plant	5.17	1.08875
Transmission Lines	6.15	1.09799
Substations	6.00	1.09633
General Plant	5.60	1.093
Maryland		
Transmission Lines	7.54	1.11226
Substations	6.37	1.10016
General Plant	7.40	1.1108

In addition to the labor factors, there are other charges incurred in the design and construction of any large project whether the construction is carried on by contract, or with the owner's force. In a project of this magnitude, and because of the difficulty of the owner building up a large construction organization under present conditions of labor shortages, it is believed that the project could be constructed in less time and at less total cost by contracting for most of the work. There will, therefore, be incurred by the contractors certain expenses and in addition, thereto, a charge for the contractors' services.

To determine suitable bases for these charges, analyses have been made of the costs of the Safe Harbor Plant, the Holtwood Steam Station, the Transmission Plants, and the General Plants. The studies of Safe Harbor show actual

costs in terms of percentages for indirect and overhead charges were as follows:

HOLTWOOD HYDRO PLANT INDIRECT COSTS	Percent of Labor and Payroll Overheads + Material Costs (Safe Harbor Costs)	Percent Used for Holtwood Hydro
Constructors Fees & Expenses		
Contractor's Engineering & Superintendence	0.835	
Contractor's Accounting & Purchasing	1.352	
Contractor's Office Furniture Supplies & Expenses	0.160	
Total Contractors Exp.	2.347	
Constructors Fee & Administrative Exp.	3.456	
Total Constructors Charges	5.803	5.8
Other Indirect Construction Costs		
Construction Equipment	4.363	4.4
Temporary Construction & Service Facilities	7.801	7.8
Insurance (Other than Employee)	0.423	0.4
Testing Equipment	0.035	Omitted
Camp, Commissary, Hospital, etc.	0.089	0.25
Furniture & Equipment	0.137	
Suspense Account	7.023	Omitted
Total	19.871	12.85
Total Inc. Contractors Fees & Expense	25.674	18.65

[22184] (page 7)

Holtwood Hydro Plant Overhead Charges	Percent of Labor and Payroll Overheads + Material Costs (Safe Harbor Costs)	Percent Used for Holtwood Hydro
Engineering and Superintendence		
Consulting Engineers Fees & Expenses	0.547	0.50
Acct. 3941—Administrative	0.543	0.50
Acct. 3951—Eng. & Superintendence	7.667	7.50*
Acct. 3952—Accounting & Purchasing	0.220	0.25

**Excluding Legal Fees and Expenses

The suspense items included in accounts

3991 General Foreman, Guards, etc.
3992 Sickness and Vacations
3993 Small Tools
3994 Operation and Maintenance of Temporary Plant & Facilities
3995 Operation and Maintenance of Temporary Buildings
3999 Miscellaneous Charges

have been omitted from our application of indirect charges to the reproduction of the Holtwood Plant, because we were informed that these charges were in the original cost of the Holtwood Plant, and, therefore, would be duplicated. This does not apply, however, to our method of handling Account 321—Structures & Improvements, and 322—Dams and Waterways—due to our method of treating these accounts.

Legal Fees and Expenses amounting to $18,315 or 0.0105% of the labor and material base have been omitted from the application to Holtwood, because it is assumed that it would be covered in any valuation of water rights.

From the above percentages, multipliers were calculated to be applied separately to labor and material costs as shown below:

Material Multiplier

1.06 (Interest & Taxes) x 1.29 (Total before Interest & Taxes)

= 1.3674

Labor Multiplier

1.093 (Overtime and Insurance) x 1.3674 (Material Multiplier)

= 1.4946

[22185] (page 8)

HOLTWOOD STEAM PLANT

For the Holtwood Steam Plant, we have determined the additional direct, indirect and overhead charges as follows:

	Percent of Labor + Overtime Pay + Insurance + Material	
INDIRECT COSTS		
Constructor's Fee & Expenses	(Same as Used on Holtwood Hydro)	5.8
Camp Commissary & Hospital	(Same as Used on Holtwood Hydro)	0.25
Other Construction Costs Analysis of Holtwood Steam shows $9.17 less .06 Salvage	Used	9.2
Sickness & Vacation 0.63% of Labor	Omitted in this case.	
Total Indirect Costs		15.25
OVERHEAD CHARGES		
Engineering & Superintendence		
Consulting Engineers' Fee & Exp.	(Same as Used for Holtwood Hydro)	0.5
Administrative Charges	(Same as Used for Holtwood Hydro)	0.5
Field Engineering & Expediting	(Same as Used for Holtwood Hydro)	2.5
Office Engineering & Drafting		7.0
Accounting & Purchasing (Actual Costs Holtwood Steam 0.73)	Used	0.75

Office Supplies and Expenses (Actual Holtwood Steam 1.16) (Safe Harbor 1.394)			
Average	1.277	Used	1.25
Total Engineering & Superintendence			12.50
Preliminary Operating Expenses			
Actual Holtwood Steam 0.42%		Used	.40
Total Before Interest & Taxes			28.15
Taxes (Actual Holtwood Steam 0.10%)		Used	3.00
Interest (Actual Holtwood Steam 2.86%)			

From the above percentages, material and labor multipliers were determined as shown below:

Material Multiplier

1.03 (Interest & Taxes) x 1.2815 (Total before interest) = 1.3199

Labor Multiplier

1.088 (Overtime + Insurance) x 1.3199 (Material Multiplier) = 1.4361

[22186] (page 9)

TRANSMISSION PLANT

Analyses were made of the actual original costs of the indirect and overhead charges on transmission lines and substations. From these analyses, the present day costs were determined largely on the basis of reproducing the transmission plant in a short period of time. The construction work would be handled by general contractors.

	Actual Original Cost Percent of Labor and Material		
	Pa.	Md.	Pa. & Md.
(a) *Transmission Lines Only* (Accounts 341, 344, 345, 346 & 349)			
Payroll Insurance	3.56	4.29	3.92
Temporary Construction Facilities	8.69	6.13	7.30
Engineering	16.88	11.16	13.76
Interest & Taxes During Construction	3.67	4.56	4.14
(b) *Substations Only* (Accounts 342 and 343)			
Payroll Insurance	6.45	2.03	5.09
Temporary Construction Facilities	3.38	2.36	3.10
Engineering	17.12	11.85	15.70
Interest & Taxes During Construction	3.36	2.53	3.17

Further analyses were made of the actual original costs of the Westport, Washington, Perryville and Riverside Transmission Lines which were constructed in 1931, 1932, 1934 and 1937 respectively. These analyses showed that temporary facilities costs ranged from 4.97% on the Riverside Line, (1937) to a maximum of 12.63% on the

Perryville Line (1934) with an average of 8.63% for the four lines. Construction Equipment from 0.08% to 2.76% with an average of 1.35%, Suspense Accounts from 3.80 to 9.23%, with an average of 6.74%. Camp Facilities costs were incurred or shown for only one line, the Riverside Line, and amounted to 0.63%. We have figured the Camp Facilities separately, and have used the percentages shown on the following pages.

GENERAL PLANT

In order to determine the approximate direct and indirect costs and overhead charges for the General Plant property analyses were made of the actual original costs incurred for each primary account by the Pennsylvania and Maryland Companies.

For the Pennsylvania Company, the result of the analyses are shown below:

		Original Cost Percentages of Labor & Material			Cost of Reproduction Percentages Used by Us		
Acct. No.	P/R	Eng.	Temp. Facil.	Taxes & Interest	Eng.	Temp. Facil.	Taxes & Interest
371	4.12	18.75	6.5	2.36	11.5	6.5	3.0
372	4.31	11.00	0.117	0.745	11.0	0.117	0.745
373	-	0.54	-	-	0.54	-	-
374	6.2	20.40	6.36	-	11.5	6.36	-
375	6.1	18.00	6.32	0.17	11.5	6.32	0.17
376	7.15	11.10	0.555	7.80	11.1	0.555	2 80
377	3.56	7.85	1.07	1.04	7.85	1.07	1 04
378	4.81	24.00	3.45	3.26	11.5	3 45	3 00
379	6.18	13.75	4.03	-	11.5	4 03	

Similar analyses of the actual original costs of the Maryland Company were made and the results and percentages used by us are as follows:

		Original Cost Percentages of Labor & Material			Cost of Reproduction Percentages Used by Us		
Acct. No.	P/R	Eng.	Temp. Facil.	Taxes & Interest	Eng.	Temp. Facil.	Taxes & Interest
371	1.26	17.2	0.33	0.45	11.5	0.33	0.45
372	-	5.75	0.43	2.6	5.75	0.43	2.6
373	-		-	-	-	-	-
374	-	12.4	-	-	11.5	-	-
375	-	15.5	-	-	11.5	-	-
376	-	87.5	-	-	11.5	-	-
377	-	9.22	-	0.375	9.22	-	0.375
378	7.28	21.5	1.75	0.66	11.5	1.75	0 66
379	-	-	-	-	-	-	

From the above analyses and percentages adopted, material and labor multipliers were developed and applied separately for each primary account of the Pennsylvania and Maryland General Plant properties. The summary of multipliers used is presented here:

Acct. No.	Pennsylvania Multipliers Material	Pennsylvania Multipliers Labor	Maryland Multipliers Material	Maryland Multipliers Labor
371	1.2154	1.3275	1.1233	1.2358
372	1.145	1.2505	1.0894	1.1985
373	1.005	No Labor	None on Labor or Material	
374	1.1786	1.2873	1.1150	1.2267
375	1.1802	1.2890	1.1150	1.2267
376	1.1478	1.2536	1.1150	1.2267
377	1.1328	1.2372	1.0963	1.2061
378	1.1840	1.2932	1.13997	1.2541
379	1.1553	1.2618	None on Labor or Material	

SUMMARY

For the purpose of providing comparative data on 1945 Costs of Reproduction with the actual original costs year by year as they were incurred in the surviving property, the labor and material dollars as of December 31, 1945 were adjusted to give effect to the present day indirect costs and overhead charges, and are presented opposite the total cost of surviving property by primary accounts for each year. That is up to the end of the year 1944. In making the adjustment for the gross additions and retirements made in the year 1945, the larger retirements were adjusted to the 1945 cost of the dollars as of the year of installation. The 1945 gross additions were then added at actual cost.

and

SUSQUEHANNA TRANSMISSION COMPANY OF MARYLAND

OUTLINE OF ESTIMATING PROCEDURE SUBSTITUTE AND REPRODUCTION PLANT COSTS

As of December 31, 1945

In developing the cost as of December 31, 1945, for the physical properties of Pennsylvania Water & Power Company and Susquehanna Transmission Company of Maryland, as shown in the attached summary, two methods were used in determining the final cost. The first method utilized trend factors to adjust actual original cost to December 31, 1945, and the second involved a new estimate of the cost of a new "Substitute Plant" with unit costs as of December 31, 1945. The first method was applied to all physical property as described in a separate report, and

the second to those portions of the property where modern practices in design and operating procedure might have brought about some degree of obsolescence.

SUBSTITUTE PLANT

The major items included in the Substitute Plant are the hydro-electric development, the steam plant, the electrical equipment serving outgoing transmission lines at Holtwood, the double circuit 66 kv transmission line from Holtwood to Highlandtown, and the Highlandtown Substation. Three plans are attached showing general plans and sections of the proposed substitute plant. In the case of the steam and hydro plants certain necessary items are not included in the Substitute Plant but are retained at original cost or trended original cost. These include all Land and Land Rights, the [22253] (page 2) railroad relocation, the operators' village, the river coal plant and equipment, and all roads, trails, and bridges. Trended original costs were used for Transmission Roads, Trails, and Bridges. A more detailed reference to these items is made in the following description of Substitute Plant items.

HOLTWOOD SUBSTITUTE HYDRO PLANT

The substitute hydro plant is similar in design to Safe Harbor and other recent plants. The dam is located on the same axis as the existing dam and differs slightly from it except for length of spillway and the inclusion of a crest gate in the new design. The selection of the same site for the dam removed many of the uncertainties from the estimate of foundations, resulting in a more accurate estimate than is ordinarily possible. The length of free crest on the existing dam is 2368 feet with a 14 ft log sluice section, while the substitute dam has a free crest length slightly shorter and a 50 ft crest gate section as shown on the General Plans and Sections attached hereto. The new crest and gate section provide for a maximum discharge of 1,200,000 cubic feet per second with headwater at elevation

188 which is approximately equal to the present discharge capacity at that elevation.

In the design of the substitute power house full advantage is taken of modern developments in hydraulic turbine and generator design. The substitute plant has four main generating units instead of the original ten. The normal rating of each hydraulic turbine is 35,100 horsepower at 51 ft net head. The generators consist of three 25 cycle machines with a rating of 27,500 kva, or 25,500 kw, at .925 power factor and one 60 cycle machine with a rating of 30,000 kva, or 25,500 kw, at .85 power factor. These four units give the plant a normal capacity of 102,000 kw in the main units. The turbines are of the adjustable 5-blade propeller type which provide for high efficiency under all operating conditions.

Two Station Service Units are also provided, which are rated at 1000 kva or 750 kw at .75 power factor. The turbines for these units are vertical Francis type units with a normal rating of 1050 hp at 51 ft net head.

The arrangement of the power house, skimmer wall, deflection wall and tail race is much the same as in the present plant except that the power house length is materially reduced through elimination of six units.

Equipment design for the power house follows conventional present-day practice and besides the Generating Units themselves includes head gates, draft tube gates, operating cranes, trash racks, draft tube unwatering pumps, power house crane and [22254] (page 3) miscellaneous tools and devices.

The power house itself has concrete substructure, intake and electrical bay with the superstructure constructed of brick with structural steel frame. The roof of the electrical bay is designed to support step-up transformers for outgoing transmission lines and the power house roof is used to support substation steelwork for the outgoing lines.

Main switching control and protection equipment up to the low tension terminals of the step-up transformers

is included in the substitute hydro-plant estimate as is the 25/60 cycle frequency converter. The estimate for switching and control includes a double bus arrangement for both 25 cycle and 60 cycle sections. Control and switching for generators, outgoing lines, frequency converter, station service and steam plant circuit is provided.

The frequency converter is a 31,250 kva, 25/60 cycle, synchronous-synchronous type machine rated at 25,500 kw at 0.81 power factor. The rating of the machine is determined by load requirements on both the 25 and 60 cycle systems correlated with the main generator size and output.

Transformers and high voltage switchgear are described under the Transmission system.

COMPARISON WITH PRESENT HYDRO

The property replaced, consisting of the present dam, deflection wall, skimmer wall, power house and bulkhead section, is of similar nature but of earlier design. The major difference is in the power house and equipment. The present power house measures 173 feet by 510 feet in plan whereas the substitute power house would be 102 feet by 372 feet. The housing over the intake makes an appreciable difference in width since it is eliminated in the substitute design and the reduction in the number of units reduces the length materially. The width for the substitute power house includes the electrical bay on which the new outdoor transformers are to be placed. These factors all operate to reduce the substitute power house cost as compared with the trended reproduction cost as indicated below.

Power House Cost—December 31, 1945

Substitute Plant	$5,501,738
Trended Reproduction	$7,837,311

The second major difference in the substitute hydro plant lies in the equipment. The ten original units were installed between 1910 and 1924 and range in size from 10,000 kw to 12,000 kw. [22255] (page 4) Their total ac-

tual capacity operating at full load is 103,500 kw. The substitute generators are rated at 102,000 kw for the main units and 1,500 kw for the station service, making the total capacity equal to the present plant, or 103,500 kw. However, the new equipment would be more efficient and the total capacity reached with a flow of 28,500 cubic feet per second as compared to 31,500 cubic feet per second required to reach full capacity in the present plant.

The frequency converter installation in the present plant is 12,000 kw, or equal in size to the two 60 cycle generators. In other words, total available 60 cycle capacity with one unit out of service would be 24,000 kw. This situation is duplicated in the substitute plant which has one 25,500 kw unit and one 25,500 kw frequency changer. With either of these out of service, the 60 cycle capacity of the plant would be 25,500 kw or just slightly more than provided at present.

The total cost of equipment to be installed in the substitute power house is also materially reduced because of the decrease in the number of units installed in spite of the fact that the adjustable blade units are inherently more expensive than the older Francis type as indicated below.

Hydro Plant Equipment Costs—December 31, 1945

Substitute Plant	$ 9,158,831
Trended Reproduction	$12,346,739

PRESENT ITEMS RETAINED

Items of the original hydro plant which are retained in the 1945 cost at trended reproduction or original cost are:

Land	Original Cost
Railroad Relocation	Trended Cost
Operators' Village	Trended Cost
Roads, Railroads and Bridges	Trended Cost

The railroad relocation, the operators' village, and roads, railroads and bridges are not estimated in the sub-

stitute plant because no functional obsolescence can be found and their reconstruction today would follow the original pattern in all material aspects.

[22256] (page 5)

For the Hydro Plant substitute plant estimates represent $21,962,564 and trended reproduction costs $7,016,989 of the total estimated cost as of December 31, 1945 of $28,979,553.

HOLTWOOD SUBSTITUTE STEAM PLANT

The estimate for the substitute steam plant covers a single unit station of the same capacity as the present plant. Two separate buildings are provided as at present, one housing the steam turbine and boiler and the other housing the coal preparation plant. Both have concrete foundations, steel frame and brick exterior walls. The substitute structures are located in approximately the same sites as the present plant.

The main generating unit is a 25,000 kw, 13,800 volt, 60 cycle turbo-generator using steam at 650 lb per square inch pressure and 825 degrees throttle temperature. The electrical end is rated at 29,400 kva, allowing for 25,000 kw at .85 power factor. The steam end is gaged to carry a maximum load of 26,500 kw and this amount could be carried by the unit as long as the power factor is .90 or better.

The boiler is a Stirling type bent tube unit, rated at 275,000 lb of steam per hour and capable of delivering a maximum of 300,000 lb per hour when steam for heating and melting ice is in demand. Air heater and economizer are provided for maximum efficiency as are all the usual boiler auxiliaries including automatic combustion control. A Cotterell electrostatic precipitator is installed on the boiler house roof for fly ash collection.

Condensing water for the plant is taken from the pond above the dam through a screen house and intake tunnel.

The water is returned to the pond through a discharge tunnel so arranged as to prevent recirculation.

The coal handling and preparation equipment in the substitute plant provides for receiving coal from the River Coal Plant (included in the trended reproduction estimate) in a track hopper. Equipment is provided at the hopper to transfer the coal to the storage yard through a skip hoist and drag scraper. Storage of the wet coal in the yard for a time tends to reduce the moisture content and consequently makes the drying operation easier.

When the coal is reclaimed from storage it is delivered to two 500-ton wet coal bunkers. From these main storage bunkers the coal is delivered to two small 25-ton bunkers which feed the two dryers. The rotary type dryers are designed to reduce the moisture content of the coal from 20% to 2%. After the coal leaves the dryers it is carried through conveying and weighing equipment to two pulverizing mills designed to reduce the coal to a fineness suitable for burning. The pulverized coal is delivered from the mills through a transport pump and 5 inch steel pipe to the 100-ton pulverized coal bunker in the boiler room.

[22257] (page 6)

Auxiliaries for the steam plant include a compressed air system, fire protection system, power house crane, elevator in the boiler house and miscellaneous small items.

The electrical system at the steam plant is relatively simple, consisting only of the necessary controls at the turbine cables for delivering the generator output to the hydro plant, control cables and steam plant auxiliary equipment switching and control. The generator operates at 13,800 volts and is tied in to the system on the 13.8 kv, 60 cycle bus in the hydro plant. There is no 13.8 kv switching in the steam plant. The generators are excited by direct connected main and pilot exciters, with an emergency tie to the spare exciter in the hydro plants. All main electrical controls for the generator are likewise located in the

hydro plant. Electrical equipment is provided in the steam plant for plant auxiliaries. A central switchgear group is provided in the steam station and the coal preparation plant. Local groups are also provided in the steam station, strategically situated for operation of the auxiliary equipment, but these are kept to a minimum in the coal preparation plant on account of the severe operating conditions with respect to dust and heat. The type of switching equipment used is the modern fully enclosed unit construction. Other electrical items included consist of the necessary power and control wiring for plant auxiliaries, a d-c system for the coal feeders, grounding and lighting.

COMPARISON WITH PRESENT PLANT

The present steam plant has two units presently rated at 26,000 kw, operating at 350 lb per square inch pressure and 550° temperature at the throttle. Sufficient steam capacity is provided in three boilers to carry 26,000 kw. Because of the reduction from two units to one unit and from three boilers to one boiler, the size of the power house is reduced from 146 ft x 119 ft to 127 ft x 72 ft.

The increase in boiler and turbine pressure makes possible a reduction in the total amount of steam required from 375,000 lb per hour to 300,000 lb per hour.

The comparative cost of the structures and equipment in the present plant and the substitute plant are as shown below:

Comparative Cost—December 31, 1945

	Structure	*Equipment*
Substitute Plant	$1,666,117	$3,575,975
Trended Reproduction	2,006,810	4,139,851

These figures include the dryer and pulverizer building which do not differ greatly in the present and substitute plants.

[22258] (page 7)

The coal drying equipment and the puverizing equipment in the substitute plant is similar to the most modern equipment in the present plant.

ITEMS RETAINED AT TRENDED COST

The River Coal Plant is the only item in the original design for which no substitute plant is estimated. This consists of dredges, steam boats, tug boats, barges and their auxiliaries, together with the shore installation near the steam plant. The shore installation consists of a coal washing plant for separation of the coal from the sand and silt dredged up with it.

SUBSTITUTE TRANSMISSION PLANT

The intent of the substitute transmission plant is to evaluate an economical substitute for that portion of the transmission property which might indicate obsolescence to a sufficient degree to warrant investigation, as to the feasibility of replacement in accordance with modern practice. The elements of property coming under this classification are the Holtwood-Baltimore lines and the substation equipment at each end of these lines.

HOLTWOOD SUBSTATION

The substitute transmission substation at Holtwood consists of step-up transformers and other station equipment serving the Holtwood-Baltimore lines as well as other high tension lines out of Holtwood. While the obsolescence in transmission plant may be considered as involving primarily the Holtwood-Baltimore connection, the changes required for this purpose, together with the extensive changes involved in the substitute hydro plant at Holtwood, make it desirable to provide a substitute for all substation equipment at that location.

In the proposed arrangement the transformers are located on the roof of the electrical bay, similar to the

arrangement at the Safe Harbor plant. The high tension switching structure is mounted on the roof of the generator room. The switching arrangement includes no high tension circuit breakers, as the transformers are associated with specific lines and all load switching is done on the low-tension side except in emergencies. This follows the company's current practice for the past several years and also that of Safe Harbor. The low tension switchgear required for this purpose is included in the cost of the hydro plant.

COMPARISON WITH PRESENT PLANT

The major changes made in the substitute plant as compared with the existing plant are as follows:

The indoor 70 kv oil switches are eliminated; instead, air-break switches are substituted as they will provide equivalent switching service at lower cost.

[22259] (page 8)

Nine 3-phase power transformers, now located indoors, stepping up the 25 cycle power to 66 kv for transmission to Baltimore and Lancaster, are replaced by outdoor transformers, two banks stepping up power to 110 kv for transmission to Baltimore, and one 3-phase transformer stepping up to 66 kv for transmission to Lancaster. Little fundamental change is made in the 60 cycle arrangement. There is some adjustment in the sizes of transformers. There is also some change in the design of most of the transformers, particularly the 25 cycle units, to make use of modern developments such as inert gas atmosphere and air blast equipment for the higher loadings. Water cooling is eliminated.

HIGHLANDTOWN SUBSTATION

At Highlandtown a complete substitution is proposed for all property associated with transmission of power, except land. The storage and meter test facilities and the

garage located at this point therefore remain unchanged. The new substation facilities consist of an outdoor 110 kv switching structure with two transformer banks stepping down to 13.8 kv, and a low tension switchhouse containing the 13.8 kv switchgear, control switchboards, and service facilities. These replace the present 8 three-phase transformers which are all indoors, the indoor 70 kv switchgear, and the low tension switchgear which is inadequate to properly handle the short circuit requirements of the present system. The number of high tension circuits is reduced due to the use of larger transformer banks possible with modern designs and the use of two lines from Holtwood instead of four. The number of low tension feeder circuits increases somewhat because some feeders are now doubled up on the same circuit on account of limited space for switching facilities. The more adequate low tension switchgear permits elimination of the current limiting reactors now required. The spray pond and transformer water cooling equipment are also eliminated in the new design by the use of self-cooled transformers with air blast equipment for the higher loadings.

HOLTWOOD-BALTIMORE LINES

The transmission lines between Holtwood and Baltimore are completely revised in the substitute layout. The present four 66 kv circuits are replaced by two 110 kv circuits. The present four circuits are run in vertical arrangement on two tower lines on a common right of way. The two substitute lines are run in flat arrangement on separate tower lines, also on a common right of way which is wider than that for the present lines. The route is assumed to be the same as that traversed by the present lines. Overhead ground wires and underground counterpoise are included in the substitute lines, following the company's practice. In view of the numerous interconnections the substitute lines are deemed to provide reliability and serviceability substantially equivalent to that originally pro-

vided by the existing lines. By operating at higher voltage with somewhat larger conductors the substitute lines will have a smaller power loss, thereby improving both the operating revenue and the effective system capacity. Assuming unity power factor on the Holtwood end of the lines, the losses [22260] (page 9) on the proposed circuits will be approximately 48% of the losses over the existing lines with a nominal load of 75,000 kw.

OTHER LINES

There is a portion of the Gunpowder transmission line now located on a portion of the same right of way at the Baltimore end of these lines. The costs used for the substitute lines disregard this condition, on the assumption that it is irrelevant to the problem and would not materially alter the overall cost picture. The company owns and operates a number of other transmission lines in both Pennsylvania and Maryland. As these are considered fully adequate for present requirements no substitution is planned for any of them. The relocation of transformers at Holtwood would require some rearrangement of the Holtwood terminations of some of these lines but no cost allowance has been included in our estimates for this as it would not substantially affect the value of the property.

OTHER SUBSTATIONS

There are also a number of other substations and switching stations which the company owns and operates. No substation plant has been figured for these as they are considered adequate and sufficiently modern.

SOURCE OF UNIT COSTS AND QUANTITIES

For the major items of equipment in the substitute plant such as hydraulic turbines, generators, turbo-generator unit, boiler transformers, and other substantial items letters were obtained from manufacturers giving the price of the equipment in question. In other cases, prices on smaller items of equipment were obtained from manufac-

turers' representatives by telephone or from published price lists of the manufacturers.

For field construction unit costs of recent projects including some of the Tennessee Valley Authority costs on recent projects and the prices per unit of the Wolf Creek, Table Rock and Center Hill projects, where unit prices covering direct labor and material costs were not available from current operations, unit prices were built up from material costs and prevailing wage rates applicable to the Holtwood area and finally compared with Safe Harbor cost giving consideration to increase in cost trends.

Quantities were estimated from the General Plans and Sections of the proposed substitute plant. These quantities could be checked against original quantities in some cases and the results are sufficiently accurate so that a large contingency allowance for quantity overrun is not necessary.

[22261] (page 10)

TRENDING OF DEC. 31, 1940 COSTS TO DEC. 31, 1945

Most of the costs for the substitute plant were originally estimated as of Dec. 31, 1940. This was primarily because of the fact that no major construction of this nature was carried out between 1940 and 1945. The one exception to this is the steam plant equipment and its installation which is priced at Dec. 31, 1945 because of the difficulty of obtaining equipment costs as of 1940. Trend factors for the large equipment items in the steam plant are also at or near unity in any event and the number of comparable sales of equipment of this type in that period was small so that pricing of these items as of 1945 proved desirable.

The trend factors applied to the remainder of the substitute plant were developed from actual labor rates and material costs prevailing in the area on the two dates. Each account was analyzed to determine the percent labor and material costs involved, the division between common

and skilled labor and the type of material involved. From these facts and the material and labor costs combined trend factors (covering both material and labor) were developed. Direct labor and material cost for the substitute hydro plant increased 21% from Dec. 31, 1940 to Dec. 31, 1945. The corresponding figure for the substitute transmission plant of both companies was 16%. These compare with an increase in the Engineering News Record Construction Cost Index of 29.5% for the same period. Most of the substitute steam plant was not trended in this manner so no corresponding figure is available for it.

INDIRECT COST AND COMPANY EXPENSE

In all cases in the estimate for the substitute plant the unit prices used in the detailed estimate include only direct labor and material costs. Direct labor cost includes allowance for necessary overtime and payroll charges for social security, workmen's compensation, etc. Contractor's expenses and fee and other indirect costs of construction incurred by the contractor in carrying out the work are not included in the unit prices. These indirect costs amount to 18.65 percent for the hydro plant, 15.25 percent for the steam plant and 15.4 percent for the transmission plant. These percentages are applied and added to the direct labor and material cost.

In addition to the above certain expenses are incurred directly by the company because of the construction which are not covered by unit prices or indirect construction. These expenses include, legal expense, administration, field engineering, office engineering and design, accounting and purchasing, office supplies and expenses and preliminary operation. These total 10.85 percent for the hydro plant, 13.4 percent for the steam plant and 8.9 percent for the transmission plant and are applied and added to the direct labor and material costs.

[22262] (page 11)

The third item not included in direct cost is that covering contingencies. In this estimate the allowance is not as large as is usual in an estimate made from preliminary plans because foundation conditions are known at the present plant, therefore removing some of the uncertainties. The allowance for contingencies is 8.5 percent for the hydro plant, 7.5 percent for the steam plant, and 6.5 percent for the transmission plant.

These percentages are also applied and added to direct labor and material and a sub-total obtained covering direct cost of construction, indirect construction costs, company engineering supervision and expenses and contingencies. To this sub-total is added the final item covering interest and taxes during construction while the money is invested but as yet not capable of producing a return. The allowance for interest and taxes is 6.0 percent for the hydro plant, 3 percent for the steam plant and 3.1 percent for the transmission plant. These percentages are applied and added to the sub-total referred to above for the final cost as of December 31, 1945. The allowance for interest is based on a rate of 6% and construction periods ranging from a little over a year for the steam plant to 2½ years for the hydro plant.

In the determination of the amount of indirect costs and company expense we have been guided by the company's experience at Safe Harbor. A detailed explanation of these costs as experienced by the company is included in Estimate of Constructing and Reproducing the Entire Physical Properties as of December 31, 1945 by Chas. T. Main, Inc.

[22285]

BEFORE THE FEDERAL POWER COMMISSION

In the Matter of

Pennsylvania Water & Power Company and
Susquehanna Transmission Company of Maryland

IT-5915

TESTIMONY AND EXHIBITS OF DR. H. B. DORAU RELATING TO THE SUPPLY OF MONEY AND THE VALUE OF THE DOLLAR

Washington, D. C.
May 1, 1946.

Exhibit No. 33

[22286]

PROPOSED TESTIMONY OF H. B. DORAU

1-Q. Have you prepared an exhibit setting forth the the changes in the supply of money in the United States over the period of 1914-1946?

1-A. Yes, I prepared a tabulation and chart setting forth Deposits, Investments and Loans of All Banks, as well as Currency in Circulation and Gold Stocks in millions of dollars for the period 1914-1946.

2-Q. Will you briefly explain the meaning and significance of this exhibit?

2-A. The chart in this exhibit graphically sets forth the rise in total bank deposits, gold stocks and currency in circulation, 1914-1945 and the rise of loans from 1914 to 1929 and the subsequent decline of loans.

It can be readily and quickly seen that total deposits have gone through two periods of substantial increase since 1933. The first rise took place from 1933 to 1943, during which period total deposits rose from $36,919 million to $71,027 million. The second and even more rapid rise brought the total of the June 30, 1942 of $71,027 million to $137,688 million as of June 30, 1945.

3-Q. What is the meaning and significance of total deposits in dollars?

3-A. Total deposits in dollars measure the quantity of dollar money which the banks owe the depositors and which the depositors can withdraw from the banks and spend as they may choose, time deposits with notice, other deposits on demand. Total deposits measure the potential expressible money spending power of depositors. Deposit dollars are money and thus a major part of the money supply of the country. The increase in [22287] (page 2) deposits therefore measures, to a large extent, the increase in the supply of money in the United States.

4–Q. Are there other components of the money supply?
4–A. Yes, currency in circulation.
5–Q. Will you explain your exhibit in further detail?
5–A. With respect to currency in circulation, reference to the chart indicates a gradual increase until 1939 when a rapid rise began. From a level of $6,461 million as of June 30, 1938 the currency in circulation rose to $9,612 million in 1941, to $17,421 million in 1943 and to $26,746 million in 1945.

As of June 30, 1945 currency in circulation was more than eight times the amount of June 30, 1914, and more than four times the quantity as of June 30, 1938.

Gold stocks, because they are at least in theory the basis of our monetary standard of value, are also important. The gold stock of the country has increased from $1,699 million as of June 30, 1915 to $20,213 million as of 1945. The rapid increase in gold stock took place after 1933, since which date the rise has been five-fold.

In 1933 the total of deposit money and currency in circulation was $42,353 million, in 1945 the total of deposit money and currency was $164,667 million, or close to a four-fold increase.

The difference between total deposits and loans is also important. Loans represent the extent to which people are in debt to the banks as distinguished from deposits which reflect the extent to which banks are in debt to their depositors.

[22288] (page 3)

As of June 30, 1919, following the last previous war, the excess of deposits over loans may be seen by reference to the tabulation which is a part of this exhibit, to have been only $7,322 million ($32,012 million less $24,690 million). As of June

30, 1945 the excess of deposits over loans was $109,709 million, or fifteen (15) times the excess of deposits over loans in 1919.

6–Q. What is the economic significance of this substantial increase in the quantity of money for the determination of a fair return in utility regulation?

6–A. The money revolution in the United States since 1933 constitutes the largest monetary inflation in the history of the country. The increase in the number of dollars of money in the country since 1933, and even more strikingly since 1941, is without parallel and unprecedented in this country.

The dollar is the economic measure of investment and return, of sacrifice and income. The quantity of dollars is therefore one of the important factors determining the size of the dollar as a unit for the measurement of economic sacrifice and return.

The yardstick as a linear measure does not change in linear significance when the number of yardsticks is increased, but the size of the dollar as a standard of measurement tends to decrease with an increase in the effective quantity of spendable dollars.

A change in the magnitude of any unit of measurement and enumeration destroys its validity as a standard of measurement and [22289] (page 4) comparison.

Merely calling the changed unit of measurement by the same name does not make it the same. The summation of such changed units of measurement, simply because they continue to have the same label, is as invalid as adding pears, peaches, peas and persimmons. The accounting summation of unlike dollars does not measure the investment sacrifice.

If the mile as a unit of linear measurement should have changed in magnitude as the dollar has changed as a measure of sacrifice and gain, no sen-

sible person would draw any conclusions from a comparison of ton-miles of railway service in 1907, 1917 and 1935. Before any informed person would believe that the ton-miles in 1917 exceeded the ton-miles in 1935, he would demand that such calculations be translated into an equated or equivalent number of ton-miles on the basis of the relative magnitude of the different length of the miles used.

Progress in every field of human endeavor has depended on the establishment of standard and comparable units of measurement. When the horsepower was the power of a horse instead of the energy equivalent of 550 foot-pounds per second, the enumeration of horsepowers was of limited accuracy and meaning.

When the foot was literally a "foot-length" instead of, as now 12 inches, linear measurement and comparison were uncertain and unreliable. It would be no more inappropriate to add nautical miles and land miles than to add 1907 dollars and 1917 dollars, but no respectable geographer would do so.

If the mile as well as the dollar had been redefined at 59 percent of its former magnitude in 1934, geographers and engineers would not make comparisons and enumerations without equating and adjusting for [22290] (Page 5) the differences in the actual comparative magnitude of the standard of measurement.

7-Q. Can the differences in the dollar as a unit of measurement of economic cost and income be equated so as to afford a reasonably comparable standard for the measurement of investment and return in utility regulation?

7-A. Yes, the variability of the dollar as a unit of economic measurement can be measured with reasonable accuracy so as to afford the basis for equating one size dollar with another. The size of the dollar is

measured by the goods and services which it can buy. Money is but the medium of exchange and the dollar is the unit of measurement, but the dollar varies in its purchasing power, its exchangeability for goods and services, and thus in its size.

This variability of the dollar can be equated so that the dollars of different size can be *legitimately* added and expressed as the equivalent of a fixed and certain sum of any other size of dollar, just as the sum of nautical and land miles can be equated and expressed as either so many nautical miles or the equated number of land miles.

8–Q. Have you prepared an exhibit which sets forth the change in the yearly average size of the dollar over the period 1902-1945?

8–A. Yes, I have prepared a tabulation which sets forth the purchasing power change in the size of the dollar by years from 1902-1945 and a seven-year moving average from 1905.

Column 1 identifies the years from 1902-1945.

[22291] (page 6)

Column 2 records the wholesale price index as reported by the United States Department of Labor, Bureau of Labor Statistics, with the average for 1926 equal to an index of 100.

Column 3 translates the index of wholesale prices into the purchasing power of the dollar which is determined by calculating the reciprocal of the annual averages in Column 2, i. e., by dividing the index of wholesale prices into 100.

Column 4 records the total of the seven years of Column 3, i. e., the total of the years 1902-1908 for 1905, and for each succeeding seven-year group in the same way down to 1943, for which a five-year total is ascertained, and for 1944 for which year a three-year

total is determined, and for 1945, for which a one-year total is taken.

Column 5 records the calculated seven-year moving average of Column 3 plotted on the fourth year center, except that for the year 1943 a five-year average is calculated and recorded, for 1944 a three-year average, and for 1945 a one-year average.

Column 6 records the translation of the seven-year moving average index of the purchasing power of the dollar to an index with 1945 as 100 for ease of comparison.

9–Q. Does the United States Department of Commerce calculate and report the changing purchasing power of the dollar?

9–A. Yes, in the Survey of Current Business.

10–Q. Does it use the same index of wholesale prices which you have used?

10–A. Yes, the Department of Commerce calculates the purchasing power of [22292] (page 7) the dollar as the reciprocal of the index of wholesale prices.

11–Q. Why did you use a seven-year moving average, except as noted?

11–A. The period of time from 1902-1945 is long enough to accommodate a seven-year average and a seven-year average satisfactorily eliminates minor and short-term changes which are more in the nature of fluctuations.

12–Q. Why did you use a five and three-year average for 1943 and 1944 and the one-year average for 1945?

12–A. In order to taper off the seven-year average and bring it down to the current time and date of 1945. This is satisfactory and justified since the trend during these years was in the same direction and accelerating. Moreover, since the continuing trend in 1945 and 1946 is strongly in the direction of higher prices and a cheaper dollar, the result is conservative.

13–Q. What, in brief, does the index developed, in Column 6 of this exhibit, disclose as to the changing economic size of the dollar?

13–A. Treating the 1945 dollar as 100, or par, the dollar of 1905 was 73.2 percent larger. The average size of the dollar was larger than in 1945 in every year down to 1918. From 1918 to 1923 it was slightly and temporarily below 100, but since 1922 the purchasing power of the dollar has been above 1945 by as much as 42.3 percent in 1934 and on the average for the period 23 percent above 1945.

From 1905 to 1918 the purchasing power of the dollar was on the [22293] (page 8) average 50 percent above 1945.

From 1918 to 1923 it was on the average 5 percent below 1945.

For the entire period 1905-1945 the average purchasing power of the dollar on the basis calculated in Column 6, was 28 percent above 1945.

14–Q. Do you find in these evidences of the changing magnitude of the dollar any basis for the conclusion that the changes in the economic size of the dollar can be disregarded because the fluctuations are compensatory?

14–A. No. There is no evidence to support such an assertion in this exhibit or anywhere. I have just pointed out that the average of the entire period is 28 percent above 1945 and that in every year except five during a 44-year period the purchasing power of the dollar was above 1945. My use of a seven-year moving average is proper treatment of mere fluctuations in the short term and even if in the long term there were compensations, changing investments and investors would make the *assumption* of a constant dollar inequitable.

The long term trend, however, is not and has not been compensatory. The price level has been ris-

ing since 1897 and the dollar reciprocally declining in size. The trend continues. Forces and factors justifying the expectation that the dollar will continue to shrink in size are clearly in evidence. Among the more obvious of these factors are the unparalleled quantity of money, the rate of spending, the size of the public debt, and the new and high levels of wages.

15–Q. Has the dollar been legally re-defined during the period covered by your exhibit?

[22294] (page 9)

15–A. Yes, before January 31, 1934 the "dollar" was the name for 23.22 grains of fine gold; after January 31, 1934 the name "dollar" was used to mean 13.714 grains of fine gold. The legal post-1934 dollar is only 59 percent the size of the pre-1934 dollar. The dollar has been changed legally as well as economically, but the name remains the same, and so bookkeepers add and subtract these different dollars without distinction.

16–Q. Has the distinction between the calculation of economic sacrifice and return in nominal and actually comparable dollars been recognized in other economic areas?

16–A. Yes. In the field of wage determination and administration the distinction between nominal dollar wages and real wages is fully recognized and well understood by wage earners and others.

17–Q. What is the economic meaning of the term investment?

17–A. The investment process consists of converting liquid or alternatively applicable economic resources into indirect goods capable of income production. Investment involves the sacrifice of alternative goods and the alternative goods given up measure the investment.

An investment may be made through the medium of money (as is most common in our day) or by direct investment of labor, risk-taking and the cost of waiting or postponement of income to the future. The investment in any economic undertaking may and commonly does consist of both money investment and direct investment. In any case the investment is measured by the sacrifice made to produce a future [22295] (page 10) income, whether accounted for by bookkeeping or not, and whether in the form of money expenditures or direct sacrifices made without the intervention of the medium of exchange money.

18–Q. Assuming the *entire* investment of two enterprises to be reflected by the same number of accounted for dollars, does it follow that the investment in the two enterprises is the same?

18–A. No, it is the same only in the number of nominal dollars. If those dollars are not of equal size and economic significance, the investment sacrifice is not the same. If one was in 1918 dollars and the other in 1905 dollars, the actual investment would (as measured by the index of dollar purchasing power in Column 6 of my exhibit) be 73 percent greater in 1905 dollars than the investment of the same number of accounted for 1918 dollars.

A larger number of small dollars may actually constitute a smaller investment than a smaller number of larger dollars.

19–Q. What is the economic meaning of the investment standard for utility rate-making?

19–A. The investment standard proposes that the investor receive a fair return on the dollars (or dollar equivalent) which he gave up and invested, i. e., on the total sacrifice made. It is a sacrifice standard as distinguished from a value standard and cannot be fairly construed to mean the sacrifice of an equal number of other dollars since they would not measure the investment sacrifice made.

[22296] (page 11)

20–Q. Does the sum of the nominal dollars invested (in money and/or goods and services) measure the investment actually made, if made in dollars of different economic size and purchasing power?

20–A. Obviously not. An investment made by the sacrifice of dollars having a purchasing power of 100 would be equal to the investment of twice the same number of 50-cent dollars. It seems almost too simple to have to explain that an investment sacrifice of 1,000,000 hundred-cent dollars is the same as an investment of 2,000,000 fifty-cent dollars.

21–Q. Is it possible to express the nominal investment in an enterprise made in various kinds of dollars in terms of an equivalent number of dollars of equal size and equal investment significance?

21–A. Yes, very easily. The relative size and investment significance of the dollars sacrificed each year can be determined by reference to an index of purchasing power. By weighting the dollars invested each year by their purchasing power an average purchasing power dollar related to any desired base can be obtained and the investment in terms of any weight of dollar determined. In this way the constant dollar equivalent of the investment of heterogeneous dollars of different vintage and size can be determined.

22–Q. Have you applied this method to the dollars invested in electric plant in service of Pennsylvania Water & Power Company including Susquehanna Transmission Company to determine the investment sacrifice of 1945 dollars?

[22297] (page 12)

22–A. Yes, I requested that the Company provide me with a distribution of the $36,414,232 of electric plant in service (before adjustments and construction work

in progress and property held for future use) by years according to year of origin of the dollars of electric plant in service December 31, 1945.

The Company provided the desired information and I have used the same in the first numerical column of a two-page tabulation and chart which I have prepared.

23–Q. Will you explain this tabulation and chart?

23–A. Column 1 of the tabulation identifies the years from 1905-1945. Column 2 records the dollars of investment in electric plant in service December 31, 1945 according to the year of origin of the investment.

Column 3 repeats the moving average purchasing power of the dollar as previously developed with 1945 as an index of 100.

Column 4 of this tabulation expresses the equivalent number of 1945 dollars which were invested in each year in electric plant and which remained in service on December 31, 1945.

The original investment in electric plant recorded opposite each year for the period 1905-1945 in Column 4 is determined by multiplying the annual investment of each year of various size dollars by the factor in Column 3 which measures the relationship of the purchasing power of that year's dollars to 1945 dollars. To illustrate, in 1905 2,135,006 dollars were invested which represented electric plant in service as of December 31, 1945. The dollar of 1905 had 1.732 times the purchasing power of the 1945 dollar. Multiplying 2,135,006 by 1.732 results in the number of equivalent 1945 dollars in the amount [22298] (page 13) of 3,697,830.

By the same method the equivalent number of 1945 dollars was determined for the investment of each year which remained in service as of December 31, 1945.

The number of 1945 dollars which represent the equivalent investment sacrifice of the dollars recorded in Column 2 is found by adding the figures in Column 4 to obtain a total.

It will be seen that the 50,091,106 1945 dollars are the equivalent investment sacrifice of the 36,414,232 nominal dollars of various vintage and diverse size.

The accompanying chart sets forth the method and result graphically.

The purchasing power of the dollar of each year (based on the seven-year moving average) is indicated by a bar in size relative to the purchasing power of the dollar of 1945 as 100 cents.

Examination of this chart indicates that the size of the dollar of 1905-1918 was consistently and substantially in excess of the economic size of the dollar of 1945; on the average it represented a 50 percent greater investment.

These were the years in which a substantial part of the investment remaining in service December 31, 1945 originated, as may be observed by reference to the first numerical line below the graphic section of the chart, and the years 1905, 1906, 1907 and 1910 in particular. Other years of large investment were 1923, 1924, and 1925 when the purchasing power of the dollar was not much above what it is in 1945. The large investments of the years 1931, 1934 and 1937 were, however, made in dollars of substantially larger purchasing power and investment sacrifice than 1945 dollars.

[22299] (page 14)

The dotted horizontal line affords a convenient reference for comparison of the investment sacrifice of each year with 1945. It will be readily seen that except for the years 1919, 1920, 1921 and 1922, in-

vestments of all years are in dollars representing greater investment sacrifice than 1945 dollars.

The second numerical line records the number of equivalent 1945 dollars invested in each year, the third numerical line cumulates the annual investments in nominal dollars which adds up to $36,414 thousand in 1945.

The fourth numerical line cumulates the annual investment in 1945 dollars found in the second line. It will be seen that in each year the cumulative total in 1945 dollars exceeds by a substantial margin, the cumulation of nominal dollars invested up to that year and in service December 31, 1945.

Relating the cumulative 1945 dollars, as of 1945, to the nominal dollars of the same year, cumulated, shows that the cumulative investment of 1945 dollars exceeded the cumulation of nominal dollars in 1945 by 37.6 percent.

The cumulative total of $50,093 thousand in the fourth line under the year 1945 fairly measures and expresses, in my opinion, the investment of electric plant in service on December 31, 1945 in 1945 dollars.

24–Q. Is this figure of $50,093 thousand the cost of reproduction of the electric plant in service as of December 31, 1945?

24–A. No, it is not. I had no intention of reflecting cost of reproduction which is an entirely different matter and this exhibit does not reflect cost of reproduction. This calculation reflects no appreciation [22300] (page 15) in *value* and the figure found does not measure the *value* of electric plant. This determination sets forth the number of 1945 dollars which measure the investment sacrifice of the dollars which investors actually gave up. I have merely calculated the number of dollars which would now command the same amount of goods in exchange as the dollars in-

vestment would have commanded at the time of their investment. Any small number of dollars would mean a sacrifice on the part of investors.

Reflecting the changed size of the dollar only operates to keep the actual investment quoted in terms of the same amount of *real* sacrifice of goods and services. It is a method of avoiding arbitrary devaluation of the actual sacrifice and in no way attempts to reflect revaluation, appreciation or present value. It is merely a way of avoiding arbitrary economic write-down of the basis of return. It only corrects for the bookkeeping fiction that all dollars are alike and measure the same amount of investment.

25–Q. Will you briefly explain the difference between your determination in this exhibit and cost of reproduction?

25–A. Cost of reproduction is evidence of present value and is determined by applying the present cost of the components of property to an inventory of the property components. The difference is that the determination of the equivalent 1945 dollar investment does not attempt or presume to reflect any *actual* increases in value; it reflects only the sacrifice made by the investment as measured by the size of the present day dollars in which size dollar the return is paid.

[22301] (page 16)

The price of goods can increase for two reasons, (1) an increase in the scarcity of goods, and (2) a decrease in the economic size of the dollar. This exhibit does not purport to reflect any actual increase in value, it only measures the investment made in a single size dollar of the purchasing power of 1945. It attempts only to establish what number of 1945 dollars measure the accounted for investment sacrifice made for the plant in use December 31, 1945.

26–Q. Is your determination in this exhibit the same as trended original cost?

26–A. No, it is not. Trending original cost involves the use of the current prices of commodities and labor which enter into the construction of a plant. Trended original cost would also reflect actual increases in value. It would reflect the extent to which components of plant had increased (or decreased) in scarcity as well as that increase (or decrease) in price which was nothing but the reflection of changes in the size of the dollar.

There is no reason or excuse, in my opinion, for identifying or confusing a calculation of the fair original cost or investment in homogeneous current dollars with either cost of reproduction or trended original cost. They are not the same and I have not pretended that they are the same.

27–Q. In your opinion is the fair original cost in homogeneous current dollars a useful fact in the determination of a fair return under regulation?

[22302] (page 17)

27–A. Yes, it is useful evidence for the determination of a fair return.

28–Q. Is it, in your opinion, useful for the determination of the rate base or the fair rate of return?

28–A. The fact as to the fair original cost or investment in homogeneous current dollars is alternatively useful for both purposes. It is useful evidence as to a fair rate base in terms of current dollars and useful for the calculation of a fair rate of return if applied to a rate base not expressed in dollars of current purchasing power. Unless the decreased significance of the dollar as a unit of economic measurement is recognized in either the rate base or the rate of return the *real* income on the investment will be arbi-

trarily decreased. In the instance of the Pennsylvania Water & Power Company, as far as electric plant alone is concerned, the real income would be decreased by the complement of the percentage relationship of $36,414 thousand to $50,093 thousand (72.7) or 27.3 percent.

Recognition of the fact that the actual investment made and remaining in service is measured and measurable by 50,093 thousand 1945 dollars, the size of dollar in which the return is paid maintains the economic parity of the investment.

SOURCE OF DATA

Moody's Bond Yield Averages are computed by Moody's Investors Service and are issued in their publications. The Bond Yield Averages are reproduced in Survey of Current Business, November 1937, 1938 Supplement, and March 1939. The above figures were taken from the last named source for the period from January 1920 to January 1939; and were taken direct from Moody's Bond Survey for the subsequent months.

COMPILATION OF MOODY'S BOND YIELD AVERAGES

In the compilation of Moody's Bond Yield Averages, daily yields for each individual bond are computed on the basis of closing prices. Unweighted arithmetic averages are computed to obtain each of the series shown. The monthly series are arithmetic averages of the daily figures.

Occasional substitutions in the bond list have been made when ratings have been changed, when a bond is called, when a bond sells too far above its call price, or because of approaching maturity. Suitable adjustments (usually small), which are gradually amortized, are introduced to prevent such substitutions from impairing the comparability of the series. No convertible or other unusual issues are included and the average maturity is close to 30 years.

Only 60 bonds were used in the averages from 1920 to 1927, inclusive. From 1928 to 1933, inclusive, 120 bonds were used, no adjustment being required to connect the two series. Since 1933 it has not been possible to find a sufficient number of representative bonds for some of the Industrial and Railroad groups, and therefore contain a less number from time to time. However, the averages for these groups are given equal weighting in combining them with other group averages.

KEY TO MOODY'S BOND RATINGS

Moody's Ratings are an indicator of the relative investment quality of bonds. The Ratings are defined by Moody's Investors Service as follows:

Aaa

Bonds which are rated Aaa are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as "gilt edge." Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.

Aa

Bonds which are rated Aa are judged to be of high quality by all standards. Together with the Aaa group they comprise what are generally known as high grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in Aaa securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long term risks appear somewhat larger than in Aaa securities.

A

Bonds which are rated A possess many favorable investment attributes and are to be considered as higher medium grade obligations. Factors giving security to principal and interest are considered adequate but elements may be present which suggest a susceptibility to impairment sometime in the future.

Baa

Bonds which are rated Baa are considered as lower medium grade obligations, i.e., they are neither highly protected nor poorly secured. Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

Source of data: The computations were made by the U. S. Treasury Department and represent monthly data which are averages of daily figures. Beginning January 1926, average yields are based on all outstanding Treasury bonds not due or callable for 12 years or more. Earlier figures are for Treasury bonds not due or callable for eight years or more, together with certain Liberty Loan issues. The yields are published in the Survey of Current Business from which the above figures were taken for the period prior to September 1942. Since then figures are from the Federal Reserve Bulletin.

1/ In April 1944, the series was revised (beginning February 1943) to include all outstanding partially tax exempt issues due or callable in more than 15 years.

COMMERCIAL LOAN RATES

AVERAGES OF RATES CHARGED CUSTOMERS BY BANKS IN PRINCIPAL CITIES

Cities Included - Reports are received by the Board of Governors of the Federal Reserve System from banks in 19 leading cities scattered throughout the country. These cities are as follows:

New York City

Seven Northern and Eastern Cities

Chicago	Buffalo
Boston	Cleveland
Philadelphia	Detroit
Pittsburgh	

Eleven Western and Southern Cities

San Francisco	New Orleans
Los Angeles	Seattle
St. Louis	Atlanta
Dallas	Baltimore
Minneapolis	Richmond
Kansas City, Mo.	

The 19 cities included in this list are representative financial centers of the country. They have large loan markets and interest rates charged by banks in these cities are probably more responsive to changes in general monetary conditions than are rates in other places. Because of the financial importance of these cities, their influence would predominate in any compilations of rates designed to show movements of interest rates in large cities. This would be true even though many more cities were covered. In other cities, and especially at country banks, rates are generally higher and fluctuate less in accordance with changes in money market conditions.

Banks that report customer rates have been selected by each Federal Reserve Bank from those that report their statement of condition each Wednesday. They account for at least three-quarters of the commercial loans made by all banks in the city where they are located. At the present time reports are submitted by 87 banks. Reports are requested for loans of branches or any other office that is not the head office only where such loans are made in substantial amounts.

Since March 1939, loans with maturity of 30 days to 12 months, inclusive, are reported separately from those with maturity of over 12 months. Loans with maturity of less than 30 days are not reported. In compiling published averages, only those rates on loans with maturity of 30 days to 12 months are used. Renewals during the period of loans previously made are included in the reports.

Source of Data: Commercial Loan Rates are compiled by the Board of Governors of the Federal Reserve System, and are contained in the Federal Reserve Bulletin.

(1) Includes income in kind as well as cash income.

(2) In addition to benefits payable under the Social Security program, this item includes pensions paid out by private industries and governmental agencies, compensation for industrial accidents, pensions to veterans, and also loans to World War veterans on their adjusted service certificates, and since June 1936 adjusted service certificate payments less prior loans. These latter items account for the sharp increase in this type of income in 1931 and 1936.

Source of Data: Statistics compiled by the U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce, and published in the Survey of Current Business. The above data for the years 1929 to 1941, inclusive, were taken from, and the twelve-months' totals for the years 1942 to 1945, inclusive, are based on the monthly figures contained in the aforementioned publication.

PART I

Written Statement

By order dated September 1, 1944 in Docket No. IT-5915, the Federal Power Commission instituted an investigation of the rates of Pennsylvania Water & Power Company (hereinafter sometimes "Holtwood"). Subsequently, on October 3, 1944, the Commission, by order, enlarged the scope of the investigation to include Susquehanna Transmission Company of Maryland (hereinafter sometimes "Susquehanna"), the wholly-owned subsidiary of Pennsylvania Water & Power Company.

Pursuant to the aforesaid orders, the staff of the Commission undertook an examination, among other things, of the accounts and records of Holtwood and Susquehanna. This report reflects the results of that examination.

Scope of Report

This report deals with the Companies' history, capitalization and plant investment. It includes a written statement which has been divided into three chapters as follows:

I. Corporate and Financial History

II. Early History of the Holtwood Project

III. Plant Investment

[22579] (page 2)

In addition to the written statement there are 39 schedules and 6 appendices. Schedule 1 is a consolidated balance sheet of Holtwood and Susquehanna at December 31, 1945 per books and as adjusted by the examiners to reflect adjustments and transfers from the companies' plant accounts. Schedule 2 shows the details of the adjusted plant balances. Electric plant in service as reclassified by Holtwood in its original cost studies is reconciled with the

original cost determined by the F. P. C. examiners on Schedule 3. The remaining schedules present the details of certain plant accounts and list and explain the examiners' adjusting entries. All schedules have been prepared on a consolidated basis. The appendices consist of balance sheets and statements of cash receipts and disbursements for predecessor companies.

Corporate and Financial History

Incorporation and Purposes

Pennsylvania Water & Power Company was incorporated January 13, 1910 in the State of Pennsylvania under the provisions of the Act of April 27, 1909 as a reorganization of McCall Ferry Power Company, which had in turn been formed by the merger on April 14, 1905 of Hillside Water & Power Company and Susquehanna Water & Power Company. Each of the latter companies had been incorporated in Pennsylvania on September 2, 1902 for the purpose of the storage and transportation of water and water power for commercial and manufacturing purposes and the development by [22580] (page 3) the use of the same, of electric current and power. Pennsylvania Water & Power Company derived its original franchise privileges from these early charters. The corporation has perpetual life.

Capitalization

Since its acquisition of the properties and franchises of McCall Ferry Power Company on January 13, 1910, in exchange for common stock and bonds, Pennsylvania Water & Power Company has been financed by additional issues of common and preferred stock and several bond issues, which are described in the following paragraphs:

Capital Stock: The various capital stock issues of the company are listed in the table below:

	Year	Shares Issued No. of Shares	Shares Issued Par or Stated Value	Shares Outstanding December 31, 1945 No. of Shares	Shares Outstanding December 31, 1945 Par or Stated Value
Capital Stock—$100 Par					
Authorized—					
85,000 shares (1910)					
50,000 shares (1923)					
Initial Issue—Note (a)	1910	84,950	$ 8,495,000)	Exchanged for No Par	
Issued for cash at 100	1923	12,743	1,274,300)	Stock in 1927—Four	
Issued for cash at 112½ (b)	1924	9,769	976,900)	New for One Old	
		107,462	$10,746,200		
Common Stock—No Par					
Authorized—					
540,000 shares (1927)					
Exchanged for Par Stock (b)	1927	429,848	$10,868,312	429,848	$10,868,312
$5 Cumulative Preferred Stock—No Par (c)					
Authorized—					
100,000 shares (1932)					
Issued for cash at 97½	1933	3,829	$ 373,327		
Issued for cash at 99½	1935	17,664	1,757,568		
		21,493	$ 2,130,895	21,493	$ 2,130,895

(a) Of the total initial issue of $8,495,000 par value of capital stock, $4,995,000 was given in exchange for an equal principal amount of McCall Ferry Power Company bonds on which $4,495,500 had been paid in (at 90). The remaining [22581] (page 4) $3,500,000 par value of stock was issued as a bonus in marketing $4,170,000 of Pennsylvania Water & Power Company bonds.

(b) The premium of $122,112.50 on the par value capital stock issued in 1924 was carried in a separate account for premium on capital stock until the exchange for no par stock in 1927 when the amount was transferred to the capital stock account.

(c) The preferred stock is redeemable at $110. per share plus accrued dividends, and is entitled to $100. per share plus accrued dividends in any liquidation.

The initial issue of capital stock was held in a voting trust from the time of its issue until November 1, 1912 when the trust expired by its own terms.

Bonds Issued: A summary of the Company's several bond issues is given below:

	Year	Issued Amount	Outstanding Dec. 31, 1945
First Mtge. 5% S. F. Bonds, due 1940			
Initial Issue (at 90) Note (a)	1910	$ 7,500,000	
Issued at various prices (85 to 95)	1911-23	5,000,000	
		12,500,000	
First Refunding Mtge. 5½% Bonds, due 1953			
Issued at 91-3/8	1923	2,000,000	
Issued at 96	1924	1,000,000	
		3,000,000	
First Mtge. 6% S. F. Bonds, due 1954 (b)			
Issued at 95	1924	2,750,000	
First Refunding Mtge. 4½% Bonds, due 1968 (c)			
Issued at 96	1928	6,000,000	
Issued at 88½	1930	1,750,000	
Issued at 93	1931	3,500,000	
		11,250,000	

	Year	Issued Amount	Outstanding Dec. 31, 1945
Refunding Mtge. and Collateral Trust Bonds 3¼% due 1964 (d) Issued at 102	1939	10,900,000	10,383,000
Refunding Mtge. and Collateral Trust Bonds 3¼% due 1970 (e) Issued at 103	1940	$10,962,000	10,450,000

[22582] (page 5)

(a) All bonds were sold for cash with the exception of the initial issue of $7,500,000 of 5% bonds due 1940 of which $3,330,000 were issued in exchange for an equal principal amount of McCall Ferry Power Company bonds (sold at 90) and the remaining $4,170,000 were sold for cash at 90 with a 50% common stock bonus.

(b) The First Mortgage 6% Sinking Fund Bonds due 1954 were issued in 1924 by Holtwood Power Company, a wholly-owned subsidiary, and were assumed by the parent company in 1927 when the subsidiary was merged.

(c) Proceeds from the sale of $6,000,000 of 4½% bonds in 1928 were used to redeem $3,000,000 of 5½% bonds due 1953 and $2,750,000 of 6% bonds due 1954.

(d) Proceeds from the sale of the 3¼% bonds due 1964 were used to redeem $10,903,000 of 5% bonds due 1940.

(e) Proceeds from the sale of the 3¼% bonds due 1970 were used to redeem $10,962,000 of 4½% bonds due 1968.

The indenture for the two series of 3¼% bonds now outstanding provide for their partial retirement through purchase or redemption by means of annual sinking fund payments of approximately $109,000 for each series. Specified premiums are payable for sinking fund redemptions beginning with 5% for the 1964 bonds and 6% for the 1970 bonds declining to 3/8% near the maturity of the issues. In addition the bonds of either series may be retired in whole or in part at any time on 30 days notice upon the payment of a declining rate of premium which at the present time stands at 5½% and 6½% for the 1964 and 1970 bonds, respectively, reducing to 3/8% for both issues near maturity.

Directors and Officers

The officers and directors of the Company as of April 6, 1946 were as follows:

[22583] (page 6)

Officers

President	J. A. Walls
Executive Vice President	J. L. Rintoul
Vice President	G. W. Spaulding
Treasurer	J. U. Diehl
Secretary and Asst. Treas.	W. H. Eichhorn, Jr.
Assistant Secretary	R. L. Bortner

Directors

P. S. Bush*	M. E. Noyes	G. W. Spaulding
G. T. Hambright	J. L. Rintoul	L. G. Tighe
E. B. Leisenring	T. E. Seelye	J. A. Walls
D. E. Williams, Jr.		J. S. Young

* Chairman of the Board.

Associated Companies

As at December 31, 1945, Pennsylvania Water & Power Company owned the entire issued capital stock and bonds of Susquehanna Transmission Company of Maryland and one-third of the capital stock of Safe Harbor Water Power Corporation. It also owned the entire issued stock of two inactive subsidiaries, Holtwood Coal Company and Susquehanna Canal and Power Company.

Susquehanna Transmission Company of Maryland: This company was organized by Pennsylvania Water & Power Company on April 19, 1910 under the laws of the State of Maryland by the consolidation of Susquehanna Pole Line Company of Harford County and Susquehanna Pole Line Company of Baltimore County, two companies which had been incorporated by McCall Ferry Power Company in 1907 in connection with the acquisition of rights of way for the Baltimore transmission line. Among other things, it was authorized in its charter to erect and operate pole lines for the transmission of electric current, and substations for raising or lowering the voltage of any electricity received. It has perpetual life.

[22584] (page 7)

The company owns the Maryland section of all transmission lines operated by its parent company. This construction was financed by the parent company in return for securities of the subsidiary. The transmission company has no net income and no surplus. All operating expenses are paid by the parent company which also waives all interest due on the subsidiary's outstanding bonds. The company is consolidated with its parent company in the statements appearing in this report.

Safe Harbor Water Power Corporation: This company was incorporated under the laws of Pennsylvania on January 6, 1930. It owns and operates a hydroelectric plant

on the Susquehanna River about eight miles above Holtwood, Pa. Pennsylvania Water & Power Company owns one-half of its Voting Class B stock for which it paid $3,000,000 to the affiliate. The remainder of the Class B stock and all of the Non-Voting Class A stock, representing two-thirds of the entire capital stock, are owned by Consolidated Gas Electric Light and Power Company of Baltimore.

Mergers of Subsidiary Companies

Holtwood Power Company: In December 1927, Pennsylvania Water & Power Company acquired all the franchises and properties of Holtwood Power Company, a wholly-owned subsidiary, in consideration for the delivery to that company of all its capital stock and the assumption by the parent company of the subsidiary's indebtedness. The subsidiary had been organized on August 9, 1924 to own and operate the steam-electric plant completed on August 15, 1925. The entire electric output of the plant was sold to the parent company.

[22585] (page 8)

Transmission Companies: In December 1939 Pennsylvania Water & Power Company acquired all the franchises and properties of Susquehanna Transmission Company of Pennsylvania and Pennsylvania Transmission Company, wholly-owned subsidiaries, in consideration for the assumption of the subsidiaries' liabilities and the cancellation of all their outstanding capital stock and bonds. Susquehanna Transmission Company of Pennsylvania was organized by the parent company on April 26, 1910 to own the Pennsylvania section of the Baltimore transmission line. Pennsylvania Transmission Company was organized on April 1, 1932 to own the Pennsylvania sections of the Safe Harbor-Westport and Safe Harbor-Riverside trans-

mission lines. The construction of the transmission lines was entirely financed by the parent company.

Other Subsidiary Companies

In addition to its utility subsidiaries, Pennsylvania Water & Power Company during its history organized two other companies which operated briefly. These were the Baltimore Electro Alloys Company, organized in 1915 for the manufacture of electric furnace products, chiefly ferrosilicon, and Holtwood Coal Company, formed in 1920 to develop a river coal market. The Electro Alloys Company discontinued its manufacturing operations in 1919, and after several years of inactivity was liquidated in 1931. Holtwood Coal Company was actively engaged in marketing river coal from 1921 to 1923 and later purchased coal for the parent Company's steam plant. It is now inactive.

[22586] (page 9)

Early History of the Holtwood Project

Promotion

The project for a hydroelectric development at McCall Ferry on the Susquehanna River was originated by Carl T. Hutchinson, an electrical engineer, who began the acquisition of properties and riparian rights on the river about 1901. His early acquisitions included an option on the properties of the York Furnace Power Company, a partnership which controlled the properties necessary for a development originally considered at York Furnace. These properties became the nucleus of the project which was finally located a few miles downstream at McCall Ferry.

In order to secure the right to build his dam, Hutchinson on September 2, 1902 formed two water power companies, Hillside Water and Power Company and Susquehanna Water and Power Company, located on opposite sides of the Susquehanna River in Lower Chanceford Township, York County and in Martic Township, Lancaster

County, Pennsylvania. His efforts to secure absolute control of the river above McCall Ferry were blocked by the Harlow-McGaw interests who were primarily interested in a development lower down on the river but owned an old canal which extended along the west bank of the river from Havre de Grace, Maryland, to Wrightsville, Pennsylvania. These canal rights were absolutely essential to Hutchinson's project. Failing in an attempt to have the canal charter rescinded, Hutchinson on April 14, 1903 entered into an agreement with the Harlow-McGaw interests under which he would be able to secure the necessary canal rights to build his dam in return for certain cash payments, some property transfers [22587] (page 10) on the lower river and the withdrawal of his interference at all other places on the river. Originally for six months, this agreement was extended to May 15, 1905. The agreement, although never carried out enabled Hutchinson to go ahead with his project.

Formation of Initial Syndicate

In February or March 1905 a syndicate was formed for the financing of the McCall Ferry project, managed by Henry F. Dimock (Hutchinson's father-in-law), S. R. Bertron (of Bertron, Storrs and Griscom, Bankers), and Charles F. Barney (President of Knickerbocker Trust Company), and a combined prospectus and underwriting agreement was issued dated March 1, 1905. This agreement proposed an initial development of 50,000 horsepower at McCall Ferry to be financed by the sale of $8,000,000 of 5% thirty-year bonds at 90 with a 50% stock bonus consisting of $4,000,000 of 5% cumulative preferred stock. The agreement was to become effective when subscriptions for $6,000,000 of bonds had been received. $4,000,000 of common stock was also proposed to be issued.

The chief financial interests behind the original underwriting were Bertron, Storrs & Griscom and Lee, Higginson & Company.

Harvey Fisk & Sons Enters Syndicate

In order to secure sufficient subscriptions, the original syndicate found it necessary to enlist the aid of Harvey Fisk & Sons of New York City. The exact nature of the arrangements made with the latter firm are obscure because no agreement has been found, if any existed, covering their arrangements with the original syndicate. However, Harvey Fisk & Sons apparently became Syndicate Managers and Bankers and on March 25, 1905 issued a Bond and Stock Purchase [22588] (page 11) Agreement between themselves as "Bankers" and the subscribers, severally, proposing the organization of a company to develop the McCall Ferry site, capitalized substantially as in the original plan but calling for a 45% Preferred Stock Bonus instead of a 50% bonus with the sale of the bonds, and for the present issuance of the entire $5,000,000 of Common Stock instead of $4,000,000 as proposed earlier. Harvey Fisk & Sons stated in the Bond and Stock Purchase Agreement that they "have been requested and are willing to aid in financing the said plan to the extent of taking agreements from the Subscribers for the purchase of bonds and preferred stock of the Power Company, of acquiring the bonds and stocks for delivery under such purchase, and of making or procuring the loans hereinafter mentioned." It was also stated in the agreement that the Bankers do not "assume any fiduciary relation of any kind, or any obligation to cause the plan aforesaid to be undertaken or carried out." Harvey Fisk & Sons performed the usual functions of a syndicate manager and banker. The firm subscribed to $100,000 principal amount of bonds.

Subscribers had the option of deferring payment of their subscriptions for at least three years after the initial installment of 20% had been paid, to be financed by loans to be secured by the Bankers, and the Bankers had the option, at any time before final delivery, to repurchase from Subscribers all or any part of their bonds at 90. This

option would permit the Bankers to sell the bonds at a profit if the opportunity arose before final delivery of the securities.

[22589] (page 12)

The subscriptions secured by the original syndicate (about half of the total) were apparently kept in force under the new arrangement and appear to have received the full 50% preferred stock bonus called for under the earlier plan.

Incorporation of McCall Ferry Power Company

On April 14, 1905 the two water power companies which Hutchinson had formed in 1902, The Hillside Water and Power Company and Susquehanna Water and Power Company, were merged to form the McCall Ferry Power Company by an exchange of one share of stock in the new company for each share of the outstanding stock of the old companies (5 shares each). The new company had the same incorporators, stockholders, directors, and officers as its predecessor companies, all nominees of Cary T. Hutchinson and his associates.

The initial capitalization of McCall Ferry Power Company was 10 shares, par value $100 each, but was increased to the following on June 13, 1905:—

First Mortgage 5%, 30 Year Bonds, dated June 15, 1905	$10,000,000
5% Cumulative Preferred Stock, $100 Par Value	5,000,000
Common Stock, $100 Par Value	5,000,000

Management of McCall Ferry Power Company

The management of the company was in the hands of its officers and directors, with an Executive Committee meeting frequently and performing most of the functions of the directors. They had the assistance of a Board of Advisory Engineers appointed by the directors.

[22590] (page 13)

The initial members of the Executive Committee and their business or other connections are given below:

H. F. Dimock	Hutchinson's father-in-law
C. A. Coffin	President of General Electric Co.
Gardiner M. Lane	Lee, Higginson & Company, Bankers
William M. Barnum	Harvey Fisk & Sons, Bankers
W. Barclay Parsons	Consulting Engineer

S. R. Bertron of Bertron, Storrs & Griscom replaced Gardiner M. Lane on the Committee in September 1905.

It is apparent from the above that all interests shared in the direction of the enterprise. The promoters were represented by H. F. Dimock, the original syndicate by Gardiner M. Lane (later S. R. Bertron), and Harvey Fisk & Sons by William M. Barnum. C. A. Coffin was identified with the original syndicate. W. Barclay Parsons was a member of the Board of Advisory Engineers. The examiners found no evidence that any one interest was primarily responsible for the management of the project or dominated it to the exclusion of the others. The active day by day management of the Company, including supervision of the construction work, was exercised by its officers.

The principal officers during the period of active construction were as follows:

President	H. F. Dimock
Vice President	J. A. Keppelman (later J. W. Kirkland)
Treasurer	W. H. Barnum
Secretary	Harold Pender
Chief Engineer	Cary T. Hutchinson

The company's stock was held in a voting trust formed under the terms of a stock agreement dated January 20, 1906 with H. F. Dimock, William M. Barnum and S. R. Bertron as the voting committee.

[22591] (page 14)

Acquisition of the Harlow-McGaw Properties

The distribution of the plans for the McCall Ferry project caused the Harlow-McGaw interests to protest to Harvey, Fisk & Sons that the proposal exceeded the limits intended by their agreement of April 14, 1903 and conflicted with their own plans for the development of the entire river from tidewater to Columbia by means of a series of five dams. Negotiations between the parties resulted in two agreements dated April 27, 1905 whereby Harlow-McGaw agreed to sell their entire interest along the river from Columbia to Havre de Grace to Harvey Fisk & Sons and S. R. Bertron for $200,000 in cash and $250,000 principal amount of bonds and $100,000 par value of common stock of McCall Ferry Power Company. These agreements superseded the April 14, 1903 agreement between Harlow-McGaw and Hutchinson and gave the McCall interests control of the vital west bank canal from tidewater to Wrightsville. The agreements were subject to a prior option for the river properties which Harlow-McGaw had granted to Charles D. Pullen who had also been attempting a consolidation of the conflicting interests along the river. The Pullen options were purchased by Bertron, Storrs and Griscom on April 29, 1905 for $10,000 in cash and the promise to deliver $15,000 par value of common stock of McCall Ferry Power Company.

Incorporation of Susquehanna Contracting Company

To provide a vehicle for the refinancing of the project, Susquehanna Contracting Company was organized in New York on June 12, 1905 with a capital of $500 divided into five shares of $100 each. The original directors, stockholders and officers of the company were as follows:

[22592] (page 15)

Name and Position Held	*Shares Held*
A. P. Bartlett, President and Director	3 shares
Ross A. Mackey, Secy-Treas. and Director	1 share
James E. Hopkins, Director	1 share

Shortly after its formation Harvey Fisk & Sons transferred to the new corporation the firm's entire rights and obligations under the Bond and Stock Purchase Agreement, but retained the right to repurchase the bonds from the subscribers at 90. The agreements for the purchase of the Harlow-McGaw properties and the Pullen options were also assigned to the Contracting Company.

Transfer of Properties to McCall Ferry Power Company.

On June 13th, the day following its incorporation, Susquehanna Contracting Company entered into an agreement with McCall Ferry Power Company whereby it agreed to transfer to the latter company all the properties and options to be acquired from Cary T. Hutchinson and associates, Harlow-McGaw, and Charles Pullen and to pay $6,400,000 in cash within three years as required by McCall Company, in exchange for $8,483,000 principal amount of 5% bonds, $4,116,500 par value of preferred stock and $4,999,000 par value of common stock of McCall Ferry Power Company. It was further agreed that the Contracting Company would refund to McCall Company the excess of bond interest received from McCall over interest and commissions paid by the Contracting Company in obtaining loans to finance the project.

Acquisition of Cary T. Hutchinson Properties.

On the following day, June 14, 1905, the Contracting Company entered into a contract whereby Cary T. Hutchinson was to transfer to the Contracting Company all property rights owned by him [22593] (page 16) or his associates on the Susquehanna River between Columbia and Havre de Grace, in exchange for $750,000 in cash and

$400,000 par value of preferred stock and $4,884,000 par value of common stock of McCall Ferry Power Company.

Distribution of McCall Company Securities

The execution of the above contracts left McCall Company in possession of most of the lands and riparian rights necessary for the construction of its project, and the right to call on Susquehanna Contracting Company for $6,400,000 cash for construction costs. The distribution to be made of McCall Company's securities on the basis of the various contracts already signed was as follows:

	Shares		*Principal*
	Common Stock	*Preferred Stock*	*Amount Bonds*
Issued in exchange for Cary T. Hutchinson's stock in merged predecessor companies	10		
Issued to Susquehanna Contracting Company in exchange for properties—			
Cary T. Hutchinson	48,840	4,000	
Harlow-McGaw Interests	1,000		$ 250,000
Charles D. Pullen	150		
Retained for Bond Subscriptions		37,165	8,233,000
	50,000	41,165	$8,483,000

Hutchinson apparently did not retain all the securities due him under his agreement with the Contracting Company but the circumstances of the ultimate distribution of the shares are not known definitely since none of the existing agreements cover this phase of the transaction. The common stock was held in a voting trust and the trustee's records are not available.

[22594] (page 17)

The common stock certificate book shows two certificates issued to the Contracting Company in August 1905; one for 18,840 shares and the other for 30,000 shares. No further change took place in these certificates until 1909 when 1,000 shares were issued to Thomas Newhall and another 1,000 shares to Lorenzo Semple in May and July respectively from the certificate for 18,840 shares. Photostatic copies of Bertron, Storrs & Griscom's investment records secured by the Company show the receipt of 12,462½ shares of common stock of which 5,000 shares were later transferred to Lee, Higginson & Company. Presumably, these represent part of the shares due Hutchinson under the contract of June 14, 1905. The distribution of the preferred stock due Hutchinson is similarly obscure.

Sale of Properties Below the Tailrace.

The properties acquired from the Harlow-McGaw interests were equally useful for the upper river development which was later made at Safe Harbor and the lower development now existing at Conowingo, since the Susquehanna and Tidewater canal extended along the river from Havre de Grace to Wrightsville. The McCall Company actively considered a development near Conowingo to be undertaken after the completion of the dam at McCall Ferry and made some studies to that end. In drawing up the agreement for the relocation of the Columbia and Port Deposit Railroad, provision was made for the eventual relocation of the railroad when the lower dam was built. In addition to the west bank canal, the McCall Company owned a large part of the additional properties which would be required for the Conowingo dam. Most of these had been [22595] (page 18) acquired from Harlow-McGaw.

In July 1906, Susquehanna Power Company, a competing interest on the lower river with which James H. Harlow had become associated, instituted condemnation proceedings against that portion of McCall Company's properties on the lower river lying in Maryland which

would be required by a dam Susquehanna proposed to erect to elevation 65, a half mile above Shure's Landing near Conowingo. This dam would back water almost to the Pennsylvania State line in flood time. McCall Company fought the suit, complaining that it interfered with their own plans at Conowingo and would render valueless the remainder of their property rights between the Pennsylvania State line and the McCall Ferry tailrace. The case was decided against the McCall Company in the lower courts, but before a final decision had been handed down on an appeal, a consolidation of all competing interests on the lower river had been effected through negotiations undertaken by Bertron, Storrs & Griscom who had in the meantime secretly secured control of a third competitor for the lower river rights, Susquehanna Electric Power Company. The consolidation was accomplished by an agreement dated February 20, 1908, modified on June 30, 1908, whereby the competing interests were to transfer their holdings on the river from tidewater to elevation 103 to Susquehanna Power Company and its subsidiary Sowego Water and Power Company, and in return were to receive General Mortgage 5% bonds and the entire outstanding capital stock of Susquehanna Power Company in proportion to the amount of the fall in the river between elevation 12 and elevation 103 which each interest was deemed to control, as follows:

[22596] (page 19)

		Shares Stock	Bonds
McCall Ferry Power Company	38/91	1,670	$ 760,000
Susquehanna Power Company	30/91	1,319	600,000
Susquehanna Electric Power Company	23/91	1,011	460,000
		4,000	$1,820,000

The McCall Company's share was based on the fall in the river between their tailrace (elevation 103) and the Pennsylvania State line (elevation 65). None of these properties had been included in the condemnation proceedings.

The entire capital stock of Susquehanna Power Company was to be exchanged for an equal number of shares of a new holding company to be formed under the name of Susquehanna Properties Company. After the deduction of a portion of the securities for legal fees, etc., McCall Company received 1,500 shares of capital stock of Susquehanna Properties Company and $703,000 principal amount of the General Mortgage 5% bonds of Susquehanna Power Company.

Financing of the McCall Ferry Project

The construction of the project was financed through Susquehanna Contracting Company with funds secured by payments received on bond subscriptions and from loans secured from Knickerbocker Trust Company upon the pledge of deferred bond purchase agreements. A total of $8,075,000 principal amount of bonds was subscribed, divided into $6,180,000 of deferred subscriptions and $1,895,000 of non-deferred subscriptions. This provided total funds of $7,267,500 of which $2,817,900 was paid in on subscriptions and $4,449,600 was borrowed from Knickerbocker Trust Company. An additional $250,000 principal amount of bonds was issued to Harlow-McGaw in part payment for properties acquired.

[22597] (page 20)

A $400,000 loan was secured by Contracting Company on October 28, 1908 from four of the principal syndicate participants, ($100,000 each from Harvey Fisk & Sons, Lee, Higginson & Company, Bertron, Storrs & Griscom and C. A. Coffin) upon pledge of $702,000 principal amount of McCall Company bonds, a $25,000 mortgage of the Conowingo Land Company, and the McCall Company's equity in

a $250,000 railroad relocation deposit. The Contracting Company had only $158,000 of bonds left from the original financing but acquired $544,000 additional from McCall Company and the right to pledge the railroad relocation deposit, under two agreements dated October 20, 1908 whereby the Contracting Company cancelled all indebtedness due from McCall Company (totalling $566,750) and agreed to pay that company $62,000 in cash and transfer certain additional property rights which had cost the Contracting Company $55,853.00. The indebtedness cancelled consisted of $130,000 cash advanced to McCall Company against its note and $436,750 due on open account for unpaid bond interest.

Construction Activities

Upon the advice of its Board of Advisory Engineers, McCall Company undertook to construct the dam itself. The Executive Committee employed Hugh T. Cooper (who had resigned from the Board of Advisory Engineers to make a proposition) as Hydraulic Engineer and Manager of Construction and employed Sanderson & Porter as Superintendent of Electrical Construction. Clearing of the site for the dam started on October 24, 1905, but actual construction did not get under way until 1906.

[22598] (page 21)

The McCall Company agreed to relocate the existing single track line of the Columbia and Port Deposit Railway Company on the East Bank of the river by constructing a new double track roadbed and a single track. The railroad was to pay McCall Company $200,000 when it made use of the roadbed for a second track. McCall Company provided a cash deposit of $250,000 with the Knickerbocker Trust Company as a bond for faithful performance of its contract.

H. S. Kerbaugh, Incorporated, was employed to do the railroad relocation work for a lump sum of $1,250,000. Other large contracts were executed in 1907 with I. P. Morris

Company for turbines and with General Electric Company for generators and switchboards.

It had originally been estimated that construction might be completed and the plant in operation early in 1908. Delays occurred, however, and by May 1, 1907 it was estimated that the first unit might be in operation by June 1, 1908 with all units installed by January 1, 1909.

Financing Difficulties

The original plans for financing the McCall project based on a 155 foot dam with 50,000 horsepower installed plus an auxiliary steam plant became inadequate almost immediately, for on August 8, 1905 the Executive Committee called for bids on a 185 foot dam, and on June 19, 1906 officially adopted a height of 165 feet, either of which would require more funds than had been provided. Although the need for additional funds was recognized, no definite plans were prepared for securing any. On June 5, 1907 when it was apparent that the available cash could not last beyond the Fall the Executive Committee authorized [22599] (page 22) the sale of the Company's treasury bonds at "not less than 90 per cent of its face value with each bond to be given fifty (50%) of its face value in preferred stock." Some preliminary discussions occurred at this time of an additional underwriting proposed for the Fall but no actual underwriting resulted.

Suspension of Work

On November 1, 1907 all construction work on the project and on the machinery contracts was halted except for maintenance and cleaning up work and the placing of a small amount of concrete necessary to protect the existing plant. The suspension was primarily due to the company's failure to provide adequate financing to complete the project although the immediate cause may have been the closing of the Knickerbocker Trust Company on October 21, 1907. This closing temporarily embarrassed the Company

for, although it had no current funds on deposit there, a balance of approximately $345,000 was still due under the loan arrangement with that company. However, no request had been made to the Trust Company for the payment of the balance due, and by December 7, the Receivers for the Trust Company had taken steps to complete the loan originally agreed upon. McCall Company also had available for call at this time, the balance of $164,700 due on the non-deferred bond subscriptions. The sum of these amounts, however, was totally inadequate for the completion of the work and although received on January 8, 1908 the work suspension was not lifted. Construction work was not thereafter resumed, except for some excavation of the tailrace, until the project was reopened by the Receiver for the McCall Company in the Fall of 1909.

[22600] (page 23)

A skeleton organization was maintained throughout the period of suspension until November 1, 1908 when all employees were discharged except for a few men to care for the property at McCall Ferry and a few administrative employees in New York.

Formation of the Bondholders' Committee

In anticipation of the default on the McCall Company bond interest payment due on December 15, 1908, the leading syndicate participants, Harvey Fisk & Sons, Lee, Higginson & Company, Bertron, Storrs and Griscom, H. F. Dimock, and C. A. Coffin, formed a bondholders' committee on December 7, 1908, consisting of William M. Barnum, A. C. Bedford, S. R. Bertron, Charles A. Coffin, and Gardiner M. Lane, who resigned from their positions as directors of the McCall Company and invited the deposit of McCall Company bonds and preferred stock under the terms of a preliminary agreement dated December 7, 1908.

The committee investigated several reorganization plans and finally adopted one submitted by J. E. Aldred,

President of Shawinigan Water and Power Company, which was embodied in a "Memorandum of Understanding" dated April 24, 1907 between Aldred and the Committee. Under the terms of this agreement a new company was to be formed (or the old one recapitalized) with a total capitalization consisting of $8,500,000 par value of capital stock and $12,500,000 principal amount of First Mortgage 30 year 5% Bonds. The $8,325,000 principal amount of McCall Company bonds outstanding were to be exchanged for 40% of new bonds. ($3,330,000) and 60% of new stock ($4,995,000). An additional $4,000,000 of bonds and $3,500,000 [22601] (page 24) of stock were to be used for construction and other corporate purposes. It was agreed that "Mr. Aldred will use his best efforts to sell $4,170,000 of new bonds at 90% of their par value, * * * and the said $3,500,000 of stock shall go to him for use in connection with the sale of such bonds, or otherwise as he may determine." All stock was to be placed in a voting trust for three years from November 1, 1909, two of the trustees to be nominated by Aldred and one by the Committee.

A voting trust was considered necessary to protect the new interests, who would own less than 50% of the stock, by giving them stock control of the Company until the project was completed and in successful operation.

A "Plan and Agreement" was issued by the Committee on May 28, 1909 with substantially the same financial provisions as were contained in the "Memorandum of Understanding" and became effective July 1, 1909.

Receivership and Resumption of Construction

Foreclosure proceedings were brought against McCall Ferry Power Company on July 13, 1909 on behalf of the depositing bondholders because of the default on the bond interest due December 15, 1908. The McCall Company admitted the allegations of the bill of complaint and on July 17 J. E. Aldred was appointed Receiver. In accordance with the Plan and Agreement, Aldred made arrangements to reopen the project. On August 16, 1909 The Empire

Engineering Corporation was employed for a fee of $60,000 to complete the hydraulic construction which Cooper had originally undertaken and been paid for. Empire [22602] (page 25) immediately started to get the project in shape for renewed construction after its long shut down. No substantial amount of work was done until September, but construction thereafter continued first during the receivership and later under the direction of Pennsylvania Water & Power Company, until the plant was completed.

Financing of Construction

It had originally been planned that construction work would be carried on during the receivership with funds advanced by a new Syndicate against Receiver's Certificates which would constitute a first lien on the property. On legal advice that such a lien would not rank ahead of non-assenting bonds and would give no security beyond that which could be given by the Committee itself, it was decided that the Syndicate would make the required advances against notes to be issued by the Committee, secured by the deposited McCall Company bonds. This plan would obviate any trouble or delay involved in applications to the Court.

The Committee obtained loans of $1,100,000 from Montreal Trust Company and the Bank of Scotland who were acting on behalf of the Syndicate participants. Of this amount $450,000 was advanced to Aldred up to December 31, 1909. The balance was used to buy the $400,000 outstanding note payable of Susquehanna Contracting Company held by the old McCall Company syndicate members, to settle outstanding obligations of McCall Company, and to pay the Committee's own expenses.

Because the use of Receiver's Certificates was discarded, Aldred in submitting a report of his activities to the court and to Pennsylvania Water & Power Company and the Bondholder's Committee, [22603] (page 26) segregated his expenditures in connection with construction, acquisition of rights of way and purchase of undeposited Mc-

Call Company securities, from purely maintenance expenditures which he classified as receivership expenses. This was undoubtedly done because of his failure to request Court approval for the issue of Receiver's Certificates. This segregation was not maintained on the Receiver's books.

Aldred's expenditures were financed entirely from funds received from the McCall Ferry Power Company and Committee advances. He used none of his personal funds for this purpose and incurred no liabilities without the backing of the Committee. Most of the larger contracts made during this period were either signed by Aldred as Receiver, or provision was made for his release from personal liability through assignment to the Bondholders' Committee or the new company. Aldred received a fee of $7,000 for his services during this period.

Sale of McCall Ferry Power Company Properties

The property of McCall Company was sold at public auction on December 7, 1909 for $2,000,000 to William M. Barnum acting for the Bondholders' Committee. The Court ordered the distribution of the proceeds pro rata to the bondholders. This was accomplished by cancelling the past due interest coupons and stamping the McCall Company bonds with the proportion of the sale price and Receiver's funds applicable to each. The transfer of the properties to Pennsylvania Water & Power Company did not take place until January 13, 1910.

Underwriting of Pennsylvania Water & Power Company Bonds

Bondholders of McCall Company subscribed to $500,000 principal amount of the total amount of $4,170,000 of bonds which Aldred had undertaken to sell. One-half of the balance, or $1,835,000, was underwritten [22604] (page 27) by a syndicate formed in England by Kitcat & Aitken whom Aldred had interested in the proposition. Subscriptions for the remaining $1,835,000 of bonds were secured, mainly

in Canada, by Aldred and two associates, E. R. Wood, Vice President of the Dominion Securities Corporation of Toronto, and H. S. Holt, President of Montreal Light, Heat & Power Company.

The entire $4,170,000 principal amount of bonds was sold at 90. With these bonds went a 50% stock bonus totaling $2,085,000 par value of capital stock, leaving $1,415,000 par value remaining of the original total of $3,500,000 placed at Aldred's disposal. These were divided among the chief participants in the underwriting as a special bonus for carrying out the refinancing as follows:

J. E. Aldred	$ 655,000
Kitcat & Aitken	457,500
E. R. Wood	152,500
H. S. Holt	150,000
Total	$1,415,000

Aldred retained a proportionately greater amount of the capital stock than he allotted to his associates, presumably in recognition of his leadership in the financing operations. The "Memorandum of Understanding" had placed no restriction on Aldred's distribution of these shares and he had undertaken no obligation therein except to sell the required amount of bonds. With the completion of the financing Aldred had completed his part of the bargain and the capital stock was his unconditionally.

Organization of Pennsylvania Water & Power Company

Pennsylvania Water & Power Company was organized by the members of the Bondholders' Committee with an authorized capital stock [22605] (page 28) of $8,500,000 at an organization meeting held January 13, 1910. The directors of the new company immediately authorized the issuance to the Committee of $7,580,000 principal amount of 5% bonds and $8,495,000 par value of capital stock of the

Company in exchange for the properties and franchises of McCall Ferry Power Company and the assets remaining in the hands of the Bondholders' Committee, including the unpaid bond subscriptions. The Company also agreed to assume the Committee's obligations under the "Plan and Agreement." The bonds originally issued were to be temporary one year bonds which were to be replaced by 30 year 5% bonds dated January 13, 1910. The directors on January 22, 1910 approved a $12,500,000 bond issue for the above purpose. On March 3, 1910 the Directors approved the assumption of all contracts entered into by Aldred.

The voting trust called for by the Plan and Agreement was formed on January 27, 1910 with J. E. Aldred, W. M. Barnum and C. E. F. Clarke, Treasurer of the Company, as trustees.

Temporary directors were elected on January 13, 1910 who were replaced on March 3, 1910 by the following persons:

J. E. Aldred	W. M. Canby	S. L. Lewis
R. M. Aitken	A. V. Davis	F. C. McCown, Jr.
Wm. M. Barnum	R. E. Griscom	M. E. Olmsted
A. C. Bedford	H. S. Holt	E. R. Wood
C. E. F. Clarke	G. M. Lane	W. R. Warren

An Executive Committee was also elected on March 3, consisting of the following persons:

J. E. Aldred	A. C. Bedford	W. M. Barnum
C. E. F. Clarke	E. R. Wood	

[22606] (page 29)

Management of Pennsylvania Water & Power Company

In making his proposition to the Bondholder's Committee, for the refinancing of McCall Ferry Power Company, Aldred suggested that, inasmuch as the new interest would be in the minority, an arrangement be made to pool

the shares in the hands of a committee of management, to retain control until the project was completed successfully. The opportunity to share in the management was a privilege which was advantageous to Aldred and his associates in the underwriting, for in order to realize on the stock they would receive under the refinancing, it was necessary that the new company be placed on a profitable operating basis.

Aldred became President of Pennsylvania Water & Power Company upon its inception in January 1910 at a salary of $10,000 a year. So far as is known no management contract existed requiring Aldred to devote his services to the Company. He was at liberty to resign at any time.

Distribution of Pennsylvania Water & Power Company Securities

A summary of the distribution of the securities of Pennsylvania Water & Power Company is given in the following table:

	Bonds	Stock
Exchanged for $8,325,000 McCall Company Bonds	$3,330,000	$4,995,000
New Subscriptions to Bonds at 90 (with 50% stock bonus)	4,170,000	2,085,000
Special Stock Bonus Issued to Underwriters:		
J. E. Aldred		655,000
Kitcat & Aitken		457,500
E. R. Wood		152,500
H. S. Holt		150,000
	$7,500,000	$8,495,000

[22607] (page 30)

Only $8,259,000 principal amount of McCall Company bonds were deposited for exchange. The $66,000 of undeposited bonds were purchased for cash by J. E. Aldred, Receiver, prior to January 1, 1910. The $39,600 of new stock and $26,400 of new bonds exchangeable therefor were treated as treasury stock and bonds by Pennsylvania Water & Power Company.

Transmission Companies

McCall Ferry Power Company organized separate companies during 1907 and 1908 in each of the Maryland Counties and Pennsylvania Townships through which the transmission line to Baltimore would pass, as follows:

	Incorporated Date	State	Capital Stock Authorized	Issued
Susquehanna Pole Line Company of Baltimore County	6/27/07	Maryland	$50,000	$500
Susquehanna Pole Line Company of Harford County	8/13/07	Maryland	50,000	500
Lower Chanceford Township Transmission Company	11/18/08	Penna.	5,000	500
Peach Bottom Electric Transmission Company	11/18/08	Penna.	5,000	500

Expenditures totaling $100,134.91 were made for rights of way by McCall Company prior to the Receivership. These were carried on its books as an advance to Susquehanna Pole Line Co. of Baltimore County.

Merger of Pole Line Companies

The Maryland Pole Line Companies were merged on April 19, 1910 under the laws of the State of Maryland to form Susquehanna Transmission Company of Maryland.

The Pennsylvania companies were merged on April 26, 1910 under the laws of the State of Pennsylvania to form Susquehanna Transmission Company of Pennsylvania. In each case one share of the stock of the new company was given in exchange for two shares of stock of the merged companies.

[22608] (page 31)

Plant Investment

General

This section deals with the Companies' investment in Electric Plant and the adjustments made by the examiners to reduce the amounts recorded on the books to original cost as at December 31, 1945. Schedule 2 summarizes the plant as recorded on the books and as adjusted by the examiners. Schedule 3 shows a summary of Electric Plant in Service as reclassified by the Company in its original cost studies, reconciled with the original cost as determined by the examiners.

A summary of the consolidated Electric Plant Accounts as at December 31, 1945, per books and as adjusted, is given below:

	Per Books	Examiners' Adjustments	As Adjusted
Electric Plant			
In Service	$ 5,244,832	$(3,596)	$ 5,241.236
In Process of Reclassification	33,339,399	(5,659,897)	27,679,502
Subtotal	38,584,231	(5,663,493)	32,920,738
Construction Work in Progress	237,362		237,362
Held for Future Use	2,196	75,722	77,918
Total	$38,823,789	$(5,587,771)	$33,236,018

The details of construction work in progress at December 31, 1945 are shown on Schedule 4. The details at December 31, 1944 and 1943 are shown on Schedules 5 and 6, respectively. A summary of Plant Held for Future Use, showing the purpose for which it is held, is shown on Schedule 7.

[22609] (page 32)

The examiners' adjusting entries are listed on Schedule 8 with a recapitulation on Schedule 9. Schedules 10 to 27 contain supporting details of the adjustments. A further explanation of the more important adjustments is given in the following paragraphs:

Acquisition of Properties on January 13, 1910
(Entry No. 1—$4,770,379.07)

The amount of $11,946,831.77 charged to plant account on the books of Holtwood to record the transfer of properties on January 13, 1910 from the Bondholders' Committee of McCall Ferry Power Company represented the excess of the face and par value of the securities issued to the Committee over the amount recorded on the books for the other net assets acquired. (Schedule 10) The examiners have substituted $7,472,991.83, being the original cost of the properties, including an allowance for interest during construction.

McCall Ferry Power Company: In determining the original cost of the properties acquired from this company, bond expense and cessation costs have been eliminated so far as could be determined, and the general overheads applicable to the period of suspension of construction from November 1, 1907 to September 1, 1909 have been disallowed as not proper construction costs.

During the period of suspension overheads which could be considered to contribute directly to construction work without duplication, have been allowed. In this category are the expenses [22610] (page 33) of the hydraulic de-

partment (consisting mainly of the salaries of foremen, draftsmen, watchmen, the local office personnel and the hydraulic construction superintendent) who were actually engaged in the limited amount of work done on the tailrace excavation from May to October 1908. Although the period of activity is limited as stated, the examiners have allowed the hydraulic department expenses for the full suspension period in order to provide a liberal allowance for contingencies and delayed items including any repair work on construction equipment, etc.

Taxes paid during the suspension period were largely applicable to the period prior to November 1, 1907 and have been allowed as has the New York Office expense of Sanderson & Porter, apparently representing the time and expenses of draftsmen engaged on drawings of electrical equipment. Legal expenses were probably increased by the Company's financial difficulties but the entire amount has nevertheless been allowed because of the examiners' inability to make any segregation on the basis of the available information. (Schedules 12, 12a) The engineering experts' salaries disallowed include payments made to Hugh L. Cooper and Sanderson & Porter covering the period of suspension. (Schedule 12b) These are discussed below under "Bondholders' Committee."

J. E. Aldred: The entire expense of the receivership period has been allowed with the exception of $5,000 paid to Cary T. Hutchinson, covering back salary due him during the period of suspension. The expenses prior to September 1, 1909, the date of [22611] (page 34) full resumption of work on the project, have been allowed as an offset against any delayed items at the beginning of the period of suspension. (Schedule 13)

Bondholders' Committee: The examiners have disallowed the payments made to Hugh L. Cooper, manager of hydraulic construction, and Sanderson & Porter, superintendent of electrical construction, covering the period of

cessation, since they did not complete the work for which they had contracted. Sanderson & Porter's contract called for a flat fee of $50,000 payable in thirty-eight equal monthly installments from November 1, 1905 to December 1, 1908. Cooper's contract called for a flat fee of $100,000 payable in twenty-five equal monthly installments beginning November 1, 1905, with a bonus of $30,000 payable in monthly installments of $4,000 each beginning January 1, 1908 if the work had reached a specified stage of completion. A fee of $60,000 was later paid to The Empire Engineering Corporation to complete the hydraulic construction started by Cooper.

Sanderson & Porter had contracted to prepare plans and superintend all electrical construction including transmission lines and substations, none of which had been installed when the work was suspended. The electrical construction and installation was finally supervised by Pennsylvania Water & Power Company employees with the assistance of R. S. Kelsch, consulting engineer.

Since the reorganization effected by the Bondholders' Committee was primarily a matter of refinancing, it is probable [22612] (page 35) that a portion of the reorganization expenses should be treated as a financial expense, but for the purpose of these proceedings the entire amount, not disallowed, has been treated as a capital charge subject to the Commission's review. (Schedule 14)

Property Acquired from Susquehanna Contracting Company: The original cost of the property and riparian rights acquired by the McCall Ferry Power Company from its associated company, Susquehanna Contracting Company, has been determined by an examination of the purchase contracts made by the Contracting Company, which merely acted as a vehicle for the acquisition of the properties and their transfer to the McCall Company. (Schedule 12c)

Cary T. Hutchinson Properties: This acquisition represented, essentially, a transfer by Hutchinson in 1905 of

properties and options held by him individually to the McCall Company, which he and the associated Bankers controlled, by using the Susquehanna Contracting Company as a conduit. The price paid, consisting of $750,000 cash, in addition to $4,884,000 par value of common stock and $400,000 par value of preferred stock of McCall Ferry Power Company, was not the result of arm's-length bargaining and should be disregarded in determining original cost. (Schedule 12c)

Proof of the cost of the properties to Cary T. Hutchinson has not been presented to the examiners who were informed that Hutchinson's records could not be located. In the absence of this information the examiners have allowed the cash consideration of $750,000 paid to Hutchinson. This amount is ample when the known prices paid by Hutchinson for some of the properties acquired by him are considered.

[22613] (page 36)

Harlow-McGaw Properties and Pullen Options: The examiners have allowed the cash cost of these properties, plus a valuation of 90 for the $250,000 principal amount of McCall Company bonds given as part consideration, representing the price at which the remainder of the bonds had been subscribed. No cash value has been proven for the 1000 shares of common stock given to Harlow-McGaw and the 150 shares given to Charles Pullen, and none has been allowed. (Schedule 12c) At that time there was no market for the stock and no known sales. None was ever issued for cash. In fact the 1150 shares given in connection with these purchases plus the 48,850 shares issuable to Hutchinson in connection with the acquisition of his properties and the incorporation of McCall Ferry Power Company, comprised the entire authorized common stock.

In April 1905 when these contracts were made, the McCall Company had no tangible assets, and in June 1905 when the purchase prices were paid, it had no source of

revenue except bank interest. Its only assets consisted of the various properties to be secured from Hutchinson and Harlow-McGaw, and the right to receive $6,400,000 cash for construction purposes from Susquehanna Contracting Company. Construction was not started until October 1905. At the date of execution of the contracts the common stock appeared to represent only a speculative interest in the future profits of the project if built, and if successful in earning a return above the heavy prior charges for bond interest and preferred stock dividends.

[22614½ (page 37)

There is a complete absence of proof that any cash could have been realized for the stock at the time it was issued—the criterion of cash value under Electric Plant Accounts Instruction 3-D of the Commission's system of accounts. And it is significant that neither the common nor the preferred stock of the McCall Company were allotted any value in the reorganization of the company in 1909.

Sale of River Property Below the Dam: The examiners have reduced the cost of properties and riparian rights acquired through Susquehanna Contracting Company by $200,000 to reflect the transfer in 1908 by McCall Ferry Power Company of its property and riparian rights on the Susquehanna River below its tailrace to the Susquehanna Power Company interests in exchange for $703,000 principal amount of General Mortgage 5% Thirty-Year Bonds of Susquehanna Power Company and 1500 shares of capital stock of Susquehanna Properties Company. No entry was made in McCall Company's books of account to record the transfer of the properties.

The securities were sold by Pennsylvania Water & Power Company in March 1912 to Bertron, Griscom & Jenks, for $200,000 in cash. Susquehanna Power Company at that time was in serious financial difficulties which re-

sulted in an application for receivership for the company in July 1912, and the subsequent public sale of its entire assets on February 24, 1913, by order of the court, to the nominee of the interests holding the general [22615] (page 38) Mortgage bonds and certain creditors. In view of the financial condition of the company at the date of the sale of the securities by the Pennsylvania Water & Power Company, it is considered that their value in 1908, when they were first issued, must have been at least as great, if not greater, but the examiners have only applied the smaller amount in reduction of the cost of the project.

Interest During Construction to December 31, 1910 (Entries Nos. 1 and 2)

Interest has been calculated by the examiners at 6% on the allowed construction costs for the actual construction period from April 14, 1905 to December 31, 1910, exclusive of the period of suspension which lasted from November 1, 1907 to August 31, 1909. An allowance at the same rate has also been made for working capital during the construction period. (Schedules 15 and 16)

Interest during construction is an allowable addition to plant cost only during the period which contributes to the completion of the project through unretarded construction activity, and during the necessary preliminary period prior to the beginning of construction.

The interest rate was determined after a study of the loans outstanding during the construction period, which averaged somewhat less than 6% as shown by the following table:

[22616] (page 39)

	Actual Interest Rate	Largest Amount Outstanding	Annual Interest Charge	Average or Effective* Rate
Period Apr. 1905 to Nov. 1, 1907				
Loans and Advances—				
Payments by Non-deferred Subscribers.	5%	1,526,400	76,320	
Payments by Deferred Subscribers	5%	1,112,400	55,620	
Knickerbocker Trust Co. Loan	6%	3,909,600	234,576	
Knickerbocker Trust Co. Comm.	½%		22,410	
Total Loans and Advances		6,548,400	388,926	5.94
McCall Ferry Power Co. 30 year bonds (at 90)	5%	250,000	12,500	5.70*
Period Sept. 1, 1909 to Dec. 31, 1909				
Loans and Advances—				
Loans from Syndicate Participants (Period Oct. 28, 1908 to Oct. 15, 1909)	6%	400,000	24,000	
Payments by P. W. & P. Co. Bond Subscribers (Period July 1, 1909 to Dec. 31, 1909)	5%	1,442,875	72,144	
Total Loans and Advances		1,842,875	96,144	5.22
McCall Ferry Power Co. 30 year bonds (at 90)	5%	8,325,000	No Interest Paid	
Period Jan. 1, 1910 to Dec. 31, 1910				
Penna. Water & Power Co. 30 year bonds (at 90)	5%	7,473,600	373,680	5.70*

In addition to bonds, Pennsylvania Water & Power Company and the Bondholders' Committee had sundry bank loans outstanding during a portion of the year 1910 at 5% interest, but the total interest paid on these loans would have no significant effect on the average cost of money.

The annual interest charge for loans and advances shown on the above table does not represent actual payments but the annual amount computed on the basis of the largest principal amount [22617] (page 40) outstanding during the period. If the calculation is adjusted to reflect the time that each loan was actually outstanding during the period, the weighted average interest rate on loans and advances becomes 5.98% instead of 5.94% for the period to November 1, 1907, and 5.08% instead of 5.22% for the period from September 1, 1909 to December 31, 1909. The rate of 5.7% shown for bonds represents the effective rate for 30 year 5% bonds sold at 90.

The only bonds outstanding prior to November 1, 1907 were the $250,000 principal amount of bonds given to the Harlow-McGaw interests in part payment for their properties. An additional amount of $1,895,000 was issued to non-deferred subscribers about February 1, 1908 and the balance, $6,180,000, was issued after November 1, 1908 as the individual subscribers paid off their loans to Knickerbocker Trust Company. No bond interest was paid by McCall Ferry Power Company after June 15, 1908.

A comparison of the total interest allowed on construction expenditures by the examiners to December 31, 1910 with the total interest paid by Pennsylvania Water & Power Company and predecessor companies for the same period (including interest paid during the period of suspension) is shown below:

Interest allowed by examiners—	
Period from April 1905 to Dec. 31, 1909, Schedule 15	$ 622,150.87
Period from Jan. 1 to Dec. 31, 1910, Schedule 16	479,232.72
	$1,101,383.59
Interest paid during the period from April 1905 to December 31, 1910 (net)—	
McCall Ferry Power Company—Note (a)	65,271.48
Susquehanna Contracting Company	728,467.36
J. E. Aldred, Receiver	(9,627.14)
Bondholders' Committee	13,807.80
Pennsylvania Water & Power Company	321,725.93
	$1,119,645.43

Note (a): Exclusive of bond interest paid to Susquehanna Contracting Co.

[22618] (page 41)

Interest During Construction—Year 1911 (Entry No. 3—$6,285.22)

The first hydro unit went into operation in October 1910. Four more units, on which construction had commenced in 1910, were completed during 1911 after the close of the initial construction period. The examiners have allowed interest during 1911 on the construction cost of the turbines, generators, and gate mechanisms, (including a proportional part of the cost of the switchboard and accessory electrical equipment) until the end of the month in which each unit went into service. Unit costs installed not being available for each turbine and generator with accessory equipment, the average cost of the first five units has been used in this calculation as determined on Schedule

17a. Overheads have been added at the average rate used for this type of equipment by the company in preparing its plant reclassification studies, reduced to reflect the overhead disallowances made by the examiners.

The interest (as recalculated by the examiners) has been substituted for the interest charged to plant on the books during 1911 as shown on Schedule 17. No interest has been allowed during 1911 on the powerhouse and dam structures which are considered to have been in operation as a whole as of January 1, 1911.

Interest During Construction—Years 1912 to 1945, Inclusive

During the years prior to 1930 the company capitalized interest during construction only when major construction projects were under way. Thus interest was capitalized during the years 1912, 1913, and 1914 and 1923, 1924, and 1925, all representing periods during which additional hydro units were added or transmission lines constructed. During the intervening years no interest was capitalized. [22619] (page 42) Beginning with 1930 the Company has consistently capitalized interest at 6% on the larger plant additions although interest rates are now considerably lower. The examiners have allowed the interest actually capitalized on the books during this period.

Capital Stock Taxes (Entry No. 4—$3,450)

This represents capital stock taxes, and legal expenses in connection therewith, applicable to the period prior to the beginning of operations and are therefore a proper charge to plant account.

Promotion Expenses Disallowed (Entry No. 7—$30,787.34)

These expenses were accumulated in a separate account which was closed at the end of each year to the plant con-

trol account. The examiners have received no adequate explanation of the nature of the promotion involved. The only information received was to the effect that it may represent, to some extent, expenses in connection with the negotiation of power sale contracts. (Schedule 18)

Abandoned Projects Disallowed (*Entry No. 8—$44,173.17*)

This represents the amount expended on preliminary investigations of sundry projects which were later abandoned but not removed from the plant account. (Schedule 19)

Survey of Storage Reservoir Sites: This investigation was made to determine favorable locations for storage reservoirs on the Susquehanna River and its tributaries, above the dam, with secondary consideration being given to their possible use for power development. The Company later abandoned the idea of such a development for itself, but was instrumental in the formation of a Water Conservation Association to work for state assistance in the construction of storage [22620] (page 43) reservoirs. The Association disbanded after legislation which it had supported was defeated.

Lancaster Transmission Line: This represents expenditures made during 1910 and 1911 for the survey and acquisition of right-of-way options for a proposed transmission line to Lancaster to be built by the Company to serve the Edison Electric Company of Lancaster. Contract negotiations were terminated in 1911 and the options allowed to lapse. When a contract was finally signed in October 1912, Edison undertook to build the line itself. Further expenses were incurred by Pennsylvania Water & Power Company in assisting Edison with the construction of the transmission line. These expenses were also charged to plant account and have been disallowed.

Roller Dam Investigation: This represents expenditures made in studies of a proposed roller dam, some fifteen feet high, to be built on the crest of the dam to replace the flashboards previously installed, in order to obtain additional head for the turbines. The project was later abandoned.

Flowage Basin (Entry No. 9—$296,630.42)

For a considerable number of years after it commenced operations, the Company continued to charge to a Flowage Basin Account, not only the cost of additional properties acquired for the reservoir, but large amounts of engineering salaries and expenses, Lancaster office expenses, legal fees and miscellaneous expenses with in most cases no adequate explanation of the nature of the charges. The examiners' investigation of the entries and such additional information as the Company has given has failed to disclose any reasonable basis for their [22621] (page 44) capitalization in plant account. The examiners on Schedules 20 and 21 and supporting schedules, have made a segregation of those charges believed to be a proper charge to plant account, and have disallowed the remainder.

The items allowed include such charges as could be identified as the cost of road and bridge relocations, the first survey of properties, the clearing of the flowage basin, and the purchase of property (including not only the purchase price but the direct costs associated therewith). The items disallowed are believed to be a proper charge to operations or surplus and are summarized below:

	Job Order	Year Expended	Amount Disallowed
Period 1910-1924 (Schedule 20)			
Motion pictures and panorama expense		1919-24	$ 4,098.56
River observations		1911-24	4,988.45
Engineering salaries and expenses		1911-24	45,515.19
Miscellaneous office expenses		1911-23	561.65
Interest		1911-14	3,959.15
Lancaster office expenses, Schedule 20a			
Salary of M. E. Bushong		1916-24	50,423.24
Expenses		1916-24	27,127.82
Sundry legal fees, Schedule 20b		1915-24	36,920.00
Miscellaneous expenses, Schedule 20c		1916-23	14,075.18
Total 1910-1924			$187,669.24
Period 1925-1936 (Schedule 21)			
Lower development studies, Schedule 21a	C-283-8	1925-28	$ 38,804.95
Survey of railroad property north of Holtwood	C-283-11	1925-26	1,764.59
Philadelphia transmission line link (Project abandoned)	C-325	1925-26	8,396.10
Susquehanna River aerial survey	C-370-3	1925	1,631.31
Philadelphia-Safe Harbor transmission line link (project abandoned)	C-326	1925	153.30

	Job Order	Year Expended	Amount Disallowed
McCall Ferry topographical survey	C-613	1927-28	3,658.24
Lancaster office expenses, Schedule 21b	M-387	1926-30	36,959.06
Flowage Basin, Schedule 21b	M-388	1926-29	11,097.67
Extension of triangulation system	C-791	1929-32	3,338.25
Property ties to triangulation system	C-970	1932-34	3,157.71
Total 1925-1936			$108,961.18
Grand Total			$296,630.42

[22622] (page 45)

Engineers' Salaries and Expenses: The nature of the work performed by the engineers whose salaries and expenses are charged to the flowage basin are not given in the original entries in most cases. No time sheets or other data have been submitted to the examiners to support the items except a general explanation of the nature of the charges prepared during 1945 by Mr. R. L. Bortner, Assistant Secretary of the Company. Mr. Bortner's explanation indicates that the work includes high water observations, back water observations, ice observations, water surface readings, river cross sections, topographic surveys, river flow characteristics, rates of run off, establishment of bench marks, property levels, surveys and investigations necessary for the defense of law suits, and property surveys. The distribution of the total cost between the different types of work is unknown. To the extent that these expenses represent the first survey of properties in connection with their acquisition they would represent a proper charge to

plant account. No segregation of the cost of these surveys has been presented if they are in fact included in the total. The Company's classification of accounts provided a separate sub-account for "Surveying Property", and the amounts so segregated have been allowed by the examiners as a proper charge to plant. The entire amount of unclassified engineers' salaries and expenses has been disallowed because it is properly a charge to operations.

Lancaster Office Expenses: This represents the cost of operating the Lancaster office, including the salary of M. E. Bushong, from the time the office was opened in March 1916 until December 1929, with the exception of the months of April and May 1924 when the [22623] (page 46) expenses were charged to the Lancaster Transmission Line, and the period from June 1924 to December 1925 when they were charged to Holtwood Power Company organization expense. A portion of Mr. Bushong's salary for the years 1926 through 1929 was charged to Property Maintenance and Repairs—Supervision. After 1929 the expense of the Lancaster Office was divided between Pennsylvania Water & Power Company, Safe Harbor Water Power Corporation, various construction job orders, and property maintenance. Since 1933 it appears to have been charged entirely to operating expenses of the two corporations.

The Company claims that the main function of the Lancaster office during the period it was capitalized in the Flowage Basin Account, was to acquire property for the Holtwood development. The examiners' investigation discloses that Mr. Bushong was active in the acquisition of properties on a per diem basis during the years 1912 and 1913, mainly along Conestoga Creek. This work tapered off in 1914 and 1915 and practically ceased with the purchase of the Woelpper property in March 1916. After the opening of the Lancaster office comparatively few properties were acquired. There were no acquisitions at all from April 1916 to July 1920 except for the foreclosure in 1919

of the Benjamin Davis mortgage which had previously been acquired in 1913. Later acquisitions have also been few in number. The examiners have allowed Mr. Bushong's entire expenses and salary during the years 1912 to 1915 during the period of greatest property acquisitions, but have disallowed Lancaster office expenses from March 1916.

[22624] (page 7)

Sundry Expenses Eliminated from the Flowage Basin: The examiner has disallowed sundry legal fees which were charged to the Flowage Basin without explanation of the nature of the services performed, also expenses in connection with the negotiation of the "Backwater Agreement" with the Susquehanna Power Company (Lower development studies), motion picture and panorama expense, the cost of river observations, and miscellaneous office expenses. These expenses are all believed to be proper charges to operations or surplus since there is no evidence that they were incurred in connection with construction or property acquisitions. The entire amount of interest charged to the Flowage Basin after the beginning of operations, has been disallowed because new acquisitions are immediately in service upon purchase and no interest should be added thereafter.

The miscellaneous expenses disallowed are listed on Schedule 20c. A portion represents expenses in connection with the project for the recovery and marketing of river coal and are all believed to be proper charges to income or surplus.

Several job orders for surveys not in connection with the acquisition of properties, and for the cost of the preliminary investigation for the Philadelpha Transmission Line, subsequently abandoned, have been disallowed as well as payments to sundry persons which were charged to Job Orders M-387 and M-388 without any explanation of the services performed.

Expense in Connection with Coal Storage Facilities (Entry No. 10—$1,340.98)

These expenses were incurred in connection with the coal marketing activities of Holtwood Coal Company and should have been [22625] (page 48) charged to that company or to income.

Flashboard Renewal Expense (Entry No. 11—$44,961.06)

This represents the cost of testing and renewal of flashboards, and the cost of experiments to increase operating efficiency, including the cost of experimental swing gates erected in 1916 and 1917. Flashboards are an expendable item that are so regularly carried away, in whole or in part, by high water that their renewal is treated as an operating expense. The examiners have allowed the entire expense for the years 1911 and 1912 which is deemed to be ample to cover the original construction cost of the flashboard system. (Schedule 22)

Capital Stock Expense (Entry No. 12—$82,963.12)

This consists of expenses incurred for the issuance and sale of capital stock from 1923 to 1935 long after the organization of the Company, and is a proper charge to Capital Stock Expense rather than Organization Expense. (Schedule 23)

Construction Fee Charged to Holtwood Power Company (Entry No. 13—$50,194.73)

This represents an intercompany profit on construction work performed by Pennsylvania Water & Power Company for its subsidiary and has therefore been eliminated from the plant accounts by the examiners. The steam station construction jobs received a regular proration of the parent company's construction overheads in the same proportion as other jobs.

Holtwood Power Company Organization Expenses (Entry No. 14—$28,213.34)

The organization expenses of Holtwood Power Company have been allowed as a proper charge to plant because the Company was advised by its counsel that it was necessary to organize the subsidiary [22626] (page 49) in order to obtain the legal right to operate a steam plant. The examiners have eliminated therefrom amounts classified by the Company as "Promotion Expenses," consisting of the entire Lancaster office expense from June 1924 to December 1925, and sundry legal fees in connection with the negotiation of power contracts by Pennsylvania Water & Power Company. (Schedule 24)

Construction Costs Charged to Operations (Entry No. 18—$76,915.93)

The examiner has added to plant the cost of sundry plant additions, charged in error to operations on the books, which did not represent a replacement of existing facilities. (Schedule 26)

Westport Line Overheads (Entry No. 19—$26,234.97)

The elimination of overheads on the Westport Line after March 1, 1932 has been made to make the date in service coincide with that for the Safe Harbor Project which the line was built to serve.

Intercompany Profit on the Transfer of Land (Entry No. 20—$24,151.83)

The book value of land acquired by the Susquehanna Transmission Company of Maryland from The Baltimore Electro Alloys Company has been reduced to cost to the latter company to eliminate the intercompany profit from the plant account. (Schedule 27)

Takoma Substation Engineering (Entry No. 21—$5,668.48)

This expense was incurred in connection with the Ellicott-Washington Line, the lower end of which was constructed for and charged to the Potomac Electric Power Company. The engineering supervision of Potomac's Takoma Substation should also have been charged to Potomac or written off to surplus if uncollectible, rather than to plant account.

[22627] (page 50)

Plant Additions Charged to Depreciation Reserve (Entry No. 23—$122,488.49)

This item represents the cost of new plant additions charged erroneously to the depreciation reserve, apparently as representing replacements or deferred maintenance, which it was the company's practice to charge to the reserve during the period from 1921 to 1930. The items added back to plant by the examiner represent new plant additions rather than replacements.

Unrecorded Retirements (Entry No. 24—$343,928.42)

This represents the total cost of plant items retired from service which had not been removed from plant account on the books, as determined by the Company in its plant reclassification studies. The examiner has reduced the total amount by the cost of equipment reinstalled in new locations, the cost of plant items which were replaced by charges to the depreciation reserve under the accounting practices in effect from 1921 to 1930, and by an over-all reduction in the overheads applicable to the retirements due to other disallowances made by the examiners.

Plant Held for Future Use (Entry No. 26—$78,343.06)
Other Physical Property (Entry No. 27—$59,915.65)

The amounts transferred by the examiners to "Plant Held for Future Use" and "Other Physical Property" represent the amounts as determined by the Company in its

plant reclassification studies. The Land included in the transfer to "Other Physical Property" has been valued by the Company in most cases at a purely nominal value as representing land remnants of little use for agricultural purposes. The Commission has not yet determined the project boundaries.

[22628] (page 51)

Adjustment of Retirements 1937-1945 (Entries Nos. 28 and 29)

These entries adjust retirements and property sales recorded on the books since January 1, 1937 to bring them into agreement with the disposition made of the property by the examiners in previous entries for unrecorded retirements or transfers to "Plant Held for Future Use" or to "Other Physical Property."

(a) The Company does not keep continuing property records for Plant in Process of Reclassification by its former account classification. The "book" balances represent the balances at December 31, 1936 as accumulated by the Company in its original cost study, less retirements made during the period from January 1, 1937 to December 31, 1945.
(b) Includes credits of $500,000 and $194,615 for transfers of land and riparian rights to the steam station and Safe Harbor Water Power Corporation respectively. These credits are applicable to the property included in the "Initial Entry".
(c) Represents organization expense of Pennsylvania Transmission Company.
( ) Denotes deduction.

Overheads Eliminated From Depreciable Plant				(5,807.00)	(5,807.00)
Total General Plant	752,574.49	44,077.38	796,651.87	(12,799.74)	783,852.13
Total Electric Plant in Service	$30,795,602.17	$5,618,630.04	436,414,232.21	($3,493,493.98)(a)	$32,920,738.23

* This schedule presents the electric plant in service as reclassified by the Company in its original cost study (Columns 1, 2 and 3), with the examiners' eliminations allocated thereto on an approximate basis only because of the intricate methods of cost redistribution involved. No attempt has been made to distribute the overhead eliminations applicable to depreciable plant to the individual plant accounts.

(a) The examiners' eliminations from the Company's reclassified plant balances shown above, are less than the total examiners' adjustments to the plant balances per books shown on Schedule 2, because the Company had already made some eliminations in preparing its reclassification.

( ) Denotes deductions.

PENNSYLVANIA WATER & POWER COMPANY

McCall Ferry Power Company

Detail of General Office Salaries and Engineering Experts' Salaries Disallowed During Cessation Period

Particulars		Amount Disallowed
General Office Salaries:		
J. W. Kirkland, Vice President	Nov. 1907 - Feb. 1908	$ 2,500.00
W. H. Barnum, Treasurer	Nov. 1907 - Nov. 15, 1908	2,500.00
G. A. Foote, Chief Accountant	Nov. 1907 - July, 1908	1,662.44
O. M. Hinton, Chief Accountant	July 1908 - July 1909	1,695.85
F. H. Sillick, Accountant	Nov. 1907 - Jay 1908	350.00
Harold Pender, Secretary	Nov. 1907 - July 1909	512.50
L. F. Deutzman, Ass't to Treas'r	Nov. 1907 - Dec. 1908	260.00
Stenographers and Clerical	Nov. 1907 - Jan. 1908	761.00
Miscellaneous Office Expense		14.15
Total General Office Salaries Disallowed, Sch.12a		$10,255.94
Engineering Experts' Salaries		
Cary T. Hutchinson, Chief Engineer	Nov. 1907 - July 1908	$10,499.94
Hugh L. Cooper, Hydraulic Engr.	(Completion Bonus)	14,107.21
Boyd Ehle, Resident Engineer	Nov. 1907 - Aug. 1908	2,200.00
R. H. Anderson, Ass't, Resident Engineer	Nov. 1907 - Aug. 1908	1,100.00
J. W. Young, Ass't. Engineer	Nov. 1907 - July 16, 1909	5,125.00
Harold Pender, Ass't to Chief Engineer	Nov. 1907 - July 16, 1909	2,050.00
R. Beeuwkes, Electrical Inspector	Nov. 1907 - Oct. 1908	750.00
Total Engineering Experts' Salaries Disallosed, Schedule 12a		$25,832.15

Docket IT-5915 PENNSYLVANIA WATER POWER COMPANY Schedule 12c

McCALL FERRY POWER COMPANY

Determination of Excess of Properties, Stocks, Franchises and Contracts Account Over Original Cost of Properties Acquired from Susquehanna Contracting Company

Properties, Stocks, Franchises and Contracts Account, Per Books		
Par value of McCall Ferry Power Company common stock issued in April 1905 in exchange for the outstanding stock of its merged predecessor companies, The Hillside Water and Power Company and Susquehanna Water and Power Company, owned by Cary T. Hutchinson		$ 1,000.00
Securities of McCall Ferry Power Company issued to Susquehanna contracting company under Agreement of June 13, 1905 in exchange for land riparian rights and cash -		
First Mortgage 5% Bonds, principal amount	$ 8,183,000.00	
Preferred Stock, 411,650 shares at $100. par	4,116,500.00	
Common Stock, 499,900 shares at $10.00. par	4,999,000.00	
	17,598,500.00	
Less-cash due from Susquehanna Contracting Company Balance per books, July 17, 1909	6,400,000.00	11,198,500.00
		11,199,500.00

Cost to Susquehanna Contracting Company of Property and Riparian Rights transferred to McCall Ferry Power Company -	Per Books	Allowed by Examiner	
Under Agreement of June 13, 1905			
Cary T. Hutchinson Properties and Rights			
Cash paid to Cary T. Hutchinson June 20, 1905	750,000.00	750,000.00	
4,000 shares McCall Ferry Power Company Preferred stock, Note(a)	-	-	
48,840 shares McCall Ferry Power Company Common stock, Note(a).	-	-	
Harlow-McCaw Properties and Rights			
Cash paid to Harlow-McCaw interests June 16, 1905	200,432.00	200,432.00	
$250,000 McCall Ferry Power Company 5% Bonds (at $90.)		225,000.00	
1,000 shares McCall Ferry Power Company Common stock	-	-	
Pullen Options to Purchase Harlow-McCaw Properties, etc.			
Cash paid to Bertron Storrs & Griscom May 15, 1905	10,022.22	10,022.22	
150 shares McCall Ferry Power Company Common Stock	-	-	
Simpson, Thacher & Bartlett, legal services	47,307.00	47,307.00	
Under Agreement of October 20, 1908, Note(b)			
Cash paid for sundry properties and riparian rights	47,762.65	47,762.65	
Lorenzo Semple, legal services re Susquehanna matter	5,000.00	5,000.00	
Sundry legal fees and expenses	3,090.35	3,090.35	
Total cost to Susquehanna Contracting Company	$1,063,614.22	$1,288,614.22	
Less Property and Riparian Rights below the dam, given in August 1908 in exchange for $703,000 First Mortgage 5% Bonds of Susquehanna Power Company and 1500 shares of capital stock of Susquehanna Properties Company- Valued at proceeds of sale of these securities in 1912		200,000.00	
Cost of remaining properties at July 17, 1909			1,088,614.22
Excess of Ledger Balance over cost of Properties and Riparian Rights at July 17, 1909			$10,110,885.78

Notes-

(a) The Company claims that the entire 4,000 shares of preferred stock and 30,000 shares of common stock were transferred by C. T. Hutchinson to the bankers and underwriters for the project.

(b) An additional $544,000 principal amount of McCall Ferry Power Company 5% bonds was issued to Susquehanna Contracting Company under the Agreement of October 20, 1908, but McCall Ferry Power Company made no entry in its plant accounts, the bonds being offset against amounts due the Contracting Company and additional cash to be received.

Total	$131,459.50		$131,562.49		$243,347.01				$132,425.98		$548,794.98
Interest on Working Capital at 6%											
For the Period from April 14, 1905 to October 31, 1907, Schedule 15a											69,549.83
For the Period from September 1, 1909 to December 31, 1909, Schedule 15b											3,806.06
Total Interest Allowed for Period from April 14, 1905 to December 31, 1909 at 6%											$622,150.87

(a) Plant expenditures include the original cost of land acquired from Susquehanna Contracting Company and expenditures of McCall Ferry Power Company, J. B. Aldred, Receiver, and the Bondholders' Committee, to December 31, 1909.

(b) November 1907 expenditures include October payroll, petty cash expenditures and store issues totalling approximately $114,000.

(c) The increased expenditures during January 1908 were not due to construction activities, but resulted from large payments for legal services, insurance premiums, machinery, equipment and structural steel.

(d) Includes credit of $200,000 for the sale of property and riparian rights below the dam, in exchange for securities of Susquehanna Power Company and Susquehanna Properties Company.

(e) Represents advances to agents for purchase of transmission line right-of-way, recorded by McCall Ferry Power Company as a loan to Susquehanna Pole Line Company of Baltimore County, a wholly-owned subsidiary.

(f) Represents interest at ½% on additions from January 1 to October 31, 1907.

(g) Represents interest at ½% on additions from September 1 to December 31, 1909.

• Denotes period of cessation of construction from November 1, 1907 to August 31, 1909.

( ) Denotes credit.

Schedule 20b - Schedule 20c

Notes -
(a) Includes $7,400.00 payment for Conestoga Township road relocation.
(b) The Lancaster office was opened in March 1916. The purchase of the Woelpper property (George B. Atlee fee) was closed during the same month resulting in the dismissal of the flashboard injunction suit.
(c) Lancaster office expense was charged to the Lancaster Transmission Line or to Holtwood Power Company organization expense from April to December 1924.
(d) Transfer of Woelpper property to Property and Riparian Rights Account.
(e) Sale of the Woelpper property (George B. Atlee fee), retaining flowage rights.
(f) Amounts received from the sale or salvage of buildings on acquired properties.
(g) Flowage basin was credited with $120,314.82 in 1930 representing the transfer of these properties to Safe Harbor Water Power Corporation. Fourteen of the properties costing $28,520.00 were sold back to Pennsylvania Water & Power Company in 1933.
( ) Denotes Credit.

Docket IT-5915 Schedule 21 a

PENNSYLVANIA WATER & POWER COMPANY

Lower Development Study Expense Disallowed

(Job Order C-283-8)

Particulars	Amount	
Expenses Disallowed		
Legal Expenses		
Harmoff, Cook, Chestnut & Markel - Services	$12,793.30	
Keech, Deming & Carman - Services in connection with controversy with Susquehanna Power Company	7,500.00	
Robert H. Anderson, Services re flooding agreement with Conowingo companies	400.00	
Hambright and Hambright, Searching titles of island properties	360.00	$21,053.30
Consulting Engineers' Services		
Boyd Ehle, Services in connection with Conowingo job	1,687.50	
Charles B. Hawley & Company, Services in preparation of estimates of cost of flood gates for proposed Conowingo dam	485.44	
Sundry engineering services	100.00	2,272.94
Distribution of salaries and wages		12,223.36
Miscellaneous expenses, supplies and overheads		2,963.36
Interest		291.99
Total Expenses Disallowed		$38,804.95

Note: The above expenses were incurred by Pennsylvania Water & Power Company in connection with the negotiation of a contract with The Susquehanna Power Company, The Susquehanna Electric Company and Philadelphia Electric Power Company covering annual compensation to be paid Pennsylvania Water & Power Company for loss of energy output and demand value due to the erection of a dam on the Susquehanna River below the Company's property thereby backing water into the Company's tailrace.

Additional expenditures of $226.33 representing mainly instruments found in the physical inventory have been allowed as a plant cost.

Docket IT-5915 Schedule 22

PENNSYLVANIA WATER & POWER COMPANY

Expenditures for Erection, Renewal and Testing of Flashboards on the Dam Charged to Plant Account Years 1911 to 1921, Inclusive

Year	Job or Estimate No.		Total Amount (1)	Allowed (2)	Disallowed (3)
1911	C-12		$18,784.44	$18,784.44	$
1912	C-12		13,979.06	13,979.06	
1913	C-12		5,924.71		5,924.71
1914	C-12		2,468.96		2,468.96
1916	Est. 626		16,845.54		16,845.54
1917	C-51	$10,896.18			
	Various	155.54	11,051.72		11,051.72
1918	C-51		3,826.22		3,826.22
1919	C-51		3,209.44		3,209.44
1920	C-51		1,466.02		1,466.02
1921	C-51		168.45		168.45
	Totals		$77,724.56	$32,763.50	$ 44,961.06

Note: In the latter part of 1911 a complete system of flashboards was erected on the dam and tested. Minor improvements and additional tests were made in 1912 and the flashboards placed in operation. A large part of the expenditures in 1912 and all the expenditures in 1913 and 1914 were in connection with the renewal of flashboards and pins, and testing to improve operating conditions. The expenditures from 1916 through 1919 were largely in connection with experimental swing gates which were used to replace the conventional type flashboards at various times along a portion of the crest of the dam. These experimental gates proved a failure and were completely abandoned in 1919.

The flashboards were in operation from 1912 through 1914. They were not erected in 1915 because of a restraining injunction secured by a river property owner. This injunction was extinguished in March 1916 by the purchase of the property, but the flashboards were not replaced until July 1917. The flashboards have been in use each year since that date.

	Total Organization Expenses	$30,891.44	$20,213.58	$51,105.02	$22,891.68	$28,213.34

(a) Lancaster office expenses have been disallowed as properly chargeable to operations of Pennsylvania Water & Power Company.
(b) No explanation of these payments appeared on the vouchers, but we were informed by Mr. Wetzell, of the Company's budget department, that these lawyers were engaged during this period in negotiating the renewal of Pennsylvania Water & Power Company's power contract with Edison Electric Company of Lancaster, Pennsylvania.
(c) Half of Simpson, Thacher & Bartlett's bill has been disallowed as applicable to financing activities.

Notes:

(a) Work in Progress was not segregated on the books prior to 1921.

(b) The deferred debits for the years 1910 through 1931 represent discount, profit and loss, and expense on bond issues, which were carried in plant account on the books during that period. During 1931 and 1932 the entire amount was removed from plant account and charged to Unamortized Debt Discount and Expense Account and Miscellaneous Reserve Account.

(c) The consolidation includes merged subsidiaries and Susquehanna Transmission Company of Maryland.

Docket IT-5915

Notes: (a) Exclusive of transfers from Equalization Reserves.
(b) This represents additions to (or deductions from) operating revenues transferred from Equalization Reserves. Prior to 1931, the transfers were made to equalize the income in high and low water years. After 1931, the transfers were made to offset special allowances made in the power bill to Consolidated Gas, Electric Light and Power Company of Baltimore under Article 3g of the Supplemental Agreement of June 1, 1931.
(c) The consolidation includes merged subsidiaries and Susquehanna Transmission Company of Maryland.

( ) denote deduction.

FEDERAL POWER COMMISSION

Docket No. IT-5915

* * *

PENNSYLVANIA WATER & POWER COMPANY

CONSOLIDATED INCOME STATEMENT

Bureau of Accounts, Finance and Rates
Division of Accounts

* * *

[22729] (page 9)

* * *

The reserve for depreciation at December 31, 1939 was $6,086,538.02. The limitation provision in the power contract compelled the management of both companies to review the estimated service lives and to determine whether the annual expense of $355,000 and the accumulated depreciation reserve of $6,000,000 were excessive. Both parties agreed that the depreciation rates and depreciation reserve were not excessive and found it desirable to continue the depreciation charge based upon the same service life estimates and to remove the limitation upon the balance in the depreciation reserve. The 1931 power contract was revised accordingly, by the supplemental agreement dated September 29, 1939, effective December 1, 1939.

The depreciation rates reviewed in 1939 are shown in Schedule No. 9A. The composite depreciation rate is 1.89% and the composite service life 53 years for the plant installed prior to January 1, 1931 (Col. 4).

[22737] (page 17)

* * *

Depreciation Expense (Schedule No. 9, 9A):

The Company uses the straight line depreciation method and estimated service lives to determine depreciation rates. The depreciation rates are applied to the cost of depreciable plant to compute the annual depreciation expense. The depreciation expense so computed is recorded in the books and financial statements, included in the power bill to Baltimore Company and reported in the income tax returns to the Bureau of Internal Revenue.

Schedule No. 9A shows the details of the depreciation calculations for the year 1944. The composite service lives and depreciation rates are shown on Schedule No. 9. The composite service life for the depreciable plant is estimated by the Company to be 48 years. At December 31, 1944, the depreciable plant was $27,630,429 and the depreciation reserve balance was $8,463,859 which is 30.6% of the depreciable plant.

[22768]

Annual and Accrued Depreciation

Summary:

A comparison of annual and accrued depreciation, per books, as adjusted, and as computed by the Commission's staff, is presented on Schedule 1. A summary of these figures follows:

	Per Books As Adjusted	Depreciation Requirement	Difference
Annual Depr. Expense—1944	$ 572,365	$ 464,212	$108,153
Annual Depr. Expense—1945	574,245	465,277	108,968
Average Depr. Reserve—1944	7,978,118	7,783,095	195,023
Average Depr. Reserve—1945	8,506,513	8,204,770	301,743
Depreciation Reserve Balance 12/31/45	$8,763,118	$8,408,373	$354,745

The required annual depreciation expense is $108,968 less than the amount presently being charged. The reduction is primarily due to the longer service lives recommended by the Commission's staff, which result in lower annual depreciation rates. The reclassified depreciation base is somewhat less than the depreciation base used by the Company, due to a redistribution of overheads which assigned more overheads to non-depreciable plant, but this difference has much less effect on the amount of depreciation expense than the change in service lives.

The reserve requirement is $354,745 less than the depreciation reserve per books, as adjusted. This is an indication that the Company has included some provision for maintenance in its [22769] (page 2) depreciation reserve, as it has stated in its depreciation plan. One reason why the excess of the adjusted book reserve over the reserve

requirement should be retained is to provide for the repair of the surface of the dam, estimated to cost from $500,000 to $750,000. Since the deterioration of the surface of the dam has occurred in the past and the Company has provided for some of this cost in the past, through depreciation charged to and collected from its customers, the adjusted book reserve is deducted from the gross investment in plant.

The staff has not recomputed the depreciation expense for automobiles and trucks. The Company keeps a separate record for tax purposes showing the cost, depreciation and reserve for each auto, so that adjustments for over or under depreciation are made currently. Since no provisions for auto retirements have been made in the required annual expense, such retirements, in the amount of $46,774.77, have been excluded from the charges to the reserve requirement and only the balance of the auto depreciation reserve, amounting to $39,825.74, has been included. The annual depreciation expense for autos is the same as the amount provided by the Company and does not appear in depreciation expense because it is distributed to other accounts through a clearing account.

Required Annual Depreciation Expense and Depreciation Reserve:

The purpose of this study is to show the required annual allowance for depreciation expense and the amount of depreciation which has accrued in the depreciable electric plant.

[22770] (page 3)

It is necessary, in order to determine the required annual depreciation cost, to ascertain the service capacity or service life of the depreciable plant. The service capacity which is used or expires in one year is the most accurate measure of the annual depreciation cost. The ratio of the expired service capacity to total service capacity is the most accurate measure of the accrued depreciation.

Service Lives and Depreciation Rates:

The plant service capacity has been determined by means of service life estimates of the various classes of depreciable electric plant. Service lives determined by the Federal Power Commission staff engineers, which are set forth in another exhibit, have been applied in this study. These service lives and the equivalent depreciation rates are summarized below:

	Estimated Life Years	Depr. Rate
Intangible Plant	Non-Depr.	—
Land and Land Rights	Non-Depr.	—
Steam Plant	42	2.38%
Hydro Plant	69	1.45%
Transmission Plant	57	1.75%
General Plant	35	2.86%

Depreciation Method:

In order to give equitable treatment to the Company's customers and investors, depreciation cost must be accounted for. The depreciation accounting must necessarily be stated to conform with an orderly and consistent plan of depreciation.

[22771] (page 4)

The depreciation plan used in this study is the straight line depreciation method. Each annual accounting period is charged with its pro-rata part of the investment in service capacity. The annual depreciation cost is computed by applying the anual depreciation rate to the average investment for the year.

The amount of accrued depreciation is measured by the cumulative depreciation cost less items retired. Obviously, when the total service life has been reached the depreciation cost is the original investment in the plant, less any salvage value. Prior to the retirement of the plant, the accrued de-

preciation sustained is the cost which has accrued to date, less the net loss on items which have been retired in the past. This balance of accrued depreciation is referred to as the depreciation reserve requirement, because it measures the amount which is required to date in order to provide for the ultimate retirement of the investment in plant.

The following table shows that the required depreciation expense for 1944 and 1945 was $464,212 and $465,277, respectively, and that the depreciation reserve requirement is $8,408,373 as of December 31, 1945.

[22772] (page 5)

	Average Investment	Depreciation Rate	Depreciation Provision
Depreciable Plant—1944			
Steam	$ 4,527,532	2.38%	$ 107,755
Hydro	12,815,941	1.45	185,831
Transmission	8,561,435	1.75	149,825
General	727,325	2.86	20,801
Total	$ 26,632,233	1.74%	$ 464,212
Depreciable Plant—1945			
Steam	$ 4,551,943	2.38%	$ 108,336
Hydro	12,825,433	1.45	185,969
Transmission	8,579,897	1.75	150,148
General	728,127	2.86	20,824
Total	$ 26,685,400	1.74%	$ 465,277
Depreciable Plant Cumulative 1911-1945, incl.			
Steam	$ 75,239,524	2.38%	$ 1,790,701
Hydro	362,791,312	1.45	5,260,474
Transmission	149,971,064	1.75	2,624,493
General (except auto)	12,908,093	2.86	369,171
Total Cumulative Provisions			$10,044,839

Less Retirements and Adjustments:		
Retirements—per books (1930-1945)	$1,193,416	
Unrecorded retirements (1911-1936)	343,928	
Adjustment for duplicate retirements (1937-45)	(8,200)	
Adjustment for automobile retirements	(46,775)	1,482,369
Replacements charged to reserve in lieu of retirements		193,923
Total Charges		1,676,292
Add Reserve for Automoblie Depreciation		39,826
Depreciation Reserve Requirement, December 31, 1945		$8,406,373

Depreciation Base:

The details of the depreciable plant cost, by years, are shown on Schedule 2.

[22773] (page 6)

Schedule 2 is a summary taken from a statement of the Company's claimed original cost. The statement shows the additions and retirements, by years, and by Federal Power Commission plant account classification, as classified by the Company.

For purposes of this study, the plant has been summarized by the functional groups of steam, hydro, transmis-

sion and general plant. This classification is necessary because the steam plant, with a shorter service life than hydro and transmission plant, was placed in service in 1925; therefore an over-all composite rate would not apply prior to 1925.

Eliminations from Company's Claimed Cost Statement by F. P. C. Examiners:

Schedule 3 shows a reconciliation of the Company's claimed cost with the original cost as of December 31, 1945. The total eliminations from the Company's claimed cost amount to $3,493,494 of which $1,622,797 applies to depreciable property. As shown on Schedule 2, the eliminations were applied to the year in which such items were initially claimed in depreciable plant. The eliminations, as well as the initial claims are, in certain instances, applied to an approximate year rather than attempt an exact determination of every item by years. An exact determination by years and accounts would be virtually impossible because practically all of the claims eliminated relate to computed overheads rather than specific plant items.

[22774] (page 7)

The eliminations from the claimed cost have been distributed as follows:

Organization and Franchises	$ 545,357
Land	800,757
Depreciable Plant	217,766
General Overheads	1,929,614
Total	$3,493,494

The eliminations from the claimed general overheads for the period 1905-1915, inclusive, have been distributed on

the basis of the Company's initial overhead distribution. In its claimed cost study the Company accumulated overheads for the period 1905-1915, inclusive, and made the initial distribution to the direct costs as of December 31, 1915, thus distributing the construction overheads on a broader base than at the date of initial operation in 1911.

A summary of the claimed direct construction cost and initial overhead distribution is presented on Schedule 4. The ratio of overheads to direct cost of depreciable plant is 70.8% in the Company's claimed cost study. This ratio is reduced to 47.6%, by reason of the FPC Examiners' eliminations.

An amount of $917,735 has been eliminated from the 1905-1915 claimed direct cost of intangible plant and land. The following tabulation shows the application to non-depreciable accounts.

[22775] (page 8)

Non-Depr. Accounts	Claimed Direct Cost	Eliminations	Per Cent
301.2	$ 366,972	$335,056	91.3
301.3	94,919	250	—
302	34,542	34,542	100.0
303	8,873	8,873	100.0
320	3,082,555	539,014	17.5
340	1,224	—	—
341	1,135	—	—
	$3,590,220	$917,735	25.3

The elimination of $917,735 is largely the claimed value for McCall Ferry Power Company stock, except the item of $34,542, which is the direct cost of fishways transferred from intangible to depreciable plant.

The staff eliminations of $917,735 of claimed direct costs of intangible plant and land affects the Company's distribution of overheads as between depreciable and non-depreciable plant. The following computation shows the

calculation of overheads which have been eliminated from non-depreciable plant and redistributed:

Non-Depr. Accounts	Ratio of Direct Cost Eliminated	Total Overheads 1905-15	Amount Eliminated	Transferred from Intangible to Tangible	Adjusted Overheads
301.1		$ 7	$	$	$ 7
301.2	91.3	71,219	65,023		6,196
301.3		17,822			17,822
302	100	26,358		26,358	
303	100	8,861	8,861		
320	17.5	881,040	154,182		726,858
340.2		2,238			2,238
341		1,036			1,036
Total	25.3	$1,008,581	$228,066	$26,358	$754,157

[22776] (page 9)

The staff elimination of claimed overheads is prorated on the basis of the original overhead allocation as follows:

	Overheads 1905-1915 Amount	Ratio	FPC Staff Adjustments	Adjusted Overheads
Intangible	$ 24,025	.5%	$ 7,493	$ 16,532
Hydro Land	726,858	16.0	239,765	487,093
Trans. Land	3,274			3,274
Non-Depr.	754,157	16.5	247,258	506,899
Steam	5,984			5,984
Hydro	3,624,829	79.5	1,191,152	2,433,677
Trans.	179,388	4.0	59,941	119,447
General	11,124			11,124
Depr.	3,821,325	83.5	1,251,093	2,570,232
Total	4,575,482	100.0%	1,498,351	3,077,131
Retirements	234,455			234,455
Amt. Eliminated from N. D.	228,066		228,066	
Total per claim	$5,038,003		$1,726,417	$3,311,586

The adjustment to be made to the Company's claimed cost as of December 31, 1915, is the difference between the claimed overheads and the adjusted overheads as follows:

	Overheads 1905-1915		
	Claimed	As Adjusted	Elimination
Intangible	$ 97,908	$ 16,532	$ 81,376
Hydro Land	881,040	487,093	393,947
Trans. Land	3,274	3,274	
Non-Depr.	982,222	506,899	475,323
Steam	5,984	5,984	
Hydro	3,624,829	2,433,677	1,191,152
Trans.	179,389	119,447	59,942
General	11,124	11,124	
Depr.	3,821,326	2,570,232	1,251,094
Retirements	234,455	234,455	
Total	$5,038,003	$3,311,586	$1,726,417

An amount of $55,771.65 has been eliminated from claimed interest during construction on the transmission lines. This elimination is allocated on this basis of total transmission at December 31, 1915, as follows:

[22777] (page 10)

Transmission (Pa. & Md.):	Amount	Ratio	Elimination
Depreciable	$1,463,527	75%	$41,829
Non-Depr.	485,871	25%	13,943
Total	$1,949,398	100%	$55,772

An amount of $111,210.30 has been eliminated from the flowage basin account. Since items were charged to this

account during the period 1911-1935, inclusive, an average date of 1920 was determined for purpose of prorating the amount eliminated. Another item of $1,340.98 erroneously charged to Property and Riparian Rights account is also eliminated in 1920, both amounts being prorated to total dollars claimed:

Total Claim as of Dec. 31, 1920:	Amount	Ratio	Elimination
Hydro-Depr.	$9,004,702	56.7	$63,816
Trans.-Depr.	1,752,707	11.0	12,381
Gen.-Depr.	110,560	.8	900
Non.-Depr.	5,005,677	31.5	35,454
	$15,882,646	100.0%	$112,551

Overhead eliminations are summarized as follows, by years:

Plant	1905-1915	1920	1925	1932	1936	Total
Hydro	$1,191,152	$ 63,816	$ 5,508	$	$(28,524)	$1,231,952
Trans.	101,779	12,381	32,941	13,714	(21,104)	139,702
Steam			27,569			27,569
General		900	5,279		(372)	5,807
Non-Depr.	489,266	35,454	(136)			524,584
Total	$1,782,188	$112,551	$71,161	$13,714	$(50,000)	$1,929,614

The total eliminations from the Company's claimed cost as of December 31, 1945, are summarized below:

Plant	Overheads	Direct Cost	Intangibles	Land	Total
Hydro-Depr.	$1,231,952	$175,161	$	$	$1,407,113
Trans.-Depr.	139,702	34,714			174,416
Steam-Depr.	27,569	898			28,467
General-Depr.	5,807	6,993			12,800
Intangible	81,376		545,357		626,733
Hydro Land	429,265			785,600	1,214,865
Trans. Land	13,943			15,157	29,100
Total	$1,929,614	$217,766	$545,357	$800,757	$3,493,494

[22778] (page 11)

Based upon the data described above, the original cost of depreciable plant has been classified by functional groups and by yearly plant balances as set forth in Schedule 2.

The Company's Depreciation Plan:

As shown in Column 2 of Schedule 5, prior to 1920 the Company had set up a reserve for depreciation in the amount of $400,000 by a credit of $250,000 in the year 1913 and a credit of $150,000 in 1916. Then, in 1920, the Company instituted its present depreciation plan by transferring the entire balance of $400,000 from the depreciation reserve to earned surplus and setting up a new reserve covering the years 1917, 1918, and 1919. Thus, no depreciation was recorded for the period 1911-1916, inclusive, in lieu of the $400,000 transferred to earned surplus although $813,258.71 was applicable to this period. The various amounts referred to are summarized as follow:

	Straight Line Depreciation Expense		Recorded and Transferred to
Year	Recorded	Not Recorded	Surplus
1911		$ 99,945.01	
1912		115,271.87	
1913		131,409.01	$250,000.00
1914		148,721.40	
1915		158,485.95	150,000.00
1916		159,425.47	
1917	$162,647.42		
1918	166,390.35		
1919	168,377.64		
Total	$497,415.41	$813,258.71	$400,000.00

The depreciation plan adopted in 1920 has been followed for the entire period 1917 to 1945, inclusive. The

plan has also been used for tax purposes and is described as follows by the Company in its tax returns to the Bureau of Internal Revenue:

[22779] (page 12)

"The Company acquired at organization the dam power house and incidental properties then in course of construction, of McCall Ferry Power Company and proceeded to complete the plant and put it into operation.

"A schedule showing the proper depreciation deductions for the years 1910 to 1918, inclusive, is attached hereto and marked Exhibit "A." The value of depreciable property was obtained by taking from a statement of McCall Ferry Power Company as of January 31, 1909, the actual cost figures shown in various accounts, eliminating non-depreciable property and apportioning certain general accounts to the proper classes of depreciable property.

"To these figures have been added the figures of actual expenditures for the year 1910 and for each succeeding year. There were expenditures made between January 31, 1909 and the end of that year by McCall Ferry Power Company and by receivers of McCall Ferry Power Company, but the amounts and apportionment thereof are indefinite and have been neglected.

"The rates of depreciation have been worked out by Mr. Walls, Vice President of the Company, who is a practical engineer, thoroughly familiar with water power developments, and they are based on his own knowledge of the conditions existing at this particular development.

"In its return the Company took the position that there was no depreciation in the early years of its operations. This was wrong and the Bureau of In-

ternal Revenue made a rough adjustment of invested capital to allow for such depreciation. The Bureau, however, permitted no deduction for depreciation for 1917 and 1918.

"The failure to allow for current depreciation is inconsistent and unjust and is so contrary to the usual practice of the Bureau that it is assumed the depreciation deductions for 1917 and 1918 will be allowed without question, and the only question to be settled is the exact amount which should be deducted."

Two additional depreciation studies have been prepared by Sharp, Milne & Co., accountants and auditors employed by the Company. The first report covers the period 1917-1930, inclusive, and the second report covers the period 1931-1937, inclusive. The depreciation base and depreciation charge shown in the Sharp, Milne & Co. [22780] (page 13) reports have been summarized on Schedule 6. The composite lives and rates shown on Schedule 6 have been computed from the annual charge and depreciation base figures. The depreciation base figures are as of the end of each year instead of the average for the year which causes a fluctuation in the computed composite rates when large additions occur.

The Company's registration statement, filed with the Securities and Exchange Commission in connection with the present 3¼% bonds, contains the following statement of the Company's depreciation policy and service lives:

"The Company and its wholly-owned subsidiary transmission companies have provided depreciation reserves applicable to their properties to cover losses suffered by structures and equipment from wear and tear and obsolescence, including deferred maintenance but excluding current maintenance or repairs. A depreciation reserve account was opened as of 1917 and from the year until January 1, 1931, the annual de-

preciation charges as well as the corresponding credits to the reserve account were computed upon an age-life basis. Beginning January 1, 1931 the depreciation policy has been as follows:

"With respect to plant, property and equipment installed prior to January 1, 1931, the Company and its wholly-owned subsidiary transmission companies have set aside annually from earnings, for depreciation the same amount ($355,146.73) which had been included in operating expenses during the year 1930, plus an amount computed at the rate of 2½% per annum on the cost of net additions to properties by months subsequent to January 1, 1931.

"Deductions for depreciation claimed for income tax purposes have also been computed on the basis outlined above.

"The estimated lives of various classes of depreciable property, upon which the annual depreciation charges for 1930 and prior years were calculated, are the equivalent of the following annual rates:

[22781] (page 14)

Service Life-Yrs.	Annual Rate	Classification
200	.5%	Dam and Hydraulic Structures (Including Massive Concrete or Equally Permanent Foundation Structures)
50	2.0%	Turbines (Older Types)
100	1.0%	Turbines (Moody Draft Type)
40	2.5%	Generators (Older Types)
66	1.5%	Generators (Class "B" Insulation)
40	2.5%	Auxiliary Machinery (Iron and Steel)
66	1.5%	Auxiliary Machinery (Brass, Galvanized Steel, etc.)
40	2.5%	Switchboard

Service Life-Yrs.	Annual Rate	Classification
66	1.5%	Bulk Power Switch Equipment
100	1.0%	Concrete Building (or Mainly Concrete)
50	2.0%	Brick Building (or Mainly Brick)
25	4.0%	Frame Buildings
25	4.0%	Transmission Line Towers
100	1.0%	Transmission Line Cables—Aluminum
200	.5%	Transmission Line Cables—Copper
33	3.0%	Underground Cables (Street Service)
50	2.0%	Racks, Headgates, Booms, etc. (Immersed Equipment, etc.)
20	5.0%	Transmission Lines, etc. (Local Lines)
40	2.5%	Transformers (Older Types)
66	1.5%	Transformers (Outdoor Conservatore Type)
25	4.0%	Buildings (Special Steel Buildings, etc.)
20	5.0%	Transformers (High Current Type)
33	3.0%	Steam Generating System Properties

The effective service lives at the present time are shorter than indicated by the above statement because plant additions since 1930 have an estimated life of 40 years as compared with the composite life of 53 years for plant installed prior to 1931. In effect, the Company shortened the service lives for hydro plant and transmission plant, and lengthened the service life for the steam plant, when it adjusted the depreciation rates in 1931.

Retirements Charged to the Depreciation Reserve:

When the Company began its plan of depreciation accounting in 1920 it did not record the retirements from plant accounts and [22782] (page 15) consequently there were no retirements charged to the reserve. In the case of certain items which were renewed or replaced, the cost of the re-

placement was charged to the depreciation reserve and no retirement was recorded. This method is, in effect, the capitalization of the renewals and replacements by an indirect method of accounting and no adjustment to plant or depreciation reserve is necessary.

Since 1930 the net loss on property retired has been charged to the depreciation reserve. Schedule 5 shows the recorded gross retirements from plant in Column 3 in the amount of $1,306,537.63 and the net loss in Column 6, in the amount of $1,193,415.66. Unrecorded retirements for the period 1911-1936 were determined in connection with the original cost study. The amount of $343,928.42 covers the unrecorded retirements and an adjustment of the recorded retirements, to reflect the new classification and overhead distribution made in the original cost study. Overheads applicable to retirements since 1937 have been computed by the standard 25% overhead rate used prior to January 1, 1937.

Deferred Maintenance Charged to the Depreciation Reserve:

Column 7 of Schedule 5 shows that a total of $680,180.03 has been charged to the depreciation reserve as replacements and "deferred maintenance." The items included in such charges have been classified as follows by the staff:

Plant Additions	$122,488.49
Plant Replacements	193,922.49
Plant Maintenance	363,769.05
Total	$680,180.03

[22783] (page 16)

The following plant additions have been transferred from the depreciation reserve to plant account:

Year	Job Order No.	Description	Amount
1927-8-9	K-531	Extension of Toe of Dam	$114,596.61
1928-9	K-753	Exciter Board Ventilation	1,212.66
1929	K-837	New Oil Filter	3,387.73
1929	M-843	Lathe for Hydro Plant	2,653.92
1929	K-824	New Fence at Highlandtown	637.57
		Total	$122,488.49

The details of plant replacements as shown on Schedule 7 and the details of plant maintenance are shown on Schedule 8.

The Company claims that its depreciation rates include provisions for "deferred maintenance" but exclude current maintenance or repairs. Its definition of "deferred maintenance" is that it covers, in general, repair and resurfacing of concrete structures, including dam, welding turbines, resurfacing turbine distributors, rewinding generators and rewinding transformers.

The Company has not determined how much it is providing for the so called "deferred maintenance" in its depreciation charge to expense, or how much of the depreciation reserve balance is available for "deferred maintenance."

The service lives estimated by the Commission's staff do not include provisions for maintenance and it follows that if the recommended service lives are used by the Company in the future no maintenance expense is properly chargeable to the depreciation reserve.

[22784] (page 17)

The balance of the adjusted book reserve for depreciation is $354,745 in excess of the reserve requirement as of December 31, 1945. In view of the Company's practice of

providing for and charging certain maintenance to the reserve in the past, it is reasonable to conclude that this excess is available for a large item of maintenance on the dam which the Company expects to incur.

In a letter to the Commission's staff, dated November 28, 1945, the Company's chief engineer estimated that the approximate cost of resurfacing the spillway of the Holtwood dam would be from $500,000 to $750,000, depending upon whether the work was done with concrete or with granite blocks. A reasonable method of handling this expense, when it is incurred, would be to charge it to the excess of the adjusted book reserve over the reserve requirement, to the extent of such excess, and charge the balance to current maintenance expense.

RECONCILIATION OF OPERATING EXPENSE ALLOCATED IN TABLE III WITH EXPENSE REPORTED BY HOLTWOOD IN F.P.C. FORM 1

Operating Expense, 1944, as reported		$2,579,099
Revenue from Interchange Sales in Pennsylvania 1/		628,867
		3,207,966
Susquehanna Capital Stock and Property Taxes	$128,776 2/	
Susquehanna Depreciation	65,060	
		193,836
		3,014,130
Less Safe Harbor Bill as rendered		1,214,553
		1,799,577
Less Adjustment Credit to Admin. and Gen. Exp.		9,703
Balance of Operating Expense as allocated in Table III		$1,789,874

1/ Revenue from interchange sales to customers in Pennsylvania is shown in the company's report as a credit to Operating Expenses. In this study the amount of these sales has been transferred to Revenue.

2/ Operating Expenses as reported contain the total costs of Susquehanna Transmission Company of Maryland, which include Taxes and Depreciation. These are taken out for separate handling and are combined with Taxes and Depreciation of Holtwood.

EXHIBIT NO. 72.

[22851]

CONTRACT

Agreement made as of this fifteenth day of November, 1945, by and between Metropolitan Edison Company (hereinafter called "Metropolitan") party of the first part, and Pennsylvania Water & Power Company (hereinafter called "Holtwood") party of the second part, both of the said companies being corporations organized and existing under the laws of the Commonwealth of Pennsylvania.

WHEREAS, each of the parties hereto owns and operates electric generating plants and a transmission system, which transmission systems are presently interconnected at Violet Hill in Spring Garden Township, York County, Pennsylvania by means of two 66,000 volt transmission lines; and

WHEREAS, Holtwood and its affiliated company, Safe Harbor Water Power Corporation (hereinafter called "Safe Harbor") with which it is interconnected, are primarily engaged in generating electrical energy by means of hydro-electric plants on the Susquehanna River and, because of the varying flow of the river, will have a variable amount of energy available from time to time and it is the intent that the parties hereto utilize the energy which may be made available by Holtwood to Metropolitan to the fullest extent consistent with good operating practice; and

WHEREAS, Metropolitan and Holtwood and Safe Harbor are now supplying electric power and energy to Edison Light and Power Company (which latter is affiliated with Metropolitan) under an agreement dated January 1, 1935, as supplemented in March of 1945, which expires at midnight March 31, 1946; and

WHEREAS, the parties hereto now interchange economy energy and capacity and supply emergency service to each other at various times under an agreement between them dated March 11, 1931 which expires at midnight March 31, 1946; and

WHEREAS, the continued effective use by the parties hereto of the existing interconnection of their facilities is advantageous to them and will likewise be of benefit to the public served by them; and

WHEREAS, Metropolitan desires to purchase and Holtwood [22852] (page 2) is willing to sell to Metropolitan certain capacity and energy:

NOW, THEREFORE, THIS AGREEMENT WITNESSETH that, in consideration of the premises and of the mutual covenants, promises and agreements hereinafter set forth, the parties hereto do hereby covenant and agree with each other as follows:

ARTICLE I

TERMINATION OF EXISTING AGREEMENTS

SECTION 1. The agreement dated March 11, 1931 between the parties hereto providing for the interconnection of their facilities, the furnishing of emergency service and the interchange of economy energy is hereby terminated as of midnight, December 31, 1945.

SECTION 2. The agreement dated January 1, 1935, as supplemented in March of 1945, between Metropolitan, Holtwood, Safe Harbor and Edison Light and Power Company is hereby terminated as of midnight, December 31, 1945. Holtwood shall secure written consent to such cancellation by Safe Harbor and Metropolitan shall secure written consent to such cancellation by Edison Light and Power Company.

ARTICLE II

Effective Date and Duration of Agreement

This agreement shall become effective at midnight of December 31, 1945, and shall continue to midnight of December 31, 1950, and thereafter for successive periods of three (3) years each, unless and until one of the parties hereto shall have given to the other, at least eighteen (18) months prior to the expiration of the original term of this contract or of any three (3) years' renewal period thereof, written notice of a desire to terminate this agreement at the end of such period.

ARTICLE III

Definition of "Metropolitan's Total Requirements" and "Metropolitan's Steam Line"

Section 1. The phrase "Metropolitan's total requirements", when used in this agreement, shall include all the firm power [22853] (page 3) and energy requirements of Metropolitan and its affiliated companies, Edison Light and Power Company, Glen Rock Electric Light and Power Company and New Jersey Power & Light Company.

Section 2. The phrase "Metropolitan's steam line", when used in this agreement, shall mean a value in kilowatts determined by deducting from the maximum clock one-hour integration of Metropolitan's total requirements during the current month or any of the prior eleven (11) months the amount of firm power in kilowatts provided for in Article IV, Section 1.

ARTICLE IV

Amount of Firm Power and Energy to Be Supplied to Metropolitan by Holtwood

Section 1. (a) Subject to future decreases or increases in the amount thereof as provided in Subsection (b) of this

Section, Holtwood shall supply and Metropolitan shall receive 20,000 kilowatts of firm power.

(b) The amount of firm power to be supplied by Holtwood and received by Metropolitan may be decreased below or increased above 20,000 kw. under the following conditions:

1. At the election of Metropolitan, the amount of firm power may be decreased 1,000 kw. for each 10,000 kw. that the maximum clock one-hour integration of Metropolitan's total requirements during the current month or any of the prior eleven (11) months, is less than 275,000 kw. and any such decrease shall be effective with the current month upon notice to Holtwood of Metropolitan's election prior to rendition of the bill for such month, and shall continue only so long as such decreased maximum load condition continues.

2. At the election of Holtwood, the amount of firm power may be increased 1,000 kw. for each 10,000 kw. that the maximum clock one-hour integration of Metropolitan's total requirements during the current month or any of the prior eleven (11) months, is greater than 275,000 kw. and any such increase shall be effective with the current month upon notice to Metropolitan of Holtwood's election prior to rendition of the bill for such month, and shall continue only so long as such increased maximum load condition continues.

[22854] (page 4)

The adjustments in the amount of firm power resulting from the operation of this Subsection shall be limited to a maximum of 10,000 kw. below or above the 20,000 kw. of firm power provided for in Subsection (a) above.

(c) The firm power to be provided by Holtwood under Subsections (a) and (b), above, shall be measured on a clock one-hour integrated basis, and the swings that Holtwood shall be obligated to provide above this firm power supply to Metropolitan during such clock hour shall be limited to five (5) per cent of Holtwood's firm power obligation.

SECTION 2. Holtwood shall, upon request of Metropolitan, provide spinning reserve capacity (without firm energy commitment) for Metropolitan to the extent that the firm power provided for in Section 1 above, exceeds the hourly amounts of firm energy supply as provided for in Section 3 hereof.

SECTION 3. Holtwood shall supply to Metropolitan, and Metropolitan shall receive, hourly amounts of firm energy equal to the hourly integrated generation of Holtwood and Safe Harbor in excess of 50,000 kwh. per hour multiplied by the ratio of Holtwood's firm power obligation to Metropolitan as specified in Section 1, hereof, to the rated effective generating capacity of Holtwood and Safe Harbor minus 50,000 kw., but never less than Metropolitan's total energy requirements above Metropolitan's steam line; except that Metropolitan shall not be obligated to receive firm energy under the provisions of this Section in excess of that which it is able to absorb during its minimum load hours as Metropolitan may determine on the basis of desirable minimum steam requirements.

ARTICLE V

CHARGES FOR FIRM POWER AND ENERGY

SECTION 1. Subject to adjustments provided for hereinafter in Sections 4, 5 and 6 of this Article and in Article X hereof, Metropolitan shall pay Holtwood for the firm power and energy supplied, as provided for in Article IV

hereof, a Demand Charge and an Energy Charge as specified in Sections 2 and 3 hereof.

SECTION 2. *Demand Charges*

(a) $25,000.00 per month for the 20,000 kw. of firm power specified in Section 1 (a) of Article IV, plus or minus $1,250.00 per month per 1,000 kw. of firm power increase or decrease as provided for under Section 1 (b) of Article IV.

[22855] (page 5)

(b) $0.50 per 1,000 kw. of spinning reserve capacity as provided for in Section 2 of Article IV, for each clock hour in which such reserve capacity is provided.

SECTION 3. *Energy Charges*

(a) 4.0 mills per kilowatthour for firm energy supplied in any month in the portion of Metropolitan's total requirements above Metropolitan's steam line.

(b) 3.5 mills per kilowatthour for firm energy supplied in any month between the hours of 7 A. M. and 9 P. M. on all days except Sundays and major holidays in Metropolitan's territory in excess of that billed under Subsection 3 (a) hereof.

(c) 2.5 mills per kilowatthour for all additional firm energy supplied in any month in excess of that billed under Subsections 3 (a) and (b).

SECTION 4. The monthly energy charges specified in Section 3 hereof shall be subject to adjustment for variations in the power factor of the energy supplied by Holtwood to Metropolitan, except that no adjustment shall be made if and to the extent that the lowering of the power factor below the percentages hereinafter prescribed is caused by changes by Holtwood in the operation of its own

system. If in any month the average lagging power factor of such supply to Metropolitan at the points of delivery specified in Article VII during the hours from 7 A. M. to 9 P. M. on all days except Sundays and major holidays in Metropolitan's territory is less than 90%, the energy charges for the month under Subsections 3 (a) and (b) hereof shall be increased 1% for each whole per cent that the average power factor is below 90%. When the average power factor is less than 85% during the remaining hours of the month the energy charges for the month under Subsection 3 (c) hereof shall be increased by 1% for each whole per cent that the power factor is below 85%. In computing the average lagging power factor no account shall be taken of periods during which Metropolitan is prevented by accident or other abnormal conditions from utilizing its power factor corrective apparatus. Since firm energy as provided for in Article IV and interchange energy as provided for in Article IX are both measured at the same delivery points, it is mutually [22856] (page 6) agreed that no correction will be made for excessive lagging power factor caused by interchanging blocks of energy in excess of 5,000 kw. during emergencies or other abnormal periods or when transmitting blocks of energy in excess of 5,000 kw. through Metropolitan to third parties. The average lagging power factor shall be computed from the readings of the integrating reactive kilovolt-ampere-hour meters and of kilowatthour meters, both at the delivery points specified in Article VII. The kilovolt-ampere-hour meters shall be equipped with ratchets to prevent them from running backward on leading power factor.

SECTION 5. The monthly energy charges specified in Sections 3 and 4 hereof shall be subject to monthly adjustment based upon changes in cost of fuel to Metropolitan. The charges per kilowatthour in any month shall be increased or decreased one (1) per cent for each ten (10) cent increase above or decrease below $5.00 per net or short ton

in the average cost of bituminous coal and freight only, on hand and delivered at Metropolitan's steam generating stations during the second preceding calendar month.

SECTION 6. So long as the monthly demand and energy charges specified in Sections 2, 3, 4 and 5 hereof remain in effect, they, together with the special facilities charge specified in Article VI, shall be subject to adjustment for variations in the taxes accrued by Holtwood and Safe Harbor. For the purpose of such adjustment 20% of these monthly charges shall be considered as payment for all taxes other than: (1) such portion of income or other taxes applicable to non-operating incomes or assets, (2) taxes specifically assignable to individual customers of Holtwood and Safe Harbor and (3) all local taxes assessed on real or personal property that are now levied by counties, cities, townships or other political subdivisions of the States. This adjustment for variations in the amount of taxes accrued by Holtwood and Safe Harbor and not excluded by the exceptions above, shall be made in accordance with the following formula:

$$Ma = M \times 0.8 \times \frac{Ha}{Ha\text{-}Ta}$$

in which

Ma = the amount payable by Metropolitan after adjustment for taxes has been made to M.

M = the charges provided for under Sections 2, 3, 4 and 5 [22857] (page 7) hereof and under Article VI.

Ha = the consolidated operating revenues of Holtwood and Safe Harbor adjusted (1) by subtracting (a) the actual income taxes or other taxes of a similar nature accrued on operating incomes, and (b) the taxes specifically assignable to individual customers of Holtwood and Safe Harbor, excluding, however, such taxes which result from intercompany transactions

between Holtwood and Safe Harbor, and (2) by adding the amounts of income taxes or taxes of a similar nature which would accrue if such taxes were computed on operating incomes, after excluding therefrom all non-operating incomes and all non-operating deductions. For example, and without limiting the generality of the foregoing, any deduction allowable for income tax purposes resulting from the retirement of an entire issue of bonds shall be treated as non-operating deductions.

Ta = the total taxes accrued by Holtwood and Safe Harbor adjusted (1) by subtracting (a) the actual income taxes or other taxes of a similar nature accrued on operating incomes and (b) the taxes excepted in the first paragraph of this Section 6, and (2) by adding the amounts of income taxes or taxes of a similar nature which would accrue if such taxes were computed on operating incomes, after excluding therefrom all non-operating incomes and all non-operating deductions. For example, and without limiting the generality of the foregoing, any deduction allowable for income tax purposes resulting from the retirement of an entire issue of bonds shall be treated as non-operating deductions.
